

Developmental Screening in the First Three Years of Life (DEV)

Percentage of children screened for risk of developmental, behavioral, and social delays using a standardized screening tool in the 12 months preceding or on their first, second, or third birthday.

Numerators

The numerators identify children who were screened for risk of developmental, behavioral, and social delays using a standardized tool. National recommendations call for children to be screened three times in the first three years of life. This measure is based on three, age specific indicators.

Developmental Screening Coding

- | | | |
|---|---|---|
| <div data-bbox="181 940 263 1020">1</div> | <div data-bbox="305 940 872 1020">Children in Denominator 1 who had a claim with CPT code 96110 before or on their first birthday.</div> | <div data-bbox="1049 940 1255 978">CPT Code 96110</div> |
| <div data-bbox="181 1100 263 1180">2</div> | <div data-bbox="305 1100 927 1213">Children in Denominator 2 who had a claim with CPT code 96110 after their first and before or on their second birthdays.</div> | |
| <div data-bbox="181 1272 263 1352">3</div> | <div data-bbox="305 1272 872 1386">Children in Denominator 3 who had a claim with CPT code 96110 after their second and before or on their third birthdays.</div> | |
| <div data-bbox="181 1444 263 1524">4</div> | <div data-bbox="305 1444 951 1600">Children in the entire eligible population who had claim with CPT code 96110 in the 12 months preceding or on their 1st, 2nd, or 3rd birthday (the sum of numerators 1, 2, and 3).</div> | |

Notes

- The codes set on the previous page are used by HEDIS to determine compliance. Not all codes are necessarily covered by Medi-Cal.
- It is important to note that modified 96110 claims should not be included IF the modifier is used to indicate that the screening is for a specific domain of development (for example, social emotional screening via the ASQ-SE or autism screening). This measure is anchored to recommendations focused on global developmental screening using tools that focus on identifying risk for developmental, behavioral, and social delays.
- The following tools are included in the Bright Futures Recommendations for Preventive Care at **downloads.aap.org/AAP/PDF/periodicity_schedule.pdf**:
 - Ages and Stages Questionnaire - 3rd Edition (ASQ-3)
 - Parents' Evaluation of Developmental Status (PEDS) - Birth to age 8
 - Parent's Evaluation of Developmental Status - Developmental Milestones (PEDS-DM)
 - Survey of Well-Being in Young Children (SWYC)
