San Francisco Health Plan

HIPAA Transaction Standard Companion Guide

Refers to the Implementation Guides Based on ASC X12 version 005010

CORE v5010 Companion Guide

January 2016
Disclosure Statement

San Francisco Health Plan is a Phase III CORE Certified Health Plan and is accepting X12N 276/277 Health Care Claims Status Request and Response, as mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Type 3 and Errata (also The X12N 276/277 version of the 5010 Standards for Electronic Data Interchange Technical Report referred to as Implementation Guides) for the Health Care Claims Status Request and Response Transaction has been established for claim status inquiry and response compliance. This document has been prepared to serve as a San Francisco Health Plan’s specific companion guide to the 276/277 Transaction Sets. This document supplements but does not contradict any requirements in the 276/277 Technical Report, Type 3. The primary focus of the document is to clarify specific segments and data elements that should be submitted to San Francisco Health Plan on the 276/277 Health Care Claim Status Request and Response Transaction. This document will be subject to revisions as new versions of the 276/277 Institutional & Professional Health Care Claim Transaction Set Technical Reports are released. This document has been designed to aid both the technical and business areas. It contains San Francisco Health Plan’s specifications for the transactions as well as contact information and key points.
Preface

This Companion Guide to the v5010 ASC X12N Implementation Guides and associated errata adopted under HIPAA clarifies and specifies the data content when exchanging electronically with San Francisco Health Plan. Transmissions based on this companion guide, used in tandem with the v5010 ASC X12N Implementation Guides, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

1 INTRODUCTION

Under the Administrative Simplification provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, the Secretary of the Department of Health and Human Services (HHS) is directed to adopt standards to support the electronic exchange of administrative and financial health care transactions. The purpose of the Administrative Simplification portion of HIPAA is to enable health information to be exchanged electronically and to adopt standards for those transactions.

San Francisco Health Plan is a Phase III CORE Certified Health Plan. For questions relating to the San Francisco Health Plan’s 276/277 Health Care Claim Status Request and Response Transaction, please email your questions to edi@sfhp.org.

San Francisco Health Plan’s billing guidelines are not included in this document. Please refer to our website at http://www.sfhp.org/providers/network/claims-submission/ for these guidelines, or contact Provider Relations at (415) 547-7818 ext. 7084.

1.1 SCOPE

This section specifies the appropriate and recommended use of the Companion Guide. This companion guide is intended for San Francisco Health Plan’s Trading Partners interested in exchanging HIPAA compliant X12 transactions with San Francisco Health Plan. It is intended to be used in conjunction with X12N Implementation Guides and is not intended to contradict or exceed X12 standards. It is intended to be used to clarify the CORE rules. It contains information about specific San Francisco Health Plan requirements for processing following X12N Implementation Guides:

- 005010X212, Health Care Claim Status Request and Response (276/277)

All instructions in this document are written using information known at the time of publication and are subject to change.

1.2 OVERVIEW

The Health Insurance Portability and Accountability Act–Administration Simplification (HIPAAAS) requires San Francisco Health Plan and all other covered entities to comply with the electronic data interchange standards for health care as established by the Secretary of Health and Human Services.

This guide is designed to help those responsible for testing and setting up electronic claim status transactions. Specifically, it documents and clarifies when situational data elements and segments must be used for reporting and identifies codes and data elements that do not apply to San Francisco Health Plan. This guide supplements (but does not contradict) requirements in the ASC X12N 276/277 (version 005010X212) implementation. This information should be given to the provider’s business area to ensure that claims status responses are interpreted correctly.

1.3 REFERENCES

This section specifies additional documents useful for the read. For example, the X12N Implementation Guides adopted under HIPAA that this document is a companion to.

2 GETTING STARTED

2.1 WORKING WITH SAN FRANCISCO HEALTH PLAN

For questions relating to the San Francisco Health Plan’s 276/Health Care Claim Status Request and Response Transaction, please contact the EDI Department at edi@sfhp.org.

2.2 TRADING PARTNER REGISTRATION

There is no current process or form for 270/271 or 276/277 enrollment.

3 TESTING WITH THE PAYER

After the submitter setup is complete, the submitter can send claim status transactions to the test environment. San Francisco Health Plan notifies the provider after the successful completion of testing and prepares the provider for production status.

- During the testing process, San Francisco Health Plan examines submitted test transactions for required elements, and also ensures that the submitter gets a response during the testing mode.
- When the submitter is ready to send ANSI 276/277 transactions to a production mailbox, they must notify San Francisco Health Plan Provider Relations. Provider Relations then moves the submitter to the production environment.
- The submitter's mailbox name remains the same when moving from test to production. Changing passwords is optional upon submitter's request to the Provider Relations Team.

4 CONNECTIVITY WITH THE PAYER/COMMUNICATIONS

4.1 PROCESS FLOWS

4.1.1 Real-time

- The user application submits an SOAP request at https://or.edifecs.com/mt1sp800 and MIME request at https://or.edifecs.com/mt1mp800
- Claim status system authenticates the user
- If the user is successfully authorized, the following files will be issued within 20 seconds:
  - TA1 (if problem with the ISA/IEA segments exist)
  - 999 Reject (if problem occurs within the subsequent loops and segments)
  - 277 Eligibility Response

4.1.2 Batch

- The user application submits an SOAP request at https://or.edifecs.com/mt1sp900 and MIME request at https://or.edifecs.com/mt1mp900
- Claim status system authenticates the user
If the user is successfully authorized, one of the following will be generated back to the user:

- TA1 available within one hour, if there is a problem with the ISA or IEA segments
- 999 Reject available within one hour, if there is a problem with the segments occurring between the ISA and IEA.
- 999 Acceptance response will be available within one hour.
- The 277 transaction(s) will be available the following day (no later than 7:00a.m)

### 4.1.3 Structure Requirements

Real-time 276 requests are limited to one inquiry, per patient, per transaction. Batch 276 requests are limited to 99 ST/SE groupings per transaction. Each batch inquiry must be in its own ST/SE.

### 4.1.4 Response Times

A response (TA1, 999 reject or 277) to real-time inquiries will be provided within 20 seconds. A response to the batch inquiry will be provided by 7 a.m. (ET) the following day. Batch requests submitted after 9 p.m. (ET) will be available by 7 a.m. (ET) two days following submission.

### 4.2 RE-TRANSMISSION PROCEDURE

If the HTTP post reply message is not received within the 60-second response period, the user’s CORE compliant system should send a duplicate transaction no sooner than 90 seconds after the original attempt was sent.

If no response is received after the second attempt, the user’s CORE compliant system should submit no more than five duplicate transactions within the next 15 minutes. If the additional attempts result in the same timeout termination, the user’s CORE compliant system should notify the user to contact the health plan or information source directly to determine if system availability problems exist or if there are known Internet traffic constraints causing the delay.

### 4.3 COMMUNICATION PROTOCOL SPECIFICATIONS

The following is a list of technical standards and versions for the SOAP envelope and claim status payload:

- HTTP Version 1.1
- CSOAP Version 1.2
- SSL Version 3
- Health Care Claims Status Request and Response Version 005010X212
- CAQH SOAP (San Francisco Health Plan supports the use of HTTP SOAP + WSDL envelope standards as identified in CAQH CORE Phase I/II Connectivity standards http://www.caqh.org/pdf/CLEAN5010/250-v5010.pdf)

The following is a list of technical standards and versions for the HTTP MIME multipart envelope and claim status payload:

- HTTP Version 1.1
- SSL Version 3.0
- MIME Version 1.0
- Health Care Claims Status Request and Response Version 005010X212
- CAQH MIME (San Francisco Health Plan supports the use of HTTP MIME Multipart existing envelope standards and has implemented the HTTP MIME Multipart envelope standards as identified in CAQH CORE Phase I/II Connectivity standards.)

4.4 PASSWORDS
The EDI Department is responsible for password assignment and resets. For any information or queries, please email us at edi@sfhp.org.

4.5 MAINTENANCE SCHEDULE
The systems used by the 276/277 transaction have a standard maintenance schedule of Sunday 10PM to 12AM PST. The systems are unavailable during this time. Email notifications will be sent notifying submitters of unscheduled system outages.

5 CONTACT INFORMATION
The following sections provide contact information for any questions regarding HIPAA, 276/277 Health Care Claim Status Request and Response Transactions, and documentation or testing.

5.1 EDI CUSTOMER SERVICE
For 276/277 Transaction EDI Claim Status Request and Response Questions Contact the EDI Department at edi@sfhp.org

## 7 PAYER SPECIFIC BUSINESS RULES AND LIMITATIONS

San Francisco Health Plan responds to a 276 request with status codes at both claim and service line level, if the submission is HIPAA compliant. Due to the extensive amount of status codes used at the claim and service line level, we recommend viewing the up-to-date status code lists at the Washington Publishing Company’s website (www.wpc-edi.com).
San Francisco Health Plan follows the 277 Response Implementation Guide for an outbound response from both a structure and content perspective. There are no unique requirements that are specific to San Francisco Health Plan. When programming to accept a San Francisco Health Plan 277 response, follow the complete HIPAA Implementation Guide and TR3 guidelines. A non-HIPAA compliant request, i.e., a request that includes local codes, will not receive a 277 response.

**SUPPORTED FUNCTIONALITY**

- San Francisco Health Plan accepts the 276/277 transactions as a “read only” transaction and does not use any data coming in on the 276 transaction to update its internal systems.
- To provide immediate response to submitters, San Francisco Health Plan uses real time processing for its EDI transactions.

**SUBSCRIBER AND MEMBER SEARCHES**

To uniquely identify a member, a 276 transaction must include the member’s San Francisco Health Plan’s Identification Number, the provider’s San Francisco Health Plan Identification Number, and dates of service. In addition to the previous criteria, the claim number, claim amount, claim if for clearing house can also be submitted.

- For the best response time, San Francisco Health Plan recommends that the 276 transaction set be programmed to a single record. This consists of a one-to-one ratio in a single loop structure: one information receiver, one provider, one subscriber and associated date of service.
- If the 276 transaction is not rejected, San Francisco Health Plan returns the 277 transaction with all of the Inquiry criteria information that was submitted in the 276 transaction.

**8 ACKNOWLEDGEMENTS AND/OR REPORTS**

**8.1 999 – ACKNOWLEDGEMENT FOR HEALTH CARE INSURANCE**

San Francisco Health Plan supports the Acknowledgement for Health Care Insurance (999). 999s are sent for real-time submissions of 276 transactions when an error or discrepancy is found at the GS or ST level. For Batch 276 transactions a 999 is sent always.

**8.2 TA1 - INTERCHANGE ACKNOWLEDGEMENT REQUEST**

San Francisco Health Plan supports the Interchange Acknowledgement Request (TA1) when any issues at ISA level.

**8.3 REJECTION LOGIC/STATUS CODES**

To better communicate to its providers the reason a transaction was rejected and what action should be taken to resolve a rejection, San Francisco Health Plan developed rejection logic using HIPAA standard codes available on the Washington Publishing Company’s website (www.wpc-edi.com). HIPAA Status Category Codes, Status Codes, and Entity Codes are used at the claim and service line level.
9 TRADING PARTNER AGREEMENTS

This section contains general information concerning Trading Partner Agreements. An actual agreement may optionally be included in an appendix.

9.1 TRADING PARTNERS

An EDI Trading Partner is defined as any San Francisco Health Plan customer (provider, billing service, software vendor, employer group, financial institution, etc.) that exchanges data with San Francisco Health Plan. Please contact Provider Relations to register new partners and agreement/set-up forms to process electronic transactions.

10 TRANSACTION SPECIFIC INFORMATION

The following table specifies the segments and suggested use of them in the transmission:

<table>
<thead>
<tr>
<th>Loop ID</th>
<th>Element</th>
<th>Field Name</th>
<th>No. of Char</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>2100C</td>
<td>NM109</td>
<td>Provider Identification Code</td>
