

HEDIS 2012 Procedure and Diagnosis Code Reference Guide

PROCEDURE AND DIAGNOSIS HELPFUL HINTS:

- Use the series of “preventive medicine” codes to designate **well care visits** for children. A well care visit includes a developmental history of mental and physical development, a physical examination, and anticipatory guidance and/or health education.
- Document vaccinations, laboratory and radiology tests done for preventive care screening and follow up.
- SFHP will provide updated HEDIS codes so that you may update your coding manuals annually.
