FAM-TRASTUZUMAB DERUXTECAN-NXKI (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have unresectable or metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumors have activating HER2 (ERBB2) mutations (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test
3. You have received a prior systemic therapy (treatment that targets the entire body)

E. If you have locally advanced or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+ or IHC 2+/ISH positive)
3. You have received a prior trastuzumab-based (type of medication) regimen

F. If you have unresectable or metastatic solid tumors, approval also requires:
1. You are 18 years of age or older
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+)
3. You have received previous systemic treatment (therapy that targets the entire body) and have no other satisfactory treatment options

RATIONALE

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the request for the prevention of recurrent *Clostridioides difficile* infection (CDI) (ICD-10 A04.71) **AND** the patient meets the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient previously received Vowst?

   If yes, continue to #4.
   If no, continue to #3.

3. Has the patient completed antibiotic treatment (e.g., vancomycin [Vancocin], fidaxomicin [Dificid]) for recurrent CDI (defined as at least 3 CDI episodes)?

   If yes, **approve for 30 days by HICL or GPI-10 for 1 fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

FECAL MICROBIOTA CAPSULE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ALL** of the following criteria?
   - The patient had treatment failure, defined as the presence of CDI diarrhea within 8 weeks of the first dose of Vowst AND a positive stool test for *C. difficile*
   - The patient has not previously received more than one treatment course of Vowst AND the start of that treatment course was at least 12 days and not more than 8 weeks prior

   If yes, **approve for 30 days by HICL or GPI-10 for 1 fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FECAL MICROBIOTA CAPSULE (Vowst)** requires the following rule(s) be met for approval:
   A. You will use Vowst for the prevention of recurrent *Clostridioides difficile* infection (CDI: a bacterial infection)
   B. You are 18 years of age or older
   C. If you have NOT previously received Vowst, approval also requires:
      1. You have completed antibiotic (such as vancomycin [Vancocin], fidaxomicin [Dificid]) treatment for recurrent CDI (defined as at least 3 CDI episodes)
   D. If you have been previously treated with Vowst, approval also requires:
      1. You had treatment failure, defined as the presence of CDI diarrhea within 8 weeks of the first dose of Vowst AND a positive stool test for *C. difficile*
      2. You have not previously received more than one treatment course of Vowst AND the start of that treatment course was at least 12 days and not more than 8 weeks prior

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Vowst.

FENTANYL CITRATE TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
FENTANYL CITRATE	ACTIQ, FENTORA, FENTANYL CITRATE	01747		GPI-10 (6510002510)	ROUTE = BUCCAL

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of cancer-related pain (ICD-10 G89.3) and meet **ONE** of the following criteria?
   - The request is for Actiq (fentanyl citrate) AND the patient is 16 years of age or older
   - The request is for Fentora (fentanyl citrate) AND the patient is 18 years of age or older

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by GPID or GPI-14 for all strengths. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

FENTANYL CITRATE TIRF (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of cancer-related pain (ICD-10 G89.3) and meet **ALL** of the following criteria?
   - The patient is on a maintenance dose of controlled-release opioid pain medication (e.g., MS Contin [morphine extended release], Oxycontin [oxycodone extended release], Duragesic [fentanyl patch])
   - The patient has difficulty swallowing tablets/capsules OR the patient had a trial of or contraindication to at least one immediate-release oral opioid pain agent (e.g., morphine sulfate immediate-release [MSIR], oxycodone/aspirin, oxycodone/acetaminophen, codeine/acetaminophen, hydromorphone, meperidine)

   If yes, continue to #2.
   If no, do not approve.
   - **If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   DENIAL TEXT: See denial text at the end of the guideline.

2. Is the request for Actiq (fentanyl citrate) **AND** the patient is 16 years of age or older?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths. (NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

FENTANYL CITRATE TIRF (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the request for Fentora (fentanyl citrate) **AND** the patient is 18 years of age or older?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths. (NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FENTANYL CITRATE (Actiq, Fentora)** requires the following rule(s) be met for approval:
   A. You have cancer-related pain
   B. You are on a maintenance dose of controlled-release opioid pain medication (such as MS Contin [morphine extended release], Oxycontin [oxycodone extended release], Duragesic [fentanyl patch])
   C. You have difficulty swallowing tablets/capsules OR you have tried or have a contraindication to (harmful for you to use) at least one immediate-release oral opioid pain agent (such as morphine sulfate immediate-release [MSIR], oxycodone/aspirin, oxycodone/acetaminophen, codeine/acetaminophen, hydromorphone, meperidine)
   D. If you are requesting Actiq (fentanyl citrate), approval also requires:
      1. You are 16 years of age or older
   E. If you are requesting Fentora (fentanyl citrate), approval also requires:
      1. You are 18 years of age or older

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

FENTANYL NASAL SPRAY TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
FENTANYL CITRATE	LAZANDA		27648 29146	GPI-14 (65100025102050, 65100025102060)	

These are TIRF-Like drugs requiring a payment determination for 'Part D' or 'Non-Part D'.

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of cancer-related pain (ICD-10 G89.3) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months for all strengths by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document diagnosis provided in MedAccess**.**

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction**:** '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

FERRIC CITRATE DvE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
FERRIC CITRATE	AURYXIA, FERRIC CITRATE	41378		GPI-10 (5280003010)	

This is a DvE drug requiring a payment determination for "Part D" or "Non-Part D."

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, **do NOT approve under Part D. Finalize as follows:**

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment which is paid under Medicare Part B and is not a Part D eligible drug. Please follow your internal procedures for denial.

   If no, continue to #2.

2. Is the requested medication for the treatment of iron deficiency anemia?

   If yes, **set CMS_DVE_OVR to 'E' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Payment Determination Override. This is not a Part D indication.**

   If no, **set CMS_DVE_OVR to 'D' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Part D Determination Override.** (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   NOTE: If the claim rejects after analyzing, then follow the clinical authorization process within the HQ notes.

GUIDELINES FOR USE

INITIAL CRITERIA (FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe menopausal vasomotor symptoms (VMS) (ICD-10 N95.1) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to hormonal therapy (e.g., estradiol transdermal patch [Minivelle, Climara], oral conjugated estrogens [Premarin])
   - The patient has undergone laboratory testing to establish baseline hepatic function, and these values will continue to be monitored in accordance with the FDA's current label recommendation
   - Veozah will NOT be used concurrently with another hormonal (e.g., Prempro [conjugated estrogen/medroxyprogesterone]) or non-hormonal (e.g., Brisdelle [paroxetine]) agent for VMS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

FEZOLINETANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **FEZOLINETANT (Veozah)** requires the following rule(s) be met for approval:

A. You have moderate to severe menopausal vasomotor symptoms (VMS: a type of symptom related to menopause)
B. You have tried or have a contraindication to (harmful for you to use) hormonal therapy (such as estradiol transdermal patch [Minivelle, Climara], oral conjugated estrogens [such as Premarin])
C. You have had laboratory testing to establish baseline hepatic (liver) function, and these values will continue to be monitored as recommended in the Food and Drug Administration's (FDA's) current label
D. Veozah will NOT be used concurrently (at the same time) with another hormonal (such as Prempro [conjugated estrogen/medroxyprogesterone]) or non-hormonal (such as Brisdelle [paroxetine]) medication for VMS

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

FEZOLINETANT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe menopausal vasomotor symptoms (VMS) (ICD-10 N95.1) and meet **ALL** of the following criteria?
   - The patient has a continued need for VMS treatment (persistently symptomatic with hot flashes)
   - The patient has had a reduction in VMS frequency OR severity due to Veozah treatment
   - The patient has not experienced new symptoms of liver injury and/or worsening lab values (e.g., ALT, AST, total bilirubin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FEZOLINETANT (Veozah)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe menopausal vasomotor symptoms (VMS: a type of symptom related to menopause)
   B. You have a continued need for VMS treatment (still experiencing persistent hot flashes)
   C. You have had a reduction in VMS frequency OR severity due to Veozah treatment
   D. You have not had new symptoms of liver injury and/or worsening lab values (such as alanine transaminase [ALT: a type of liver enzyme test], aspartate transaminase [AST: a type of liver enzyme test], total bilirubin [a type of liver function test])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Veozah.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever and meet **ALL** of the following criteria?
   - The patient has a non-myeloid malignancy
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nivestym (filgrastim-aafi)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no continue to #2.

2. Has the patient undergone or is undergoing induction or consolidation chemotherapy treatment for acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nivestym (filgrastim-aafi)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no continue to #3.

FILGRASTIM (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the patient undergoing myeloablative chemotherapy followed by bone marrow transplantation and meet **ALL** of the following criteria?
   - The patient has a non-myeloid malignancy
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nivestym (filgrastim-aafi)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no continue to #4.

4. Is the patient undergoing autologous peripheral blood progenitor cell collection and therapy and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nivestym (filgrastim-aafi)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no continue to #5.

5. Does the patient have a diagnosis of congenital neutropenia (ICD-10 D70.0), cyclic neutropenia (ICD-10 D70.4), or idiopathic neutropenia (ICD-10 D70.9), and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nivestym (filgrastim-aafi)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no continue to #6.

FILGRASTIM (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Is the patient acutely exposed to myelosuppressive doses of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [H-ARS]) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FILGRASTIM (Neupogen)** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You are receiving myelosuppressive anti-cancer drugs (drugs that decrease bone marrow activity) associated with a significant incidence of severe neutropenia (a type of blood condition) with fever
      2. You have undergone or are undergoing induction or consolidation chemotherapy treatment (you are starting cancer treatment or receiving treatment following initial therapy) for acute myeloid leukemia (AML: type of blood cancer)
      3. You undergoing myeloablative chemotherapy (high-dose drugs used to treat cancer) followed by bone marrow transplantation (procedure to get healthy blood-forming cells)
      4. You are undergoing autologous peripheral blood progenitor cell collection and therapy (a type of blood cell is stimulated to be collected by a process where it is separated from the blood)
      5. You have congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia (low levels of a type of white blood cell at birth, in cycles, or due to unknown causes)
      6. You are acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [H-ARS]: an illness that happens after whole body radiation)

   B. If you are receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever, approval also requires:
      1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
      2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
      3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

FILGRASTIM (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have undergone or are undergoing induction or consolidation chemotherapy treatment for acute myeloid leukemia, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

D. If you are undergoing myeloablative chemotherapy followed by bone marrow transplantation, approval also requires:
1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

E. If you are undergoing autologous peripheral blood progenitor cell collection and therapy, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

F. If you have congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

G. If you are acutely exposed to myelosuppressive doses of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome), approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

FILGRASTIM-SNDZ (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **FILGRASTIM-SNDZ (Zarxio)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are receiving myelosuppressive anti-cancer drugs (drugs that decrease bone marrow activity) associated with a significant incidence of severe neutropenia (a type of blood condition) with fever
   2. You have undergone or are undergoing induction or consolidation chemotherapy (starting cancer treatment or receiving treatment following initial therapy) for acute myeloid leukemia (AML: a type of blood cancer)
   3. You are undergoing myeloablative chemotherapy (high-dose drugs used to treat cancer) followed by bone marrow transplantation (procedure to get healthy blood-forming cells)
   4. You are undergoing autologous peripheral blood progenitor cell collection and therapy (a type of blood cell is stimulated to be collected by a process where it is separated from the blood)
   5. You have congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia (low levels of a type of white blood cell at birth, in cycles, or due to unknown cause)

B. If you are receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

C. If you have undergone or are undergoing induction or consolidation chemotherapy treatment for acute myeloid leukemia, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

D. If you are undergoing myeloablative chemotherapy followed by bone marrow transplantation, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

FILGRASTIM-SNDZ (PART D)

GUIDELINES FOR USE (CONTINUED)

E. If you are undergoing autologous peripheral blood progenitor cell collection and therapy, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

F. If you have congenital neutropenia, cyclic neutropenia, or idiopathic neutropenia, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nivestym (filgrastim-aafi)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

FINERENONE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of heart failure (ICD-10 Group I50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist
   - The patient has New York Heart Association (NYHA) Class II-IV
   - The patient has a left ventricular ejection fraction (LVEF) of at least 40% that is not due to an underlying cause (e.g., infiltrative cardiomyopathy, hypertrophic cardiomyopathy, valvular disease, pericardial disease, or high-output heart failure)
   - Kerendia will NOT be used concurrently with another mineralocorticoid (aldosterone) receptor antagonist (MRA) (e.g., spironolactone, eplerenone)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FINERENONE (Kerendia)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Chronic kidney disease (CKD: long-term kidney disease) associated with type 2 diabetes (a disorder with high blood sugar)
      2. Heart failure (a type of heart condition)

   B. If you have chronic kidney disease associated with type 2 diabetes, approval also requires:
      1. You are 18 years of age or older
      2. You have a history of and will continue to use, or you have a contraindication (harmful for you to use) or intolerance to (side effect) an angiotensin converting enzyme inhibitor (ACE-I, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB, such as losartan, valsartan)

FINERENONE (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have heart failure, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor)
3. You have New York Heart Association (NYHA) Class II-IV (a way to classify the severity of heart failure symptoms)
4. You have a left ventricular ejection fraction (LVEF: evaluates heart function) of at least 40% that is not due to an underlying cause (such as infiltrative cardiomyopathy [a type of heart condition], hypertrophic cardiomyopathy [a type of heart condition], valvular disease [a type of heart condition], pericardial disease [a type of heart condition], or high-output heart failure [a type of heart condition])
5. You will NOT use Kerendia concurrently (at the same time) with another mineralocorticoid (aldosterone) receptor antagonist (MRA) (such as spironolactone, eplerenone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 10 years of age or older
   - The patient has a contraindication to or is unable to swallow fingolimod capsules

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FINGOLIMOD LAURYL SULFATE (Tascenso ODT)** requires the following rule(s) be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away) or active secondary progressive disease (advanced disease)
   B. You are 10 years of age or older
   C. You have a contraindication to (harmful for you to use) or are unable to swallow fingolimod capsules

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of advanced Parkinson's disease (PD) (ICD-10 Group G20) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Vyalev is being used for the treatment of motor fluctuations associated with Parkinson's disease
   - Therapy is prescribed by or in consultation with a neurologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient is unable to swallow extended-release tablets or administer extended-release capsules via a feeding tube
   - The patient has failed to adhere to an oral carbidopa/levodopa regimen or tolerate a carbidopa/levodopa regimen via a feeding tube

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

FOSCARBIDOPA-FOSLEVODOPA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **FOSCARBIDOPA-FOSLEVODOPA (Vyalev)** requires the following rule(s) be met for approval:

A. You have advanced Parkinson's disease (PD: a type of movement disorder)
B. You are 18 years of age or older
C. Vyalev is being used for the treatment of motor fluctuations (changes in the ability to move) associated with Parkinson's disease
D. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
E. You meet ONE of the following:
    1. You are unable to swallow extended-release tablets or administer extended-release capsules through a feeding tube
    2. You have failed to adhere to (keep up with) an oral carbidopa/levodopa regimen or tolerate a carbidopa/levodopa regimen through a feeding tube

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   - The patient is 18 years of age or older
   - The patient has been previously treated for unresectable, locally advanced or metastatic iCCA
   - The patient has fibroblast growth factor receptor 2 (FGFR2) gene fusions or other rearrangements
   - The patient will complete a comprehensive ophthalmological examination, including optical coherence tomography (OCT), prior to the initiation of Lytgobi and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **FUTIBATINIB (Lytgobi)** requires the following rule(s) be met for approval:
   A. You have unresectable, locally advanced or metastatic intrahepatic cholangiocarcinoma (iCCA) (a type of bile duct cancer inside the liver that is unable to be removed by surgery, has spread from where it started to nearby tissue/lymph nodes or to other parts of the body)
   B. You are 18 years of age or older
   C. You have been previously treated for unresectable, locally advanced or metastatic iCCA
   D. You have fibroblast growth factor receptor 2 (FGFR2: a type of protein) gene fusions or other rearrangements
   (Denial text continued on the next page)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the preventive treatment of migraines (ICD-10 Group G43) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Emgality will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Vyepti [eptinezumab-jjmr]) for migraine prevention

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of episodic cluster headache (ICD-10 Group G44.01) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GALCANEZUMAB-GNLM (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GALCANEZUMAB-GNLM (Emgality)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Preventive treatment of migraines (a type of headache)
   2. Episodic cluster headache (a type of headache)

B. If the request is for preventive treatment of migraines, approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Emgality concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Vyepti [eptinezumab-jjmr]) for migraine prevention

C. If you have episodic cluster headache, approval also requires:
   1. You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GALCANEZUMAB-GNLM (PART D)

RENEWAL CRITERIA

1. Is the request for the preventive treatment of migraines (ICD-10 Group G43) **AND** the patient meets the following criterion?
   - Emgality will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Vyepti [eptinezumab-jjmr]) for migraine prevention

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced a reduction in migraine or headache frequency with therapy
   - The patient has experienced a reduction in migraine severity with therapy
   - The patient has experienced a reduction in migraine duration with therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

3. Does the patient have a diagnosis of episodic cluster headache (ICD-10 Group G44.01) **AND** meet the following criterion?
   - The patient has had improvement in episodic cluster headache frequency as compared to baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

GALCANEZUMAB-GNLM (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GALCANEZUMAB-GNLM (Emgality)** requires the following rule(s) be met for renewal:

A. The request is for ONE of the following:
   1. Preventive treatment of migraines (a type of headache)
   2. Episodic cluster headache (a type of headache)

B. If the request is for preventive treatment of migraines, renewal also requires:
   1. You will NOT use Emgality concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Vyepti [eptinezumab-jjmr]) for migraine prevention
   2. You meet ONE of the following:
      a. You have experienced a reduction in migraine or headache frequency with therapy
      b. You have experienced a reduction in migraine severity with therapy
      c. You have experienced a reduction in migraine duration with therapy

C. If you have episodic cluster headache, renewal also requires:
   1. You have had improvement in episodic cluster headache frequency as compared to baseline

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Andembry will be used for prophylaxis against HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Andembry will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Takhzyro [lanadelumab-flyo])
- The patient had a trial of or contraindication to ONE of the following preferred agents: Cinryze (C1 esterase inhibitor), Haegarda (C1 esterase inhibitor), Takhzyro (lanadelumab-flyo)

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of newly-diagnosed CD33-positive acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet the following criterion?
   - The patient is 1 month of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory CD33-positive acute myeloid leukemia (AML) (ICD-10 C92.02, C92.00) and meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GEMTUZUMAB OZOGAMICIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GEMTUZUMAB OZOGAMICIN (Mylotarg)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Newly-diagnosed CD33 (type of molecule that is used as a marker to diagnose AML) -positive acute myeloid leukemia (AML: a type of blood and bone marrow cancer)
   2. Relapsed (returning) or refractory (resistant) CD33 -positive acute myeloid leukemia (AML)

B. If you have newly-diagnosed CD33–positive acute myeloid leukemia, approval also requires:
   1. You are 1 month of age or older

C. If you have relapsed or refractory CD33-positive acute myeloid leukemia, approval also requires:
   1. You are 2 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Mylotarg.

GEPIRONE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of major depressive disorder (MDD) (ICD-10 Groups F32, F33) and meet **ALL** of the following criteria?
   - The patient has had a response to or remission of depressive symptoms with Exxua
   - Exxua will NOT be used concurrently with another 5-HT1A receptor agonist (e.g., buspirone)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GEPIRONE (Exxua)** requires the following rule(s) be met for renewal:
   A. You have major depressive disorder (MDD: a type of mental illness)
   B. You have had a response to or remission (reduction or disappearance of the signs and symptoms of a disease) of depressive symptoms with Exxua
   C. You will NOT use Exxua concurrently (at the same time) with another 5-HT1A receptor agonist (such as buspirone)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GEPOTIDACIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GEPOTIDACIN (Blujepa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Uncomplicated urinary tract infection (uUTI: a type of bacterial infection)
   2. Uncomplicated urogenital gonorrhea (a type of bacterial infection)

B. If you have uncomplicated urinary tract infection, approval also requires:
   1. You are a female
   2. You are 12 years of age or older
   3. Your uncomplicated urinary tract infection (a type of bacterial infection) is caused by susceptible *Escherichia coli, Klebsiella pneumoniae, Citrobacter freundii complex, Staphylococcus saprophyticus, or Enterococcus faecalis* (types of bacteria that can be treated with the medication)
   4. You meet ONE of the following:
      a. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
      b. You have a documented culture demonstrating uncomplicated urinary tract infection (a type of bacterial infection is caused by a bacteria with sensitivity (lab test that shows what medications work on which bacteria) to gepotidacin AND resistance (medication will not work for that bacteria) or contraindication to (harmful for you to use) all alternatives (such as Pivya [pivmecillinam], trimethoprim-sulfamethoxazole [TMP-SMX], nitrofurantoin, fosfomycin, penicillins [such as amoxicillin-clavulanate], cephalosporins [such as cephalexin], fluoroquinolones [such as ciprofloxacin])
      c. Your request is for continuation of Blujepa therapy from an inpatient setting

C. If you have uncomplicated urogenital gonorrhea, approval also requires:
   1. You are 12 years of age or older
   2. Your infection has limited or no alternative treatment options
   3. Your infection is caused by a susceptible strain of *Neisseria gonorrhoeae*
   4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ceftriaxone

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GIVINOSTAT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) **AND** meet the following criterion?
   - The patient has been on a stable dose of corticosteroids for at least 6 months AND will continue steroid therapy with Duvyzat

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient currently ambulatory **AND** meets the following criterion?
   - The patient has shown improvement since starting Duvyzat, as assessed by a standard set of ambulatory or functional status measures (e.g., 6-minute walking distance [6MWD], ascending or descending 4 stairs, rise from floor time [Gower's maneuver], 10-meter [30 feet] run/walk time, North Star Ambulatory Assessment [NSAA])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the patient currently non-ambulatory **AND** meets the following criterion?
   - The patient has maintained or demonstrated a less than expected decline in pulmonary function or upper limb strength since starting Duvyzat, as assessed by standard measures (e.g., pulmonary function [FVC, PFTs], upper limb strength)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: See the renewal denial text at the end of the guideline.

GIVINOSTAT (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GIVINOSTAT (Duvyzat)** requires the following rule(s) be met for renewal:

A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)
B. You have been on a stable dose of corticosteroids for at least 6 months AND will continue steroid therapy with Duvyzat
C. If you are currently ambulatory (can walk), approval also requires:
   1. You have shown improvement since starting Duvyzat, as measured by a standard set of ambulatory or functional status measures (such as 6-minute walking distance [6MWD], going up or down 4 stairs, time to rise from the floor [Gower's maneuver], 10-meter [30 feet] run/walk time, North Star Ambulatory Assessment [NSAA: a tool for evaluating Duchenne muscular dystrophy])
D. If you are currently non-ambulatory (cannot walk), approval also requires:
   1. You have maintained or had a less than expected decrease in pulmonary (lung) function or upper limb strength since starting Duvyzat, as assessed by standard measures (such as pulmonary function [forced vital capacity, pulmonary function tests], upper limb strength)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

GIVOSIRAN BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GIVOSIRAN SODIUM	GIVLAARI	46222		GPI-10 (8508002520)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue #5.

GIVOSIRAN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

GIVOSIRAN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acute hepatic porphyria (AHP) (ICD-10 E80.21) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a geneticist, hepatologist, hematologist, gastroenterologist, neurologist, dermatologist, or a healthcare provider experienced in managing AHP
- The patient has genetic confirmation of mutation OR elevated urinary or plasma PBG (porphobilinogen) or ALA (aminolevulinic acid)
- The patient has experienced two or more AHP attacks in the past 12 months

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

GIVOSIRAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GIVOSIRAN (Givlaari)** requires the following rule(s) be met for approval:

A. You have acute hepatic porphyria (AHP: a type of rare genetic disease)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a geneticist (a doctor who treats gene disorders), hepatologist (a type of liver doctor), hematologist (a type of blood doctor), gastroenterologist (a doctor who treats digestive conditions), neurologist (a type of brain and nervous system doctor), dermatologist (a type of skin doctor), or a healthcare provider experienced in managing acute hepatic porphyria
D. You have genetic confirmation of mutation, OR high urinary or plasma porphobilinogen (PBG) or aminolevulinic acid (ALA) levels (PBG and ALA: a type of urine or blood test)
E. You have experienced two or more acute hepatic porphyria attacks in the past 12 months

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GIVOSIRAN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of acute hepatic porphyria (AHP) (ICD-10 E80.21) and meet **ALL** of the following criteria?
- The patient has achieved ormaintained clinical benefit compared to baseline (e.g., less hemin use, less AHP attacks, improvement of AHP symptoms)
- The patient has not received a liver transplant

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GIVOSIRAN (Givlaari)** requires the following rule(s) be met for renewal:
A. You have acute hepatic porphyria (AHP: a type of rare genetic disease)
B. You have achieved or maintained clinical benefit compared to baseline (before treatment) (such as less hemin use, less AHP attacks, improvement of AHP symptoms)
C. You have not received a liver transplant

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Givlaari. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GLECAPREVIR/PIBRENTASVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

19. Is the patient treatment-experienced and meets **ALL** of the following criteria?
    - The patient has genotype 3
    - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
    - The patient has prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir)
    - The patient has NO prior treatment experience with an NS3/4A protease inhibitor (e.g., Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])

    If yes, **approve for 16 weeks by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #20.

20. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

    If yes, **approve as indicated per guidance in AASLD/IDSA.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **GLECAPREVIR/PIBRENTASVIR (Mavyret)** requires the following rule(s) be met for approval:
    A. You have acute (short-term) or chronic (long-term) hepatitis C virus (HCV: liver inflammation caused by a type of virus)
    B. You are 3 years of age or older
    C. You have a genotype 1, 2, 3, 4, 5, or 6 infection (types of hepatitis C virus)
    D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
    E. You do NOT have moderate or severe liver impairment (decompensated cirrhosis [a condition where there is liver damage and scarring with major symptoms]; Child-Pugh B or C [a score that evaluates the severity of liver damage])
    (Denial text continued on next page)

GLECAPREVIR/PIBRENTASVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

F. You will NOT be using Mavyret concurrently (at the same time) with any of the following medications: rifampin, atazanavir, carbamazepine, efavirenz, darunavir, lopinavir, ritonavir, atorvastatin, lovastatin, simvastatin, rosuvastatin (at doses greater than 10mg), cyclosporine (for patients requiring stable cyclosporine doses greater than 100mg/day), medications containing more than 20 mcg of ethinyl estradiol, Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir), or Zepatier (elbasvir/grazoprevir)

G. If you have chronic hepatitis C virus and are treatment-naive (no prior treatment), approval also requires ALL of the following:

1. You meet ONE of the following:
   a. You do not have cirrhosis (liver damage and scarring)
   b. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
   c. You received a liver transplant (replaced your liver)
   d. You received a kidney transplant (replaced your kidney)
2. If you have a genotype 1, 4, 5, or 6 infection, you have an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Harvoni, Epclusa; OR if you have a genotype 2 or 3 infection, you have an intolerance (side effect) or contraindication to (harmful for you to use) the preferred medication: Epclusa

H. If you have chronic hepatitis C virus, are treatment-experienced (failed prior treatment) and prior therapy did not contain an NS5A inhibitor, approval also requires ONE of the following:

1. You have a genotype 1, 2, 4, 5, or 6 infection, and you have compensated cirrhosis (a condition where there is liver damage and scarring without major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring), and you have prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir])
2. You have genotype 1 OR genotype 2, 3, 4, 5, or 6 and are less than 18 years of age, and you have compensated cirrhosis (Child-Pugh A) OR you do not have cirrhosis, and you have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]), and you do not have prior treatment experience with an NS5A inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir])

GLECAPREVIR/PIBRENTASVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

3. You have a genotype 3 infection, and you have compensated cirrhosis (Child-Pugh A) OR you do not have cirrhosis, and you have prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir])

I. If you have chronic hepatitis C virus and are treatment-experienced (failed prior treatment), approval also requires ALL of the following:

1. You meet ONE of the following:
   a. You are less than 18 years of age AND had prior treatment with an interferon
   b. You have genotype 1 OR genotype 2, 3, 4, 5, or 6 and are less than 18 years of age, and you have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring), and you have prior treatment experience with an NS5A inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir]), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir])
   c. You have failed prior treatment with a sofosbuvir-based regimen with no NS3/4A protease inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir], Sovaldi [sofosbuvir])
   d. You have failed Mavyret AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
   e. You have failed Vosevi (sofosbuvir/velpatasvir/voxilaprevir) AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
   f. You are less than 18 years of age, have genotype 3, AND you had prior treatment with an interferon
2. If you have a genotype 1, 4, 5, or 6 infection, you have an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Harvoni, Epclusa; OR if you have a genotype 2 or 3 infection, you have an intolerance (side effect) or contraindication to (harmful for you to use) the preferred medication: Epclusa

J. Mavyret will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

No	No	Yes	No	No	Yes	No	No	Yes	No	Yes	Yes

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

GLOFITAMAB-GXBM BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

GLOFITAMAB-GXBM BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory diffuse large B-cell lymphoma, not otherwise specified (DLBCL, NOS) (ICD-10 Group C83.3), OR large B-cell lymphoma (LBCL) arising from follicular lymphoma (ICD-10 Groups C83.3, C85.2), and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient previously received at least two lines of systemic therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])
   - The patient will receive or has received a single dose of Gazyva (obinutuzumab) as a pretreatment prior to initiating Columvi
   - The patient has not previously received more than 12 cycles of Columvi

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GLOFITAMAB-GXBM (Columvi)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory diffuse large B-cell lymphoma (DLBCL: a type of white blood cell cancer that has returned or is not responding to treatment), not otherwise specified (NOS), OR large B-cell lymphoma (LBCL) arising from follicular lymphoma (a type of blood cancer)
   B. You are 18 years of age or older

GLP1-EXENATIDE MICROSPHERES TIRF (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GLP1-EXENATIDE MICROSPHERES (Bydureon BCise)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Type 2 diabetes mellitus (a disorder with high blood sugar)
   2. Any other medically accepted indication that is supported by the Center forMedicare and Medicaid Services (CMS) approved compendia (such as American Hospital Formulary Service Drug Information, Micromedex DrugDex)

B. If you have type 2 diabetes mellitus, approval also requires:
   1. You are 10 years of age or older
   2. You have tried TWO preferred glucagon-like peptide-1 (GLP-1) or glucose-dependent insulinotropic polypeptide (GIP)/GLP-1 agonists (such as Trulicity [dulaglutide], Rybelsus [semaglutide], Ozempic [semaglutide], Mounjaro [tirzepatide])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

Prior authorization on Bydureon BCise is required due to a high potential for non-Part D use (D vs. E payment determination only). Bydureon BCise should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act. For further information, please refer to the Prescribing Information and/or Drug Monograph for Bydureon BCise.

GLP-1 EXENATIDE TIRF (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E13, E11 except ICD-10 E11.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of TWO preferred GLP-1 or GIP/GLP-1 agonists (e.g., Trulicity [dulaglutide], Rybelsus [semaglutide], Ozempic [semaglutide], Mounjaro [tirzepatide])

   If yes, **approve for 12 months by HICL or GPI-14 for all strengths. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Is the request for any other medically accepted indication that is supported by CMS approved compendia (e.g., American Hospital Formulary Service Drug Information, Micromedex DrugDex)?

   If yes, **please forward to pharmacist for clinical review. Approve for 12 months under Part D by HICL or GPI-14 for all strengths. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by HICL or GPI-14.**
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by HICL or GPI-14.**

GLP-1 EXENATIDE TIRF (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GLP1-EXENATIDE (Byetta)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Type 2 diabetes mellitus (a disorder with high blood sugar)
   2. Any other medically accepted indication that is supported by the Center forMedicare and Medicaid Services (CMS) approved compendia (such as American Hospital Formulary Service Drug Information, Micromedex DrugDex)

B. If you have type 2 diabetes mellitus, approval also requires:
   1. You are 18 years of age or older
   2. You have tried TWO preferred glucagon-like peptide-1 (GLP-1) or glucose-dependent insulinotropic polypeptide (GIP)/GLP-1 agonists (such as Trulicity [dulaglutide], Rybelsus [semaglutide], Ozempic [semaglutide], Mounjaro [tirzepatide])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

Prior authorization on Byetta is required due to a high potential for non-Part D use (D vs. E payment determination only). Byetta should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act. For further information, please refer to the Prescribing Information and/or Drug Monograph for Byetta.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GLYCEROL PHENYLBUTYRATE (Ravicti)** requires the following rule(s) be met for renewal:
   A. You have a urea cycle disorder (UCD: a genetic disorder that causes high ammonia levels in the blood)
   B. You had a clinical benefit compared to baseline (such as normal fasting glutamine, low-normal fasting ammonia levels, mental status clarity)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Ravicti.

GLYCEROL PHENYLBUTYRATE (PART D)

For Part D use only:

GLYCEROL PHENYLBUTYRATE (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	UREA CYCLE DISORDER (UCD): INITIAL: DIAGNOSIS IS CONFIRMED BY ENZYMATIC, BIOCHEMICAL OR GENETIC TESTING
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS
Other Criteria	UCD: INITIAL: TRIAL OF OR CONTRAINDICATION TO SODIUM PHENYLBUTYRATE. RENEWAL: PATIENT HAS CLINICAL BENEFIT FROM BASELINE.

Created: 11/07
Effective: 01/01/26 Client Approval: 01/26 P&T Approval: 07/25

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

GOLIMUMAB IV BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

GOLIMUMAB IV BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient will be concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #2.

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, continue to #3.
If no, continue to #4.

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 5 years of age AND had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Orencia (abatacept)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel (etanercept)])
     - Xeljanz (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Orencia (abatacept)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel (etanercept)])
     - Skyrizi (risankizumab-rzaa)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Xeljanz (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Orencia (abatacept)
     - Otezla (apremilast)

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #5.

5. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **GOLIMUMAB IV (Simponi Aria)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. You will be concurrently (at the same time) using methotrexate
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   4. You will NOT use Simponi Aria concurrently with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Orencia (abatacept)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Cosentyx (secukinumab)
      ii. Orencia (abatacept)
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Enbrel (etanercept)])
      iv. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   b. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Cosentyx (secukinumab)
      ii. Selarsdi/Yesintek/ustekinumab-aauz
      iii. Orencia (abatacept)
      iv. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Enbrel (etanercept)])
      v. Skyrizi (risankizumab-rzaa)
      vi. Otezla (apremilast)
      vii. Tremfya (guselkumab)
      viii. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

(Initial denial text continued on next page)

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   i. Cosentyx (secukinumab)
   ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   iii. Selarsdi/Yesintek/ustekinumab-aauz
   iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   v. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   vi. Skyrizi (risankizumab-rzaa)
   vii. Tremfya (guselkumab)
   viii. Orencia (abatacept)
   ix. Otezla (apremilast)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:

GOLIMUMAB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:

1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

GOLIMUMAB IV BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 Group M08) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **GOLIMUMAB IV (Simponi Aria)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have psoriatic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Simponi Aria. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

For Part D use only:

GOLIMUMAB IV (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST OR DERMATOLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, RINVOQ, SKYRIZI, TREMFYA, ORENCIA, OTEZLA. AS: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ. PJIA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ IR, RINVOQ, ORENCIA. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: ALL INDICATIONS: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 11/07
Effective: 07/15/26 Client Approval: 07/26 P&T Approval: 10/24

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient will be concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, continue to #2.

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi/Yesintek/ustekinumab-aauz
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Tremfya (guselkumab)
  - Orencia (abatacept)
  - Otezla (apremilast)

If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 excluding Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient weighs at least 15 kg (33 lbs)
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - The patient is less than 5 years of age
   - The patient is 5 to 17 years of age AND had a trial of or contraindication to the following preferred agent: Humira (adalimumab)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GOLIMUMAB SQ (Simponi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. You will be concurrently (at the same time) using methotrexate
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   4. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Orencia (abatacept)

(Initial denial text continued on next page)

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Selarsdi/Yesintek/ustekinumab-aauz
   d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   f. Skyrizi (risankizumab-rzaa)
   g. Tremfya (guselkumab)
   h. Orencia (abatacept)
   i. Otezla (apremilast)

(Initial denial text continued on next page)

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release, or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

(Initial denial text continued on next page)

GOLIMUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, approval also requires:

1. You weigh at least 15 kilograms (33 pounds)
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
4. You meet ONE of the following:
   a. You are less than 5 years of age
   b. You are 5 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) the following preferred medication: Humira (adalimumab)
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Selarsdi/Yesintek/ustekinumab-aauz
      ii. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iv. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      v. Skyrizi (risankizumab-rzaa)
      vi. Tremfya (guselkumab)

GOLIMUMAB SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

GOLIMUMAB SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 excluding group M45.A), and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

GOLIMUMAB SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: : *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GOLIMUMAB SQ (Simponi)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have psoriatic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

GOLODIRSEN	VYONDYS-53	46254		GPI-10 (7460004200)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

GOLODIRSEN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external infusion pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for up to 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

GOLODIRSEN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet **ALL** of the following criteria?
   - The patient has a confirmed mutation of the DMD gene that is amenable to exon 53 skipping therapy
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is ambulatory
   - The patient is currently receiving treatment with or has a contraindication to corticosteroids (e.g., prednisone, prednisolone)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GOLODIRSEN (Vyondys 53)** requires the following rule(s) be met for approval:
   A. You have Duchenne muscular dystrophy (DMD: a type of inherited muscle disorder)
   B. You have a confirmed mutation of the DMD gene that will respond to exon 53 skipping therapy (a process that allows a protein to still function with sections of faulty genetic code)
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
   (Initial denial text continued on next page)

GOLODIRSEN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient meet **ONE** of the following criteria?
   - The patient has maintained or demonstrated a less than expected decline in ambulatory ability based on muscle function assessments (e.g., 6-minute walk test)
   - The patient has maintained or demonstrated a less than expected decline in other muscle function (i.e., pulmonary or cardiac function)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GOLODIRSEN (Vyondys 53)** requires ONE of the following rules be met for renewal:
   A. You have maintained or demonstrated a less than expected decline in ambulatory ability (ability to walk) based on muscle function assessments (such as the 6-minute walk test)
   B. You have maintained or demonstrated a less than expected decline in other muscle function (pulmonary [lung] or cardiac [heart] function)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vyondys 53.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GOSERELIN BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GOSERELIN ACETATE	ZOLADEX	21114		GPI-10 (2140500510)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**
   If no, continue to #5.

GOSERELIN BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of endometriosis (ICD-10 Groups N80 and R52) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with an obstetrician/gynecologist
- The patient had a trial of or contraindication to a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing preparation (e.g., combination hormonal contraceptive preparation, progestin-only therapy)
- Zoladex will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])
- The patient has NOT received a total of 6 months of treatment with Zoladex per lifetime

If yes, **approve for 6 months per lifetime by HICL or GPI-10.**

If no, continue to #4.

4. Does the patient have a diagnosis of dysfunctional uterine bleeding (ICD-10 N93.8) **AND** meet the following criterion?
- Zoladex will be used as an endometrial-thinning agent prior to endometrial ablation

If yes, **approve for 12 months by HICL or GPI-10.**

If no, continue to #5.

5. Does the patient have a diagnosis of advanced breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
- The patient is a premenopausal or perimenopausal female

If yes, **approve for 12 months by HICL or GPI-10.**

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

GOSERELIN BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **GOSERELIN (Zoladex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally confined Stage T2b-T4 (Stage B2-C) carcinoma of the prostate (prostate cancer that has not spread outside the prostate)
   2. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
   3. Endometriosis (condition affecting the uterus)
   4. Dysfunctional uterine bleeding (abnormal uterine bleeding)
   5. Advanced breast cancer (breast cancer that has spread to nearby tissue or organs)

B. If you have locally confined Stage T2b-T4 (Stage B2-C) carcinoma of the prostate, approval also requires:
   1. Zoladex will be used in combination with Eulexin (flutamide)

C. If you have endometriosis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
   3. You have tried or have a contraindication to (harmful for you to use) a nonsteroidal anti-inflammatory drug (NSAID: such as ibuprofen, meloxicam, naproxen) AND a progestin-containing preparation (such as combination hormonal contraceptive preparation, progestin-only therapy)
   4. Zoladex will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])
   5. You have NOT received a total of 6 months of treatment with Zoladex per lifetime

D. If you have dysfunctional uterine bleeding, approval also requires:
   1. Zoladex will be used as an endometrial-thinning agent prior to endometrial ablation (a type of surgical procedure)

E. If you have advanced breast cancer, approval also requires:
   1. You are a premenopausal (before menopause) or perimenopausal (time around menopause) female

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

     If yes, continue to #2.
     If no, continue to #3.

GUSELKUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

GUSELKUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GUSELKUMAB (Tremfya)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe ulcerative colitis (UC: a type of digestive condition)
      4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

GUSELKUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, scalp, or genital area
4. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

GUSELKUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GUSELKUMAB (Tremfya)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe ulcerative colitis (UC: a type of digestive condition)
      4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

   B. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   D. If you have moderate to severe ulcerative colitis, renewal also requires:
      1. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

   (Renewal denial text continued on next page)

HEPATITIS B VACCINE BVD DETERMINATION (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
HEPATITIS B VIRUS VACCINE	RECOMBIVAX HB, ENGERIX-B, PREHEVBRIO	34649		GPI-10 (1710001020, 1710001040)	
HEPATITIS B VACCINE/CPG 1018/PF	HEPLISAV-B	44645		GPI-10 (1710001030)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: This PA is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

GUIDELINES FOR USE

1. Is the drug to be administered to a member at high or intermediate risk of being infected with Hepatitis B virus?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with a 'D' in the PA override field)**

RATIONALE

Hepatitis B vaccine requires a Part B versus Part D payment determination. This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. This vaccine is covered under Part B if patients in all age groups are at intermediate to high-risk of being infected with Hepatitis B.

High Risk Groups include:
End-Stage Renal Disease (ESRD) patients
Hemophiliacs who receive Factor VIII or IX concentrates
Clients of institutions for individuals with intellectual disabilities
Persons who live in the same household as a hepatitis B carrier
Homosexual men
Illicit injectable drug abusers
Pacific Islanders (that is, those Medicare beneficiaries who reside on Pacific islands under U.S. jurisdiction, other than residents of Hawaii)
Persons diagnosed with diabetes mellitus

HEPATITIS B VACCINE BVD DETERMINATION (PART D)

RATIONALE (CONTINUED)

Intermediate Risk Groups include:
Staff in institutions for individuals with intellectual disabilities and classroom employees who work with for individuals with intellectual disabilities
Workers in health care professions who have frequent contact with blood or blood-derived body fluids during routine work (including workers who work outside of a hospital and have frequent contact with blood or other infectious secretions)
Heterosexually active persons with multiple sexual partners (that is, those Medicare beneficiaries who have had at least two documented episodes of sexually transmitted diseases within the preceding 5 years)
Individuals who have not previously received a completed hepatitis B vaccination series or whose previous vaccination history is unknown

Exception:
Individuals are not considered at high or intermediate risk of contracting hepatitis B if they have undergone a prevaccination screening and have been found to be currently positive for antibodies to hepatitis B.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of pain (R52) severe enough to require an opioid analgesic and for which alternative treatments are inadequate?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient been identified as being enrolled in hospice (i.e., plan notification, member attribute, physician/member notification on the medication request form)?

   If yes, continue to #3.
   If no, continue to #4.

HIGH CONCENTRATION OPIOID ORAL SOLUTIONS (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the physician attest that the requested medication will be used for an indication that is unrelated to the terminal illness or conditions?

   If yes, **approve under Part D for lifetime by GPID or GPI-14 and override PA_HOSPICE in the PA override field. Change PA type to HE (Hospice Exception).**

   If no, do not approve.**(Change PA type to HP)**
   NOTE: This medication is included in the hospice benefit (Part A) and is not a Part D eligible drug.

   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: If you are enrolled in hospice, your requested medication will be covered under your Part D benefit if your doctor confirms that the medication is being used for the treatment of a condition that is not related to your terminal illness. If you are enrolled in hospice and are taking the medication for a condition related to your terminal illness, coverage may be available through your hospice benefit (Medicare Part A). Your doctor should contact your hospice provider or health plan for coverage information. This decision was based on Title XVIII of the Social Security Act (Section 1861(t)).

4. Is the patient receiving palliative care (ICD-10 Z51.5) or end-of-life care?

   If yes, **approve for lifetime by GPID or GPI-14.**
   If no, continue to #5.

5. Does the patient meet **ALL** of the following criteria?
   - The patient has previously used at least 60 mg oral morphine per day, 25 mcg transdermal fentanyl per hour, 30 mg oral oxycodone per day, 8 mg oral hydromorphone per day, 25 mg oral oxymorphone per day, 60 mg oral hydrocodone per day, or an equianalgesic dose of another opioid
   - The patient has trouble swallowing opioid tablets, capsules, or large volumes of liquid

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

HIGH CONCENTRATION OPIOID ORAL SOLUTIONS (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **HIGH CONCENTRATION OPIOID ORAL SOLUTIONS (morphine sulfate, oxycodone hydrochloride)** requires the following rule(s) be met for approval:

A. You have pain severe enough to require opioid analgesic (a class of drugs used to treat pain) and for which alternative treatments are inadequate
B. You meet ONE of the following:
    1. You are enrolled in hospice OR you are receiving palliative care (relieving pain without treating the cause of the condition) or end-of-life care
    2. You meet ALL of the following:
        a. You have previously used at least 60 mg oral morphine per day, 25 mcg transdermal fentanyl per hour, 30 mg oral oxycodone per day, 8 mg oral hydromorphone per day, 25 mg oral oxymorphone per day, 60 mg oral hydrocodone per day, or an equianalgesic dose of another opioid
        b. You have trouble swallowing opioid tablets, capsules, or large volumes of liquid

HISTRELIN-SUPPRELIN LA BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with an endocrinologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

2. Is the request for a female patient who meets **ALL** of the following criteria?
   - The patient has an elevated level of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for breast development and pubic hair growth

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

HISTRELIN-SUPPRELIN LA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a male patient who meets **ALL** of the following criteria?
   - The patient has an elevated level of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for genital development and pubic hair growth

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.
   Our guideline named **HISTRELIN-SUPPRELIN LA** requires the following rule(s) be met for approval:
   A. You have central precocious puberty (CPP: early sexual development in children)
   B. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   C. If you are a female, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 8 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for breast development and pubic hair growth
   D. If you are a male, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 9 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for genital development and pubic hair growth

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HISTRELIN-SUPPRELIN LA BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The patient's Tanner staging at initial diagnosis has stabilized or regressed during three separate medical visits in the previous year
   - The patient has not reached the actual age which corresponds to current pubertal age

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HISTRELIN-SUPPRELIN LA** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in children)
   B. Your Tanner staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis has stabilized or regressed (lowered) during three separate medical visits in the previous year
   C. You have not reached the actual age which corresponds to your current pubertal age

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Supprelin LA. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

HOSPICE PRIOR AUTHORIZATION GUIDELINES

HOSPICE AVD DETERMINATION (PART D)

Note: This guideline pertains to Generic Therapeutic Category PAIN MANAGEMENT, ANALGESICS and Generic Therapeutic Category ANTIEMESIS/ANTIVERTIGO and Generic Therapeutic Category BEHAVIORAL HEALTH – OTHER as referenced in the HOSPICE DRUG LIST found in the FORMULARY ANALYZER TOOL:

STC	Generic	HICL	GCN	Exception/Other
Laxatives and Cathartics	N/A	N/A	N/A	N/A
Anti-Anxiety	N/A	N/A	N/A	N/A
Antiemetic/Antivertigo Agents	N/A	N/A	N/A	N/A
Analgesics	N/A	N/A	N/A	N/A

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: This PA is for administrative purposes to determine Medicare Part D versus Hospice funding.

Hospice patients will be identified in the Member Attribute Screen (mbr_attribute table where mbr_attribute_type = 'HOSPICE').

GUIDELINES FOR USE

1. Is the requested medication on the “HOSPICE DRUG LIST”? (**NOTE:** Please reference the Formulary Analyzer Tool for drug status.)

   If yes, **Default to PA type HP** and continue to #2.
   If no, guideline does not apply.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: See member notification/denial text at the end of guideline.

2. Has the patient been identified as being enrolled in hospice (i.e., plan notification, member attribute, physician/member notification on the medication request form)?

   If yes, continue to #3.
   If no, guideline does not apply.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: See member notification/denial text at the end of guideline.

CONTINUED ON NEXT PAGE

GUIDELINES FOR USE (CONTINUED)

3. Does the physician indicate that the patient is no longer in hospice?

   If yes, **approve for 12 months under Part D and override PA_HOSPICE in the PA override field. Change PA type to HE (Hospice Exception). Document in the PA comments: 'Part D Determination Override.'**

   If no, continue to #4.

4. Does the physician attest that the requested medication is being used for an indication that is unrelated to the terminal illness or conditions?

   If yes, **approve for 12 months under Part D and override PA_HOSPICE in the PA override field. Change PA type to HE (Hospice Exception). Document in the PA comments: 'Part D Determination Override.'**

   If no, do not approve.
   NOTE: This medication is included in the hospice benefit (Part A) and is not a Part D eligible drug.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: For patients enrolled in hospice, attestation by the prescriber must indicate that the requested medication is being used for the treatment of a diagnosis unrelated to the terminal illness or related condition for coverage under their Part D benefit. For patients enrolled in hospice who are taking medications for a diagnosis related to the terminal illness/condition, coverage may be eligible through their hospice benefit (Medicare Part A). Your physician should contact your hospice provider or health plan for coverage information. This decision was based on Title XVIII of the Social Security Act (Section 1861(t)).

RATIONALE

2014 Hospice Drug Policy
CMS requires that Part D sponsors ensure that Part D does not pay for drugs and biologics that may be covered under the Medicare Part A per-diem payment to a hospice program. (As specified in section 1861(dd) of the Social Security Act and in Federal regulations at Part 418, the hospice is responsible for covering all drugs or biologics for the palliation and management of the terminal and related conditions). CMS revised guidance on July 18, 2014, under the memorandum entitled “Part D Payment for Drugs for Beneficiaries Enrolled in Medicare Hospice” to encourage sponsors to place beneficiary-level PA requirements on only four categories of prescription drugs identified by the DHHS Office of Inspector General (OIG): ***analgesics, antinauseants (antiemetics), laxatives, and antianxiety drugs (anxiolytics***).

HRM-BUTALBITAL-CONTAINING AGENTS (PART D)

RATIONALE

The drug(s) is/are listed as high risk medications in the elderly. The measure is an adaptation of the HEDIS measure, Drugs to Avoid in the Elderly, and calculates the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high risk medications.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HRM - CLEMASTINE** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Allergic rhinitis such as sneezing, rhinorrhea (runny nose), pruritus (itching), or lacrimation (watery eyes)
      2. Mild, uncomplicated allergic skin conditions of urticaria (hives) and angioedema (a type of swelling)
   B. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
   C. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

   NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years old or older.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The drug(s) is/are listed in the high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure, Drugs to Avoid in the Elderly, and calculates the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

HRM - DIPHENHYDRAMINE ELIXIR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HRM - DIPHENHYDRAMINE ELIXIR** requires the following rule(s) be met for approval:

A. Your request is for ONE of the following:
   1. Treatment of anaphylactic reaction(s) (severe, life-threatening allergic reaction)
   2. Treatment of pruritus (itching) or urticaria (hives) (due to allergic conjunctivitis [eye inflammation caused by allergies] due to foods; mild, uncomplicated allergic skin manifestations of urticaria and angioedema [a type of swelling]; improvement of allergic reactions to blood or plasma; or dermatographism [a condition in which lightly scratching the skin causes raised, red lines])
   3. Treatment of insomnia (as a nighttime sleep-aid)
   4. Treatment of parkinsonism (a condition of movement abnormalities such as slow movements)
   5. Motion sickness

B. If your request is for the treatment of pruritus or urticaria, approval also requires:
   1. You have tried or have a contraindication to (harmful for you to use) a non-sedating antihistamine (such as levocetirizine)

C. If your request is for the treatment of insomnia, approval also requires:
   1. You have tried Silenor (doxepin) AND Belsomra (suvorexant)

D. If your request is for the treatment of parkinsonism or motion sickness, approval also requires:
   1. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years of age or older

E. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The drug(s) is/are listed as high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure Drugs to Avoid in the Elderly and calculates: the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

PRIOR AUTHORIZATION GUIDELINES

HRM - DISOPYRAMIDE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
DISOPYRAMIDE PHOSPHATE	NORPACE, NORPACE CR, DISOPYRAMIDE PHOSPHATE	00077		GPI-10 (3510001010)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient 65 years of age or older?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the patient enrolled in hospice?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the requested medication for the treatment of documented ventricular arrhythmias (ICD-10 I49.3, I49.01; Group I47 except I47.9), such as sustained ventricular tachycardia that is life-threatening, **AND** the patient meets the following criterion?
   - The patient does NOT have asymptomatic ventricular premature contractions

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

HRM - DISOPYRAMIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the prescriber acknowledge or is aware that the requested medication is considered a high-risk medication for patients 65 years or older?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.
   (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HRM - DISOPYRAMIDE (Norpace, Norpace CR)** requires the following rule(s) be met for approval:
   A. The requested medication is for the treatment of documented ventricular arrhythmias (a type of irregular heartbeat), such as sustained ventricular tachycardia (a type of fast heartbeat) that is life-threatening
   B. You do NOT have asymptomatic ventricular premature contractions (a type of abnormal heartbeat)
   C. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
   D. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

   NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The drug(s) is/are listed as high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure, Drugs to Avoid in the Elderly, and calculates the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

HRM - ESTRADIOL-NORETHINDRONE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HRM - ESTRADIOL-NORETHINDRONE (CombiPatch, Mimvey, Activella, Amabelz)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Treatment of moderate to severe vasomotor symptoms (such as night sweats, hot flashes) due to menopause
   2. Treatment of moderate to severe vulvar and vaginal atrophy (dryness, discomfort, and pain in the vaginal areas) due to menopause
   3. Treatment of hypoestrogenism (lower than normal estrogen levels) due to hypogonadism (a condition where your body does not produce enough sex hormones), castration (removal of ovaries), or primary ovarian failure (ovaries stop working)
   4. Prevention of postmenopausal osteoporosis (a type of bone condition in women after menopause)

B. If your request is for treatment of moderate to severe vasomotor symptoms due to menopause, approval also requires:
   1. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older

C. If your request is for treatment of moderate to severe vulvar and vaginal atrophy due to menopause, approval also requires:
   1. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older

D. If your request is for treatment of hypoestrogenism due to hypogonadism, castration, or primary ovarian failure, approval also requires:
   1. Your request is for CombiPatch

E. If your request is for prevention of postmenopausal osteoporosis, approval also requires:
   1. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
   2. Your request is for any of the following:
      a. Mimvey
      b. Activella
      c. Amabelz
      d. Estradiol/norethindrone acetate

F. If you are enrolled in hospice (end of life care), your request will be approved without requiring additional criteria

HRM - ESTRADIOL-PROGESTERONE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ESTRADIOL/ PROGESTERONE	BIJUVA	01417		GPI-10 (2499300214)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient 65 years of age or older?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the patient enrolled in hospice?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for the treatment of moderate to severe vasomotor symptoms due to menopause (ICD-10 N95.1) **AND** the patient meets the following criterion?
   - The prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.
   (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

HRM - ESTRADIOL-PROGESTERONE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HRM - ESTRADIOL-PROGESTERONE (Bijuva)** requires the following rule(s) be met for approval:

A. Your request is for the treatment of moderate to severe vasomotor symptoms (such as night sweats, hot flashes) due to menopause
B. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
C. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The drug(s) is/are listed as high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure, Drugs to Avoid in the Elderly, and calculates the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

HRM - KETOROLAC (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
KETOROLAC TROMETHAMINE	KETOROLAC TROMETHAMINE	05175		GPI-10 (6610003710)	ROUTE ≠ OPHTHALMIC, NASAL

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient 65 years of age or older?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the patient enrolled in hospice?

   If yes, **approve for 30 days by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of moderately severe acute pain (ICD-10 R52) and meet **ALL** of the following criteria?
   - The request is for short-term use (i.e., 5 days or less of total combined duration of use of ketorolac tromethamine tablets and injection)
   - The patient's pain requires analgesia at the opioid level (usually in a postoperative setting)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Is the request for ketorolac IV or IM?

   If yes, continue to #6.
   If no, continue to #5.

HRM - KETOROLAC (PART D)

GUIDELINES FOR USE (CONTINUED)

5. Is the request for ketorolac tablet **AND** the patient meets the following criterion?
   - The medication will be used only as continuation treatment that was initiated with ketorolac tromethamine IV or IM

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the prescriber acknowledge or is aware that the requested medication is considered a high-risk medication for patients 65 years or older?

   If yes, **approve for 30 days by HICL or GPI-10.**
   APPROVAL TEXT: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.
   (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HRM - KETOROLAC** requires the following rule(s) be met for approval:
   A. Your request is for short-term (5 days or less) management of moderately severe acute pain that requires analgesia (pain control) at the opioid level, usually in a postoperative (after surgery) setting
   B. Request for ketorolac tablets must be used only as continuation treatment that was initiated with ketorolac IV (intravenous) or IM (intramuscular)
   C. The total combined duration of use of ketorolac tromethamine tablets and injection is 5 days or less
   D. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
   E. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

   NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HRM - KETOROLAC (PART D)

RATIONALE

The drug(s) is/are listed as high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure Drugs to Avoid in the Elderly and calculates: the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HRM - PAROXETINE (Paxil, Paxil CR, Pexeva)** requires the following rule(s) be met for approval:

A. If your request is for Paxil (paroxetine tablets or suspension), approval requires you are being treated for ONE of the following:
1. Major depressive disorder (MDD: a type of mental health condition)
2. Obsessive compulsive disorder (OCD: a type of mental health condition)
3. Panic disorder (PD: a type of mental health condition)
4. Social anxiety disorder (SAD: a type of mental health condition)
5. Generalized anxiety disorder (GAD: a type of mental health condition)
6. Posttraumatic stress disorder (PTSD: a type of mental health condition)

B. If your request is for Paxil CR (paroxetine controlled-release/extended-release), approval requires you are being treated for ONE of the following:
1. Major depressive disorder (MDD: a type of mental health condition)
2. Panic disorder (PD: a type of mental health condition)
3. Social anxiety disorder (SAD: a type of mental health condition)
4. Premenstrual dysphoric disorder (PMDD: a type of mental health condition)

C. If your request is for Pexeva (paroxetine mesylate), approval requires you are being treated for ONE of the following:
1. Major depressive disorder (MDD: a type of mental health condition)
2. Obsessive compulsive disorder (OCD: a type of mental health condition)
3. Panic disorder (PD: a type of mental health condition)
4. Generalized anxiety disorder (GAD: a type of mental health condition)

D. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older

E. If you are enrolled in hospice (end of life), your request will be approved without requiring additional criteria

NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HRM - PROMETHAZINE (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the request for **ANY** of the following FDA approved indications?
   - Treatment of anaphylactic reactions
   - For use in preoperative, postoperative, or obstetric sedation
   - For control of post-operative pain (ICD-10 Groups G89.1, 89.2 except G89.29)
   - For sedation in adults
   - Treatment of motion sickness (ICD-10 T75. 3)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HRM - PROMETHAZINE (Promethegan)** requires the following rule(s) be met for approval:

   A. You are using the requested medication for ONE of the following:
      1. Pruritus (itching) or urticaria (hives) (due to vasomotor rhinitis [chronic condition with sneezing, congestion, runny nose that is not caused by allergy or infection]; allergic conjunctivitis [eye inflammation caused by allergies] due to inhalant allergens [substances that cause allergic reaction when breathed in] or foods; mild, uncomplicated allergic skin manifestations of urticaria or angioedema [a type of swelling]; improvement of allergic reactions to blood or plasma; or dermatographism [a condition in which lightly scratching the skin causes raised, red lines])
      2. Seasonal (occurring for a season) or perennial (long-lasting) allergic rhinitis (stuffy, runny nose)
      3. Nausea and vomiting
      4. Anaphylactic reactions (severe, potentially life-threatening allergic reactions)
      5. Use in preoperative (before surgery), postoperative (after surgery), or obstetric (during childbirth) sedation (to help you relax and fall asleep)
      6. Control of post-operative (after surgery) pain
      7. Sedation (to help you relax and fall asleep) in an adult
      8. Motion sickness

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the prescriber acknowledge or is aware that the requested medication is considered a high-risk medication for patients 65 years or older?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.
   (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: **Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HRM - SCOPOLAMINE (Transderm-Scop)** requires the following rule(s) be met for approval:
   A. Your requested medication is being used for the prevention of nausea and vomiting associated with motion sickness or post-operative (after surgery) nausea and vomiting
   B. Your prescriber acknowledges or is aware that the requested medication is considered a high-risk medication for patients 65 years or older
   C. If you are enrolled in hospice (end of life care) and your doctor confirms that scopolamine patch is being used for the treatment of a condition that is not related to your terminal illness, your request will be approved without requiring additional criteria

   NOTE: The American Geriatrics Society (AGS) considers the requested medication a high-risk medication (HRM) if you are 65 years or older.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HRM - SCOPOLAMINE (PART D)

RATIONALE

The drug(s) is/are listed as high-risk medications in the elderly. The measure is an adaptation of the HEDIS measure Drugs to Avoid in the Elderly and calculates: the percentage of patients 65 years or older who have received at least one prescription for a high-risk drug and the percentage of Medicare patients 65 years or older who received two or more different prescriptions for high-risk medications.

HYDROCHLOROTHIAZIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HYDROCHLOROTHIAZIDE (Inzirqo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Hypertension (high blood pressure)
   2. Edema (swelling caused by fluid build-up in the body) associated with congestive heart failure (a type of heart condition), hepatic cirrhosis (liver damage and scarring), or renal (kidney) disease (including nephrotic syndrome [a type of kidney disorder])

B. If you have hypertension, approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow hydrochlorothiazide tablets

C. If you have edema associated with congestive heart failure, hepatic cirrhosis, or renal disease (including nephrotic syndrome), approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow hydrochlorothiazide tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Inzirqo.

HYDROCODONE BITARTRATE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the patient opioid tolerant (receiving, for one week or longer, at least 60mg oral morphine per day, 25mcg transdermal fentanyl per hour, 30mg oral oxycodone per day, 8mg oral hydromorphone per day, 25mg oral oxymorphone per day, or an equianalgesic dose of another opioid)?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the requested drug.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HYDROCODONE BITARTRATE (Hysingla ER, Hydrocodone Bitartrate ER)** requires the following rule(s) be met for approval:
   A. You are using the requested drug for the management of pain severe enough to require daily, around-the-clock, long-term opioid treatment
   B. Alternative treatment options are inadequate
   C. You are not using this drug on an 'as-needed' basis
   D. If you are requesting a dose that is more than 20 mg in one day, you must be opioid tolerant (you have been receiving, for one week or longer, at least 60mg oral morphine per day, 25mcg transdermal fentanyl per hour, 30mg oral oxycodone per day, 8mg oral hydromorphone per day, 25mg oral oxymorphone per day, or an equianalgesic dose [the equivalent dose that produces the same degree of pain relief] of another opioid)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IBRUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of chronic graft versus host disease (cGVHD) (ICD-10 D89.811, D89.812) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has failed at least ONE line of systemic therapy (e.g., prednisone, methotrexate, mycophenolate mofetil)
   - Imbruvica will NOT be used concurrently with Jakafi (ruxolitinib), Niktimvo (axatilimab-csfr), or Rezurock (belumosudil)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IBRUTINIB (Imbruvica)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Chronic lymphocytic leukemia (CLL: type of blood cancer)
      2. Small lymphocytic lymphoma (SLL: type of blood cancer)
      3. Waldenstrom's macroglobulinemia (WM: type of blood cancer)
      4. Chronic graft versus host disease (cGVHD: a type of long-term immune disorder)

   B. If you have chronic lymphocytic leukemia, small lymphocytic lymphoma, or Waldenstrom's macroglobulinemia, approval also requires:
      1. You are 18 years of age or older

   C. If you have chronic graft versus host disease, approval also requires:
      1. You are 1 year of age or older
      2. You have failed at least ONE line of systemic therapy (treatment that targets the entire body such as prednisone, methotrexate, mycophenolate mofetil)
      3. You will NOT use Imbruvica concurrently (at the same time) with Jakafi (ruxolitinib), Niktimvo (axatilimab-csfr), or Rezurock (belumosudil)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The requested medication will be used for the treatment of acute HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist or pulmonologist
- The requested medication will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Ruconest [C1 esterase inhibitor], Berinert [C1 esterase inhibitor], Kalbitor [ecallantide])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ICATIBANT (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
   - The patient has Type III HAE

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ICATIBANT (Firazyr, Sajazir)** requires the following rule(s) be met for approval:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You are 18 years of age or older
   C. The requested medication will be used for the treatment of acute (sudden and severe) hereditary angioedema attacks
   D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor) or pulmonologist (lung/breathing doctor)
   E. You will NOT use the requested medication concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) HAE attacks (such as Ruconest [C1 esterase inhibitor], Berinert [C1 esterase inhibitor], Kalbitor [ecallantide])
   F. You meet ONE of the following:
      1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
      2. You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.
50.16.2 – Inhalation Durable Medical Equipment (DME) Supply Drugs (Rev. 18, 09-17-18)
Medicare Part B covers certain inhalation drugs, such as Albuterol and Levalbuterol nebulizer solutions, as supplies under the DME benefit. The DME benefit, however, is not available to beneficiaries residing in long-term care facilities (i.e. Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities). Consequently, if the beneficiary is not on a Part A stay in one of these facilities, these inhalation drugs can be covered under Medicare Part D. CMS permits Part D sponsors to rely on a patient residence code of “3” or “9” on a pharmacy claim for determining when such inhalation drugs may be covered under Part D. Moreover, we expect that sponsors will only pay claims for these products when the pharmacy claim includes these specified patient residence codes regardless of any prior coverage determination based upon a prescriber statement indicating that the beneficiary resides in a long-term care facility (i.e. the prescriber statement and patient residence code must be aligned).
For further information, please refer to the Prescribing Information and/or Drug Monograph for Ventavis.

IMATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) (ICD-10 Group C91.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) (ICD-10 Group C91.0) **AND** meet the following criterion?
   - The requested medication will be used in combination with chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of a myelodysplastic/myeloproliferative disease (MDS/MPD) (ICD-10 C94.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The disease is associated with platelet-derived growth factor receptor (PDGFR) gene re-arrangements

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

IMATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have a diagnosis of aggressive systemic mastocytosis (ASM) (ICD-10 C96.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The disease is without the D816V c-Kit mutation OR c-Kit mutational status is unknown

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and/or chronic eosinophilic leukemia (CEL) (ICD-10 C94.8) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans (DFSP) (ICD-10 C44.99) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient have a diagnosis of unresectable and/or metastatic malignant gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) **AND** meet the following criterion?
   - The patient's tumor is Kit (CD117) positive

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

IMATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

10. Does the patient have a diagnosis of gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The request is for adjuvant treatment following complete gross resection of Kit (CD117) positive GIST

    If yes, **approve for 36 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **IMATINIB (Gleevec)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Newly diagnosed Philadelphia chromosome positive chronic myeloid leukemia (Ph+CML: type of blood cancer) in chronic phase
        2. Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML) in blast crisis, accelerated phase, or chronic phase after failure of interferon-alpha therapy
        3. Relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL: type of blood cancer that has returned or did not respond to treatment)
        4. Newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL)
        5. Myelodysplastic/myeloproliferative disease (MDS/MPD: type of blood cancer)
        6. Aggressive systemic mastocytosis (ASM: a type of blood disorder)
        7. Hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukemia (type of inflammatory cancer)
        8. Unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans (DFSP: type of rare skin tumor that cannot be completely removed by surgery or returns/spreads)
        9. Unresectable and/or metastatic malignant gastrointestinal stromal tumor (GIST: type of digestive tumor that spreads or cannot be removed by surgery)
        10. Adjuvant (add-on) treatment after complete gross resection (surgical removal) of Kit (CD117) positive gastrointestinal stromal tumor (GIST: a type of digestive tumor)

IMATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have newly diagnosed Philadelphia positive chronic myeloid leukemia in chronic phase OR Philadelphia chromosome positive chronic myeloid leukemia in blast crisis, accelerated phase, or chronic phase, approval also requires:
1. You have NOT received previous treatment with another tyrosine kinase inhibitor such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Iclusig (ponatinib)

C. If you have relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia, approval also requires:
1. You are 18 years of age or older

D. If you have newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia, approval also requires:
1. The requested medication will be used in combination with a chemotherapy (drugs used to treat cancer)

E. If you have myelodysplastic/myeloproliferative diseases, approval also requires:
1. You are 18 years of age or older
2. Your disease is associated with platelet-derived growth factor receptor (PDGFR) gene re-arrangements (a type of gene mutation)

F. If you have aggressive systemic mastocytosis, approval also requires:
1. You are 18 years of age or older
2. Your disease is without the D816V c-Kit mutation (abnormal change in a type of gene) OR c-Kit mutational status is unknown

G. If you have hypereosinophilic syndrome and/or chronic eosinophilic leukemia, approval also requires:
1. You are 18 years of age or older

H. If you have unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans, approval also requires:
1. You are 18 years of age or older

I. If you have unresectable and/or metastatic malignant gastrointestinal stromal tumor, approval also requires:
1. Your tumor is Kit (CD117: a type of protein) positive

J. If you have gastrointestinal stromal tumor, approval also requires:
1. You are 18 years of age or older
2. The request is for adjuvant (add-on) treatment following complete gross resection (complete removal) of Kit (CD117: a type of protein) positive GIST

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMATINIB SOLUTION (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IMATINIB SOLUTION (Imkeldi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML: a type of blood cancer)
   2. Relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL: type of blood cancer that has returned or did not respond to treatment)
   3. Newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) (type of blood cancer)
   4. Myelodysplastic/myeloproliferative disease (MDS/MPD: type of blood cancer)
   5. Aggressive systemic mastocytosis (ASM: a type of blood disorder)
   6. Hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukemia (CEL) (types of inflammatory cancer)
   7. Unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans (DFSP: type of rare skin tumor that cannot be completely removed by surgery, has returned, and/or has spread to other parts of the body)
   8. Unresectable and/or metastatic malignant gastrointestinal stromal tumor (GIST: type of digestive tumor that cannot be removed by surgery and/or has spread to other parts of the body)
   9. Gastrointestinal stromal tumor (GIST: type of digestive tumor)

B. If you have Philadelphia chromosome positive chronic myeloid leukemia, approval also requires:
   1. You meet ONE of the following:
      a. You have newly diagnosed Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML: type of blood cancer) in chronic phase
      b. You have Ph+ CML in blast crisis (BC), accelerated phase (AP), or chronic phase (CP) after failure of interferon-alpha therapy
   2. You have NOT received previous treatment with another tyrosine kinase inhibitor, such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Iclusig (ponatinib)
   3. You are unable to swallow generic imatinib tablets

C. If you have relapsed or refractory Philadelphia chromosome positive acute lymphoblastic leukemia, approval also requires:
   1. You are 18 years of age or older
   2. You are unable to swallow generic imatinib tablets

(Denial text continued on next page)

IMATINIB SOLUTION (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have newly diagnosed Philadelphia chromosome positive acute lymphoblastic leukemia, approval also requires:
1. Imkeldi will be used in combination with chemotherapy (a type of cancer treatment)
2. You are unable to swallow generic imatinib tablets

E. If you have myelodysplastic/myeloproliferative disease, approval also requires:
1. You are 18 years of age or older
2. Your disease is associated with platelet-derived growth factor receptor (PDGFR) gene rearrangements (a type of gene mutation)
3. You are unable to swallow generic imatinib tablets

F. If you have aggressive systemic mastocytosis, approval also requires:
1. You are 18 years of age or older
2. Your disease is without the D816V c-Kit mutation (abnormal change in a type of gene) OR c-Kit mutational status is unknown
3. You are unable to swallow generic imatinib tablets

G. If you have hypereosinophilic syndrome and/or chronic eosinophilic leukemia, approval also requires:
1. You are 18 years of age or older
2. You are unable to swallow generic imatinib tablets

H. If you have unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans, approval also requires:
1. You are 18 years of age or older
2. You are unable to swallow generic imatinib tablets

I. If you have unresectable and/or metastatic malignant gastrointestinal stromal tumor, approval also requires:
1. Your tumor is Kit (CD117: a type of protein) positive
2. You are unable to swallow generic imatinib tablets

J. If you have gastrointestinal stromal tumor, approval also requires:
1. You are 18 years of age or older
2. The request is for adjuvant (add-on) treatment following complete gross resection of Kit (CD117: a type of protein) positive gastrointestinal stromal tumor (GIST)
3. You are unable to swallow generic imatinib tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMIQUIMOD - ZYCLARA (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IMIQUIMOD - ZYCLARA** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Actinic keratosis (AK: a type of skin condition) of the full face or balding scalp
   2. External genital or perianal (around the anus) warts

B. If you have actinic keratosis of the full face or balding scalp, approval also requires:
   1. You are 18 years of age or older
   2. You are immunocompetent (healthy immune system)
   3. You have tried or have a contraindication to (harmful for you to use) generic imiquimod 5 percent cream

C. If you have external genital or perianal warts, approval also requires:
   1. You are 12 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) generic imiquimod 5 percent cream

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

IMMUNE GLOBULIN BVD DETERMINATION (PART D)

RATIONALE

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. IVIG/SCIG for use at home for patients with a diagnosis of primary immune deficiency disease or ICD-10 G11.3 is covered under Part B. Drugs administered via an external pump are covered under Part B if they are specifically infused through an external infusion pump covered by Medicare.

GUIDELINES FOR USE

1. Is the medication being used for the prevention of an organ transplant rejection?

   If yes, do not approve.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Is the medication being used for a Part D approved indication other than transplant?

   If yes, **approve for 12 months under Part D by GPID or GPI-14 for all strengths of the requested drug with no quantity limit (Populate the PA_OVR_TYPE with TRANSPLANT and PA_OVR_VALUE with 'Y').**

   If no, do not approve.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: The guideline named **IMMUNOSUPPRESSANT BVD DETERMINATION** applies to drugs that are used to prevent organ transplant rejection. These drugs are covered under Medicare Part B (Medical Insurance) if they are being used for transplant related purposes and your transplant was covered by Medicare. However, if you are using the drug for a Part D approved indication that is not related to transplant, it is covered under Medicare Part D. Centers for Medicare and Medicaid Services (CMS) has clarified that the Medicare Part B or D coverage for these medicines should be determined by the data indicating a Medicare Covered transplant which is provided by CMS.

IMMUNOSUPPRESSANT BVD DETERMINATION (PART D)

RATIONALE

Immunosuppressant therapy is covered under Part B for patients who received a Medicare covered organ transplant. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.

The 2019 Call Letter provided new guidance on how Part D sponsors are expected to determine whether immunosuppressants are coverable under Part D. Beginning in 2019, when the Part D plan receives new information from CMS (in MARx, ABII, or through a CMS program audit) indicating a Medicare covered transplant, it should rely on the new CMS information from that point forward, even if it is in conflict with the plan's prior research. ABII will not include renal transplants at this time, plans will continue to rely on MARx for renal transplant information).

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Uplizna will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INEBILIZUMAB-CDON BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of immunoglobulin G4-related disease (IgG4-RD) (ICD-10 D89.84) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AChR) antibody positive OR anti-muscle-specific tyrosine kinase (MuSK) antibody positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - Uplizna will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG
   - The patient had a trial of or contraindication to ONE standard of care corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE standard of care non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INEBILIZUMAB-CDON BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INEBILIZUMAB-CDON (Uplizna)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
   2. Immunoglobulin G4-related disease (IgG4-RD: a type of inflammatory disorder)
   3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)

B. If you have neuromyelitis optica spectrum disorder, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ophthalmologist (a type of eye doctor)
   3. You have a positive serologic (blood) test for anti-aquaporin-4 (AQP4: type of protein) antibodies
   4. You will NOT use Uplizna concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])
   5. You have at least ONE of the following core clinical characteristics:
      a. Optic neuritis (type of brain disorder)
      b. Acute myelitis (type of brain disorder)
      c. Area postrema syndrome (type of brain disorder)
      d. Acute brainstem syndrome (type of brain disorder)
      e. Symptomatic narcolepsy (type of sleep condition) or acute diencephalic clinical syndrome (type of brain disorder) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
      f. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

C. If you have immunoglobulin G4-related disease, approval also requires:
   1. You are 18 years of age or older

INEBILIZUMAB-CDON BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have generalized myasthenia gravis, approval also requires:

1. You are 18 years of age or older
2. You are anti-acetylcholine receptor (AChR) antibody positive (an indicator of myasthenia gravis) OR anti-muscle-specific tyrosine kinase (MuSK) antibody positive (an indicator of myasthenia gravis)
3. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
4. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
5. You will NOT use Uplizna concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis (a chronic autoimmune disorder)
6. You have tried or have a contraindication to (harmful for you to use) ONE standard of care corticosteroid (such as prednisone)
7. You have tried or have a contraindication to (harmful for you to use) ONE standard of care non-steroidal immunosuppressive therapy (such as azathioprine, cyclophosphamide, methotrexate)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INEBILIZUMAB-CDON BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of immunoglobulin G4-related disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient has shown clinical benefit (e.g., reduction in relapse frequency from baseline or a decrease in NMOSD-related hospitalizations) while on therapy with Uplizna
   - Uplizna will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, **approve 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Uplizna will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INEBILIZUMAB-CDON BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INEBILIZUMAB-CDON (Uplizna)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
   2. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)

B. If you have neuromyelitis optica spectrum disorder, renewal also requires:
   1. You have shown clinical benefit (such as reduction in relapse frequency from baseline [before treatment] or a decrease in NMOSD-related hospitalizations) while on therapy with Uplizna
   2. You will NOT use Uplizna concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

C. If you have generalized myasthenia gravis, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (such as Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   2. You will NOT use Uplizna concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis (a chronic autoimmune disorder)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Uplizna. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

INFLIXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a candidate for systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #6.
   If no, continue to #7.

INFLIXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)
   - The patient is 18 years of age or older and had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB (Remicade)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   (Initial denial text continued on next page)

INFLIXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. You are concurrently (at the same time) using methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

C. If you have psoriatic arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

INFLIXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Selarsdi /Yesintek /ustekinumab-aauz
   d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   f. Skyrizi (risankizumab-rzaa)
   g. Tremfya (guselkumab)
   h. Orencia (abatacept)
   i. Otezla (apremilast)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

E. If you have severe chronic plaque psoriasis, approval also requires:
1. You are 18 years of age or older
2. You are a candidate for systemic therapy (treatment that travels through the entire body)
3. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
4. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
5. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
6. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
3. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Skyrizi (risankizumab-rzaa)
      v. Tremfya (guselkumab)

G. If you have fistulizing Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)

(Initial denial text continued on next page)

INFLIXIMAB BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with anothersystemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

INFLIXIMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

INFLIXIMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB (Remicade)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint disorder)
      2. Psoriatic arthritis (PsA: a type of skin and joint disorder)
      3. Ankylosing spondylitis (AS: a type of joint disorder)
      4. Severe chronic plaque psoriasis (PsO: a type of skin disorder)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   (Renewal denial text continued on next page)

INFLIXIMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have severe chronic plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

F. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

G. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

INFLIXIMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Remicade.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

INFLIXIMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP, OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO

	OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, RINVOQ, SKYRIZI, TREMFYA, ORENCIA, OTEZLA. PSO: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, SKYRIZI, TREMFYA, OTEZLA. AS: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ. MODERATE TO SEVERE CD: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, RINVOQ, SKYRIZI, TREMFYA. UC: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, RINVOQ, SKYRIZI, TREMFYA. INITIAL/RENEWAL: RA, PSA, AS, PSO, MODERATE TO SEVERE CD, UC: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, PSA, AS, PSO: CONTINUES TO BENEFIT FROM THE MEDICATION.

PRIOR AUTHORIZATION GUIDELINES

INFLIXIMAB-ABDA BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB-ABDA	RENFLEXIS	44432		GPI-10 (5250504010)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

INFLIXIMAB-ABDA BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

INFLIXIMAB-ABDA BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi /Yesintek /ustekinumab-aauz
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Tremfya (guselkumab)
  - Orencia (abatacept)
  - Otezla (apremilast)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, continue to #4.

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a candidate for systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, continue to #5.

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #6.
   If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-ABDA (Renflexis)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Fistulizing (abnormal connection between two body parts) Crohn's disease
   7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. You are concurrently (at the same time) using methotrexate
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   4. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Orencia (abatacept)

(Initial denial text continued on next page)

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Selarsdi /Yesintek /ustekinumab-aauz
   d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   f. Skyrizi (risankizumab-rzaa)
   g. Tremfya (guselkumab)
   h. Orencia (abatacept)
   i. Otezla (apremilast)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have severe chronic plaque psoriasis, approval also requires:

1. You are 18 years of age or older
2. You are a candidate for systemic therapy (treatment that travels through the entire body)
3. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
4. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
5. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
6. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

(Initial denial text continued on next page)

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
3. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Skyrizi (risankizumab-rzaa)
      v. Tremfya (guselkumab)

G. If you have fistulizing Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)

(Initial denial text continued on next page)

INFLIXIMAB-ABDA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

H. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
3. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Xeljanz (tofacitinib immediate-release or extended-release) (NOTE: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iv. Rinvoq (upadacitinib) (NOTE: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      v. Skyrizi (risankizumab-rzaa)
      vi. Tremfya (guselkumab)

INFLIXIMAB-ABDA BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

INFLIXIMAB-ABDA BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-ABDA (Renflexis)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   (Renewal denial text continued on next page)

INFLIXIMAB-ABDA BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have severe chronic plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

F. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

G. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

INFLIXIMAB-ABDA BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Renflexis.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

For Part D use only:

INFLIXIMAB-ABDA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP, OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX,

	HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, RINVOQ, SKYRIZI, TREMFYA, ORENCIA, OTEZLA. PSO: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, SKYRIZI, TREMFYA, OTEZLA. AS: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ. MODERATE TO SEVERE CD: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, RINVOQ, SKYRIZI, TREMFYA. UC: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, RINVOQ, SKYRIZI, TREMFYA. INITIAL/RENEWAL: RA, PSA, AS, PSO, MODERATE TO SEVERE CD, UC: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, PSA, AS, PSO: CONTINUES TO BENEFIT FROM THE MEDICATION.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

INFLIXIMAB-AXXQ BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered using an external infusion pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

INFLIXIMAB-AXXQ BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi /Yesintek /ustekinumab-aauz
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Tremfya (guselkumab)
  - Orencia (abatacept)
  - Otezla (apremilast)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a candidate for systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #6.
   If no, continue to #7.

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)
   - The patient is 18 years of age or older and had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-AXXQ (Avsola)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. You are concurrently (at the same time) using methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Selarsdi /Yesintek /ustekinumab-aauz
   d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   f. Skyrizi (risankizumab-rzaa)
   g. Tremfya (guselkumab)
   h. Orencia (abatacept)
   i. Otezla (apremilast)

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have severe chronic plaque psoriasis, approval also requires:
1. You are 18 years of age or older
2. You are a candidate for systemic therapy (treatment that travels through the entire body)
3. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
4. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
5. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
6. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
3. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Skyrizi (risankizumab-rzaa)
      v. Tremfya (guselkumab)

G. If you have fistulizing Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

H. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iv. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      v. Skyrizi (risankizumab-rzaa)
      vi. Tremfya (guselkumab)

INFLIXIMAB-AXXQ BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-AXXQ (Avsola)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   (Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have severe chronic plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

F. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

G. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

INFLIXIMAB-AXXQ BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Avsola.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

For Part D use only:

INFLIXIMAB-AXXQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP, OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX,

INFLIXIMAB-DYYB IV BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB-DYYB	INFLECTRA		40977	GPI-14 (52505040202120)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

CONTINUED ON NEXT PAGE

INFLIXIMAB-DYYB IV BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

INFLIXIMAB-DYYB IV BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is concurrently using methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi /Yesintek /ustekinumab-aauz
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Tremfya (guselkumab)
  - Orencia (abatacept)
  - Otezla (apremilast)

If yes, **approve for 6 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a candidate for systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #6.
   If no, continue to #7.

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to the preferred agent: Humira (adalimumab)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-DYYB IV (Inflectra)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. You are concurrently (at the same time) using methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have severe chronic plaque psoriasis, approval also requires:
1. You are 18 years of age or older
2. You are a candidate for systemic therapy (treatment that travels through the entire body)
3. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
4. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
5. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
6. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

INFLIXIMAB-DYYB IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
3. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications:
      i. Selarsdi /Yesintek /ustekinumab-aauz
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Skyrizi (risankizumab-rzaa)
      v. Tremfya (guselkumab)

G. If you have fistulizing Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)

(Initial denial text continued on next page)

INFLIXIMAB-DYYB IV BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of severe chronic plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of fistulizing Crohn's disease (CD) (ICD-10 K50.913, K50.013, K50.113, K50.813)?

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

INFLIXIMAB-DYYB IV BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-DYYB IV (Inflectra)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe chronic plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Fistulizing (abnormal connection between two body parts) Crohn's disease
      7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

INFLIXIMAB-DYYB IV BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have severe chronic plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

F. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

G. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

---

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Inflectra.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

INFLIXIMAB-DYYB IV (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP, OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, RINVOQ, SKYRIZI, TREMFYA, ORENCIA, OTEZLA. PSO: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, SKYRIZI, TREMFYA, OTEZLA. AS: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ. MODERATE TO SEVERE CD: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS, WHERE AGES ALIGN: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ,

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zymfentra will be used following treatment with an intravenous infliximab agent (e.g., Remicade, Renflexis, Avsola)
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

INFLIXIMAB-DYYB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

If yes, **approve all formulations of the 120mg/mL strength for 6 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zymfentra will be used following treatment with an intravenous infliximab agent (e.g., Remicade, Renflexis, Avsola)
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve all formulations of the 120mg/mL strength for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-DYYB SQ (Zymfentra)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
      2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

(Initial denial text continued on the next page)

INFLIXIMAB-DYYB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe ulcerative colitis, approval also requires:

1. You are 18 years of age or older
2. Zymfentra will be used after treatment with an intravenous (injection into the vein) infliximab medication (such as Remicade, Renflexis, Avsola)
3. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
4. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Selarsdi /Yesintek /ustekinumab-aauz
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Skyrizi (risankizumab-rzaa)
   f. Tremfya (guselkumab)

INFLIXIMAB-DYYB SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve all formulations of the 120mg/mL strength for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve all formulations of the 120mg/mL strength for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See renewal denial text at the end of the guideline.

INFLIXIMAB-DYYB SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-DYYB SQ (Zymfentra)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

B. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

C. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

---

NOTE: This PA is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

GUIDELINES FOR USE

1. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months under Part B for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in PA override field)**

   If no, continue to #2.

2. Is the drug administered using an external pump?

   If yes, continue to #3.
   If no, **approve for 12 months under Part D for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Populate the B vs. D field with a 'D' in the PA override field)**

INFUSIBLE DRUG BVD DETERMINATION (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months under Part B for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in PA override field)**

   If no, **approve for 12 months under Part D for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Populate the B vs. D field with a 'D' in the PA override field)**

Drug List:

Infusible Drug Requested	Approval Instructions	HICL	GPID	Medi-Span
ACYCLOVIR SODIUM	Enter multiple approvals by GPID or GPI-10 as listed.		43396 43390 43391	GPI-10 (1240501010)
AMPHOTERICIN B	Enter approval by GPID or GPI-10 as listed.		42420	GPI-10 (1100001000)
AMPHOTERICIN B LIPID COMPLEX (ABELCET)	Enter approval by HICL or GPI-10 as listed.	10219		GPI-10 (1100001030)
AMPHOTERICIN B LIPOSOME (AMBISOME)	Enter approval by HICL or GPI-10 as listed.	12800		GPI-10 (1100001040)
CAFFEINE CITRATE (CAFCIT)	Enter approval by GPID or GPI-14 as listed.		50748	GPI-14 (61300010102020)
CEFIDEROCOL (FETROJA)	Enter approval by HICL or GPI-10 as listed.	46229		GPI-10 (0280002070)
CISPLATIN	Enter approval by HICL or GPI-14 as listed.	03902		GPI-14 (21100020002020)
CLADRIBINE	Enter approval by GPID or GPI-10 as listed.		880	GPI-10 (2130000700)
CYCLOPHOSPHAMIDE	Enter multiple approvals by GPID or GPI-14 as listed.		38352 38357 38353 48433 54284 54762	GPI-14 (21101020002125, 21101020002030, 21101020002130, 21101020002120, 21101020002020, 21101020002005, 21101020002070)
CYTARABINE, CYTARABINE/PF	Enter approval by HICL or GPI-10 as listed.	03910		GPI-10 (2130001000)

DAUNORUBICIN/ CYTARABINE LIPOSOMAL (VYXEOS)	Enter approval by HICL or GPI-10 as listed.	44461		GPI-10 (2199000220)
DOBUTAMINE HCL, DOBUTAMINE HCL/D5W	Enter multiple approvals by HICL or GPI-10 as listed.	00040 08777		GPI-10 (3135001510, 3135001511)
DOXORUBICIN HCL (ADRIAMYCIN)	Enter approval by HICL or GPI-10 as listed.	03916		GPI-10 (2120004010)
DOXORUBICIN HCL PEG-LIPOSOMAL (DOXIL, CAELYX)	Enter approval by HICL or GPI-10 as listed.	10222		GPI-10 (2120004040)
FLOXURIDINE	Enter approval by GPID or GPI-10 as listed.		38531	GPI-10 (2130002000)
FLUOROURACIL (ADRUCIL)	Enter multiple approvals by GPID or GPI-14 as listed.		97457 97458 97456 97455	GPI-14 (21300030002020, 21300030002025, 21300030002035)
FOSCARNET SODIUM	Enter approval by HICL or GPI-10 as listed.	13221		GPI-10 (1220002010)
FOSDENOPTERIN HYDROBROMIDE	Enter approval by HICL or GPI-10 as listed	47158		GPI-10 (3090643020)
GARETOSMAB-GRTS (PASATRU)	Enter approval by HICL or GPI-10 as listed	51491		GPI-10 (7588102000)
MILRINONE LACTATE (HICL 06549), MILRINONE LACTATE/D5W (HICL 09744)	Enter multiple approvals by HICL and GPID or GPI-10 as listed.	06549	5320	GPI-10 (3135005010, 3135005011)
OLICERIDINE FUMARATE (OLINVYK)	Enter approval by GPID or GPI-14 as listed.		48499	GPI-14 (65100070202040)
PEGLOTICASE (KRYSTEXXA)	Enter approval by HICL or GPI-10 as listed.	37154		GPI-10 (6800005000)
POTASSIUM CHLORIDE	Enter multiple approvals by GPID or GPI-14 as listed.		3281 3282 3283 3284 3342 3350 41321 41331	GPI-14 (79700030002050, 79700030002060, 79700030002005, 79700030002075, 79700030002055, 79700030002070)
POTASSIUM CHLORIDE IN 0.9%NACL	Enter multiple approvals by GPID or GPI-14 as listed.		56590 56591	GPI-14 (79992002102020, 79992002102030)
POTASSIUM CHLORIDE/D5W	Enter approval by HICL or GPI-10 as listed.	14775		GPI-10 (7999300210)
POTASSIUM CHLORIDE/D5W-0.45NACL	Enter multiple approvals by HICL or GPI-14 as listed.	14778		GPI-14 (79993003102015, 79993003102025,

				79993003102038, 79993003102050)
POTASSIUM PHOSPHATE	Enter approval by HICL or GPI-10 as listed.	00551		GPI-10 (7960001005)
POTASSIUM PHOSPHATE-0.9% NACL	Enter approval by HICL or GPI-10 as listed.	37356		GPI-10 (7960001010)
REMDESIVIR (VEKLURY)	Enter approval by HICL or GPI-10 as listed.	46410		GPI-10 (1270008000)
TEMSIROLIMUS (TORISEL)	Enter approval by HICL or GPI-10 as listed.	34870		GPI-10 (2153257000)
TREOSULFAN (GRAFAPEX)	Enter approval by GPI-10 as listed.			GPI-10 (2110006000)
VINBLASTINE SULFATE	Enter approval by HICL or GPI-10 as listed.	03912		GPI-10 (2150003010)
VINCRISTINE SULFATE (VINCASAR PFS)	Enter approval by GPID or GPI-10 as listed.		97630	GPI-10 (2150002010)
VERTEPORFIN (VISUDYNE)	Enter approval by HICL or GPI-10 as listed.	21150		GPI-10 (8670006500)

RATIONALE

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

INHALED INSULIN (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INSULIN REGULAR, HUMAN	AFREZZA	00768		GPI-10 (2710401000)	ROUTE = INHALATION

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient meet **ONE** of the following criteria?
   - The patient has chronic lung disease (such as asthma or chronic obstructive pulmonary disease)
   - The patient has lung cancer
   - The patient has diabetic ketoacidosis
   - The patient smokes or has quit smoking within the past 6 months

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of type 1 diabetes mellitus (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - A baseline spirometry has been performed to measure FEV1
   - The patient is concurrently using a long-acting insulin (e.g., Lantus, Tresiba, Toujeo, Basaglar)
   - The patient had a trial of or contraindication to ONE of the following preferred rapid-acting insulins: Novolog, Fiasp

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

INHALED INSULIN (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - A baseline spirometry has been performed to measure FEV1

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred rapid-acting insulins: Novolog, Fiasp
   - The prescriber has indicated that the patient is physically unable to or unwilling to administer injectable insulin

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INHALED INSULIN (Afrezza)** requires the following rule(s) be met for approval:
   A. You have type 1 or type 2 diabetes mellitus (disorders with high blood sugar)
   B. You are 6 years of age or older
   C. You have a baseline spirometry (test to measure how well your lungs work) to measure FEV1 (forced expiratory volume: amount of air exhaled in one second)
   D. You do not have chronic lung disease (a type of long-term lung disease), lung cancer, or diabetic ketoacidosis (condition where body breaks down fat too fast)
   E. You do not currently smoke or did not quit smoking within the past 6 months
   F. If you have type 1 diabetes mellitus, approval also requires:
      1. You are using a long-acting insulin (such as Lantus, Tresiba, Toujeo, Basaglar) with Afrezza
      2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred rapid-acting insulins: Novolog, Fiasp

INHALED INSULIN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of type 1 diabetes mellitus (ICD-10 Group E10) **AND** meet the following criterion?
   - The patient is currently on a long-acting insulin (e.g., Lantus, Tresiba, Toujeo, Basaglar)

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13)?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Did the patient have a follow-up spirometry to measure FEV1 after 6 months of treatment and annually thereafter?

   If yes, continue to #4.
   If no, **approve for 1 month by HICL or GPI-10 (to allow for follow-up spirometry evaluation).**
   APPROVAL TEXT: Renewal requires a follow-up spirometry after 6 months of treatment and annually thereafter.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

4. Has the patient's FEV1 declined 20 percent or more from baseline?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

INHALED INSULIN (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INHALED INSULIN (Afrezza)** requires the following rule(s) be met for renewal:

A. You have type 1 or type 2 diabetes mellitus (disorders with high blood sugar)
B. You had a follow-up spirometry (test to measure how well your lungs work) to measure FEV1 (forced expiratory volume in 1 second) after 6 months of treatment and annually thereafter
C. Your FEV1 has not declined 20 percent or more from baseline
D. If you have type 1 diabetes mellitus, approval also requires:
   1. You are currently using a long-acting insulin (such as Lantus, Tresiba, Toujeo, Basaglar)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR) with polyneuropathy (ICD-10 E85.1) and meet **ALL** the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, physician at an amyloidosis treatment center, or medical geneticist
   - The patient is ambulatory (i.e., familial amyloid polyneuropathy [FAP] stage 1 - 2, OR polyneuropathy disability [PND] stage I - IIIb polyneuropathy)
   - Tegsedi will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the hATTR diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INOTERSEN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INOTERSEN (Tegsedi)** requires the following rule(s) be met for approval:

A. You have hereditary transthyretin-mediated amyloidosis (hATTR: a rare genetic disorder) with polyneuropathy (widespread nerve pain/damage)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (nerve doctor), cardiologist (heart doctor), physician at an amyloidosis treatment center, or medical geneticist (doctor who treats gene disorders)
D. You are ambulatory (able to walk) (you have familial amyloid polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2, OR polyneuropathy disability [PND: a tool used to evaluate disease severity] stage I to IIIb polyneuropathy)
E. You will NOT use Tegsedi concurrently (at the same time) with other Hattr-PN medications (such as Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])
F. Your diagnosis is confirmed by ONE of the following:
    1. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (type of abnormal protein) presence AND chemical typing to confirm presence of TTR (transthyretin) protein
    2. DNA (deoxyribonucleic acid) genetic sequencing (type of lab test) to confirm hATTR mutation (type of abnormal gene)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INOTERSEN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR) with polyneuropathy (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient has not progressed to familial amyloid polyneuropathy (FAP) stage 3 or polyneuropathy disability (PND) stage 4 polyneuropathy, as evidenced by functional decline (e.g., wheelchair-bound, bedridden)
   - Tegsedi will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INOTERSEN (Tegsedi)** requires the following rule(s) be met for renewal:
   A. You have hereditary transthyretin-mediated amyloidosis (hATTR: a rare genetic disorder) with polyneuropathy (widespread nerve pain/damage)
   B. You have not progressed to familial amyloid polyneuropathy (FAP: a tool used to evaluate disease severity) stage 3 or polyneuropathy disability (PND: a tool used to evaluate disease severity) stage 4 polyneuropathy, as shown by functional decline (such as being wheelchair-bound, being bedridden)
   C. You will NOT use Tegsedi concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory CD22-positive B-cell precursor acute lymphoblastic leukemia (ALL) (ICD-10 Group C91.0) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has NOT previously received 6 cycles of Besponsa treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INOTUZUMAB OZOGAMICIN (Besponsa)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory CD22-positive B-cell precursor acute lymphoblastic leukemia (ALL: a type of blood cancer that has returned or did not respond to treatment)
   B. You are 1 year of age or older
   C. You have not previously received 6 cycles of Besponsa treatment

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INTERFERON GAMMA-1B (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INTERFERON GAMMA-1B, RECOMB (Actimmune)** requires the following rules be met for approval:

A. You have ONE of the following:
   1. Chronic granulomatous disease (CGD: a type of immune disorder)
   2. Severe malignant osteopetrosis (SMO: a type of bone condition)

B. If you have chronic granulomatous disease, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor), infectious disease specialist (a doctor that specializes in treating infections), or immunologist (a type of immune system doctor)

C. If you have severe malignant osteopetrosis, approval also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor) or hematologist (a type of blood doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INTERFERON GAMMA-1B (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of chronic granulomatous disease (CGD) or severe malignant osteopetrosis (SMO) and meet **ALL** of the following criteria?
   - The patient has demonstrated clinical benefit compared to baseline (e.g., reduction in frequency and severity of serious infections)
   - The patient has not received hematopoietic cell transplantation

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INTERFERON GAMMA-1B (Actimmune)** requires the following rules be met for renewal:
   A. You have ONE of the following:
      1. Chronic granulomatous disease (CGD: a type of immune disorder)
      2. Severe malignant osteopetrosis (SMO: a type of bone condition)
   B. You have shown clinical benefit compared to baseline (such as reduction in frequency and severity of serious infections)
   C. You have not received hematopoietic cell transplantation (bone marrow transplant)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Actimmune.

IPILIMUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IPILIMUMAB	YERVOY	37503		GPI-10 (2135523200)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

IPILIMUMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision).**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

IPILIMUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Yervoy will be used as a single agent OR in combination with Opdivo (nivolumab)

   If yes, **approve for 4 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of cutaneous melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Yervoy will be used for adjuvant treatment
   - There is pathologic involvement of regional lymph nodes of more than 1mm
   - The patient has undergone complete resection, including total lymphadenectomy

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

IPILIMUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)
   - The patient has intermediate or poor risk disease

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (ICD-10 C19) and meet **ALL** the following criteria?
   - The patient is 12 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)
   - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR)

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (ICD-10 C22.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #6.
   If no, continue to #7.

CONTINUED ON NEXT PAGE

IPILIMUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - Yervoy will be used in combination with Opdivo (nivolumab) as first-line treatment
   - Yervoy will be used in combination with Opdivo (nivolumab), AND the patient has previously been treated with Nexavar (sorafenib)

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors express PD-L1 (at least 1%), as determined by an FDA-approved test
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Yervoy will be used in combination with Opdivo (nivolumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of metastatic or recurrent non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Yervoy will be used in combination with Opdivo (nivolumab) and 2 cycles of platinum-doublet chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

IPILIMUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of unresectable malignant pleural mesothelioma (ICD-10 C45.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

10. Does the patient have a diagnosis of unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Yervoy will be used in combination with Opdivo (nivolumab)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

IPILIMUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IPILIMUMAB (Yervoy)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (a type of skin cancer that cannot be completely removed by surgery or has spread to other parts of the body)
   2. Cutaneous melanoma (a type of skin cancer)
   3. Advanced renal cell carcinoma (a type of kidney cancer)
   4. Unresectable or metastatic colorectal cancer (type of digestive tract cancer that cannot be completely removed by surgery or has spread to other parts of the body)
   5. Unresectable or metastatic hepatocellular carcinoma (a type of liver cancer that cannot be completely removed by surgery or has spread to other parts of the body)
   6. Metastatic or recurrent non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body or has returned)
   7. Unresectable (cannot be removed by surgery) malignant pleural mesothelioma (a tumor of the tissue that has spread and lines the lungs, stomach, heart, and other organs)
   8. Unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC: a type of digestive cancer that cannot be removed by surgery or has spread to other parts of the body)

B. If you have unresectable or metastatic melanoma, approval also requires:
   1. You are 12 years of age or older
   2. Yervoy will be used as a single medication OR in combination with Opdivo (nivolumab)

C. If you have cutaneous melanoma, approval also requires:
   1. You are 18 years of age or older
   2. Yervoy will be used for adjuvant (add-on) treatment
   3. There is pathologic (disease) involvement of regional lymph nodes of more than 1mm
   4. You have undergone complete resection (surgery to completely remove cancer), including total lymphadenectomy (lymph glands are surgically removed)

D. If you have advanced renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Yervoy will be used in combination with Opdivo (nivolumab)
   3. You have intermediate or poor risk disease

E. If you have unresectable or metastatic colorectal cancer, approval also requires:
   1. You are 12 years of age or older
   2. Yervoy will be used in combination with Opdivo (nivolumab)
   3. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)

(Initial denial text continued on next page)

IPILIMUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Yervoy will be used in combination with Opdivo (nivolumab) as first-line treatment
   b. Yervoy will be used in combination with Opdivo (nivolumab), AND you have previously been treated with Nexavar (sorafenib)

G. If you have metastatic or recurrent non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of protein) genomic tumor aberrations (types of gene mutations)
3. You meet ONE of the following:
   a. **For metastatic NSCLC,** Yervoy will be used in combination with Opdivo (nivolumab) AND your tumor expresses programmed death-ligand 1 (PD-L1: type of protein) (at least 1%), as determined by an FDA (Food and Drug Administration)-approved test
   b. **For metastatic or recurrent NSCLC,** Yervoy will be used in combination with Opdivo (nivolumab) and 2 cycles of platinum-doublet chemotherapy (type of cancer medication)

H. If you have unresectable malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Yervoy will be used in combination with Opdivo (nivolumab)

I. If you have unresectable advanced or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. Yervoy will be used in combination with Opdivo (nivolumab)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IPILIMUMAB BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of unresectable or metastatic melanoma, advanced renal cell carcinoma, unresectable or metastatic colorectal cancer, unresectable or metastatic hepatocellular carcinoma, metastatic/recurrent non-small cell lung cancer (NSCLC), unresectable malignant pleural mesothelioma, or unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of cutaneous melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - Yervoy will be used for adjuvant treatment
   - There is NO evidence of disease recurrence (defined as the appearance of one or more new melanoma lesions: local, regional or distant metastasis)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IPILIMUMAB (Yervoy)** requires the following rule(s) be met for renewal:
   A. You have cutaneous melanoma (a type of skin cancer)
   B. Yervoy will be used for adjuvant (add-on) treatment
   C. You do NOT have evidence of disease recurrence (defined as the appearance of one or more new melanoma lesions: local, regional or distant metastasis [cancer has spread from original site])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Fabhalta will NOT be used concurrently with a C5 complement inhibitor (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor D inhibitor (e.g., Voydeya [danicopan])

   If yes, **approve for 4 months by HICL or GPI-10.**
   If no, continue to #2.

IPTACOPAN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk of rapid disease progression (e.g., urine protein-to-creatinine ratio [UPCR] of at least 1.5 g/g)
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by renal biopsy
   - The patient has an eGFR of at least 20 mL/min/1.73 m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes

   If yes, **approve for 9 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by renal biopsy
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)
   - The patient has a urine-protein creatine ratio (UPCR) of at least 1 g/g
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes
   - Fabhalta will NOT be used concurrently with another complement inhibitor (e.g., Empaveli [pegcetacoplan]) for the treatment of C3G

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

IPTACOPAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IPTACOPAN (Fabhalta)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
   3. Complement 3 glomerulopathy (C3G: a type of kidney disease)

B. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   3. Your PNH diagnosis is confirmed by flow cytometry (a type of lab test) that shows ALL of the following:
      a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
      b. PNH granulocyte clone size of at least 10%
   4. You will NOT use Fabhalta concurrently (at the same time) with a C5 complement inhibitor (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor D inhibitor (such as Voydeya [danicopan])

C. If you have primary immunoglobulin A nephropathy, approval also requires:
   1. You are 18 years of age or older
   2. You are at risk of rapid disease progression (such as a urine protein-to-creatinine ratio [UPCR: test that measures the amount of protein in urine] of at least 1.5 g/g)
   3. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
   4. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
   5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 20 mL/min/1.73 m(2)
   6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys such as losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes

(Initial denial text continued on next page)

IPTACOPAN (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have complement 3 glomerulopathy, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
3. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
4. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
5. You have a urine protein-to-creatinine ratio (UPCR: test that measures the amount of protein in urine) of at least 1 g/g
6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys such as losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes
7. You will NOT use Fabhalta concurrently (at the same time) with another complement inhibitor (such as Empaveli [pegcetacoplan]) for the treatment of complement 3 glomerulopathy (a type of kidney disease)

PRIOR AUTHORIZATION GUIDELINES

IPTACOPAN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) **AND** meet **ALL** of the following criteria?
   - The patient experienced clinical benefit while on Fabhalta (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [LDH] and hemoglobin levels) compared to baseline
   - Fabhalta will NOT be used concurrently with a C5 complement inhibitor (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor D inhibitor (e.g., Voydeya [danicopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) **AND** meet the following criterion?
   - The patient has improved or stable kidney function compared to baseline OR has a reduction in proteinuria

   If yes, **approve for 9 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) and meet **ALL** of the following criteria?
   - The patient has improved or stable kidney function compared to baseline OR has a reduction in proteinuria
   - Fabhalta will NOT be used concurrently with another complement inhibitor (e.g., Empaveli [pegcetacoplan]) for the treatment of C3G

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

IPTACOPAN (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IPTACOPAN (Fabhalta)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
   3. Complement 3 glomerulopathy (C3G: a type of kidney disease)

B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
   1. You have had clinical benefit while on Fabhalta (such as a reduction in the number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [LDH: a type of enzyme] and hemoglobin [type of protein in red blood cells] levels) compared to baseline (before treatment)
   2. You will NOT use Fabhalta concurrently (at the same time) with a C5 complement inhibitor (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor D inhibitor (such as Voydeya [danicopan])

C. If you have primary immunoglobulin A nephropathy, renewal also requires:
   1. You have improved or stable kidney function compared to baseline OR you have a reduction (decrease) in proteinuria (increased levels of protein in urine)

D. If you have complement 3 glomerulopathy, renewal also requires:
   1. You have improved or stable kidney function compared to baseline OR you have a reduction (decrease) in proteinuria (increased levels of protein in urine)
   2. You will NOT use Fabhalta concurrently (at the same time) with another complement inhibitor (such as Empaveli [pegcetacoplan]) for the treatment of complement 3 glomerulopathy (a type of kidney disease)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Fabhalta.

IPTACOPAN (PART D)

For Part D use only:

IPTACOPAN (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PAROXYSMAL NOCTURNAL HEMOGLOBINURIA (PNH): DIAGNOSIS CONFIRMED VIA FLOW CYTOMETRY BY DEMONSTRATING: 1) AT LEAST TWO DIFFERENT GPI PROTEIN DEFICIENCIES ON AT LEAST TWO CELL LINEAGES, AND 2) PNH GRANULOCYTE CLONE SIZE OF AT LEAST 10 PERCENT. PRIMARY IMMUNOGLOBULIN A NEPHROPATHY (IGAN): 1) DIAGNOSIS CONFIRMED BY A RENAL BIOPSY, AND 2) EGFR OF AT LEAST 20 ML/MIN/1.73 M2. COMPLEMENT 3 GLOMERULOPATHY (C3G): 1) DIAGNOSIS CONFIRMED BY RENAL BIOPSY, 2) URINE-PROTEIN CREATINE RATIO (UPCR) OF AT LEAST 1 G/G, AND 3) EGFR OF AT LEAST 30 ML/MIN/1.73 M2.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PNH: PRESCRIBED BY OR IN CONSULTATION WITH A HEMATOLOGIST. PRIMARY IGAN, C3G: PRESCRIBED BY OR IN CONSULTATION WITH A NEPHROLOGIST.
Coverage Duration	INITIAL/RENEWAL: PNH: 4 MOS/12 MOS. PRIMARY IGAN: 9 MOS/9 MOS. C3G: 6 MOS/12 MOS.
Other Criteria	INITIAL: PNH: NO CONCURRENT USE WITH C5 COMPLEMENT INHIBITOR, C3 COMPLEMENT INHIBITOR, OR FACTOR D INHIBITOR. PRIMARY IGAN: TRIAL AND CONTINUATION OF AN ACE INHIBITOR OR ARB AT MAXIMUM TOLERATED DOSE FOR AT LEAST 3 MONTHS OR CONTRAINDICATION TO BOTH CLASSES. C3G: 1) TRIAL AND CONTINUATION OF AN ACE INHIBITOR OR ARB AT MAXIMUM TOLERATED DOSE FOR AT LEAST 3 MONTHS OR CONTRAINDICATION TO BOTH CLASSES, AND 2) NO CONCURRENT USE WITH ANOTHER COMPLEMENT INHIBITOR FOR C3G. RENEWAL: PNH: 1) CLINICAL BENEFIT WHILE ON FABHALTA COMPARED TO BASELINE, AND 2) NO CONCURRENT USE WITH C5 COMPLEMENT INHIBITOR, C3 COMPLEMENT INHIBITOR, OR FACTOR D INHIBITOR. PRIMARY IGAN: IMPROVED OR STABLE KIDNEY FUNCTION COMPARED TO BASELINE OR REDUCTION IN PROTEINURIA. C3G: 1) IMPROVED OR STABLE KIDNEY FUNCTION COMPARED TO BASELINE OR REDUCTION IN PROTEINURIA, AND 2) NO CONCURRENT USE WITH ANOTHER COMPLEMENT INHIBITOR FOR C3G.

ISATUXIMAB-IRFC BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ISATUXIMAB-IRFC	SARCLISA	46389		GPI-10 (2135403320)	BRAND = SARCLISA

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa will be used in combination with Pomalyst (pomalidomide) and dexamethasone
   - The patient has received at least two prior therapies including Revlimid (lenalidomide) and a proteasome inhibitor (e.g., Ninlaro [ixazomib], Kyprolis [carfilzomib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa will be used in combination with Kyprolis (carfilzomib) and dexamethasone
   - The patient has received one to three prior lines of therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

ISATUXIMAB-IRFC BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have newly diagnosed multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa will be used in combination with Velcade (bortezomib), Revlimid (lenalidomide) and dexamethasone
   - The patient is not eligible for autologous stem cell transplant (ASCT)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ISATUXIMAB-IRFC (Sarclisa)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Multiple myeloma (type of blood cancer)
      2. Relapsed or refractory multiple myeloma (type of blood cancer that has returned or no longer responds to treatment)

   B. If you have multiple myeloma, approval also requires:
      1. You are 18 years of age or older
      2. Sarclisa will be used in combination with Pomalyst (pomalidomide) and dexamethasone
      3. You have received at least two prior therapies including Revlimid (lenalidomide) and a proteasome inhibitor (such as Ninlaro [ixazomib], Kyprolis [carfilzomib])

   C. If you have relapsed or refractory multiple myeloma, approval also requires:
      1. You are 18 years of age or older
      2. Sarclisa will be used in combination with Kyprolis (carfilzomib) and dexamethasone
      3. You have received one to three prior lines of therapy

   D. If you have newly diagnosed multiple myeloma, approval also requires:
      1. You are 18 years of age or older
      2. Sarclisa will be used in combination with Velcade (bortezomib), Revlimid (lenalidomide) and dexamethasone
      3. You are not eligible for autologous stem cell transplant (ASCT: a type of treatment that uses your own healthy blood cells)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Kalydeco will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient is NOT homozygous for the *F508del* mutation in the cystic fibrosis transmembrane conductance regulator (CFTR) gene
   - The patient has a responsive mutation in the CFTR gene

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

IVACAFTOR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IVACAFTOR (Kalydeco)** requires the following rule(s) be met for approval:

A. You have cystic fibrosis (CF: a type of lung disorder)
B. You are 1 month of age or older
C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis (CF) expert
D. You will NOT use Kalydeco concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
E. You are NOT homozygous (have two copies of the same gene) for the F508del mutation (abnormal change) in the cystic fibrosis transmembrane conductance regulator (CFTR) gene
F. You have responsive mutation in the CFTR gene

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IVACAFTOR (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in clinical status
   - Kalydeco will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IVACAFTOR (Kalydeco)** requires the following rule(s) be met for renewal:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You have experienced an improvement in your clinical status
   C. You will NOT use Kalydeco concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet **ALL** of the following criteria?
   - The patient has newly diagnosed AML
   - Tibsovo will be used in combination with azacitidine (Onureg) or as monotherapy
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient is 75 years of age or older
   - The patient is 18 years of age or older AND has comorbidities that prevent the use of intensive induction chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

IVOSIDENIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of relapsed or refractory acute myeloid leukemia (AML) (ICD-10 C92.02, C92.00) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of myelodysplastic syndromes (MDS) (ICD-10 Group D46) and meet **ALL** of the following criteria?
   - The patient has relapsed or refractory MDS
   - The patient is 18 years of age or older
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of cholangiocarcinoma (ICD-10 C22.1) and meet **ALL** of the following criteria?
   - The patient has locally advanced or metastatic cholangiocarcinoma
   - The patient is 18 years of age or older
   - The patient's cancer has an isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test
   - The patient's cancer has been previously treated

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

IVOSIDENIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IVOSIDENIB (Tibsovo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Acute myeloid leukemia (AML: a type of blood cancer)
   2. Relapsed or refractory acute myeloid leukemia (AML: a type of blood cancer that has returned or has not responded to treatment)
   3. Myelodysplastic syndromes (MDS: a type of blood cancer)
   4. Cholangiocarcinoma (bile duct cancer)

B. If you have acute myeloid leukemia, approval also requires:
   1. You have newly-diagnosed acute myeloid leukemia
   2. Tibsovo will be used in combination with azacitidine (Onureg) OR as monotherapy (one drug treatment)
   3. Your cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation (a type of enzyme mutation that can be treated with Tibsovo), as detected by a Food and Drug Administration (FDA)-approved test
   4. You meet ONE of the following:
      a. You are 75 years of age or older
      b. You are 18 years of age or older AND have comorbidities (additional diseases) that prevent the use of intensive induction chemotherapy (start of a type of cancer treatment)

C. If you have relapsed or refractory acute myeloid leukemia, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation (a type of enzyme mutation that can be treated with Tibsovo), as detected by a Food and Drug Administration (FDA)-approved test

D. If you have myelodysplastic syndromes, approval also requires:
   1. You have relapsed or refractory (cancer that has returned or has not responded to treatment) myelodysplastic syndrome
   2. You are 18 years of age or older
   3. Your cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation (a type of enzyme mutation that can be treated with Tibsovo), as detected by a Food and Drug Administration (FDA)-approved test

(Denial text continued on next page)

IVOSIDENIB (PART D)

GUIDELINES FOR USE (CONTINUED)

E. If you have cholangiocarcinoma, approval also requires:

1. You have locally advanced or metastatic (cancer that has spread from where it started to nearby tissue/lymph nodes or to other parts of the body) cholangiocarcinoma
2. You are 18 years of age or older
3. Your cancer has an isocitrate dehydrogenase-1 (IDH1) mutation (type of enzyme mutation), as detected by a Food and Drug Administration (FDA)-approved test
4. Your cancer has been previously treated

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is a candidate for phototherapy or systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira[adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #3.

IXEKIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Selarsdi /Yesintek /ustekinumab-aauz, Otezla (apremilast), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira[adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Orencia (abatacept)
     - Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #4.

IXEKIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 excluding Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Cimzia [certolizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient has C-reactive protein (CRP) levels above the upper limit of normal OR has sacroiliitis on magnetic resonance imaging (MRI)
   - The patient had a trial of or contraindication to TWO of the preferred agents:
     - Cosentyx (secukinumab)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Cimzia (certolizumab pegol)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

IXEKIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **IXEKIZUMAB (Taltz)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: type of spine pain that does not show any visible damage on X-ray)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are a candidate for phototherapy (light therapy) or systemic therapy (therapy that travels through the entire body)
   2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
   3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, scalp, or genital area
   4. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
   5. You meet ONE of the following:
      a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Selarsdi /Yesintek /ustekinumab-aauz, Otezla (apremilast), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)
      b. You are 18 years of age or older AND have tried or have a contraindication to TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

(Initial denial text continued on next page)

IXEKIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Selarsdi /Yesintek /ustekinumab-aauz
   d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   f. Skyrizi (risankizumab-rzaa)
   g. Tremfya (guselkumab)
   h. Orencia (abatacept)
   i. Otezla (apremilast)

(Initial denial text continued on next page)

IXEKIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cosentyx (secukinumab)
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. Your C-reactive protein (CRP: a measure of inflammation) levels are above the upper limit of normal, OR you have sacroiliitis (inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI)
4. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Cimzia [certolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the preferred medications:
   a. Cosentyx (secukinumab)
   b. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Cimzia (certolizumab pegol)

IXEKIZUMAB (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira[adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira[adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 excluding Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

IXEKIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Cimzia [certolizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **IXEKIZUMAB (Taltz)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Non-radiographic axial spondyloarthritis (nr-axSpA: type of spine pain that does not show any visible damage on X-rays)

   B. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

IXEKIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have non-radiographic axial spondyloarthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Cimzia [certolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis

LACOSAMIDE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of primary generalized tonic-clonic seizures (ICD-10 Group G40.3) and meet **ALL** of the following criteria?
   - The patient weighs at least 50 kg (110 lbs.)
   - Motpoly XR will be used as adjunctive treatment
   - The patient had a trial of or contraindication to TWO generic antiepileptic agents (e.g., lacosamide IR, carbamazepine, divalproex sodium, lamotrigine, levetiracetam IR, topiramate, valproic acid)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LACOSAMIDE (Motpoly XR)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Partial-onset seizures (a type of seizure)
      2. Primary generalized tonic-clonic seizures (a type of seizure)
   B. If you have partial-onset seizures, approval also requires:
      1. You weigh at least 50 kilograms (110 pounds)
      2. You have tried or have a contraindication to (harmful for you to use) TWO generic anti-seizure medications (such as lacosamide immediate-release, carbamazepine, divalproex sodium, gabapentin, lamotrigine, levetiracetam immediate-release or extended-release, oxcarbazepine, tiagabine, topiramate, valproic acid, zonisamide)
   C. If you have primary generalized tonic-clonic seizures, approval also requires:
      1. You weigh at least 50 kilograms (110 pounds)
      2. Motpoly XR will be used as adjunctive (add-on) treatment
      3. You have tried or have a contraindication to (harmful for you to use) TWO generic anti-seizure medications (such as lacosamide immediate-release, carbamazepine, divalproex sodium, lamotrigine, levetiracetam immediate-release, topiramate, valproic acid)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LAMOTRIGINE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LAMOTRIGINE (Subvenite)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Partial-onset seizures (a type of seizure)
   2. Primary generalized tonic-clonic (PGTC) seizures (a type of seizure)
   3. Generalized seizures of Lennox-Gastaut syndrome (a type of seizure disorder in young children)
   4. Bipolar I disorder (a type of mood disorder)

B. If you have partial-onset seizures, approval also requires ONE of the following:
   1. You will use Subvenite as adjunctive (add-on) therapy and meet ALL of the following:
      a. You are 2 years of age or older
      b. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets
   2. You will use Subvenite as monotherapy (one medication treatment) and meet ALL of the following:
      a. You are 16 years of age or older
      b. You are receiving treatment with carbamazepine, phenytoin, phenobarbital, primidone, or valproate as a single antiepileptic medication (a type of medication used to treat epilepsy or seizures) but you will switch to Subvenite
      c. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

C. If you have primary generalized tonic-clonic seizures or generalized seizures, approval also requires:
   1. You are 2 years of age or older
   2. You will use Subvenite as adjunctive (add-on) therapy
   3. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

D. If you have bipolar I disorder, approval also requires:
   1. You will use Subvenite for maintenance treatment
   2. You are receiving treatment with standard therapy (such as olanzapine, valproate, lithium) for acute mood episodes (depression, mania, hypomania, mixed episodes [types of mood disorders])
   3. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Takhzyro will be used for prophylaxis against HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Takhzyro will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

LANADELUMAB-FLYO (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
   - The patient has Type III HAE

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LANADELUMAB-FLYO (Takhzyro)** requires the following rule(s) be met for approval:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You are 2 years of age or older
   C. Takhzyro will be used for the prevention of hereditary angioedema attacks
   D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
   E. You will NOT use Takhzyro concurrently (at the same time) with an alternative preventive medication for HAE attacks (such as Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii])
   F. You meet ONE of the following:
      1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
      2. You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LAROTRECTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LAROTRECTINIB (Vitrakvi)** requires the following rule(s) be met for approval:

A. You have a solid tumor (abnormal mass)
B. Your tumor has a neurotrophic receptor tyrosine kinase (NTRK: type of enzyme) gene fusion without a known acquired resistance mutation (you have a type of enzyme that does not have a mutation), as detected by a Food and Drug Administration (FDA)-approved test
C. Your tumor is metastatic (spread to another part of body) or surgical resection (removal) is likely to result in severe morbidity (illness)
D. You have no satisfactory alternative treatments or your condition has gotten worse after treatment
E. If the request is for Vitrakvi oral solution, approval also requires ONE of the following:
    1. You have tried Vitrakvi capsules
    2. You are unable to take the capsule formulation

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Is the request for the acute treatment of migraines (ICD Group G43 except G43.7 and G43.E) and the patient meets **ONE** of the following criteria?
   - The patient has experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (e.g., Migraine Assessment of Current Therapy [Migraine-ACT])
   - Therapy works consistently in majority of migraine attacks

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LASMIDITAN (Reyvow)** requires the following rule(s) be met for renewal:
   A. The request is for acute (quick onset) treatment of migraines (a type of headache)
   B. You meet ONE of the following:
      1. You have experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (assessment tool used to help guide treatment such as Migraine Assessment of Current Therapy [MIGRAINE-ACT])
      2. Treatment works consistently in majority of migraine attacks

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Reyvow.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient weighs at least 40 kg (88 lbs)
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Ebglyss will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g.,Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Dupixent (dupilumab), Rinvoq (upadacitinib)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEBRIKIZUMAB-LBKZ (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a trial of or contraindication to **ONE** of the following?
   - High potency topical corticosteroid (e.g., halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Topical PDE-4 inhibitor (e.g., crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., ruxolitinib [Opzelura])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **LEBRIKIZUMAB-LBKZ (Ebglyss)** requires the following rule(s) be met for approval:
   A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
   B. You are 12 years of age or older
   C. You weigh at least 40 kilograms (88 pounds)
   D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
   E. You will NOT use Ebglyss concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   F. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Dupixent (dupilumab), Rinvoq (upadacitinib)
   G. You have tried or have a contraindication to (harmful for you to use) ONE of the following:
      1. High potency topical corticosteroid (such as halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
      2. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
      3. Topical PDE-4 inhibitor (such as crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
      4. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
      5. Topical JAK inhibitor (such as ruxolitinib [Opzelura])

LECANEMAB-IRMB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LECANEMAB-IRMB (Leqembi IGLIK)** requires the following rule(s) be met for approval:

A. You have Alzheimer's disease (a progressive brain disorder that slowly destroys memory and thinking skills)
B. You have mild cognitive impairment (decreased ability to process, understand, store and remember information) or mild dementia (a type of memory disorder) due to Alzheimer's disease
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), geriatrician (a doctor who specializes in the health care of elderly individuals), or psychiatrist (a type of mental health doctor)
D. You have the presence of amyloid-beta plaques (an indicator of Alzheimer's disease)
E. You have a Clinical Dementia Rating (CDR: a tool for evaluating memory loss) global score of 0.5 or 1.0, OR a Mini Mental Status Exam (MMSE: a test used to evaluate memory, thinking, and understanding) score of 22 to 30
F. You have had a baseline brain MRI (magnetic resonance imaging) within one year prior to treatment
G. You do NOT have a history of a clotting disorder (condition that interferes with the blood's ability to clot)
H. You are NOT concurrently (at the same time) using any anticoagulant or antiplatelet therapy (such as Xarelto [rivaroxaban], Pradaxa [dabigatran], Plavix [clopidogrel], Effient [prasugrel]), except for aspirin at 81mg daily or less

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE (CONTINUED)

4. Is the patient treatment-naïve and meets **ALL** of the following criteria?
   - The patient has genotype 1 or 4
   - The patient does not have cirrhosis
   - The patient has an HCV RNA level of less than 6 million IU/mL

   If yes, **approve for 8 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient treatment-naïve and meets **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has compensated cirrhosis (Child-Pugh A)
   - The patient has decompensated cirrhosis (Child-Pugh B or C) AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, does not have cirrhosis, AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, has compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have genotype 1 infection and meet **ALL** of the following criteria?
   - The patient is treatment-experienced (previously failed a peginterferon alfa-based regimen)
   - The patient has compensated cirrhosis (Child-Pugh A)

   If yes, **approve for 24 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

LEDIPASVIR/SOFOSBUVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the patient treatment-experienced (previously failed a peginterferon alfa-based regimen) and meets **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has genotype 4, 5, or 6 infection AND has compensated cirrhosis (Child-Pugh A)
   - The patient has genotype 1 or 4 infection, is post-liver transplant, does not have cirrhosis, AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, has compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has decompensated cirrhosis (Child-Pugh B or C)
   - Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient have decompensated cirrhosis and meet **ONE** of the following criteria?
   - The patient has a contraindication to ribavirin (ribavirin ineligible)
   - The patient failed prior treatment with a sofosbuvir-based regimen (e.g., Epclusa [sofosbuvir/velpatasvir]) AND Harvoni will be used with ribavirin
   - The patient is post-liver transplant, treatment-experienced, AND Harvoni will be used with ribavirin

   If yes, **approve for 24 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

LEDIPASVIR/SOFOSBUVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

10. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

    If yes, **approve as indicated per guidance in AASLD/IDSA.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **LEDIPASVIR/SOFOSBUVIR (Harvoni)** requires the following rule(s) be met for approval:

    A. You have chronic hepatitis C virus, (HCV: liver inflammation caused by a type of virus)
    B. You are 3 years of age or older
    C. You have genotype 1, 4, 5, or 6 hepatitis C infection (types of hepatitis C virus)
    D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
    E. You will NOT use Harvoni concurrently (at the same time) with any of the following medications: carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin (rifapentine), rosuvastatin, Aptivus (tipranavir)/ritonavir, Sovaldi (sofosbuvir; as a single agent), Epclusa (velpatasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), Mavyret (pibrentasvir/glecaprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)
    F. If you are treatment-naïve (no prior treatment), approval also requires ONE of the following:
        1. You do not have cirrhosis (liver damage and scarring)
        2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
        3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage) AND Harvoni will be used with ribavirin unless you have a contraindication to (harmful for you to use) ribavirin
        4. You have genotype 1 or 4, received a liver transplant (replaced your liver), do not have cirrhosis, AND Harvoni will be used with ribavirin
        5. You have genotype 1 or 4, received a liver transplant, have compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

    (Denial text continued on next page)

LEDIPASVIR/SOFOSBUVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

G. If you are treatment-experienced (failed prior treatment), approval also requires ONE of the following:

1. You do not have cirrhosis (liver damage and scarring) AND were previously treated with a peginterferon alfa-based regimen
2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) AND were previously treated with a peginterferon alfa-based regimen
3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage) AND Harvoni will be used with ribavirin, unless you have a contraindication to (harmful for you to use) ribavirin
4. You have genotype 1 or 4 infection, received a liver transplant (replaced your liver), do not have cirrhosis, had prior treatment with a peginterferon alfa-based regimen, AND Harvoni will be used with ribavirin
5. You have genotype 1 or 4 infection, received a liver transplant, have compensated cirrhosis (Child-Pugh A), had prior treatment with a peginterferon alfa-based regimen, AND Harvoni will be used with ribavirin
6. You have decompensated cirrhosis, failed prior treatment with a sofosbuvir-based regimen (such as Epclusa [sofosbuvir/velpatasvir]) AND Harvoni will be used with ribavirin
7. You have received a liver transplant, have decompensated cirrhosis, AND Harvoni will be used with ribavirin

H. Harvoni will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of community-acquired bacterial pneumonia (CABP) (ICD-10 J15.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's CABP infection is caused by any of the following susceptible microorganisms: *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is therapy prescribed by or in consultation with an infectious disease (ID) specialist?

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

LEFAMULIN (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Xenleta

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEFAMULIN (Xenleta)** requires the following rule(s) be met for approval:
   A. You have community-acquired bacterial pneumonia (type of lung infection)
   B. You are 18 years of age or older
   C. Your infection is caused by any of the following susceptible microorganisms (bacteria that the drug can kill): *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*

LEFAMULIN (PART D)

GUIDELINES FOR USE (CONTINUED)

D. You meet ONE of the following criteria:
   1. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   2. Your antimicrobial susceptibility test (lab test that shows what drugs work on which bacteria) shows ALL of the following:
      a. The bacteria at the infection site are resistant (drug will not work for that organism) to TWO standard of care medications for community-acquired bacterial pneumonia (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)
      b. Xenleta will work against the bacteria
   3. If antimicrobial susceptibility results (lab test that shows what drugs work on which bacteria) are not available, we require you have tried or have a contraindication to (harmful for you to use) TWO standard of care medications for community-acquired bacterial pneumonia (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LENALIDOMIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LENALIDOMIDE (Revlimid)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Multiple myeloma (a type of blood cancer)
   2. Anemia due to a myelodysplastic syndrome (a type of blood cancer)
   3. Mantle cell lymphoma (a type of blood cancer)
   4. Follicular lymphoma (a type of blood cancer)
   5. Marginal zone lymphoma (a type of blood cancer)

B. If you have multiple myeloma, approval also requires:
   1. You are 18 years of age or older

C. If you have myelodysplastic syndrome, approval also requires:
   1. You are 18 years of age or older
   2. Your myelodysplastic syndrome is associated with a deletion 5q abnormality (a type of gene mutation)

D. If you have mantle cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have relapsed or progressed (disease has returned or worsened) after two prior therapies, one of which included Velcade (bortezomib)

E. If you have follicular lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously been treated for follicular lymphoma
   3. The requested medication will be used in combination with a rituximab product (type of cancer drug)

F. If you have marginal zone lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously been treated for marginal zone lymphoma
   3. The requested medication will be used in combination with a rituximab product (type of cancer drug)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LENVATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LENVATINIB (Lenvima)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Differentiated thyroid cancer (DTC: a type of thyroid cancer)
   2. Advanced renal cell carcinoma (RCC: a type of kidney cancer)
   3. Hepatocellular carcinoma (HCC: a type of liver cancer)
   4. Advanced endometrial carcinoma (EC: a type of uterus cancer)

B. If you have differentiated thyroid cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your thyroid cancer is locally recurrent (re-appears in the same spot) or metastatic (has spread to other parts of the body)
   3. Your thyroid cancer is progressive (getting worse)
   4. Your thyroid cancer is refractory (has not responded) to radioactive iodine therapy

C. If you have advanced renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. Lenvima will be used in combination with pembrolizumab (Keytruda)
      b. Lenvima will be used in combination with everolimus (Afinitor) AND you have tried one prior anti-angiogenic therapy (such as Sutent [sunitinib], Votrient [pazopanib], Nexavar [sorafenib])

D. If you have hepatocellular carcinoma, approval also requires:
   1. Your cancer is unresectable (cannot be removed by surgery)

E. If you have advanced endometrial carcinoma, approval also requires:
   1. Lenvima will be used in combination with pembrolizumab (Keytruda)
   2. Your cancer is mismatch repair proficient (pMMR: your tumor has normal expression of types of protein) OR is not microsatellite instability-high (MSI-H: a type of mutation), as determined by a Food and Drug Administration (FDA)-approved test
   3. You have experienced disease progression (worsening) following prior systemic therapy (treatment that targets the entire body)
   4. You are not a candidate for curative (to cure) surgery or radiation

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

LETERMOVIR (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LETERMOVIR	PREVYMIS	44622		GPI-10 (1220004500)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the request for prophylaxis of cytomegalovirus (CMV) infection/disease in an allogeneic hematopoietic stem cell transplant (HSCT) recipient and the patient meets **ALL** of the following criteria?
   - The patient is 6 months of age or older AND weighs at least 6 kg (13.2 lbs)
   - The patient is a CMV-seropositive recipient [R+] of an allogeneic HSCT
   - The patient will start or started Prevymis between Day 0 and Day 28 post-transplant (before or after engraftment)

   If yes, continue #2.
   If no, continue to #4.

2. Is the patient not at risk for late CMV infection and disease **AND** meets the following criterion?
   - The patient will not receive Prevymis beyond 100 days post-transplant

   If yes, **approve for 4 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the patient at risk for late CMV infection and disease **AND** meets the following criterion?
   - The patient will not receive Prevymis beyond 200 days post-transplant

   If yes, **approve for 7 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LETERMOVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the request for prophylaxis of cytomegalovirus (CMV) disease in a kidney transplant recipient and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older AND weighs at least 40 kg (88 lbs)
   - The patient is at high risk (i.e., donor is CMV seropositive, recipient is CMV seronegative [D+/R-])
   - The patient will start or started Prevymis between Day 0 and Day 7 post-transplant
   - The patient will not receive Prevymis beyond 200 days post-transplant

   If yes, **approve for 7 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LETERMOVIR (Prevymis)** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Prophylaxis (prevention) of cytomegalovirus (CMV: a type of virus) infection/disease in an allogeneic hematopoietic stem cell transplant (HSCT: cells transplanted from a matching donor) recipient
      2. Prophylaxis of cytomegalovirus (CMV) disease in a kidney transplant recipient

   B. If the request is for prophylaxis of cytomegalovirus infection/disease in an allogeneic hematopoietic stem cell transplant recipient, approval also requires:
      1. You are 6 months of age or older AND weigh at least 6 kilograms (13.2 pounds)
      2. You are a CMV-seropositive recipient [R+] of an allogeneic HSCT
      3. You will start or have started Prevymis between Day 0 and Day 28 post-transplant (before or after engraftment [a type of transplant])
      4. You meet ONE of the following:
         a. You are NOT at risk for late CMV infection and disease, AND you will not receive Prevymis beyond 100 days post (after)-transplant
         b. You are at risk for late CMV infection and disease, AND you will not receive Prevymis beyond 200 days post (after)-transplant

   (Denial text continued on next page)

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

2. Is the request for a female patient who meets **ALL** of the following criteria?
   - The patient has an elevated level of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for breast development and pubic hair growth

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

LEUPROLIDE-FENSOLVI BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a male patient who meets **ALL** of the following criteria?
   - The patient has an elevated level of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for genital development and pubic hair growth

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE-FENSOLVI** requires the following rule(s) be met for approval:
   A. You have central precocious puberty (CPP: early sexual development in children)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. If you are a female, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 8 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for breast development and pubic hair growth
   E. If you are a male, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 9 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for genital development and pubic hair growth

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

LEUPROLIDE-FENSOLVI BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The patient's Tanner staging at initial diagnosis has stabilized or regressed during three separate medical visits in the previous year
   - The patient has not reached the actual age which corresponds to current pubertal age

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE-FENSOLVI** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in children)
   B. Your Tanner staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis has stabilized or regressed (lowered) during three separate medical visits in the previous year
   C. You have not reached the actual age which corresponds to your current pubertal age

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Fensolvi. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

LEUPROLIDE-LUPRON DEPOT BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEUPROLIDE ACETATE	LUPRON DEPOT	21102		GPI-10 2140501010, 2140501015, 2140501020, 2140501025)	BRAND = LUPRON DEPOT

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 for all strengths under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 for all strengths under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

LEUPROLIDE-LUPRON DEPOT BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of advanced prostate cancer (ICD-10 C61)?

   If yes, **approve for 12 months for all strengths as follows:**
   - **Approve by GPID or GPI-14:**
     - **Lupron Depot 7.5 mg**
     - **Lupron Depot 22.5 mg**
     - **Lupron Depot 30 mg**
   - **Approve by NDC or GPI-14:**
     - **Lupron Depot 45 mg**

   If no, continue to #2.

LEUPROLIDE-LUPRON DEPOT BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of endometriosis (ICD-10 Group N80) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - The patient had a trial of or contraindication to a nonsteroidal anti-inflammatory drug (NSAID e.g., ibuprofen, meloxicam, naproxen) AND a progestin-containing preparation (e.g., combination hormonal contraceptive preparation, progestin-only therapy)
   - Lupron Depot will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Zoladex [goserelin], Synarel [nafarelin])
   - The patient has NOT received a total of 12 months of treatment with Lupron Depot per lifetime

   If yes, **approve for 6 months for all strengths as follows:**
   - **Lupron Depot 3.75 mg: Approve by GPID or GPI-14.**
   - **Lupron Depot 11.25 mg: Approve by NDC or GPI-14.**

   If no, continue to #3.

3. Does the patient have a diagnosis of uterine leiomyomata (fibroids) (ICD-10 Group D25) **AND** meet the following criterion?
   - Lupron Depot will be used concomitantly with iron therapy for the preoperative hematologic improvement of anemia caused by fibroids

   If yes, **approve for 3 months for all strengths as follows:**
   - **Lupron Depot 3.75 mg: Approve by GPID or GPI-14.**
   - **Lupron Depot 11.25 mg: Approve by NDC or GPI-14.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEUPROLIDE-LUPRON DEPOT BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **LEUPROLIDE-LUPRON DEPOT** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
   2. Endometriosis (condition affecting the uterus)
   3. Uterine leiomyomata (fibroids: noncancerous growth of the uterus)

B. If you have endometriosis, approval also requires:
   1. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
   2. You have tried or have a contraindication to (harmful for you to use) a nonsteroidal anti-inflammatory drug (NSAID: such as ibuprofen, meloxicam, naproxen) AND a progestin-containing preparation (such as combination hormonal contraceptive preparation, progestin-only therapy)
   3. Lupron Depot will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa [elagolix], Zoladex [goserelin], Synarel [nafarelin])
   4. You have NOT received a total of 12 months of treatment with Lupron Depot per lifetime

C. If you have uterine leiomyomata (fibroids), approval also requires:
   1. Lupron Depot will be used at the same time with iron therapy for the preoperative (before surgery) hematologic (blood) improvement of anemia (a type of blood condition) caused by fibroids (noncancerous growth of the uterus)

LEUPROLIDE-LUPRON DEPOT BvD (PART D)

RENEWAL CRITERIA

NOTE: For advanced prostate cancer or uterine leiomyomata (fibroids), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of endometriosis (ICD-10 Group N80) and meet **ALL** of the following criteria?
   - The patient has improvement of pain related to endometriosis while on therapy
   - The patient is receiving concomitant add-back therapy (i.e., combination estrogen-progestin or progestin-only contraceptive preparation)
   - Lupron Depot will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Zoladex [goserelin], Synarel [nafarelin])
   - The patient has NOT received a total of 12 months of treatment with Lupron Depot per lifetime

   If yes, **approve for 6 months for all strengths as follows:**
   - **Lupron Depot 3.75 mg: Approve by GPID or GPI-14.**
   - **Lupron Depot 11.25 mg: Approve by NDC or GPI-14.**

   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **LEUPROLIDE-LUPRON DEPOT** requires the following rule(s) be met for renewal:
   A. You have endometriosis (condition affecting the uterus)
   B. You experienced improvement of pain related to endometriosis while on therapy
   C. You are receiving add-back therapy at the same time (combination estrogen-progestin or progestin-only contraceptive preparation)
   D. Lupron Depot will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa [elagolix], Zoladex [goserelin], Synarel [nafarelin])
   E. You have NOT received a total of 12 months of treatment with Lupron Depot per lifetime

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of congenital or acquired hypothyroidism (ICD-10 E89.0, Group E03 except for ICD-10 E03.5) **AND** meet the following criterion?
   - The patient had a trial and failure of or contraindication to generic levothyroxine tablets

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of thyrotropin-dependent well-differentiated thyroid cancer (ICD-10 C73) and meet **ALL** of the following criteria?
   - Tirosint-Sol will be used as an adjunct to surgery and radioiodine therapy
   - The patient had a trial and failure of or contraindication to generic levothyroxine tablets

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LEVOTHYROXINE-TIROSINT-SOL (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LEVOTHYROXINE-TIROSINT-SOL** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Congenital (present from birth) or acquired hypothyroidism (low thyroid function)
   2. Thyrotropin (a type of thyroid hormone)-dependent well-differentiated thyroid cancer

B. If you have congenital or acquired hypothyroidism, approval also requires:
   1. You have tried and failed (medication did not work) or have a contraindication to (harmful for you to use) generic levothyroxine tablets

C. If you have thyrotropin-dependent well-differentiated thyroid cancer, approval also requires:
   1. Tirosint-Sol will be used as adjunct (add-on) to surgery and radioiodine therapy (a type of radiation therapy)
   2. You have tried and failed (medication did not work) or have a contraindication to (harmful for you to use) generic levothyroxine tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

L-GLUTAMINE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria?
   - The patient had at least 2 sickle cell crises in the past year (a sickle cell crises is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered narcotic or parenterally administered ketorolac, the occurrence of chest syndrome, priapism, or splenic sequestration)
   - The patient is having sickle-cell associated symptoms (e.g., pain, anemia) which are interfering with activities of daily living
   - The patient has a history of or has recurrent acute chest syndrome (ACS)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **L-GLUTAMINE (Endari)** requires the following rule(s) be met for approval:
   A. You have sickle cell disease (a type of blood disorder)
   B. You are 5 years of age or older
   C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   D. If you are 18 years of age or older, approval also requires ONE of the following:
      1. You had at least 2 sickle cell crises in the past year (a sickle cell crisis is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered [injected into the vein] narcotic [a class of drugs used to treat pain] or parenterally administered ketorolac, the occurrence of chest syndrome, priapism [prolonged erection of penis], or splenic sequestration [sickle-shaped blood cells trapped in spleen])
      2. You are having sickle-cell associated symptoms (such as pain, anemia [a type of blood condition]) which are interfering with activities of daily living
      3. You have a history of or have recurrent acute chest syndrome (ACS: chest pain, cough, fever, low oxygen level)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

L-GLUTAMINE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of sickle cell disease (ICD-10 Group D57) **AND** meet the following criterion?
   - The patient has maintained or experienced a reduction in acute complications of sickle cell disease (SCD) (e.g., number of sickle cell crises, hospitalizations, acute chest syndrome [ACS])

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **L-GLUTAMINE (Endari)** requires the following rule(s) be met for renewal:
   A. You have sickle cell disease (a type of blood disorder)
   B. You have maintained or experienced a reduction in acute (short-term) complications of sickle cell disease (such as the number of sickle cell crises, hospitalizations, acute chest syndrome [ACS: chest pain, cough, fever, low oxygen level])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LIDOCAINE OINTMENT TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LIDOCAINE	LIDOCAINE		30750	GPI-14 (90850060004210)	

These are TIRF-Like drugs requiring a payment determination for 'Part D' or 'Non-Part D'.

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, please process as follows:

   CSR NOTE: If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR4. If the caller is a pharmacy, please advise the pharmacy to bill the medication as part of the bundled dialysis facility payment or that the pharmacy contact the provider or member to submit a PA for further review.

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment and is not a Part D eligible drug. Please follow the process within the HQ notes and internal procedures for denial.

   If no, continue to #2.

LIDOCAINE OINTMENT TIRF (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

2. Is the request for **ONE** of the following?
   - Production of anesthesia of accessible mucous membranes of the oropharynx
   - As an anesthetic lubricant for intubation
   - Temporary relief of pain associated with minor burns, including sunburn, abrasions of the skin, and insect bites

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y', and approve for 12 months by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.** (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR4.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter an MCARE override**.'

LIDOCAINE OINTMENT TIRF (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LIDOCAINE OINTMENT** requires the following rule(s) be met for approval:

A. You do not have end stage renal disease (ESRD: a type of kidney disease) and are not on dialysis (process of removing excess water, toxins from the blood)
B. The request is for ONE of the following:
    1. Production of anesthesia (numbing) of accessible mucous membranes of the oropharynx (soft, pink, and moist lining at the back of the throat)
    2. As an anesthetic lubricant (a type of numbing, slippery gel) for intubation (placing a breathing tube)
    3. Temporary relief of pain associated with minor burns, including sunburn, abrasions of the skin (minor skin injury), and insect bites

RATIONALE

Prior authorization on lidocaine 5% ointment is required due to a high potential for non-Part D use. Lidocaine 5% ointment should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act. Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment. For further information, please refer to the Prescribing Information and/or Drug Monograph for topical lidocaine ointment.

PRIOR AUTHORIZATION GUIDELINES

LIDOCAINE-PRILOCAINE TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LIDOCAINE/PRILOCAINE	LIDOCAINE-PRILOCAINE	16196		GPI-10 (9085990290)	

These are TIRF-Like drugs requiring a payment determination for 'Part D' or 'Non-Part D'.

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, please process as follows:

   CSR Note: If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR4. If the caller is a pharmacy, please advise the pharmacy to bill the medication as part of the bundled dialysis facility payment or that the pharmacy contact the provider or member to submit a PA for further review.

   PAC Note: Please defer to a pharmacist for denial.

   Clinical specialist note: This medication is included in the bundled dialysis facility payment and is not a Part D eligible drug. Please follow the process within the HQ notes and internal procedures for denial.

   If no, continue to #2.

LIDOCAINE-PRILOCAINE TIRF (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The requested medication will be used on normal intact skin for local analgesia
   - The requested medication will be used on genital mucous membranes for superficial minor surgery and as pretreatment for infiltration anesthesia

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Part D Determination Override and diagnosis.** (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR4.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by HICL or GPI-10.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter an MCARE override**.'

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LIDOCAINE-PRILOCAINE** requires the following rule(s) be met for approval:
   A. You do not have end stage renal disease (ESRD: a type of kidney disease) and are not on dialysis (process of removing excess water, toxins from the blood)
   B. You meet ONE of the following:
      1. The requested medication will be used on normal intact (unbroken) skin for local analgesia (pain relief in a small area)
      2. The requested medication will be used on genital mucous membranes (soft, moist, pink, or red lining of the genital area) for superficial minor surgery (a type of simple procedure done on the top layers of the tissue) and as pretreatment (before treatment) for infiltration anesthesia (injection of medication to numb the treatment area)

LIDOCAINE-PRILOCAINE TIRF (PART D)

RATIONALE

Prior authorization on lidocaine-prilocaine cream is required due to a high potential for non-Part D use. Lidocaine-prilocaine cream should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act.
Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment. For further information, please refer to the prescribing information for lidocaine-prilocaine cream.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe binge eating disorder (ICD-10 F50.81)and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a psychiatrist
   - The patient has had at least 3 binge eating episodes per week for at least 3 months

   If yes, **approve all strengths for 3 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of attention deficit hyperactivity disorder (ADHD) (ICD-10 Group F90) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - The patient had a trial of or contraindication to ONE of the following long-acting stimulants: dextroamphetamine/amphetamine extended release (ER, XR) capsules, methylphenidate controlled delivery (CD) capsules, methylphenidate long acting (LA) capsules, methylphenidate ER tablets

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LISDEXAMFETAMINE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LISDEXAMFETAMINE (Vyvanse)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Attention deficit hyperactivity disorder (ADHD: a type of mental health disorder)
   2. Moderate to severe binge eating disorder (a type of eating disorder)

B. If you have attention deficit hyperactivity disorder, approval also requires:
   1. You are 6 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) ONE of the following long-acting stimulants: dextroamphetamine/amphetamine extended release (ER, XR) capsules, methylphenidate controlled delivery (CD) capsules, methylphenidate long acting (LA) capsules, methylphenidate ER tablets

C. If you have moderate to severe binge eating disorder, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a psychiatrist (a type of mental health doctor)
   3. You have had at least 3 binge eating events (episodes) per week for at least 3 months

LOMITAPIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 9 years of age
   - The patient is 10 years of age or older AND had a trial of Repatha (evolocumab)
   - The patient lacks functioning LDL receptors

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient is currently taking a high-intensity statin (i.e., atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily) AND has been taking it for a duration of at least 8 weeks
   - Given that the patient cannot tolerate a high-intensity statin (i.e., atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily), the patient is currently taking a maximally tolerated dose of any statin AND has been taking it for a duration of at least 8 weeks
   - The patient has an absolute contraindication to statin therapy (e.g., age, active decompensated liver disease, nursing female, pregnancy or plans to become pregnant, hypersensitivity reaction)
   - The patient has statin intolerance
   - The patient has tried rosuvastatin, atorvastatin, or statin therapy at any dose and has experienced skeletal-muscle related symptoms (e.g., myopathy)

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LOMITAPIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **LOMITAPIDE (Juxtapid)** requires the following rule(s) be met for approval:

A. You have homozygous familial hypercholesterolemia (HoFH: type of inherited high cholesterol)
B. You are 2 years of age or older
C. Your diagnosis is determined by meeting ONE of the following:
    1. Simon Broome diagnostic criteria (definite) (a tool for diagnosing homozygous familial hypercholesterolemia)
    2. Dutch Lipid Network (a tool for diagnosing homozygous familial hypercholesterolemia) criteria with a score of at least 8
    3. A clinical diagnosis based on a history of an untreated low density lipoprotein (LDL: bad cholesterol)-cholesterol level greater than 500 mg/dL AND you have either xanthoma (a type of skin condition) before 10 years of age or there is evidence of heterozygous familial hypercholesterolemia (HeFH: type of inherited high cholesterol) in both parents
D. Therapy is prescribed by or in consultation with a cardiologist (heart doctor), endocrinologist (hormone doctor), or lipidologist (cholesterol management doctor)
E. You have a low density lipoprotein cholesterol (LDL-C: bad cholesterol) level of at least 70 mg/dL while on maximally tolerated drug treatment
F. You meet ONE of the following:
    1. You are 2 to 9 years of age
    2. You are 10 years of age or older AND have tried Repatha (evolocumab)
    3. You do NOT have functional LDL (low density lipoprotein)-receptors (a type of protein)
G. You meet ONE of the following:
    1. You are currently taking a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily) AND have been taking it for a duration of at least 8 weeks
    2. You did not tolerate a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily), but you are currently taking a maximally tolerated dose of any statin AND have been taking it for a duration of at least 8 weeks
    3. You have an absolute contraindication to (harmful for you to use) statin therapy (such as age, active decompensated liver disease [symptoms related to liver damage], nursing female, pregnancy or plans to become pregnant, hypersensitivity [allergic] reaction)
    4. You have statin intolerance (side effect)
    5. You have tried rosuvastatin, atorvastatin, or statin therapy at any dose andexperienced skeletal-muscle related symptoms (such as myopathy [muscle disease])

For Part D use only:

LOMITAPIDE (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	HOMOZYGOUS FAMILIAL HYPERCHOLESTEROLEMIA (HOFH): 1) DIAGNOSIS DETERMINED BY: (A) DEFINITE SIMON BROOME DIAGNOSTIC CRITERIA, (B) DUTCH LIPID NETWORK CRITERIA SCORE OF AT LEAST 8, OR (C) CLINICAL DIAGNOSIS BASED ON A HISTORY OF AN UNTREATED LDL-C CONCENTRATION GREATER THAN 500 MG/DL TOGETHER WITH EITHER XANTHOMA BEFORE 10 YEARS OF AGE OR EVIDENCE OF HEFH IN BOTH PARENTS, AND 2) LDL-C LEVEL OF AT LEAST 70MG/DL WHILE ON MAXIMALLY TOLERATED DRUG TREATMENT.
Age Restrictions	N/A
Prescriber Restrictions	HOFH: PRESCRIBED BY OR IN CONSULTATION WITH A CARDIOLOGIST, ENDOCRINOLOGIST OR LIPIDOLOGIST.
Coverage Duration	12 MONTHS
Other Criteria	HOFH: 1) TRIAL OF REPATHA, WHERE AGES ALIGN, UNLESS THE PATIENT HAS NON-FUNCTIONING LDL RECEPTORS, AND 2) ONE OF THE FOLLOWING: (A) TAKING A HIGH-INTENSITY STATIN (I.E., ATORVASTATIN 40-80MG DAILY, ROSUVASTATIN 20-40MG DAILY) FOR A DURATION OF AT LEAST 8 WEEKS, (B) TAKING A MAXIMALLY TOLERATED DOSE OF ANY STATIN FOR A DURATION OF AT LEAST 8 WEEKS GIVEN THAT THE PATIENT CANNOT TOLERATE A HIGH-INTENSITY STATIN, (C) ABSOLUTE CONTRAINDICATION TO STATIN THERAPY (E.G., AGE, ACTIVE DECOMPENSATED LIVER DISEASE, NURSING FEMALE, PREGNANCY OR PLANS TO BECOME PREGNANT, HYPERSENSITIVITY REACTIONS), (D) STATIN INTOLERANCE, OR (E) TRIAL OF ROSUVASTATIN, ATORVASTATIN, OR STATIN THERAPY AT ANY DOSE AND HAS EXPERIENCED SKELETAL-MUSCLE RELATED SYMPTOMS (E.G., MYOPATHY).

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Hutchinson-Gilford Progeria Syndrome (HGPS) (ICD-10 E34.8) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a body surface area (BSA) of 0.39m(2) or above

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of processing-deficient Progeroid Laminopathies and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a body surface area (BSA) of 0.39m(2) or above
   - The patient has a heterozygous LMNA mutation with progerin-like protein accumulation OR homozygous or compound heterozygous ZMPSTE24 mutations

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See denial text at the end of the guideline.

LONAFARNIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LONAFARNIB (Zokinvy)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Hutchinson-Gilford Progeria Syndrome (HGPS: a rare genetic disorder)
   2. Processing-deficient Progeroid Laminopathies (a rare genetic disorder)
B. You are 1 year of age or older
C. You have a body surface area (BSA) of 0.39 meters squared or more
D. If you have processing-deficient Progeroid Laminopathies, approval also requires you have ONE of the following:
   1. Heterozygous LMNA (type of gene) mutation with progerin-like protein accumulation
   2. Homozygous or compound heterozygous ZMPSTE24 (type of gene) mutations

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age and weighs at least 11.5 kg (25.3 lbs)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

LONAPEGSOMATROPIN-TCGD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's GHD caused by a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months by HICL or GPI-10**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient's GHD confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months by HICL or GPI-10**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LONAPEGSOMATROPIN-TCGD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LONAPEGSOMATROPIN-TCGD (Skytrofa)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)

B. Skytrofa is NOT being used for any of the following:
   1. Athletic enhancement (to perform better in sports)
   2. Anti-aging purposes

C. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
   1. You are 1 to 17 years of age and weigh at least 11.5 kg (25.3 pounds)
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
   4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
   5. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)

(Initial denial text continued on next page)

LONAPEGSOMATROPIN-TCGD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you are an adult patient with growth hormone deficiency, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. Your diagnosis is caused by a congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests (tests that measure the body's ability to produce growth hormone):
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LONAPEGSOMATROPIN-TCGD (PART D)

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand) OR the patient has not completed prepubertal growth
   - The patient has shown improvement (increased height or increased growth velocity) while on therapy
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has achieved or maintained a response to therapy as evidenced by clinical treatment goals (e.g., improved body composition, lipid panel, bone health)
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

LONAPEGSOMATROPIN-TCGD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LONAPEGSOMATROPIN-TCGD (Skytrofa)** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)

B. Skytrofa is NOT being used for the treatment of any of the following conditions:
   1. Athletic enhancement (to perform better in sports)
   2. Anti-aging purposes

C. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   3. You have shown improvement (increased height or increased growth velocity [rate]) while on therapy
   4. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)

D. If you are an adult patient with growth hormone deficiency, renewal also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an endocrinologist (type of hormone doctor)
   3. You have achieved or maintained a response to therapy as evidenced by clinical treatment goals (such as improved body composition, lipid [fat] panel, bone health)
   4. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors are anaplastic lymphoma kinase (ALK)-positive, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LORLATINIB (Lorbrena)** requires the following rule(s) be met for approval:
   A. You have metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. Your tumors are anaplastic lymphoma kinase (ALK: type of enzyme)-positive, as detected by a Food and Drug Administration (FDA)-approved test

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LOSARTAN (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of type 2 diabetes with diabetic nephropathy (ICD-10 E11.21) and meet **ALL** of the following criteria?
   - The patient has a history of hypertension
   - The patient has an elevated serum creatinine level and proteinuria (urinary albumin to creatinine ratio of at least 300mg/g)
   - The patient has a contraindication to or is unable to swallow losartan tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LOSARTAN (Arbli)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Hypertension (high blood pressure)
      2. Hypertension with left ventricular hypertrophy (a type of heart condition)
      3. Type 2 diabetes (a disorder with high blood sugar) with diabetic nephropathy (a type of kidney disease caused by high blood sugar)

   B. If you have hypertension, approval also requires:
      1. You are 6 years of age or older
      2. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

   C. If you have hypertension with left ventricular hypertrophy, approval also requires:
      1. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

   D. If you have type 2 diabetes with diabetic nephropathy, approval also requires:
      1. You have a history of hypertension (high blood pressure)
      2. You have an elevated serum creatinine level (a type of lab test to measure kidney function) and proteinuria (a condition with high levels of protein in the urine) (urinary albumin to creatinine ratio of at least 300mg/g)
      3. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LUMASIRAN BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LUMASIRAN SODIUM	OXLUMO	46999		GPI-10 (5662604020)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

LUMASIRAN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

LUSPATERCEPT-AAMT (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LUSPATERCEPT-AAMT	REBLOZYL	46196		GPI-10 (8240054010)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of beta thalassemia (ICD-10 D56.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient requires regular red blood cell (RBC) transfusions
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of very low- to intermediate-risk myelodysplastic syndrome (MDS) (ICD-10 Group D46) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is erythropoiesis stimulating agent (ESA)-naïve (has not previously used an ESA such as Epogen [epoetin alfa])
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue #3.

LUSPATERCEPT-AAMT (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have **ONE** of the following diagnoses?
   - Very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS) (ICD-10 D46.B, D46.1)
   - Myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T) (ICD-10 D46.B and D46.1 and D47.1 and Group D75.83)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is failing an erythropoiesis stimulating agent (ESA) (e.g., Epogen [epoetin alfa]) AND requires at least 2 red blood cell (RBC) units over 8 weeks
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.***

   Our guideline named **LUSPATERCEPT-AAMT (Reblozyl)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Beta thalassemia (a type of blood condition)
      2. Very low- to intermediate-risk myelodysplastic syndrome (MDS: a type of blood cancer)
      3. Very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS: a type of blood cancer)
      4. Myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T: a type of blood cancer)

   B. If you have beta thalassemia, approval also requires:
      1. You are 18 years of age or older
      2. You require regular red blood cell (RBC) transfusions (adding blood to your body)
      3. Reblozyl will be used for the treatment of anemia (a type of blood condition)

   (Denial text continued on next page)

LUSPATERCEPT-AAMT (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have very low-to intermediate-risk myelodysplastic syndrome, approval also requires:
1. You are 18 years of age or older
2. You are erythropoiesis stimulating agent (ESA)-naïve (you have not previously used a type of medication that increases the production of red blood cells such as Epogen [epoetin alfa])
3. Reblozyl will be used for the treatment of anemia (a type of blood condition)

D. If you have very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts OR with myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis, approval also requires:
1. You are 18 years of age or older
2. You are failing an erythropoiesis stimulating agent (ESA: a type of medication that increases the production of red blood cells such as Epogen [epoetin alfa])
3. You require at least 2 red blood cell (RBC) units over 8 weeks
4. Reblozyl will be used for the treatment of anemia (a type of blood condition)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MACITENTAN-TADALAFIL TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MACITENTAN/ TADALAFIL	OPSYNVI	47644		GPI-10 (4099550250)	

Core			Advantage			Plus (Closed)			Plus (Open)		
Generic	Brand	BvD	Generic	Brand	BvD	Generic	Brand	BvD	Generic	Brand	BvD
No	No	No	No	No	No	No	No	No	No	Yes	No

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (ICD-10 I27.0, Group I27.2) (World Health Organization Group 1)?

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by HICL or GPI-10.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction**:** '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's cholestatic pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient is 3 months of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in ALGS cholestasis
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

MARALIXIBAT (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient's cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - The patient is 12 months of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in PFIC cholestasis
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MARALIXIBAT (Livmarli)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)
      2. Cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)

   B. If you have cholestatic pruritus associated with Alagille syndrome, approval also requires:
      1. You are 3 months of age or older
      2. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (doctor who treats digestive conditions), or physician (doctor) who specializes in ALGS cholestasis
      3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

   C. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, approval also requires:
      1. You are 12 months of age or older
      2. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (a doctor who treats digestive conditions), or physician (doctor) who specializes in PFIC cholestasis
      3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

MARALIXIBAT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient's cholestatic pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND reduction of serum bile acid from baseline
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the patient's cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND a reduction of serum bile acid from baseline
   - The patient does NOT have PFIC type 2 with specific ABCB11 variants that would result in nonfunctional, or the complete absence of, bile salt export pump (BSEP) protein
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

MARALIXIBAT (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MARALIXIBAT (Livmarli)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)
   2. Cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)

B. If you have cholestatic pruritus associated with Alagille syndrome, renewal also requires:
   1. You have shown a clinical response to therapy defined as improvement in pruritis (itching) symptoms AND a reduction of serum (blood) bile acid from baseline
   2. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

C. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, renewal also requires:
   1. You have shown a clinical response to therapy defined as improvement in pruritus (itching) symptoms AND a reduction of serum (blood) bile acid from baseline
   2. You do NOT have PFIC type 2 with specific ABCB11 variants (a type of abnormal gene) that would result in nonfunctional (does not work), or the complete absence of, bile salt export pump (BSEP: a type of protein)
   3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MAVACAMTEN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MAVACAMTEN (Camzyos)** requires the following rule(s) be met for approval:

A. You have symptomatic obstructive hypertrophic cardiomyopathy (HCM: a type of heart condition)
B. You are 18 years of age or older
C. You have New York Heart Association (NYHA) class II-III (a way to classify severity of your heart failure symptoms)
D. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor)
E. You have a left ventricular outflow track gradient (a predictor of heart failure and cardiovascular death) of 50 mmHg or higher
F. You have tried, have a contraindication (harmful for you to use), or intolerance to (side effect) a beta-blocker (such as metoprolol, carvedilol) OR a non-dihydropyridine calcium channel blocker (such as verapamil, diltiazem)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 2 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist or nephrologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Increlex will NOT be used concurrently with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MECASERMIN (Increlex)** requires the following rule(s) be met for approval:
   A. You have growth failure due to ONE of the following:
      1. Severe primary insulin growth-like factor 1 (IGF-1: a type of hormone) deficiency (your height standard deviation score [a measure of variation from the average] is -3 or less, your basal IGF-1 standard deviation score is -3 or less, and you have normal or elevated growth hormone)
      2. Growth hormone (GH) gene deletion (not growth hormone-deficient short stature) with neutralizing antibodies to growth hormone
   B. You are 2 to 17 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor) or nephrologist (a type of kidney doctor)
   D. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
   E. You will NOT use Increlex concurrently (at the same time) with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MECASERMIN (PART D)

RENEWAL CRITERIA

1. Does the patient meet **ALL** of the following criteria?
   - The patient has shown improvement while on Increlex therapy (increase in height or increase in height velocity)
   - Increlex will NOT be used concurrently with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MECASERMIN (Increlex)** requires the following rule(s) be met for renewal:
   A. You have experienced improvement while on Increlex therapy (increase in height or increase in height velocity)
   B. You will NOT use Increlex concurrently (at the same time) with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Increlex.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary medicine or allergy medicine
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the past 12 months
   - Nucala will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta-2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, continue to #4.

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient experienced at least ONE serious asthma exacerbation requiring hospitalization or ER visit within the past 12 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta-2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nucala will be used as add-on maintenance treatment
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE topical nasal corticosteroid (e.g., mometasone, fluticasone)
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has had HES for at least 6 months without an identifiable non-hematologic secondary cause
   - Nucala will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HES

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and J44.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an eosinophilic phenotype of COPD
   - Therapy is prescribed by or in consultation with a pulmonologist
   - Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
   - Nucala will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIALTEXT: See the initial denial text at the end of the guideline.

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MEPOLIZUMAB (Nucala)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus passages with small growths in the nose)
   3. Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)
   4. Hypereosinophilic syndrome (HES: a type of blood disorder)
   5. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)

B. If you have severe asthma with an eosinophilic phenotype, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (lung/breathing) medicine or allergy medicine
   3. You have a blood eosinophil level (a type of lab test) of at least 150 cells/mcL within the past 12 months
   4. Nucala will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta-2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
   5. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma

(Initial denial text continued on next page)

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

6. You meet ONE of the following:
   a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta-2-agonist reliever (SABA) (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Nucala will be used as add-on maintenance treatment (taken on a regular basis)
3. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
5. You have inadequately controlled disease
6. You had a 56-day trial of ONE topical nasal corticosteroid (such as mometasone, fluticasone)
7. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

D. If you have eosinophilic granulomatosis with polyangiitis, approval also requires:

1. You are 18 years of age or older
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis

(Initial denial text continued on next page)

MEPOLIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have hypereosinophilic syndrome, approval also requires:
1. You are 12 years of age or older
2. You have had hypereosinophilic syndrome (HES) for at least 6 months without an identifiable non-hematologic (not present in the blood) secondary cause (HES is not caused by another condition)
3. You will NOT use Nucala concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK inhibitor, PDE-4 inhibitor) for the treatment of hypereosinophilic syndrome

F. If you have chronic obstructive pulmonary disease, approval also requires:
1. You are 18 years of age or older
2. You have an eosinophilic phenotype of chronic obstructive pulmonary disease (COPD: a type of inflammatory long-term lung condition)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
4. Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
5. You will NOT use Nucala concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

MEPOLIZUMAB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of hypereosinophilic syndrome (HES), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta-2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)
   - Increase in percent predicted FEV1 from pre-treatment baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

MEPOLIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and J44.81) and meet **ALL** of the following criteria?
   - The patient has an eosinophilic phenotype of COPD
   - Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
   - Nucala will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - The patient has a reduction in COPD exacerbations from baseline
   - The patient has a reduction in severity or frequency of COPD-related symptoms (e.g., wheezing, shortness of breath, coughing, sputum production)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

MEPOLIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
   - The patient has shown a reduction in EGPA symptoms compared to baseline OR has been able to reduce/eliminate corticosteroid use
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MEPOLIZUMAB (Nucala)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
      2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus passages with small growths in the nose)
      3. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
      4. Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)

   B. If you have severe asthma with an eosinophilic phenotype, renewal also requires:
      1. You will continue to use an inhaled corticosteroid (ICS) (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta-2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)

MEPOLIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
3. You have shown a clinical response as shown by ONE of the following:
   a. You have experienced a reduction in asthma exacerbations (less sudden and severe worsening of symptoms) from baseline (before starting Nucala)
   b. You have decreased your use of rescue medications (such as albuterol)
   c. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)
   d. You have an increase in the percent predicted FEV1 (a type of lung test) from pre-treatment baseline (before starting Nucala)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:

1. You have shown a clinical benefit compared to baseline (before starting Nucala) (such as improvements in nasal congestion, sense of smell, size of polyps)
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

D. If you have chronic obstructive pulmonary disease, renewal also requires:

1. You have an eosinophilic phenotype of chronic obstructive pulmonary disease (COPD: a type of inflammatory long-term lung condition)
2. Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
3. You will NOT use Nucala concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD
4. You have shown a clinical response as evidenced by ONE the following:
   a. You have a reduction (decrease) in COPD exacerbations (worsening of symptoms) from baseline (before starting Nucala)
   b. You have a reduction in severity or frequency of COPD-related symptoms (such as wheezing, shortness of breath, coughing, sputum [mucus] production)

(Renewal denial text continued on next page)

MEPOLIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

E. If you have eosinophilic granulomatosis with polyangiitis, renewal also requires:
1. You have shown a reduction in eosinophilic granulomatosis with polyangiitis (EGPA) symptoms compared to baseline (before starting Nucala), OR you have been able to decrease or eliminate (stop) corticosteroid use
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Nucala.

For Part D use only:

MEPOLIZUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: ASTHMA: BLOOD EOSINOPHIL LEVEL OF AT LEAST 150 CELLS/MCL WITHIN THE PAST 12 MONTHS.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: ASTHMA: PRESCRIBED BY OR IN CONSULTATION WITH A PHYSICIAN SPECIALIZING IN PULMONARY OR ALLERGY MEDICINE. CRSWNP: PRESCRIBED BY OR IN CONSULTATION WITH AN OTOLARYNGOLOGIST, ALLERGIST OR IMMUNOLOGIST. EOSINOPHILIC COPD: PRESCRIBED BY OR IN CONSULTATION WITH A PULMONOLOGIST.
Coverage Duration	INITIAL: CRSWNP: 6 MO. OTHERS: 12 MO. RENEWAL: CRSWNP, ASTHMA, COPD, EGPA, HES: 12 MO.
Other Criteria	INITIAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. ASTHMA: 1) CONCURRENT THERAPY WITH A MEDIUM, HIGH-DOSE OR MAXIMALLY TOLERATED DOSE OF AN INHALED CORTICOSTEROID (ICS) AND AT LEAST ONE OTHER MAINTENANCE MEDICATION, AND 2) ONE OF THE FOLLOWING: (A) AT LEAST ONE ASTHMA EXACERBATION REQUIRING SYSTEMIC CORTICOSTEROID BURST LASTING AT LEAST 3 DAYS WITHIN THE PAST 12 MONTHS OR AT LEAST ONE SERIOUS

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	EXACERBATION REQUIRING HOSPITALIZATION OR ER VISIT WITHIN THE PAST 12 MONTHS, OR (B) POOR SYMPTOM CONTROL DESPITE CURRENT THERAPY AS EVIDENCED BY AT LEAST THREE OF THE FOLLOWING WITHIN THE PAST 4 WEEKS: DAYTIME ASTHMA SYMPTOMS MORE THAN TWICE/WEEK, ANY NIGHT WAKING DUE TO ASTHMA, SABA RELIEVER FOR SYMPTOMS MORE THAN TWICE/WEEK, ANY ACTIVITY LIMITATION DUE TO ASTHMA. CHRONIC RHINOSINUSITIS WITH NASAL POLYPS (CRSWNP): 1) A 56 DAY TRIAL OF ONE TOPICAL NASAL CORTICOSTEROID, 2) EVIDENCE OF NASAL POLYPS BY DIRECT EXAMINATION, ENDOSCOPY, OR SINUS CT SCAN, AND 3) INADEQUATELY CONTROLLED DISEASE. EOSINOPHILIC COPD: USED IN COMBINATION WITH A LAMA/LABA/ICS. RENEWAL: ASTHMA: 1) CONTINUED USE OF ICS AND AT LEAST ONE OTHER MAINTENANCE MEDICATION, 2) CLINICAL RESPONSE AS EVIDENCED BY: (A) REDUCTION IN ASTHMA EXACERBATIONS FROM BASELINE, (B) DECREASED UTILIZATION OF RESCUE MEDICATIONS, (C) REDUCTION IN SEVERITY OR FREQUENCY OF ASTHMA-RELATED SYMPTOMS, OR (D) INCREASE IN PERCENT PREDICTED FEV1 FROM PRETREATMENT BASELINE, AND 3) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. CRSWNP: 1) CLINICAL BENEFIT COMPARED TO BASELINE, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. EOSINOPHILIC GRANULOMATOSIS WITH POLYANGIITIS (EGPA): 1) REDUCTION IN EGPA SYMPTOMS COMPARED TO BASELINE OR ABILITY TO REDUCE/ELIMINATE CORTICOSTEROID USE, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. EOSINOPHILIC COPD: 1) USED IN COMBINATION WITH A LAMA/LABA/ICS, 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION, AND 3) CLINICAL RESPONSE AS EVIDENCED BY: (A) REDUCTION IN COPD EXACERBATIONS FROM BASELINE, OR (B) REDUCTION IN SEVERITY OR FREQUENCY OF COPD-RELATED SYMPTOMS.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

METHAMPHETAMINE DvE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHAMPHETAMINE HCL	DESOXYN, METHAMPHETAMINE HCL	02067		GPI-10 (6110003010)	

These are DvE drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Is the medication being requested for obesity (ICD-10 Group E66)?

   If yes, **set CMS_DVE_OVR to 'E' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Payment Determination Override. This is not a Part D indication.**

   If no, continue to #2.

2. Does the patient have a diagnosis of attention deficit hyperactivity disorder (ADHD) (ICD-10 Group F90) **AND** meet the following criterion?
   - The patient is 6 years of age or older

   If yes, **set CMS_DVE_OVR to 'D' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Part D Determination Override.**

   If no, **set CMS_DVE_OVR to 'E' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Payment Determination Override. This is not a Part D indication.**

   NOTE: If the claim rejects after analyzing, then follow the clinical authorization process within HQ notes.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METHAMPHETAMINE (Desoxyn)** requires the following rule(s) be met for approval:
   A. You have attention deficit hyperactivity disorder (ADHD: a type of mental health disorder)
   B. You are 6 years of age or older

   Note: The requested medication will NOT be approved if the request is for obesity (a condition of higher than normal body fat)

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of an acute, painful musculoskeletal condition and meet **ALL** of the following criteria?
   - The patient is 16 years of age or older
   - The patient has a contraindication to or is unable to swallow generic methocarbamol tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METHOCARBAMOL (Atmeksi)** requires the following rule(s) be met for approval:
   A. You have an acute, painful musculoskeletal condition (sudden and severe pain relating to muscles and bones)
   B. You are 16 years of age or older
   C. You have a contraindication to (harmful for you to use) or are unable to swallow generic methocarbamol tablets

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

METHOTREXATE BVD DETERMINATION (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHOTREXATE SODIUM	TREXALL, METHOTREXATE	03905		GPI-10 (2130005010)	ROUTE = ORAL
METHOTREXATE	JYLAMVO, XATMEP	03906		GPI-10 (2130005000)	ROUTE = ORAL

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: For oral methotrexate, this PA is for administrative Step Override purposes to determine Medicare Part B versus Medicare Part D funding.

GUIDELINES FOR USE

1. Is the drug being used to treat a cancerous condition?

   If yes, **approve for lifetime by GPID or GPI-14 for all strengths and forms under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by GPID or GPI-14 for all strengths and forms under Part D as follows:**
   - **Populate the B vs. D field with a 'D' in the PA override field AND**
   - **Override the administrative step therapy required restriction**

RATIONALE

This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. To determine whether methotrexate is being used to treat a medical condition other than those for which it's use qualifies for coverage under Medicare Part B. When methotrexate is used as a chemotherapeutic drug, it is covered by Part B.

METHOXY PEG-EPOETIN BETA (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHOXY PEG-EPOETIN BETA	MIRCERA	35005		GPI-10 (8240104010)	

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, **do NOT approve under Part D. Finalize as follows:**

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment which is paid under Medicare Part B and is not a Part D eligible drug. Please follow your internal procedures for denial.

   If no, review the clinical criteria for Part D coverage below if applicable.
   (**NOTE**: If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

Guideline interpretation beyond this point requires Clinical/Technician review.

METHOXY PEG-EPOETIN BETA (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of anemia associated with chronic kidney disease (CKD) (ICD-10 D63.1)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of guideline.

2. Is the patient between 3 months and 17 years of age **AND** meet the following criterion?
   - The patient is converting from another erythropoiesis-stimulating agent (ESA) (e.g. Epogen [epoetin alfa], Aranesp [darbepoetin alfa]) after hemoglobin level has been stabilized with the ESA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the patient 18 years of age or older and meet **ALL** of the following?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of guideline.

METHOXY PEG-EPOETIN BETA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHOXY PEG-EPOETIN BETA (Mircera)** requires the following rule(s) be met for approval:

A. You have anemia (low amount of healthy red blood cells) associated with chronic kidney disease (CKD)

B. If you are between 3 months and 17 years of age, approval also requires:

1. You are changing from another erythropoiesis-stimulating agent (ESA, such as Epogen [epoetin alfa], Aranesp [darbepoetin alfa]) after your hemoglobin level (type of blood test) has been stabilized with the ESA

C. If you are 18 years of age or older, approval also requires:

1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)
2. Your hemoglobin level (type of blood test) is less than 10g/dL

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METHOXY PEG-EPOETIN BETA (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of anemia associated with chronic kidney disease (CKD) (ICD-10 D63.1) **AND** meet the following criterion?
   - The patient is NOT receiving dialysis treatment
     [Note: If the patient is currently receiving dialysis treatment, the requested medication is included in the bundle dialysis facility payment which is paid under Medicare Part B]. Please refer to CRITERIA FOR PART B vs PART D DETERMINATION above.

     If yes, continue to #2.
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient between 3 months and 17 years of age and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 12g/dL
   - The patient's hemoglobin level has reached 12g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #3.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10g/dL
   - The patient's hemoglobin level has reached 10g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

METHOXY PEG-EPOETIN BETA (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHOXY PEG-EPOETIN BETA (Mircera)** requires the following rule(s) be met for renewal:

A. You have anemia (low amount of healthy red blood cells) associated with chronic kidney disease (CKD)

B. If you are between 3 months and 17 years of age, renewal also requires:
1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
2. You meet ONE of the following:
   a. Your hemoglobin level (type of blood test) is less than 12g/dL
   b. Your hemoglobin level has reached 12g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

C. If you are 18 years of age or older, renewal also requires:
1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
2. You meet ONE of the following:
   a. Your hemoglobin level (type of blood test) is less than 10g/dL
   b. Your hemoglobin level (type of blood test) has reached 10g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Patients identified as Part D (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESA included in the bundled dialysis facility payment which is paid under Medicare Part B.

For further information, please refer to the Prescribing Information and/or Drug Monograph for Mircera.

   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have chronic non-cancer pain (ICD-10 G89.2), including chronic pain related to prior cancer or its treatment, and meet **ALL** of the following criteria?
   - The patient does NOT require frequent opioid dosage escalation
   - The patient has been taking opioids for at least four weeks
   - The patient had a trial of or contraindication to the preferred agents: naloxegol (Movantik) AND lubiprostone (Amitiza)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

METHYLNALTREXONE INJECTABLE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have an advanced illness or pain caused by active cancer (ICD-10 G89.3) **AND** meet the following criterion?

- The patient requires opioid dosage escalation for palliative care

If yes, **approve for 6 months by GPID or GPI-14 for all strengths.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHYLNALTREXONE INJECTABLE (Relistor)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Opioid-induced constipation (a type of bowel disorder caused by medications used to treat pain) with chronic (long-term) non-cancer pain (including chronic pain related to prior cancer or its treatment)
   2. Opioid-induced constipation (a type of bowel disorder caused by medications used to treat pain) with advanced illness or pain caused by active cancer

B. If you have opioid-induced constipation with chronic non-cancer pain, approval also requires:
   1. You are 18 years of age or older
   2. You do NOT require frequent opioid dosage escalation (increase in dose)
   3. You have been taking opioids for at least four weeks
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medications: naloxegol (Movantik) AND lubiprostone (Amitiza)

C. If you have opioid-induced constipation with advanced illness or pain caused by active cancer, approval also requires:
   1. You are 18 years of age or older
   2. You require opioid dosage escalation (increase in dose) for palliative care (treatment for comfort from symptoms)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) and the patient has **ONE** of the following laboratory values confirming low testosterone levels?
   - At least TWO total serum testosterone levels of less than 300 ng/dL (10.4nmol/L) taken on separate occasions
   - A free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #2.
   If no, continue to #5.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, continue to #4.

METHYLTESTOSTERONE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Has the patient had a trial of or contraindication to **TWO** preferred agents: testosterone 12.5/1.25G, testosterone 20.25/1.25, testosterone 50 mg [1%]?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0) not secondary to a pathological disorder?

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Is the request for a female patient with a diagnosis of metastatic breast cancer (ICD-10 Group C50) who meets **ONE** of the following criteria?
   - The patient is postmenopausal
   - The patient is premenopausal who has benefitted from an oophorectomy AND is considered to have a hormone-responsive tumor

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METHYLTESTOSTERONE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHYLTESTOSTERONE (Methitest)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
   2. Delayed puberty not due to a pathological disorder (disease) in a male
   3. Metastatic breast cancer (cancer that has spread other parts of the body) in a female

B. If you are a male with primary or secondary hypogonadism, approval also requires:
   1. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening
   2. You have ONE of the following lab values showing you have low testosterone levels:
      a. At least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      b. Free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)
   3. You have tried or have a contraindication to (harmful for you to use) TWO preferred medications: testosterone 12.5/1.25G, testosterone 20.25/1.25, testosterone 50 mg [1%]

C. If you are a female with metastatic breast cancer, approval also requires ONE of the following:
   1. You are postmenopausal (after menopause)
   2. You are premenopausal (before menopause), you have benefitted from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METHYLTESTOSTERONE (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis metastatic breast cancer, please refer to the Initial Criteria section.

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) **AND** the patient meets the following criterion?
   - The patient has improved symptoms compared to baseline and has tolerated treatment

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0) not secondary to a pathological disorder **AND** meets the following criterion?
   - The patient has not received more than two 6-month courses of testosterone replacement therapy

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

METHYLTESTOSTERONE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHYLTESTOSTERONE (Methitest)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
   2. Delayed puberty not secondary to a pathological disorder (disease) in a male

B. If you are a male with primary or secondary hypogonadism, renewal also requires:
   1. Your symptoms have improved compared to baseline and you have tolerated treatment
   2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

C. If you are a male with delayed puberty not secondary to a pathological disorder, renewal also requires:
   1. You have NOT received more than two 6-month courses of testosterone replacement therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of congenital or acquired generalized lipodystrophy (ICD-10 E88.1) and meet **ALL** of the following criteria?
   - Myalept will be used as an adjunct to diet as replacement therapy to treat the complications of leptin deficiency
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has diabetes mellitus, insulin resistance, OR a fasting hypertriglyceridemia of greater than 200mg/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METRELEPTIN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METRELEPTIN (Myalept)** requires the following rule(s) be met for approval:

A. You have congenital or acquired generalized lipodystrophy (abnormal distribution of fatin the body)
B. Myalept will be used as an adjunct (add-on) to diet as replacement therapy to treat the complications of leptin deficiency (low level of a type of hormone)
C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
D. You have diabetes mellitus (a disorder with high blood sugar), insulin resistance (a condition where cells in the body do not respond to a type of hormone), OR a fasting hypertriglyceridemia (high levels of fat in the blood) of greater than 200mg/dL

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METRELEPTIN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of congenital or acquired generalized lipodystrophy (ICD-10 E88.1) **AND** meet the following criterion?
   - The patient has shown clinical benefit with the use of Myalept (e.g., reduction in glucose levels, reduction of insulin resistance, or reduction of triglycerides)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METRELEPTIN (Myalept)** requires the following rule(s) be met for renewal:
   A. You have congenital or acquired generalized lipodystrophy (abnormal distribution of fatin the body)
   B. You have shown clinical benefit (improvement) with the use of Myalept (such as areduction in glucose levels [lower level of blood sugar], reduction of insulin resistance [cells in the body are more responsive to a type of hormone], or reduction of triglycerides [lower level of fat in the blood])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Myalept.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pheochromocytoma (ICD-10 Groups D35.0, C74.1) and the requested medication will be used for **ONE** of the following?
   - Preoperative preparation for surgery
   - Management of malignant pheochromocytoma when surgery is contraindicated
   - Chronic treatment of patients with malignant pheochromocytoma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following?
   - The patient has a non-metastatic pheochromocytoma
   - Therapy is prescribed by or in consultation with an endocrinologist, an endocrine surgeon, or a hematologist-oncologist

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METYROSINE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient awaiting surgery?

   If yes, continue to #4.
   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

4. Will the requested medication be used in combination with an alpha-adrenergic receptor blocker (e.g., doxazosin, terazosin, prazosin, phenoxybenzamine)?

   If yes, **approve for 30 days by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METYROSINE (Demser)** requires the following rule(s) be met for approval:
   A. You have pheochromocytoma (a type of rare tumor)
   B. You will be using the requested medication for ONE of the following:
      1. Preoperative (before surgery) preparation of surgery
      2. Management of malignant (cancerous) pheochromocytoma when surgery is contraindicated (harmful for you to have)
      3. Chronic (long term) treatment of malignant pheochromocytoma
   C. You have a non-metastatic pheochromocytoma (tumor has not spread to other parts of the body)
   D. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), an endocrine surgeon (surgeon specializing in removal of glands such as adrenal glands), or a hematologist-oncologist (a type of cancer doctor)
   E. If you are awaiting surgery, approval also requires:
      1. The requested medication will be in combination with an alpha-adrenergic receptor blocker (such as doxazosin, terazosin, prazosin, phenoxybenzamine)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METYROSINE (PART D)

RENEWAL CRITERIA

NOTE: For the request of preoperative preparation for surgery, please refer to the initial criteria section.

1. Does the patient have a diagnosis of pheochromocytoma (ICD-10 Groups D35.0, C74.1) and the requested medication will be used for **ONE** of the following?
   - Management of malignant pheochromocytoma when surgery is contraindicated
   - Chronic treatment of patients with malignant pheochromocytoma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient stable or has shown clinical improvement while on therapy?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METYROSINE (Demser)** requires the following rule(s) be met for renewal:
   A. You have pheochromocytoma (a type of rare tumor)
   B. You will be using the requested medication for ONE of the following:
      1. Management of malignant (cancerous) pheochromocytoma when surgery is contraindicated (harmful for you to have)
      2. Chronic (long term) treatment of malignant pheochromocytoma
   C. You are stable or have shown clinical improvement while on therapy (treatment)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIDOSTAURIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIDOSTAURIN (Rydapt)** requires the following rules to be met for approval:

A. You have ONE of the following:
   1. Acute myeloid leukemia (AML: a type of blood cancer)
   2. Aggressive systemic mastocytosis (ASM: a type of blood disorder)
   3. Systemic mastocytosis with associated hematological neoplasm (SM-AHN: a type of blood cancer)
   4. Mast cell leukemia (MCL: a type of blood cancer)

B. If you have acute myeloid leukemia, approval also requires:
   1. You are 18 years of age or older
   2. You have newly diagnosed acute myeloid leukemia
   3. You are FLT3 (type of gene) mutation-positive, as detected by a Food and Drug Administration (FDA)-approved test
   4. Rydapt will be used in combination with standard cytarabine and daunorubicin induction and cytarabine consolidation chemotherapy (cancer drugs)

C. If you have aggressive systemic mastocytosis, systemic mastocytosis with associated hematological neoplasm, or mast cell leukemia, approval also requires:
   1. You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of endogenous Cushing's syndrome (CS) (ICD-10 Group E24 except ICD-10 E24.2 and E24.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient also has a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13) OR glucose intolerance
   - The patient has failed surgical treatment for Cushing's syndrome OR is not a candidate for surgery
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's hypercortisolism is NOT a result of chronic glucocorticoids (e.g., prednisone)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the diagnosis of endogenous Cushing's syndrome been confirmed by **ONE** of the following tests?
   - 24-hour urine free cortisol (at least 2 tests to confirm)
   - Overnight 1mg dexamethasone test
   - Late-night salivary cortisol (at least 2 tests to confirm)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

MIFEPRISTONE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIFEPRISTONE (Korlym)** requires the following rule(s) be met for approval:

A. You have endogenous Cushing's syndrome (CS: a type of hormone disorder)
B. You are 18 years of age or older
C. You also have type 2 diabetes mellitus (a disorder with high blood sugar) OR glucose intolerance (a condition that results in high blood sugar)
D. You have failed surgical treatment (surgery did not work) for Cushing's syndrome OR you are NOT a candidate for surgery
E. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
F. Your diagnosis is confirmed by ONE of the following:
    1. 24-hour urine free cortisol (a type of test that measures the amount of cortisol in the urine) (at least 2 tests to confirm)
    2. Overnight 1mg dexamethasone test (a type of diagnostic test)
    3. Late-night salivary cortisol (a type of test that measures the amount of cortisol in the saliva at night) (at least 2 tests to confirm)
G. Your hypercortisolism (high levels of cortisol) is NOT due to chronic glucocorticoids (long-term use of a class of drugs that consists of steroids, such as prednisone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIFEPRISTONE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of endogenous Cushing's syndrome (CS) (ICD-10 Group E24 except ICD-10 E24.2 and E24.4) and meet **ALL** of the following criteria?
   - The patient continues to have improvement of glucose tolerance or stable glucose tolerance (e.g., reduced A1C, improved fasting glucose)
   - The patient continues to have tolerability to therapy
   - The patient continues to not be a candidate for surgical treatment for Cushing's syndrome OR has failed surgery

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIFEPRISTONE (Korlym)** requires the following rule(s) be met for renewal:
   A. You have endogenous Cushing's syndrome (CS: a type of hormone disorder)
   B. You continue to have improvement of glucose tolerance or stable glucose tolerance (such as reduced hemoglobin A1C level [a type of lab test], improved fasting glucose)
   C. You continue to tolerate treatment
   D. You are NOT a candidate for surgery OR you have failed surgery (surgery did not work) for Cushing's syndrome

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

MIFEPRISTONE (PART D)

For Part D use only:

MIFEPRISTONE (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	CUSHINGS SYNDROME (CS): INITIAL: DIAGNOSIS CONFIRMED BY: 1) 24-HR URINE FREE CORTISOL (AT LEAST 2 TESTS TO CONFIRM), 2) OVERNIGHT 1MG DEXAMETHASONE TEST, OR 3) LATE NIGHT SALIVARY CORTISOL (AT LEAST 2 TESTS TO CONFIRM).
Age Restrictions	N/A
Prescriber Restrictions	CS: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS
Other Criteria	CS: INITIAL: HYPERCORTISOLISM IS NOT A RESULT OF CHRONIC GLUCOCORTICOIDS. RENEWAL: 1) CONTINUES TO HAVE IMPROVEMENT OF GLUCOSE TOLERANCE OR STABLE GLUCOSE TOLERANCE (E.G., REDUCED A1C, IMPROVED FASTING GLUCOSE), 2) CONTINUES TO HAVE TOLERABILITY TO THERAPY, AND 3) CONTINUES TO NOT BE A CANDIDATE FOR SURGICAL TREATMENT OR HAS FAILED SURGERY.

Created: 04/12

MIGALASTAT (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIGALASTAT HCL	GALAFOLD	44433		GPI-10 (3090365010)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist, cardiologist, or specialist in genetics or inherited metabolic disorders
   - The patient has an amenable galactosidase alpha gene (GLA) variant based on in vitro assay data that is interpreted by a clinical genetics professional as pathogenic or likely pathogenic (i.e., patient does not have a benign amenable GLA variant)
   - Galafold will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for a female patient who meets the following criterion?
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

MIGALASTAT (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a male patient who meets **ONE** of the following criteria?
   - The patient has an alpha galactosidase A (a-Gal A) deficiency as indicated by an enzyme assay
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIGALASTAT (Galafold)** requires the following rule(s) be met for approval:

   A. You have Fabry disease (a rare genetic disease)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a nephrologist (kidney doctor), cardiologist (heart doctor), or specialist in genetics or inherited metabolic disorders
   D. You have an amenable (responsive) galactosidase alpha (GLA: a type of gene) gene variant based on in vitro assay data (information from a type of lab test) that is interpreted by a clinical genetics professional as the cause of disease (pathogenic or likely pathogenic)
   E. You will NOT use Galafold concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])
   F. If you are a female, approval also requires:
      1. You have a galactosidase alpha (GLA: a type of gene) gene mutation by genetic testing
   G. If you are a male, approval also requires ONE of the following:
      1. You do not have enough alpha galactosidase A (a-Gal A: a type of protein) as indicated by an enzyme assay (a type of lab test)
      2. You have a galactosidase alpha (GLA: a type of gene) gene mutation by genetic testing

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

MIGALASTAT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
   - The patient has demonstrated improvement or stabilization
   - Galafold will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIGALASTAT (Galafold)** requires the following rule(s) be met for renewal:

   A. You have Fabry disease (a rare genetic disease)
   B. You have demonstrated improvement or stabilization while on therapy
   C. You will NOT use Galafold concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIRIKIZUMAB-MRKZ SQ (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Selarsdi /Yesintek /ustekinumab-aauz
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Skyrizi (risankizumab-rzaa)
   f. Tremfya (guselkumab)

C. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn’s disease
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Selarsdi /Yesintek /ustekinumab-aauz
   b. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Skyrizi (risankizumab-rzaa)
   e. Tremfya (guselkumab)

MIRIKIZUMAB-MRKZ SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIRIKIZUMAB-MRKZ SQ (Omvoh)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
      2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   B. If you have moderate to severe ulcerative colitis, renewal also requires:
      1. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

No	Yes	Yes	No	Yes	Yes	No	Yes	Yes	No	Yes	Yes

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan).**

   If no, continue to #2.

2. Is the drug administered via an external pump?

   If yes, continue to #3.

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field).**

3. Is the drug specifically covered under the applicable Medicare coverage policies (National and/or Local Coverage Policies)?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

MIRVETUXIMAB SORAVTANSINE-GYNX BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is platinum-resistant
   - The patient's tumor is folate receptor-alpha (FRα) positive, as determined by an FDA-approved test
   - The patient has received one to three prior systemic treatment regimen(s) (e.g., bevacizumab, Lynparza [olaparib])
   - The patient will complete an ophthalmic exam, including visual acuity and slit lamp exam, prior to the initiation of Elahere and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

MIRVETUXIMAB SORAVTANSINE-GYNX BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIRVETUXIMAB SORAVTANSINE-GYNX (Elahere)** requires the following rule(s) be met for approval:

A. You have epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system cancers)
B. You are 18 years of age or older
C. Your cancer is platinum-resistant (did not respond to a type of cancer treatment such as cisplatin, carboplatin, oxaliplatin)
D. Your tumor is folate receptor-alpha (FRα: a type of protein) positive, as determined by a Food and Drug Administration (FDA)-approved test
E. You have received one to three prior systemic treatment regimen(s) (such as bevacizumab, Lynparza [olaparib])
F. You will complete an ophthalmic (eye) exam, including visual acuity (sharpness of vision) and slit lamp exam (a type of eye exam), before starting Elahere and at the recommended scheduled times

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIRVETUXIMAB SORAVTANSINE-GYNX BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Elahere. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

MOSUNETUZUMAB-AXGB	LUNSUMIO, LUNSUMIO VELO	48556		GPI-10 (2135205010)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma (ICD-10 Group C82) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has tried two or more lines of systemic therapy

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MOSUNETUZUMAB-AXGB (Lunsumio, Lunsumio Velo)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory follicular lymphoma (a type of blood cancer that has returned or does not respond to treatment)
   B. You are 18 years of age or older
   C. You have tried two or more lines of systemic therapy (treatment that targets the entire body)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MOSUNETUZUMAB-AXGB BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma (ICD-10 Group C82) and meet **ALL** of the following criteria?
   - The patient has achieved a partial response to treatment
   - The patient has not previously received more than 17 cycles of treatment

   If yes, **approve for 7 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MOSUNETUZUMAB-AXGB (Lunsumio, Lunsumio Velo)** requires the following rule(s) be met for renewal:
   A. You have relapsed or refractory follicular lymphoma (a type of blood cancer that has returned or does not respond to treatment)
   B. You have achieved a partial response to treatment
   C. You have not previously received more than 17 cycles of treatment

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Lunsumio and Lunsumio Velo. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of endometriosis (ICD-10 Group N80) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - Synarel will NOT be used concurrently with another GnRH-modulating agent (e.g., Lupron Depot [leuprolide], Zoladex [goserelin])
   - The patient had a trial of or contraindication to a nonsteroidal anti-inflammatory drug (NSAID, e.g., ibuprofen, meloxicam, Naproxen) AND a progestin-containing preparation (e.g., norethindrone, desogestrel, estradiol/norethindrone, desogestrel/ethinyl estradiol)
   - The patient has NOT received a total of 6 months of treatment with Synarel (nafarelin) per lifetime

   If yes, **approve for 6 months per lifetime by HICL or GPI-10.**

   If no, continue to #2.

2. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with an endocrinologist

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

NAFARELIN (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a female patient who meets **ALL** of the following criteria?
   - The patient has elevated levels of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for breast development and pubic hair growth

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, continue to #4.

4. Is the request for a male patient who meets **ALL** of the following criteria?
   - The patient has elevated levels of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for genital development and pubic hair growth

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.

   INITIAL DENIAL TEXT:

   Our guideline named **NAFARELIN (Synarel)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Endometriosis (condition affecting the uterus)
      2. Central precocious puberty (CPP: early sexual development in girls and boys)

   (Initial denial text continued on next page)

NAFARELIN (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have endometriosis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
3. You have tried or have a contraindication to (harmful for you to use) a nonsteroidal anti-inflammatory drug (NSAID such as ibuprofen, meloxicam, naproxen) AND a progestin-containing preparation (such as norethindrone, desogestrel, estradiol/norethindrone, desogestrel/ethinyl estradiol)
4. Synarel will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Lupron Depot [leuprolide], Zoladex [goserelin])
5. You have NOT received a total of 6 months of treatment with Synarel (nafarelin) per lifetime

C. If you have central precocious puberty, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
2. If you are a female, you meet ALL of the following:
   a. You have high levels of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   b. You are/were younger than 8 years of age when your condition started
   c. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for breast development and pubic hair growth
3. If you are a male, you meet ALL of the following:
   a. You have high levels of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   b. You are/were younger than 9 years of age when your condition started
   c. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for genital development and pubic hair growth

NAFARELIN (PART D)

RENEWAL CRITERIA

NOTE: For endometriosis, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The patient's Tanner staging at initial diagnosis has stabilized or regressed
   - The patient has not reached actual age which corresponds to current pubertal age

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **NAFARELIN (Synarel)** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in girls and boys)
   B. Your Tanner staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis has stabilized or regressed (lowered)
   C. You have not reached actual age which corresponds to current pubertal age

NAPROXEN-ESOMEPRAZOLE (PART D)

GUIDELINES FOR USE (CONTINUED)

2. Does the patient have a diagnosis of juvenile idiopathic arthritis (JIA) (ICD-10 Group M08) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older weighing at least 38 kg (83 lbs)
   - The requested medication will be used to decrease the risk of developing gastric ulcers
   - The patient had a trial of ONE of the following generic, prescription-only proton pump inhibitors: omeprazole, lansoprazole, pantoprazole
   - The patient had a trial of generic, prescription-only naproxen

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAPROXEN-ESOMEPRAZOLE (Vimovo)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Osteoarthritis (type of joint condition)
      2. Rheumatoid arthritis (type of joint condition)
      3. Ankylosing spondylitis (type of joint condition)
      4. Juvenile idiopathic arthritis (type of joint condition)

   B. If you have osteoarthritis, rheumatoid arthritis, or ankylosing spondylitis, approval also requires:
      1. You are 18 years of age or older
      2. The requested medication will be used to decrease the risk of developing gastric ulcers (type of digestive condition)
      3. You have tried ONE of the following generic, prescription-only proton pump inhibitors: omeprazole, lansoprazole, pantoprazole
      4. You have tried generic, prescription-only naproxen

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NARCOLEPSY AGENTS TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MODAFINIL	PROVIGIL, MODAFINIL	10865		GPI-10 (6140002400)	
ARMODAFINIL	NUVIGIL, ARMODAFINIL	34868		GPI-10 (6140001000)	

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of excessive sleepiness due to narcolepsy (ICD-10 G47.419), obstructive sleep apnea (OSA) (ICD-10 G47.10, G47.33), or shift work disorder (ICD-10 G47.26) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by HICL or GPI-10. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR4.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or memberto pursue a payment determination. Document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by HICL or GPI-10.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter an MCARE override**.'

NARCOLEPSY AGENTS TIRF (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NARCOLEPSY AGENTS (Provigil, Nuvigil)** requires the following rule(s) be met for approval:

A. You have excessive sleepiness due to ONE of the following:
   1. Narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   2. Obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep)
   3. Shift work disorder (a type of sleep condition)

B. You are 18 years of age or older

RATIONALE

Prior authorization on these drugs is required due to a high potential for non-Part D use. These drugs should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act. For further information, please refer to the prescribing information and/or drug monograph for Provigil and Nuvigil.

NATALIZUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NATALIZUMAB	TYSABRI	26750		GPI-10 (6240505000)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

NATALIZUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tysabri will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Selarsdi /Yesintek /ustekinumab-aauz, Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Rinvoq (upadacitinib), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)

     If yes, **approve for 6 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

NATALIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), including clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tysabri is being used as monotherapy
   - The patient had a trial of TWO agents indicated for the treatment of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NATALIZUMAB (Tysabri)** requires the following rules be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

   B. If you have moderate to severe Crohn's disease, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
      3. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
      4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Selarsdi /Yesintek /ustekinumab-aauz, Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Rinvoq (upadacitinib), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)

NATALIZUMAB BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of a relapsing form of multiple sclerosis (MS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Tysabri will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient received at least 12 months of therapy with Tysabri **AND** meets the following criterion?
   - The patient has NOT required more than 3 months of corticosteroids use within the past 12 months to control their Crohn's disease while on Tysabri

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Has the patient only received 6 months of therapy with Tysabri **AND** meet the following criterion?
   - The patient has tapered off corticosteroids during the first 24 weeks of Tysabri therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

NATALIZUMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NATALIZUMAB (Tysabri)** requires the following rules be met for renewal:

A. You have moderate to severe Crohn's disease (CD: a type of bowel disorder)
B. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
C. If you have received at least 12 months of Tysabri therapy, renewal also requires:
   1. You have NOT received more than 3 months of corticosteroid within the past 12 months to control your Crohn's disease while on Tysabri
D. If you have only received 6 months of Tysabri therapy, renewal also requires:
   1. You have tapered off (slowly lowering the dose and stopping) corticosteroids during the first 24 weeks of Tysabri therapy

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Tysabri. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

NATALIZUMAB-SZTN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tyruko will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Selarsdi /Yesintek /ustekinumab-aauz, Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Rinvoq (upadacitinib), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)

     If yes, **approve for 6 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

NATALIZUMAB-SZTN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), including clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tyruko is being used as monotherapy
   - Tyruko will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS
   - The patient had a trial of TWO agents indicated for the treatment of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NATALIZUMAB-SZTN (Tyruko)** requires the following rules be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

   B. If you have moderate to severe Crohn's disease, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
      3. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
      4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Selarsdi /Yesintek /ustekinumab-aauz, Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Rinvoq (upadacitinib), Skyrizi (risankizumab-rzaa), Tremfya (guselkumab)

NATALIZUMAB-SZTN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have a relapsing form of multiple sclerosis, approval also requires:

1. You are 18 years of age or older
2. Tyruko is being used as a monotherapy (one drug treatment)
3. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis
4. You have tried TWO medications indicated for the treatment of multiple sclerosis (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

NATALIZUMAB-SZTN BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of a relapsing form of multiple sclerosis (MS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Tyruko will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient received at least 12 months of therapy with Tyruko **AND** meets the following criterion?
   - The patient has NOT required more than 3 months of corticosteroids use within the past 12 months to control their Crohn's disease while on Tyruko

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Has the patient only received 6 months of therapy with Tyruko **AND** meet the following criterion?
   - The patient has tapered off corticosteroids during the first 24 weeks of Tyruko therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

NATALIZUMAB-SZTN BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NATALIZUMAB-SZTN (Tyruko)** requires the following rules be met for renewal:

A. You have moderate to severe Crohn's disease (CD: a type of bowel disorder)
B. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease
C. If you have received at least 12 months of Tyruko therapy, renewal also requires:
   1. You have NOT received more than 3 months of corticosteroid within the past 12 months to control your Crohn's disease while on Tyruko
D. If you have only received 6 months of Tyruko therapy, renewal also requires:
   1. You have tapered off (slowly lowering the dose and stopping) corticosteroids during the first 24 weeks of Tyruko therapy

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Tyruko. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

NAVEPEGRITIDE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NAVEPEGRITIDE (Yuviwel)** requires the following rule(s) be met for approval:

A. You have achondroplasia (a type of bone condition)
B. You are 2 to 17 years of age
C. You have open epiphyses (the end part of a long bone)
D. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), orthopedist (a type of doctor who specializes in bones, joints, muscles, ligaments, tendons and nerves), or medical geneticist (doctor who treats gene disorders)
E. You will NOT use Yuviwel concurrently (at the same time) with another C-type natriuretic peptide (CNP) (such as Voxzogo [vosoritide]) for the treatment of achondroplasia (a type of bone condition)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NAVEPEGRITIDE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of achondroplasia (ICD-10 Q77.4) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in annual growth velocity since baseline
   - The patient's epiphyses remain open
   - Yuviwel will NOT be used concurrently with another C-type natriuretic peptide (CNP) (e.g., Voxzogo [vosoritide]) for the treatment of achondroplasia

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAVEPEGRITIDE (Yuviwel)** requires the following rule(s) be met for renewal:
   A. You have achondroplasia (a type of bone condition)
   B. You have experienced an improvement in annual growth velocity (rate of growth) since baseline (before treatment with Yuviwel)
   C. Your epiphyses (the end part of a long bone) remain open
   D. You will NOT use Yuviwel concurrently (at the same time) with another C-type natriuretic peptide (CNP) (such as Voxzogo [vosoritide]) for the treatment of achondroplasia (a type of bone condition)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NEBULIZER BVD DETERMINATION (PART D)

GUIDELINES FOR USE (CONTINUED)

2. Is the medication being used for a Part D covered indication?

   If yes, **approve for 12 months under Part D as follows (Please enter an override for the 'Nebulizer location override' field):**
   - **Budesonide: Approve all of the following strengths by GPID or GPI-14:**
     - **0.25mg/2mL**
     - **0.5mg/2mL**
     - **1mg/2mL**
   - **All others: Approve by HICL or GPI-10.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: The guideline named **NEBULIZER BVD DETERMINATION** applies to inhalation drugs that normally require a nebulizer. Medicare Part B (Medical Insurance) covers some medicines used in nebulizers if considered reasonable and necessary. These are covered as Durable Medical Equipment (DME) that your doctor prescribes for use in your home. Approval under Medicare Part D requires that you reside in a nursing or intermediate care facility. If you do not live in such residences, approval under Part D requires the drug be used for a Part D covered indication AND is not used via a nebulizer. Centers for Medicare and Medicaid Services (CMS) has clarified that the Medicare Part B or D coverage for these medicines should be determined by the data submitted by your pharmacy describing the place of residence (home or long term care/nursing home). Future claims for this drug will rely upon the data your pharmacy submits as mentioned above.

CONTINUED ON NEXT PAGE

Copyright © 2025 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

NEBULIZER BVD DETERMINATION (PART D)

RATIONALE

Nebulizer therapy is covered under Part B for patients who are using the medication via a nebulizer in their own home; those who are not using it in their home will be covered under Part D.
50.16.2 – Inhalation Durable Medical Equipment (DME) Supply Drugs (Rev. 18, 09-17-18):
Medicare Part B covers certain inhalation drugs, such as Albuterol and Levalbuterol nebulizer solutions, as supplies under the DME benefit. The DME benefit, however, is not available to beneficiaries residing in long-term care facilities (i.e. Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities). Consequently, if the beneficiary is not on a Part A stay in one of these facilities, these inhalation drugs can be covered under Medicare Part D. CMS permits Part D sponsors to rely on a patient residence code of "3" or "9" on a pharmacy claim for determining when such inhalation drugs may be covered under Part D. Moreover, we expect that sponsors will only pay claims for these products when the pharmacy claim includes these specified patient residence codes regardless of any prior coverage determination based upon a prescriber statement indicating that the beneficiary resides in a long-term care facility (i.e. the prescriber statement and patient residence code must be aligned).

NECITUMUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NECITUMUMAB	PORTRAZZA	42835		GPI-10 (2136005400)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, continue to #2.

2. Is the drug administered via an external pump?

   If yes, continue to #3.

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

3. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

NECITUMUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - Portrazza will be used in combination with gemcitabine and cisplatin

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NECITUMUMAB (Portrazza)** requires the following rule(s) be met for approval:
   A. You have metastatic squamous non-small cell lung cancer (a type of lung cancer that has spread to other parts of the body)
   B. Portrazza will be used in combination with gemcitabine and cisplatin

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

NECITUMUMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Portrazza. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, immunologist, or allergist
   - The patient has a presence of chronic pruritus (i.e., itch lasting longer than 6 weeks), multiple pruriginous lesions (localized or general), and history or sign of a prolonged scratching behavior
   - The patient had a trial of or contraindication to the preferred agent: Dupixent (dupilumab)
   - Nemluvio will NOT be used concurrently with other systemic biologics (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of prurigo nodularis

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #2.

NEMOLIZUMAB-ILTO (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Nemluvio will be used in combination with a topical corticosteroid (e.g., triamcinolone, clobetasol) and/or calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Dupixent (dupilumab), Rinvoq (upadacitinib)
   - Nemluvio will NOT be used concurrently with other systemic biologics (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Has the patient had a trial of or contraindication to **ONE** of the following?
   - High or super-high potency topical corticosteroid (e.g., clobetasol propionate 0.05% cream or ointment, fluocinonide 0.1% cream, halobetasol propionate 0.01% lotion)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Topical PDE-4 inhibitor (e.g., crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., ruxolitinib [Opzelura])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NEMOLIZUMAB-ILTO (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **NEMOLIZUMAB-ILTO (Nemluvio)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Prurigo nodularis (PN: a type of skin condition)
   2. Moderate to severe atopic dermatitis (AD: a type of skin condition)

B. If you have prurigo nodularis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), immunologist (a type of immune system doctor), or allergist (a type of allergy doctor)
   3. You have chronic pruritus (itch lasting longer than 6 weeks), multiple pruriginous lesions (wounds), and a history or sign of a prolonged scratching behavior
   4. You have tried or have a contraindication to the preferred medication: Dupixent (dupilumab)
   5. You will NOT use Nemluvio concurrently (at the same time) with other systemic biologics (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis

C. If you have moderate to severe atopic dermatitis, approval also requires:
   1. You are 12 years of age or older
   2. You will use Nemluvio in combination with a topical corticosteroid (such as triamcinolone, clobetasol) and/or calcineurin inhibitor (such as tacrolimus, pimecrolimus)
   3. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
   4. You will NOT use Nemluvio with other systemic biologics (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitors [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   5. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Dupixent (dupilumab), Rinvoq (upadacitinib)
   6. You have tried or have a contraindication to (harmful for you to use) ONE of the following:
      a. High potency topical corticosteroid (such as halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
      b. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
      c. Topical PDE-4 inhibitor (such as crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
      d. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
      e. Topical JAK inhibitor (such as ruxolitinib [Opzelura])

NEMOLIZUMAB-ILTO (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
   - The patient has had prurigo nodularis improvement (reduction) of pruritus or pruriginous lesions
   - Nemluvio will NOT be used concurrently with other systemic biologics (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of prurigo nodularis

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe atopic dermatitis (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on Nemluvio
   - Nemluvio will NOT be used concurrently with other systemic biologics (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)] for the treatment of atopic dermatitis

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **NEMOLIZUMAB-ILTO (Nemluvio)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Prurigo nodularis (PN: a type of skin condition)
      2. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   B. If you have prurigo nodularis, renewal also requires:
      1. You have had prurigo nodularis improvement or reduction of pruritus (itching) or pruriginous lesions (wounds)
      2. You will NOT use Nemluvio concurrently (at the same time) with other systemic biologics (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis
   C. If you have moderate to severe atopic dermatitis, renewal also requires:
      1. You have shown improvement while on Nemluvio
      2. You will NOT use Nemluvio with other systemic biologics (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitors [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient has a usual interstitial pneumonia (UIP) pattern as evidenced by high-resolution computed tomography (HRCT) alone or via a combination of surgical lung biopsy and HRCT
   - The patient does NOT have other known causes of interstitial lung disease (ILD) (e.g., connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis, systemic sclerosis, rheumatoid arthritis, radiation, sarcoidosis, bronchiolitis obliterans organizing pneumonia, human immunodeficiency virus [HIV] infection, viral hepatitis, cancer)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Ofev (nintedanib), pirfenidone (Esbriet)

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

NERANDOMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of progressive pulmonary fibrosis (PPF) (ICD-10 J84.170) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient has interstitial lung disease with a progressive phenotype (trait) (PF-ILD)
   - The patient's lung function and respiratory symptoms OR chest imaging has worsened/progressed despite treatment with medications used in clinical practice for ILD (not attributable to comorbidities [e.g., infection, heart failure])
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT) (e.g., defined as reticular abnormality with traction bronchiectasis with or without honeycombing)
   - The patient had a trial of or contraindication to the preferred agent: Ofev (nintedanib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NERANDOMILAST (Jascayd)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Idiopathic pulmonary fibrosis (IPF: a type of lung condition)
      2. Progressive pulmonary fibrosis (PPF: a type of lung condition with gradual scarring of the lungs)

   B. If you have idiopathic pulmonary fibrosis, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
      3. You have a usual interstitial pneumonia (UIP) pattern (a specific type of lung scarring) as shown by high-resolution computed tomography (HRCT: type of imaging test) alone or by a combination of surgical lung biopsy (removal of cells or tissue from the lung for examination) and HRCT

   (Initial denial text continued on next page)

NERANDOMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

4. You do NOT have other known causes of interstitial lung disease (ILD: a type of lung condition) (such as connective tissue disease [a type of autoimmune disorder], drug toxicity, asbestos [a type of mineral that can be toxic] or beryllium [a type of metal that can be toxic] exposure, hypersensitivity pneumonitis [a type of lung condition], systemic sclerosis [a type of autoimmune disorder], rheumatoid arthritis [a type of joint condition], radiation, sarcoidosis [a type of inflammatory disorder], bronchiolitis obliterans organizing pneumonia [a type of lung condition], human immunodeficiency virus infection [HIV: an immune system disease caused by a virus], viral hepatitis [a type of liver inflammation], cancer)
5. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ofev (nintedanib), pirfenidone (Esbriet)

C. If you have progressive pulmonary fibrosis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
3. You have interstitial lung disease with a progressive phenotype (trait) (PF-ILD)
4. Your lung function and respiratory (breathing) symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for interstitial lung disease (not caused by comorbidities [additional health conditions] such as infection, heart failure)
5. You have at least 10% fibrosis (tissue scarring) on a chest high resolution computed tomography (HRCT: type of imaging testing) (such as reticular abnormality [a specific pattern on imaging studies] with traction bronchiectasis [a condition where the lungs' airway becomes damaged, widened, and thickened] with or without honeycombing)
6. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Ofev (nintedanib)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Does the patient have ONE of the following diagnoses?
   - Idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112)
   - Progressive pulmonary fibrosis (PPF) (ICD-10 J84.170)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient experienced a clinically meaningful improvement or maintenance in annual rate of decline?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NERANDOMILAST (Jascayd)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Idiopathic pulmonary fibrosis (IPF: a type of lung condition)
      2. Progressive pulmonary fibrosis (PPF: a type of lung condition with gradual scarring of the lungs)
   B. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Jascayd.

NERANDOMILAST (PART D)

For Part D use only:

NERANDOMILAST (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: IDIOPATHIC PULMONARY FIBROSIS (IPF): A USUAL INTERSTITIAL PNEUMONIA (UIP) PATTERN AS EVIDENCED BY HIGH-RESOLUTION COMPUTED TOMOGRAPHY (HRCT) ALONE OR VIA A COMBINATION OF SURGICAL LUNG BIOPSY AND HRCT. PROGRESSIVE PULMONARY FIBROSIS (PPF): 1) AT LEAST 10% FIBROSIS ON A CHEST HRCT, AND 2) INTERSTITIAL LUNG DISEASE WITH A PROGRESSIVE PHENOTYPE (PF-ILD).
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: IPF: PRESCRIBED BY OR IN CONSULTATION WITH A PULMONOLOGIST. PPF: PRESCRIBED BY OR IN CONSULTATION WITH A PULMONOLOGIST OR RHEUMATOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: IPF: 1) DOES NOT HAVE OTHER KNOWN CAUSES OF INTERSTITIAL LUNG DISEASE (E.G., CONNECTIVE TISSUE DISEASE, DRUG TOXICITY, ASBESTOS OR BERYLLIUM EXPOSURE, HYPERSENSITIVITY PNEUMONITIS, SYSTEMIC SCLEROSIS, RHEUMATOID ARTHRITIS, RADIATION, SARCOIDOSIS, BRONCHIOLITIS OBLITERANS ORGANIZING PNEUMONIA, HUMAN IMMUNODEFICIENCY VIRUS (HIV) INFECTION, VIRAL HEPATITIS, CANCER), AND 2) TRIAL OF OR CONTRAINDICATION TO ONE OF THE FOLLOWING PREFERRED AGENTS: OFEV, PIRFENIDONE. PPF: 1) LUNG FUNCTION AND RESPIRATORY SYMPTOMS OR CHEST IMAGING HAVE WORSENED/PROGRESSED DESPITE TREATMENT WITH MEDICATIONS USED IN CLINICAL PRACTICE FOR ILD (NOT ATTRIBUTABLE TO COMORBIDITIES SUCH AS INFECTION, HEART FAILURE), AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: OFEV (NINTEDANIB). RENEWAL: IPF, PPF: CLINICAL MEANINGFUL IMPROVEMENT OR MAINTENANCE IN ANNUAL RATE OF DECLINE.

Created: 10/25
Effective: 04/04/26 Client Approval: 04/26 P&T Approval: 10/25

NERATINIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NERATINIB MALEATE	NERLYNX	44421		GPI-10 (2153303510)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is HER2-positive

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have a diagnosis of early stage (stage I-III) breast cancer and meet **ALL** of the following criteria?
   - Nerlynx will be used as extended adjuvant therapy following trastuzumab based therapy
   - Nerlynx is being requested within 2 years of completing the last trastuzumab dose

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

NERATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of advanced or metastatic breast cancer and meet **ALL** of the following criteria?
   - Nerlynx will be used in combination with capecitabine
   - The patient has received at least two prior anti-HER2 based regimens in the metastatic setting

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NERATINIB (Nerlynx)** requires the following rule(s) be met for approval:
   A. You have breast cancer
   B. If you have early stage (stage I-III) breast cancer, approval also requires:
      1. You are 18 years of age or older
      2. Your tumor is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
      3. Nerlynx will be used as extended adjuvant (additional) therapy following trastuzumab based therapy
      4. Nerlynx is being requested within 2 years of completing the last trastuzumab dose
   C. If you have advanced or metastatic breast cancer (cancer has spread from where it started to nearby tissue or lymph nodes or has spread to other parts of the body), approval also requires:
      1. You are 18 years of age or older
      2. Your tumor is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
      3. Nerlynx will be used in combination with capecitabine
      4. You have received at least two prior anti-HER2 based regimens in the metastatic setting (has spread to other parts of the body)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NILOTINIB-DANZITEN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NILOTINIB-DANZITEN** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Newly diagnosed Philadelphia chromosome-positive chronic myeloid leukemia (Ph+ CML: a type of blood cell cancer) in chronic phase
   2. Previously treated Philadelphia chromosome-positive chronic myeloid leukemia (Ph+ CML) in chronic phase or accelerated phase

B. If you have newly diagnosed Philadelphia chromosome-positive chronic myeloid leukemia in chronic phase, approval also requires:
   1. You are 18 years of age or older

C. If you have previously treated Philadelphia chromosome-positive chronic myeloid leukemia in chronic phase or accelerated phase, approval also requires:
   1. You are 18 years of age or older
   2. You are resistant (not responding to treatment) or intolerant (side effect) to prior treatment that included Gleevec (imatinib)
   3. You had a mutational analysis (a type of lab test) prior to the start of treatment AND therapy is appropriate per the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient has a usual interstitial pneumonia (UIP) pattern as evidenced by high-resolution computed tomography (HRCT) alone or via a combination of surgical lung biopsy and HRCT
   - The patient does NOT have other known causes of interstitial lung disease (for example, connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis, systemic sclerosis, rheumatoid arthritis, radiation, sarcoidosis, bronchiolitis obliterans organizing pneumonia, human immunodeficiency virus infection, viral hepatitis, or cancer)
   - The patient had a trial of or contraindication to the preferred agent: Esbriet (pirfenidone)

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

NINTEDANIB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT) (e.g., defined as reticular abnormality with traction bronchiectasis with or without honeycombing)
   - The patient has a baseline forced vital capacity (FVC) of at least 40% of predicted value
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) [e.g., heart failure/fluid overload, drug-induced lung toxicity (cyclophosphamide, methotrexate, ACE-inhibitors), recurrent aspiration (such as from GERD), pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage or ILD caused by another rheumatic disease, such as mixed connective tissue disease (MCTD)]

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of chronic fibrosing interstitial lung disease (ILD) with a progressive phenotype (PF-ILD) (ICD-10 J84.170) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient's lung function and respiratory symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for ILD (not attributable to comorbidities e.g., infection, heart failure)
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT) (e.g., defined as reticular abnormality with traction bronchiectasis with or without honeycombing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NINTEDANIB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NINTEDANIB (Ofev)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Idiopathic pulmonary fibrosis (IPF: scarring of the lungs with an unknown cause)
   2. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: disorder that causes hardening of lung tissue)
   3. Chronic fibrosing interstitial lung disease (ILD) with a progressive phenotype (PF-ILD: scarring of the lungs caused by different underlying diseases or conditions that worsen over time)

B. You are 18 years of age or older

C. If you have idiopathic pulmonary fibrosis, approval also requires:
   1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
   2. You have a usual interstitial pneumonia pattern (a specific type of lung scarring) as evidenced by high-resolution computed tomography (HRCT: type of imaging test) alone or via a combination of surgical lung biopsy (small lung sample) and HRCT
   3. You do NOT have other known causes of interstitial lung disease, such as connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis (lung inflammation from inhaled substances), systemic sclerosis (an immune system disorder), rheumatoid arthritis (joint pain and inflammation), radiation, sarcoidosis (growth of inflammatory cells in the body), bronchiolitis obliterans organizing pneumonia (type of lung infection), human immunodeficiency virus infection, viral hepatitis (type of liver inflammation), or cancer
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Esbriet (pirfenidone)

NINTEDANIB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:

1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (type of immune system doctor)
2. You have at least 10% fibrosis (tissue scarring) on a chest high resolution computed tomography (HRCT: type of imaging testing)
3. You have a baseline forced vital capacity (FVC: amount of air that can be forcefully exhaled) of at least 40% of predicted value
4. Other causes of interstitial lung disease have been ruled out. Other causes may include heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors (class of blood pressure medications)], recurrent aspiration (inhaling) such as from GERD (acid reflux), pulmonary vascular disease (affecting blood vessels in lungs), pulmonary edema (excess fluid in the lungs), pneumonia (type of lung infection), chronic pulmonary thromboembolism (blood clot in lungs), alveolar hemorrhage (bleeding of a part of the lungs) or interstitial lung disease caused by another rheumatic (inflammatory) disease, such as mixed connective tissue disease (MCTD)

E. If you have chronic fibrosing interstitial lung disease with progressive phenotype, approval also requires:

1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (type of immune system doctor)
2. Your lung function and respiratory (breathing) symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for interstitial lung disease (ILD) (not caused by comorbidities such as infection, heart failure)
3. You have at least 10% fibrosis (tissue scarring) on a chest high resolution computed tomography (HRCT: type of imaging testing)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NINTEDANIB (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112)
   - Systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81)
   - Chronic fibrosing interstitial lung disease (ILD) with a progressive phenotype (PF-ILD) (ICD-10 J84.170)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient experienced a clinically meaningful improvement or maintenance in annual rate of decline?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NINTEDANIB (Ofev)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Idiopathic pulmonary fibrosis (IPF: scarring of the lungs with an unknown cause)
      2. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: disorder that causes hardening of lung tissue)
      3. Chronic fibrosing interstitial lung disease (ILD) with a progressive phenotype (PF-ILD: scarring of the lungs caused by different underlying diseases or conditions that worsens over time)
   B. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

For Part D use only:

NINTEDANIB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: IDIOPATHIC PULMONARY FIBROSIS (IPF): A USUAL INTERSTITIAL PNEUMONIA (UIP) PATTERN AS EVIDENCED BY HIGH-RESOLUTION COMPUTED TOMOGRAPHY (HRCT) ALONE OR VIA A COMBINATION OF SURGICAL LUNG BIOPSY AND HRCT. SYSTEMIC SCLEROSIS-ASSOCIATED INTERSTITIAL LUNG DISEASE (SSC-ILD): 1) AT LEAST 10% FIBROSIS ON A CHEST HRCT, AND 2) BASELINE FVC AT LEAST 40% OF PREDICTED VALUE. CHRONIC FIBROSING INTERSTITIAL LUNG DISEASE WITH A PROGRESSIVE PHENOTYPE (PF-ILD): AT LEAST 10% FIBROSIS ON A CHEST HRCT.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: IPF: PRESCRIBED BY OR IN CONSULTATION WITH A PULMONOLOGIST. SSC-ILD, PF-ILD: PRESCRIBED BY OR IN CONSULTATION WITH A PULMONOLOGIST OR RHEUMATOLOGIST.
Coverage Duration	INITIAL: SSC-ILD: 6 MOS. IPF, PF-ILD: 12 MOS. RENEWAL (ALL INDICATIONS): 12 MOS.
Other Criteria	INITIAL: IPF: 1) DOES NOT HAVE OTHER KNOWN CAUSES OF INTERSTITIAL LUNG DISEASE (E.G., CONNECTIVE TISSUE DISEASE, DRUG TOXICITY, ASBESTOS OR BERYLLIUM EXPOSURE, HYPERSENSITIVITY PNEUMONITIS), AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: ESBRIET (PIRFENIDONE). SSC-ILD: DOES NOT HAVE OTHER KNOWN CAUSES OF INTERSTITIAL LUNG DISEASE (E.G., HEART FAILURE/FLUID OVERLOAD, DRUG-INDUCED LUNG TOXICITY, RECURRENT ASPIRATION). PF-ILD: LUNG FUNCTION AND RESPIRATORY SYMPTOMS OR CHEST IMAGING HAVE WORSENED/PROGRESSED DESPITE TREATMENT WITH MEDICATIONS USED IN CLINICAL PRACTICE FOR ILD (NOT ATTRIBUTABLE TO COMORBIDITIES SUCH AS INFECTION, HEART FAILURE). RENEWAL: IPF, SSC-ILD, PF-ILD: CLINICAL MEANINGFUL

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NIRAPARIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIRAPARIB TOSYLATE	ZEJULA	44177		GPI-10 (2153555020)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the cancer advanced, and does the patient meet **ALL** of the following criteria?
   - The patient is in complete or partial response to first-line platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient's cancer is associated with homologous recombination deficiency (HRD)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation, and/or genomic instability

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

NIRAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the cancer recurrent, and does the patient meet **ALL** of the following criteria?
   - The patient is in complete or partial response to platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient's cancer has deleterious or suspected deleterious germline *BRCA*-mutation (*gBRCAmut*), based on an FDA-approved companion diagnostic for Zejula
   - Zejula will be used as monotherapy
   - Zejula will be started no later than 8 weeks after the patient's most recent platinum-containing regimen

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NIRAPARIB (Zejula)** requires the following rule(s) be met for approval:
   A. You have advanced (has spread to other parts of the body) or recurrent (has returned) epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancer)
   B. If you have advanced epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
      1. You are 18 years of age or older
      2. You are in complete or partial response (cancer is not detectable or has partly responded to treatment but still did not go away) to first-line platinum-based chemotherapy (such as cisplatin, carboplatin)
      3. Your cancer is associated with homologous recombination deficiency (HRD: a type of gene mutation)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation (a type of gene mutation), and/or genomic instability (high rate of gene mutation)

NIRAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:

1. You are 18 years of age or older
2. You are in complete or partial response (signs or symptoms of cancer have disappeared or cancer partly responded to treatment, but still did not go away) to platinum-based chemotherapy (such as cisplatin, carboplatin)
3. Your cancer has deleterious or suspected deleterious germline *BRCA*-mutation (*gBRCAmut*: a type of gene mutation [abnormal change]) based on a Food and Drug Administration (FDA)-approved companion diagnostic for Zejula
4. Zejula will be used as monotherapy (used by itself for treatment)
5. Zejula will be started no later than 8 weeks after your most recent platinum-containing regimen (such as cisplatin, carboplatin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NIRAPARIB-ABIRATERONE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient had a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., less than 50 ng/dL)
   - Akeega will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NIRAPARIB-ABIRATERONE (Akeega)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)
      2. Metastatic castration-sensitive prostate cancer (mCSPC: prostate cancer that has spread to other parts of the body and responds to hormone therapy)

   B. If you have metastatic castration-resistant prostate cancer, approval also requires:
      1. You are 18 years of age or older
      2. Your cancer has a deleterious (harmful) or suspected deleterious BRCA mutation (BRCAm: abnormal change in gene) based on a Food and Drug Administration (FDA)-approved test for Akeega
      3. Akeega will be used in combination with oral prednisone
      4. You meet ONE of the following:
         a. You had a bilateral orchiectomy (both testicles have been surgically removed)
         b. You have a castrate level of testosterone (your blood testosterone levels are less than 50 ng/dL)
         c. Akeega will be used together with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

GUIDELINES FOR USE

1. Is the request for the prevention of respiratory syncytial virus (RSV) lower respiratory tract disease (ICD-10 Z29.11) and the patient meets **ONE** of the following criteria?
   - The patient is less than 12 months of age (neonate or infant) and born during or entering their first RSV season
   - The patient is 12 to 24 months of age and remains vulnerable to severe RSV disease

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient has not completed a course of Synagis (palivizumab) OR has not received a dose of Synagis in the past 30 days, and will not receive further doses of Synagis within the same RSV season
   - The patient has not received 2 doses of Beyfortus in their lifetime, unless has undergone or is undergoing a cardiac surgery with cardiopulmonary bypass

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

NIRSEVIMAB-ALIP (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Has the patient undergone or will undergo cardiac surgery with cardiopulmonary bypass?

If yes, **approve for 6 months by HICL or GPI-10 for 2 fills.**
If no, **approve for 6 months by HICL or GPI-10 for 1 fill.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NIRSEVIMAB-ALIP (Beyfortus)** requires the following rule(s) be met for approval:

A. Beyfortus will be used for the prevention of respiratory syncytial virus (RSV: type of lung and respiratory tract infection)
B. You meet ONE of the following:
   1. You are less than 12 months of age (neonate or infant) and were born during or are entering your first RSV season (period of increased rate of infection)
   2. You are 12 to 24 months of age and are vulnerable to (at risk of) severe RSV disease
C. You have not completed a course of Synagis (palivizumab) within this RSV season OR you have not received a dose of Synagis in the past 30 days, and you will not receive further doses of Synagis within this RSV season
D. You have not received more than 2 doses of Beyfortus in your lifetime, unless you have undergone or will undergo a cardiac surgery with cardiopulmonary bypass (type of heart and lung surgery)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NITISINONE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NITISINONE	ORFADIN, NITYR, NITISINONE	23253		GPI-10 (3090404500)	BRAND ≠ HARLIKU

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary tyrosinemia type 1 (HT-1) (ICD-10 E70.21) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases
   - The patient's diagnosis is confirmed by elevated urinary or plasma succinylacetone (SA) levels OR a mutation in the fumarylacetoacetate hydrolase (FAH) gene

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for Orfadin (nitisinone) capsules?

   If yes, **approve all strengths for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

NITISINONE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for Nityr tablets?

   If yes, **approve all strengths for 6 months by NDC or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the request for Orfadin suspension **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to the preferred agent: nitisinone tablets or capsules

   If yes, **approve for 6 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NITISINONE (Orfadin, Nityr)** requires the following rule(s) be met for approval:
   A. You have hereditary tyrosinemia type 1 (HT-1: a type of genetic disorder)
   B. Therapy is prescribed by or in consultation with a prescriber specializing ininherited metabolic diseases
   C. Your diagnosis is confirmed by elevated urinary or plasma succinylacetone levels (a chemical that is present in hereditary tyrosinemia) OR a mutation (abnormal change) in the fumarylacetoacetate hydrolase gene
   D. If you are requesting Orfadin oral suspension, approval also requires:
      1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: nitisinone tablets or capsules

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ADVANTAGE AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NITISINONE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary tyrosinemia type 1 (HT-1) (ICD-10 E70.21) **AND** meet the following criterion?
- The patient's urinary or plasma succinylacetone (SA) levels have decreased from baseline while on treatment with nitisinone

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the renewal request for Orfadin (nitisinone) capsules or Orfadin suspension?

If yes, **approve the requested formulation for 12 months by GPID for all strengths or by GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

3. Is the renewal request for Nityr tablets?

If yes, **approve for 12 months by NDC for all strengths or by GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NITISINONE (Orfadin, Nityr)** requires the following rule(s) be met for renewal:
A. You have hereditary tyrosinemia type 1 (HT-1: a type of genetic disorder)
B. Your urinary or plasma succinylacetone levels (a chemical that is present in hereditary tyrosinemia) have decreased from baseline while on treatment with nitisinone

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Opdivo will be used as a single agent OR in combination with Yervoy (ipilimumab)
   - Opdivo will NOT be used concurrently with targeted therapy (i.e., BRAF inhibitors [Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [Mekinist (trametinib)], and NTRK inhibitors [Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of stage IIB, IIC, III, or IV melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Opdivo will be used as an adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of resectable (node positive or tumor is 4 cm or greater) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #4.
   If no, continue to #6.

4. Will Opdivo be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment only?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient meet **ALL** of the following criteria?
   - The patient's cancer has no known epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) rearrangements
   - Opdivo will be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery and prior use with platinum-doublet chemotherapy as neoadjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #7.
   If no, continue to #10.

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Does the patient's tumors express PD-L1 (at least 1 percent), as determined by an FDA-approved test, and meet **ALL** of the following criteria?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Opdivo will be used in combination with Yervoy (ipilimumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Will Opdivo be used in combination with Yervoy (ipilimumab) and 2 cycles of platinum-doublet chemotherapy (e.g., carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel) **AND** the patient meets the following criterion?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Has the patient's disease progressed while on or after platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) and the patient meets **ONE** of the following criteria?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - The tumor has an ALK mutation, and the patient had disease progression following an FDA-approved ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The tumor has an EGFR mutation, and the patient had disease progression following an FDA-approved EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

13. Does the patient meet **ONE** of the following criteria?
    - The patient has intermediate or poor risk disease AND Opdivo will used in combination with Yervoy (ipilimumab)
    - Opdivo will be used in combination with Cabometyx (cabozantinib)
    - The patient has received prior anti-angiogenic therapy (e.g., Sutent [sunitinib], Votrient [pazopanib], Cabometyx [cabozantinib])

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

14. Does the patient have a diagnosis of classical Hodgkin lymphoma (cHL) (ICD-10 Group C81)?

    If yes, continue to #15.
    If no, continue to #19.

15. Has the patient's disease been previously treated?

    If yes, continue to #16.
    If no, continue to #18.

16. Has the patient's disease relapsed or progressed after **ONE** of the following?
    - Autologous hematopoietic stem cell transplantation (HSCT) and Adcetris (brentuximab vedotin)
    - 3 or more lines of systemic therapy that includes autologous HSCT

    If yes, continue to #17.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

17. Is the patient 18 years of age or older?

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

18. Is the patient's disease Stage III or IV and the patient meets **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - Opdivo will be used in combination with doxorubicin, vinblastine, and dacarbazine (AVD)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

19. Does the patient have a diagnosis of recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has disease progression while on or after treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #20.

20. Does the patient have a diagnosis of urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used as an adjuvant treatment
    - The patient is at high risk of recurrence after undergoing radical resection of UC

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #21.

GUIDELINES FOR USE (CONTINUED)

29. Does the patient have a diagnosis of completely resected esophageal or gastroesophagealjunction cancer (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used as an adjuvant treatment
    - The patient has a residual pathologic disease and has received neoadjuvant chemoradiotherapy (CRT)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #30.

30. Does the patient have a diagnosis of unresectable advanced, recurrent or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has received prior fluoropyrimidine- and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #31.

31. Does the patient have a diagnosis of unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #32.
    If no, continue to #33.

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

32. Does the patient meet **ONE** of the following criteria?
    - Opdivo will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - Opdivo will be used in combination with Yervoy (ipilimumab)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

33. Does the patient have a diagnosis of advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **NIVOLUMAB (Opdivo)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Unresectable or metastatic melanoma (type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
        2. Stage IIB, IIC, III, or IV melanoma (a type of skin cancer)
        3. Resectable (node positive or tumor is 4 cm or greater) non-small cell lung cancer (NSCLC) (a type of lung cancer that can be removed by surgery)
        4. Metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to other parts of the body)
        5. Recurrent non-small cell lung cancer (NSCLC) (a type of lung cancer that has returned)
        6. Unresectable malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery)

    (Denial text continued on next page)

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Advanced renal cell carcinoma (RCC: type of kidney cancer)
8. Classical Hodgkin lymphoma (cHL: type of blood cancer)
9. Recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN: type of head/neck cancer that has returned or spread to other parts of the body)
10. Urothelial carcinoma (UC: urinary system cancer)
11. Unresectable or metastatic urothelial carcinoma (urinary system cancer that cannot be removed by surgery or has spread to other parts of the body)
12. Locally advanced or metastatic urothelial carcinoma (urinary system cancer that has spread to nearby tissue or lymph nodes or that has spread to other parts of the body)
13. Colorectal cancer (a type of digestive cancer)
14. Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be removed by surgery or has spread to other parts of the body)
15. Completely resected esophageal or gastroesophageal junction cancer (types of digestive system cancer that has been removed by surgery)
16. Unresectable advanced, recurrent or metastatic esophageal squamous cell carcinoma (ESCC: type of digestive system cancer that cannot be removed by surgery, and has returned or has spread to other parts of the body)
17. Unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC: type of digestive system cancer that cannot be removed by surgery and has spread to other parts of the body)
18. Advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (types of digestive system cancer that has spread to other parts of the body)

B. If you have unresectable or metastatic melanoma, approval also requires:

1. You are 12 years of age or older
2. Opdivo will be used alone OR in combination with Yervoy (ipilimumab)
3. Opdivo will NOT be used concurrently (at the same time) with a targeted therapy (BRAF inhibitors [such as Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [such as Mekinist (trametinib)], and NTRK inhibitors [such as Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

C. If you have stage IIB, IIC, III, or IV melanoma, approval also requires:

1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Opdivo will be used as an adjuvant (add-on) treatment

(Denial text continued on next page)

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have resectable (node positive or tumor is 4 cm or greater) non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Opdivo will be used in combination with platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment (given before main treatment) only
   b. Your cancer has NO known epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK: a type of enzyme) rearrangements (type of gene mutation); AND Opdivo will be used in combination with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment), OR as a single medication as adjuvant (add-on) treatment after surgery and prior use with platinum-doublet chemotherapy as neoadjuvant treatment

E. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your tumors have programmed death-ligand 1 (PD-L1: a type of protein [of at least 1 percent]) as determined by a Food and Drug Administration (FDA)-approved test; your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene); AND Opdivo will be used in combination with Yervoy (ipilimumab)
   b. Your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene); AND Opdivo will be used in combination with Yervoy (ipilimumab) and 2 cycles of platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel)

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

c. Your disease has worsened while on or after platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin), and you meet ONE of the following:
   i. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of enzyme) genomic tumor aberrations (types of abnormal gene)
   ii. Your tumor has an ALK mutation, and your disease has worsened after treatment with an FDA-approved ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
   iii. Your tumor has an EGFR mutation, and your disease has worsened after treatment with an FDA-approved EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

F. If you have recurrent non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene)
3. Opdivo will be used in combination with Yervoy (ipilimumab) AND 2 cycles of platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel)

G. If you have unresectable malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used in combination with Yervoy (ipilimumab)

H. If you have advanced renal cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have intermediate or poor risk disease AND Opdivo will used in combination with Yervoy (ipilimumab)
   b. Opdivo will be used in combination with Cabometyx (cabozantinib)
   c. You have received prior anti-angiogenic therapy (medication that stop tumors from growing their own blood vessels such as Sutent [sunitinib], Votrient [pazopanib], Cabometyx [cabozantinib])

(Denial text continued on next page)

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

I. If you have classical Hodgkin lymphoma, approval also requires ONE of the following:
1. If your disease has been previously treated, you meet ALL of the following:
   a. You are 18 years of age or older
   b. Your disease has relapsed (returned) or worsened after receiving ONE of the following:
      i. Autologous hematopoietic stem cell transplantation (HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells) and Adcetris (brentuximab vedotin)
      ii. Three or more lines of systemic therapy (treatment that targets the entire body) that includes autologous hematopoietic stem cell transplantation (HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells)
2. If your disease has NOT been previously treated, you meet ALL of the following:
   a. You are 12 years of age or older
   b. Your disease is Stage III or IV
   c. Opdivo will be used in combination with doxorubicin, vinblastine, and dacarbazine (AVD)

J. If you have recurrent or metastatic squamous cell carcinoma of the head and neck, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened on or after treatment with a platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

K. If you have urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used as an adjuvant (add-on) treatment
3. You are at high risk of recurrence (disease returning) after undergoing radical resection (tumor removal) of urothelial carcinoma

L. If you have unresectable or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You will be using Opdivo in combination with cisplatin and gemcitabine

M. If you have locally advanced or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your disease has worsened during or after platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
   b. Your disease has worsened within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on next page)

NIVOLUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

N. If you have colorectal cancer, approval also requires:
1. You are 12 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)
3. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery); AND Opdivo will be used in combination with Yervoy (ipilimumab)
   b. Your cancer is metastatic (has spread to other parts of the body), and you meet ONE of the following:
      i. Opdivo will be used in combination with Yervoy (ipilimumab)
      ii. Opdivo will be used as a single medication; AND your disease has worsened after treatment with a fluoropyrimidine, oxaliplatin, and irinotecan

O. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You will be using Opdivo in combination with Yervoy (ipilimumab) as first-line treatment
   b. You will be using Opdivo in combination with Yervoy (ipilimumab), AND you have been previously treated with Nexavar (sorafenib)

P. If you have completely resected esophageal or gastroesophageal junction cancer, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used as an adjuvant (add-on) treatment
3. You have a residual pathologic disease (disease is still present) and have received neoadjuvant chemoradiotherapy (CRT) (a type of cancer treatment given before surgery)

Q. If you have unresectable advanced, recurrent, or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You have previously received treatment with fluoropyrimidine and platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

R. If you have unresectable advanced or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You will be using Opdivo in combination with fluoropyrimidine and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
   b. You will be using Opdivo in combination with Yervoy (ipilimumab)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has intermediate or poor risk disease, and Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
   - Opdivo Qvantig will be used in combination with Cabometyx (cabozantinib)
   - The patient has received prior anti-angiogenic therapy (e.g., Sutent [sunitinib], Votrient [pazopanib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, continue to #4.
   If no, continue to #6.

CONTINUED ON NEXT PAGE

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's cancer unresectable or metastatic?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient's cancer stage IIB, IIC, III, or IV and the patient meets **ALL** of the following criteria?
   - The patient has undergone complete resection
   - Opdivo Qvantig will be used as an adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is resectable (node positive or tumor is at least 4 cm)

   If yes, continue to #7.
   If no, continue to #9.

7. Will Opdivo Qvantig be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

8. Does the patient's cancer have no known epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) rearrangements, and the patient meets **ONE** of the following criteria?
   - Opdivo Qvantig will be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment
   - Opdivo Qvantig will be used as monotherapy as adjuvant treatment after surgical resection and prior use with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has disease progression while on or after platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, continue to #10.
   If no, continue to #11.

10. Does the patient meet **ONE** of the following criteria?
    - The tumor does NOT have EGFR or ALK genomic aberrations
    - The tumor has an EGFR mutation, and the patient had disease progression following an FDA-approved EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])
    - The tumor has an ALK mutation, and the patient had disease progression following an FDA-approved ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

11. Does the patient have a diagnosis of recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has disease progression while on or after treatment with a platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #12.

12. Does the patient have a diagnosis of urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #13.
    If no, continue to #16.

13. Is the patient at high risk of recurrence after undergoing radical resection of urothelial carcinoma **AND** meets the following criterion?
    - Opdivo Qvantig will be used as an adjuvant treatment

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #14.

14. Is the patient's cancer unresectable or metastatic **AND** the patient meets the following criterion?
    - Opdivo Qvantig will be used in combination with cisplatin and gemcitabine

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #15.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

15. Is the patient's cancer locally advanced or metastatic and the patient meets **ONE** of the following criteria?
    - The patient has disease progression during or following platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

16. Does the patient have a diagnosis of colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR)

    If yes, continue to #17.
    If no, continue to #19.

17. Is the patient's cancer metastatic and the patient meets **ONE** of the following criteria?
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
    - The patient has disease progression following treatment with a fluoropyrimidine (e.g., fluorouracil, capecitabine), oxaliplatin, and irinotecan

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #18.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

18. Is the patient's cancer unresectable **AND** the patient meets the following criterion?
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

19. Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #20.

20. Does the patient have a diagnosis of esophageal or gastroesophageal junction cancer (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has undergone complete resection
    - Opdivo Qvantig will be used as an adjuvant treatment
    - The patient has a residual pathologic disease
    - The patient has received neoadjuvant chemoradiotherapy (CRT)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #21.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

21. Does the patient have a diagnosis of esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #22.
    If no, continue to #24.

22. Is the patient's cancer unresectable advanced or metastatic and the patient meets **ALL** of the following criteria?
    - Opdivo Qvantig will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient's tumors express PD-L1 (at least 1%)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #23.

23. Is the patient's cancer unresectable advanced, recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has received prior fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

24. Does the patient have a diagnosis of advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo Qvantig will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient's tumors express PD-L1 (at least 1%)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **NIVOLUMAB-HYALURONIDASE-NVHY (Opdivo Qvantig)** requires the following rule(s) be met for approval:

    A. You have ONE of the following:
        1. Advanced renal cell carcinoma (RCC) (a type of kidney cancer)
        2. Melanoma (a type of skin cancer)
        3. Non-small cell lung cancer (NSCLC) (a type of lung cancer)
        4. Metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to other parts of the body)
        5. Recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (a type of head/neck cancer that has returned or has spread to other parts of the body)
        6. Urothelial carcinoma (UC: urinary system cancer)
        7. Colorectal cancer (CRC) (a type of digestive cancer)
        8. Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be completely removed with surgery or has spread to other parts of the body)
        9. Esophageal or gastroesophageal junction cancer (types of digestive system cancer)
        10. Esophageal squamous cell carcinoma (ESCC) (a type of digestive system cancer)
        11. Advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (types of digestive system cancer that has spread to other parts of the body)

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have advanced renal cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have intermediate or poor risk disease, and Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
   b. Opdivo Qvantig will be used in combination with Cabometyx (cabozantinib)
   c. You have received prior anti-angiogenic therapy (a type of medication that stops tumors from growing new blood vessels, such as Sutent [sunitinib], Votrient [pazopanib])

C. If you have melanoma, approval also requires:
1. You are 12 years of age or older
2. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery) or metastatic (has spread to other parts of the body)
   b. Your cancer is stage IIB, IIC, III, or IV; you have undergone complete resection (removal by surgery); and Opdivo Qvantig will be used as an adjuvant (add-on) treatment

D. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is resectable (node positive or tumor is at least 4 cm) (can be removed by surgery)
3. You meet ONE of the following:
   a. Opdivo Qvantig will be used in combination with platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment (given before main treatment)
   b. Your cancer has no known epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK: a type of enzyme) rearrangements (type of gene mutation), and you meet ONE of the following:
      i. Opdivo Qvantig will be used in combination with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment)
      ii. Opdivo Qvantig will be used alone as adjuvant (add-on) treatment after surgical resection (removal by surgery) and prior use with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment)

(Denial text continued on the next page)

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened while on or after platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin), and you meet ONE of the following:
   a. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of enzyme) genomic aberrations (types of abnormal gene)
   b. Your tumor has an epidermal growth factor receptor (EGFR: type of protein) mutation (abnormal change in a type of gene), and your disease has worsened after treatment with a Food and Drug Administration (FDA)-approved EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])
   c. Your tumor has an anaplastic lymphoma kinase (ALK: type of enzyme) mutation (abnormal change in a type of gene), and your disease has worsened after treatment with a Food and Drug Administration (FDA)-approved ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])

F. If you have recurrent or metastatic squamous cell carcinoma of the head and neck, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened while on or after treatment with a platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

G. If you have urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You are at high risk of recurrence (disease returning) after undergoing radical resection (tumor removal) of urothelial carcinoma (UC: urinary system cancer), and Opdivo Qvantig will be used as an adjuvant (add-on) treatment
   b. Your cancer is unresectable (cannot be removed by surgery) or metastatic (has spread to other parts of the body), and Opdivo Qvantig will be used in combination with cisplatin and gemcitabine
   c. Your cancer is locally advanced (has spread to nearby tissue or lymph nodes) or metastatic (has spread to other parts of the body), and you meet ONE of the following:
      i. Your disease has worsened during or following platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
      ii. Your disease has worsened within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on the next page)

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

H. If you have colorectal cancer, approval also requires:
1. You are 12 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)
3. You meet ONE of the following:
   a. You have metastatic cancer (cancer that has spread to other parts of the body) and meet ONE of the following:
      i. Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
      ii. Your disease has worsened after treatment with a fluoropyrimidine (a type of cancer treatment, such as fluorouracil, capecitabine), oxaliplatin, and irinotecan
   b. You have unresectable (cannot be removed by surgery) cancer and Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

I. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

J. If you have esophageal or gastroesophageal junction cancer, approval also requires:
1. You are 18 years of age or older
2. You have undergone complete resection (removal by surgery)
3. Opdivo Qvantig will be used as an adjuvant (add-on) treatment
4. You have a residual pathologic disease (disease is still present)
5. You have received neoadjuvant chemoradiotherapy (CRT) (a type of cancer treatment given before surgery)

(Denial text continued on the next page)

NIVOLUMAB-HYALURONIDASE-NVHY BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

K. If you have esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery) advanced or metastatic (has spread to other parts of the body); Opdivo Qvantig will be used in combination with fluoropyrimidine- (a type of cancer treatment, such as fluorouracil, capecitabine) and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin); AND your tumor expresses programmed death-ligand 1 (PD-L1: type of protein) (at least 1%)
   b. Your cancer is unresectable (cannot be removed by surgery) advanced, recurrent (has returned) or metastatic (has spread to other parts of the body), and you have previously received treatment with fluoropyrimidine- (a type of cancer treatment, such as fluorouracil, capecitabine) and platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

L. If you have advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Opdivo Qvantig will be used in combination with fluoropyrimidine- (a type of cancer treatment, such as fluorouracil, capecitabine) and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
3. Your tumor expresses programmed death-ligand 1 (PD-L1: type of protein) (at least 1%)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Opdivo Qvantig.
The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) as confirmed by at least **TWO** of the following criteria?
   - An elevated alkaline phosphatase (ALP)
   - The presence of antimitochondrial antibodies (AMA) OR other PBC-specific autoantibodies, including sp100 or gp210 if AMA is negative
   - Histologic evidence (obtained by liver biopsy) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist or hepatologist
   - The patient does NOT have complete biliary obstruction
   - Ocaliva will NOT be used concurrently with any other second-line PBC treatment (e.g., Iqirvo [elafibranor], Livdelzi [seladelpar])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

OBETICHOLIC ACID (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - Ocaliva will be used as monotherapy in a patient who is unable to tolerate ursodiol (ursodeoxycholic acid)
   - Ocaliva will be used in combination with ursodiol (ursodeoxycholic acid) in a patient who had an inadequate response to at least 1 year of treatment with ursodiol monotherapy

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has compensated cirrhosis with no evidence of portal hypertension

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OBETICHOLIC ACID (Ocaliva)** requires the following rule(s) be met for approval:
   A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct), as confirmed by TWO of the following criteria:
      1. You have an elevated alkaline phosphatase (ALP) level (a type of lab test)
      2. You have the presence of antimitochondrial antibodies (AMA: indicator of body attacking its own cells) or PBC-specific autoantibodies, including sp100 or gp210 if AMA is negative
      3. Histologic evidence (lab data obtained by liver biopsy [removal of cells or tissue from the liver for examination]) of non-suppurative destructive cholangitis (inflammation of the bile duct) and destruction of interlobular bile ducts
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions) or hepatologist (a type of liver doctor)

OBETICHOLIC ACID (PART D)

INITIAL CRITERIA (CONTINUED)

D. You do not have complete biliary obstruction (blockage of bile ducts)
E. You will NOT use Ocaliva concurrently (at the same time) with any other second-line therapy for PBC (such as Iqirvo [elafibranor], Livdelzi [seladelpar])
F. You meet ONE of the following:
    1. Ocaliva will be used as monotherapy (one-drug therapy) if you are unable to tolerate ursodiol (ursodeoxycholic acid)
    2. Ocaliva will be used in combination with ursodiol (ursodeoxycholic acid) if you had an inadequate response (drug did not work) to at least 1 year of treatment with ursodiol monotherapy (one-drug treatment)
G. You meet ONE of the following:
    1. You do not have cirrhosis (liver damage)
    2. You have compensated cirrhosis (a type of liver condition) with no evidence of portal hypertension (high blood pressure in the major vein that leads to the liver)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OBETICHOLIC ACID (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) and meet **ALL** of the following criteria?
   - The patient has not developed complete biliary obstruction
   - The patient continues to benefit from the medication
   - Ocaliva will NOT be used concurrently with any other second-line PBC treatment (e.g., Iqirvo [elafibranor], Livdelzi [seladelpar])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OBETICHOLIC ACID (Ocaliva)** requires the following rule(s) be met for renewal:
   A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct)
   B. You have not developed complete biliary obstruction (blockage of bile ducts)
   C. You continue to benefit from the medication
   D. You will NOT use Ocaliva concurrently (at the same time) with any other second-line therapy for PBC (such as Iqirvo [elafibranor], Livdelzi [seladelpar])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ocaliva.

PRIOR AUTHORIZATION GUIDELINES

OBETICHOLIC ACID (PART D)

For Part D use only:

OBETICHOLIC ACID (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	PRIMARY BILIARY CHOLANGITIS (PBC): INITIAL: DIAGNOSIS CONFIRMED BY TWO OF THE FOLLOWING: 1) ELEVATED ALKALINE PHOSPHATASE, 2) PRESENCE OF ANTIMITOCHONDRIAL ANTIBODIES (AMA) OR PBC-SPECIFIC AUTOANTIBODIES, INCLUDING SP100 OR GP210 IF AMA IS NEGATIVE, OR 3) HISTOLOGIC EVIDENCE OF NON-SUPPURATIVE DESTRUCTIVE CHOLANGITIS AND DESTRUCTION OF INTERLOBULAR BILE DUCTS (BY LIVER BIOPSY).
Age Restrictions	N/A
Prescriber Restrictions	PBC: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST OR HEPATOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS
Other Criteria	PBC: INITIAL: 1) DOES NOT HAVE COMPLETE BILIARY OBSTRUCTION, 2) NO CONCURRENT USE WITHANY OTHER SECOND-LINE PBC TREATMENT (E.G., IQIRVO, LIVDELZI), AND 3) ONE OF THE FOLLOWING: (A) USED AS MONOTHERAPY IF UNABLE TO TOLERATE URSODIOL, OR (B) USED IN COMBINATION WITH URSODIOL IF INADEQUATE RESPONSE TO AT LEAST 1 YEAR OF TREATMENT WITH URSODIOL MONOTHERAPY. RENEWAL: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, 2) DOES NOT HAVE COMPLETE BILIARY OBSTRUCTION, AND 3) NO CONCURRENT USE WITH ANY OTHER SECOND-LINE PBC TREATMENT (E.G., IQIRVO, LIVDELZI).

OBINUTUZUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OBINUTUZUMAB	GAZYVA	40703		GPI-10 (2135184300)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

OBINUTUZUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient has not received previous treatment for CLL
   - Gazyva will be used in combination with Leukeran (chlorambucil)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82)?

   If yes, continue to #3.
   If no, continue to #5.

3. Does the patient meet **ALL** of the following criteria?
   - The patient has relapsed after, or is refractory to, a regimen containing rituximab
   - Gazyva will be used in combination with bendamustine for the initial six cycles OR as monotherapy thereafter

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

OBINUTUZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's cancer stage II bulky, III or IV and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has NOT received previous treatment for stage II bulky, III or IV follicular lymphoma
   - Gazyva will be used in combination with chemotherapy for the initial six or eight cycles [e.g., bendamustine; CHOP (cyclophosphamide, daunorubicin, vincristine, prednisone or prednisolone); CVP (cyclophosphamide, vincristine, prednisone or prednisolone)] OR as monotherapy thereafter

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Will Gazyva be used as a pretreatment prior to initiating Columvi (glofitamab-gxbm)?

   If yes, **approve by HICL or GPI-10 for 1 fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of lupus nephritis (LN) (ICD-10 M32.14) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is receiving standard therapy (e.g., mycophenolate mofetil and corticosteroids)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OBINUTUZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OBINUTUZUMAB (Gazyva)** requires the following rule(s) to be met for approval:

A. The request is for ONE of the following:
   1. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   2. Follicular lymphoma (FL: a type of blood cancer)
   3. Use as a pretreatment prior to initiating Columvi (glofitamab-gxbm)
   4. Lupus nephritis (a type of immune condition that affects the kidneys)

B. If you have chronic lymphocytic leukemia, approval also requires:
   1. You have NOT received previous treatment for chronic lymphocytic leukemia
   2. Gazyva will be used in combination with Leukeran (chlorambucil)

C. If you have follicular lymphoma, approval also requires ONE of the following:
   1. You have relapsed (symptoms returned) after, or are refractory (not responding) to, a regimen containing rituximab; AND Gazyva will be used in combination with bendamustine for the initial six cycles or as monotherapy (one drug treatment) thereafter
   2. Your cancer is stage II bulky, III, or IV; you are 18 years of age or older; you have NOT received previous treatment for stage II bulky, III or IV follicular lymphoma; AND Gazyva will be used in combination with chemotherapy (such as bendamustine; CHOP [cyclophosphamide, daunorubicin, vincristine, prednisone or prednisolone]; CVP [cyclophosphamide, vincristine, prednisone or prednisolone]) for the initial six or eight cycles, or as monotherapy (the only drug used in treatment) thereafter

D. If you have lupus nephritis, approval also requires:
   1. You are 18 years of age or older
   2. You are receiving standard therapy (such as mycophenolate mofetil and corticosteroids)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of relapsing-remitting multiple sclerosis (MS) (ICD-10 G35.A) and meet **ALL** of the following criteria?
   - The patient is 10 years of age or older
   - The patient had a trial of TWO agents indicated for the treatment of relapsing forms of MS (e.g., Gilenya (fingolimod), Tascenso ODT (fingolimod lauryl sulfate), Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OCRELIZUMAB (Ocrevus)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary progressive multiple sclerosis (PPMS: a type of nerve disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), or active secondary progressive disease (advanced disease)
      3. Relapsing-remitting multiple sclerosis (MS) (a type of nerve disorder that returns and goes away)

   B. If you have primary progressive multiple sclerosis, approval also requires:
      1. You are 18 years of age or older

   C. If you have a relapsing form of multiple sclerosis, approval also requires:
      1. You are 18 years of age or older
      2. You have tried TWO medications indicated for the treatment of relapsing forms of MS (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   D. **If you have relapsing-remitting multiple sclerosis, approval also requires**:
      1. You are 10 years of age or older
      2. You have tried TWO medications indicated for the treatment of relapsing forms of MS (such as Gilenya (fingolimod), Tascenso ODT (fingolimod lauryl sulfate), Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

OCRELIZUMAB-HYALURONIDASE-OCSQ BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of TWO agents indicated for the treatment of relapsing forms of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of primary progressive multiple sclerosis (PPMS) (ICD-10 G35) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OCRELIZUMAB-HYALURONIDASE-OCSQ BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OCRELIZUMAB-HYALURONIDASE-OCSQ (Ocrevus Zunovo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)
   2. Primary progressive multiple sclerosis (PPMS: a type of nerve disorder)

B. If you have a relapsing form of multiple sclerosis, approval also requires:
   1. You are 18 years of age or older
   2. You have tried TWO medications indicated for the treatment of relapsing forms of MS (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

C. If you have primary progressive multiple sclerosis, approval also requires:
   1. You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ocrevus Zunovo.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

OCTREOTIDE - IM (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of severe diarrhea and flushing episodes (ICD-10 R19.7, R23.2) associated with metastatic carcinoid tumors (ICD-10 Groups C7B.0, C7A.0, D3A.0) **AND** meet the following criterion?
   - The patient had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   If yes, **approve for 2 months by HICL or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPomas) (ICD-10 C25.4) **AND** meet the following criterion?
   - The patient had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   If yes, **approve for 2 months by HICL or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OCTREOTIDE - IM (Sandostatin LAR Depot)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Acromegaly (a type of hormone disorder)
      2. Severe diarrhea and flushing episodes associated with metastatic carcinoid tumors (a type of slow growing cancer that has spread to other parts of the body)
      3. Profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (a type of cancer that starts from hormone producing cells)

ODEVIXIBAT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritis symptoms AND a reduction of serum bile acid from baseline
   - The patient does NOT have PFIC type 2 with specific ABCB11 variants that would result in nonfunctional, or the complete absence of, bile salt export pump (BSEP) protein
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of cholestatic pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritis symptoms AND a reduction of serum bile acid from baseline
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ODEVIXIBAT (Bylvay)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Pruritus (itching) associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)
      2. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)

ODEVIXIBAT (PART D)

RENEWAL CRITERIA (CONTINUED)

B. If you have pruritus associated with progressive familial intrahepatic cholestasis, renewal also requires:
1. You have shown a clinical response to therapy defined as improvement in pruritis (itching) symptoms AND a reduction of serum (blood) bile acid from baseline
2. You do NOT have PFIC type 2 with specific ABCB11 variants (a type of abnormal gene) that would result in nonfunctional (does not work), or the complete absence of, bile salt export pump (BSEP: a type of protein)
3. You will NOT use Bylvay concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Livmarli [maralixibat])

C. If you have cholestatic pruritus associated with Alagille syndrome, renewal also requires:
1. You have shown a clinical response to therapy defined as improvement in pruritis (itching) symptoms AND a reduction of serum (blood) bile acid from baseline
2. You will NOT use Bylvay concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Livmarli [maralixibat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Bylvay.

ODEVIXIBAT (PART D)

For Part D use only:

ODEVIXIBAT (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PROGRESSIVE FAMILIAL INTRAHEPATIC CHOLESTASIS (PFIC): PRESCRIBED BY OR IN CONSULTATION WITH A HEPATOLOGIST, GASTROENTEROLOGIST, OR PHYSICIAN WHO SPECIALIZES IN PFIC CHOLESTASIS. ALAGILLE SYNDROME (ALGS): PRESCRIBED BY OR IN CONSULTATION WITH A HEPATOLOGIST, GASTROENTEROLOGIST, OR PHYSICIAN WHO SPECIALIZES IN ALGS CHOLESTASIS.
Coverage Duration	INITIAL: 6 MONTHS, RENEWAL: 12 MONTHS
Other Criteria	INITIAL: PFIC: 1) NO CONCURRENT USE WITH ANOTHER ILEAL BILE ACID TRANSPORTER (IBAT) INHIBITOR, AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT, WHERE AGES ALIGN: LIVMARLI. ALGS: 1) NO CONCURRENT USE WITH ANOTHER IBAT INHIBITOR, AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: LIVMARLI. RENEWAL: PFIC: 1) CLINICAL RESPONSE TO THERAPY DEFINED AS IMPROVEMENT IN PRURITIS SYMPTOMS AND A REDUCTION OF SERUM BILE ACID FROM BASELINE, 2) DOES NOT HAVE PFIC TYPE 2 WITH SPECIFIC ABCB11 VARIANTS THAT WOULD RESULT IN NONFUNCTIONAL, OR THE COMPLETE ABSENCE OF, BILE SALT EXPORT PUMP (BSEP) PROTEIN, AND 3) NO CONCURRENT USE WITH ANOTHER IBAT INHIBITOR. ALGS: 1) CLINICAL RESPONSE TO THERAPY DEFINED AS IMPROVEMENT IN PRURITIS SYMPTOMS AND A REDUCTION OF SERUM BILE ACID FROM BASELINE, AND 2) NO CONCURRENT USE WITH ANOTHER IBAT INHIBITOR.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient previously untreated for chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1), and meets **ALL** of the following criteria?
   - Fludara (fludarabine)-based therapy is considered inappropriate for this patient
   - Arzerra will be used in combination with Leukeran (chlorambucil)

   If yes, **approve for 12 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for the treatment of relapsed chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1), **AND** the patient meets the following criterion?
   - Arzerra will be used in combination with Fludara (fludarabine) and cyclophosphamide

   If yes, **approve for 6 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

OFATUMUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the request for extended treatment of recurrent or progressive chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) **AND** the patient meets the following criterion?
   - The patient is in complete or partial response after receiving at least two lines of therapy for chronic lymphocytic leukemia

   If yes, **approve for 12 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the request for the treatment of refractory chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) **AND** the patient meets the following criterion?
   - The patient is refractory to Fludara (fludarabine) and Campath (alemtuzumab)

   If yes, **approve for 6 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OFATUMUMAB (Arzerra)** requires the following rule(s) be met for approval:
   A. You have chronic lymphocytic leukemia (CLL: type of blood cancer)
   B. If you have previously untreated chronic lymphocytic leukemia, approval also requires:
      1. You have not received previous treatment for chronic lymphocytic leukemia
      2. Fludara (fludarabine)-based therapy is considered inappropriate for you

      Arzerra will be used in combination with Leukeran (chlorambucil)
   C. If you have relapsed (disease has returned) chronic lymphocytic leukemia, approval also requires:
      1. Arzerra will be used in combination with Fludara (fludarabine) and cyclophosphamide
   D. If you are requesting extended treatment of recurrent or progressive chronic lymphocytic leukemia, approval also requires:
      1. You are in complete or partial response after receiving at least two lines of therapy for chronic lymphocytic leukemia

GUIDELINES FOR USE

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #5.

2. Is the patient's cancer advanced and the patient meets **ALL** of the following criteria?
   - The patient is in complete or partial response to first-line platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)
   - The patient's diagnosis is confirmed by an FDA-approved companion diagnostic for Lynparza

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation
   - The patient's cancer is associated with homologous recombination deficiency (HRD)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation, and/or genomic instability, AND Lynparza will be used in combination with bevacizumab

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's cancer recurrent and the patient meets **ALL** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation, as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient is in complete or partial response to platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)
   - Lynparza will be used as monotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient have a diagnosis breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is HER2-negative
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm), as confirmed by an FDA-approved companion diagnostic for Lynparza

   If yes, continue to #6.
   If no, continue to #9.

6. Is the patient's cancer high risk early breast cancer and the patient meets **ALL** of the following criteria?
   - Lynparza will be used as adjuvant treatment
   - The patient has been treated with neoadjuvant or adjuvant chemotherapy (e.g., doxorubicin, paclitaxel)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

OLAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the patient's cancer metastatic **AND** the patient meets the following criterion?
   - The patient has been treated with chemotherapy (e.g., doxorubicin, docetaxel) in the neoadjuvant, adjuvant, or metastatic setting

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

8. Does the patient meet **ONE** of the following criteria?
   - The patient does not have hormone receptor (HR)-positive breast cancer
   - The patient has a hormone receptor (HR)-positive breast cancer and has been treated with a prior endocrine therapy or is considered inappropriate for endocrine therapy (e.g., tamoxifen, Arimidex [anastrozole])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have a diagnosis of metastatic pancreatic adenocarcinoma (ICD-10 Group C25) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm), as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient's disease has not progressed on at least 16 weeks of a first-line platinum-based chemotherapy regimen (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

OLAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

10. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2, C61) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #11.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

11. Does the patient meet **BOTH** of the following criteria?
    - The patient's cancer has a deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene-mutation, as confirmed by an FDA-approved companion diagnostic for Lynparza
    - The patient's disease has progressed following prior treatment with enzalutamide (Xtandi) or abiraterone (Yonsa, Zytiga)

    If yes, continue to #13.
    If no, continue to #12.

12. Does the patient meet **BOTH** of the following criteria?
    - Lynparza will be used in in combination with abiraterone (Yonsa, Zytiga) AND prednisone or prednisolone
    - The patient's cancer has a deleterious or suspected deleterious BRCA mutation (BRCAm), as confirmed by an FDA-approved companion diagnostic for Lynparza

    If yes, continue to #13.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

13. Does the patient meet **ONE** of the following criteria?
    - The patient has received a bilateral orchiectomy
    - The patient has a castrate testosterone level (i.e., less than 50 ng/dL)
    - Lynparza will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

OLAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OLAPARIB (Lynparza)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Epithelial ovarian cancer, fallopian tube cancer, primary peritoneal cancer (types of reproductive system cancers)
   2. Breast cancer
   3. Metastatic pancreatic adenocarcinoma (a type of pancreas cancer that has spread to other parts of the body)
   4. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and does not respond to hormone therapy)

B. If you have epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
   1. You are 18 years of age or older
   2. If your cancer is advanced, you must meet ALL of the following:
      a. You are in complete or partial response to first-line platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin)
      b. Your diagnosis is confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
      c. Your cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation (a type of gene mutation) or Your cancer is associated with a homologous recombination deficiency (HRD: type of gene mutation)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation (type of gene mutation), and/or genomic instability (high rate of gene mutation), AND Lynparza will be used in combination with bevacizumab
   3. If your cancer is recurrent (returning), you must meet ALL of the following:
      a. Your cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation (a type of gene mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
      b. You are in complete or partial response to your most recent platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin)
      c. Lynparza will be used as monotherapy (used alone)

(Denial text continued on next page)

CONTINUED ON NEXT PAGE

OLAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have breast cancer, approval also requires:
1. You are 18 years of age or older
2. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
3. Your cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm: a type of gene mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
4. If you have high risk early breast cancer, you must meet ALL of the following:
   a. You have been treated with neoadjuvant or adjuvant chemotherapy (cancer treatment given before main treatment or as add-on therapy such as doxorubicin, paclitaxel)
   b. Lynparza will be used as adjuvant (add-on) treatment
5. If you have metastatic breast cancer (cancer that has spread to other parts of the body), you must meet ALL of the following:
   a. You have been treated with chemotherapy (such as doxorubicin, docetaxel) in the neoadjuvant (given before main treatment), adjuvant (add-on to main treatment), or metastatic setting (to treat disease that has spread to other parts of the body)
   b. You do not have hormone receptor (HR)-positive breast cancer OR you have hormone receptor (HR)-positive breast cancer and you have been treated with prior endocrine (hormone) therapy (such as tamoxifen, Arimidex [anastrozole]) or endocrine therapy is considered inappropriate for you

D. If you have metastatic pancreatic adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm: a type of gene mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. Your disease has not progressed on at least 16 weeks of a first-line platinum-based chemotherapy regimen (such as paclitaxel, docetaxel, cisplatin, carboplatin)

OLAPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic castration-resistant prostate cancer, approval also requires:

1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer has progressed following prior treatment with enzalutamide (Xtandi) or abiraterone (Yonsa or Zytiga) AND has a deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene-mutation (type of mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
   b. Lynparza will be used in in combination with abiraterone (Yonsa or Zytiga) and with prednisone or prednisolone AND your cancer has a deleterious or suspected deleterious BRCA mutation (BRCAm: a type of gene mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. You meet ONE of the following:
   a. You have received a bilateral orchiectomy (surgical removal of both testicles)
   b. You have a castrate testosterone level (blood testosterone levels are less than 50 ng/dL)
   c. Lynparza will be used concurrently (at the same time) with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of familial chylomicronemia syndrome (FCS) (ICD-10 E78.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tryngolza will be used as an adjunct therapy to diet

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of severe hypertriglyceridemia (sHTG) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tryngolza will be used as an adjunct therapy to diet
   - The patient has a baseline fasting triglyceride level of at least 500 mg/dL
   - The patient had a trial of or contraindication to TWO clinical standard of care triglyceride lowering therapies (e.g., Vascepa [icosapent ethyl], Lovaza [omega-3 acid ethyl esters], Lopid [gemfibrozil], fenofibrate, statin [e.g., atorvastatin, simvastatin, rosuvastatin])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OLEZARSEN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **OLEZARSEN (Tryngolza)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
   2. Severe hypertriglyceridemia (sHTG: high levels of fat in the blood)

B. If you have familial chylomicronemia syndrome, approval also requires:
   1. You are 18 years of age or older
   2. Tryngolza will be used as an adjunct (add-on) therapy to diet

C. If you have severe hypertriglyceridemia, approval also requires:
   1. You are 18 years of age or older
   2. Tryngolza will be used as an adjunct (add-on) therapy to diet
   3. You have a baseline (before treatment) fasting triglyceride (a type of lab test) level of at least 500 mg/dL
   4. You have tried or have a contraindication to (harmful for you to use) TWO clinical standard of care triglyceride (a type of fat) lowering therapies (such as Vascepa [icosapent ethyl], Lovaza [omega-3 acid ethyl esters], Lopid [gemfibrozil], fenofibrate, statin [such as atorvastatin, simvastatin, rosuvastatin])

OLEZARSEN (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of familial chylomicronemia syndrome (FCS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of severe hypertriglyceridemia (sHTG) **AND** meet the following criterion?
   - The patient has experienced a clinical benefit as demonstrated by a reduction in triglyceride levels or acute pancreatitis events

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **OLEZARSEN (Tryngolza)** requires the following rule(s) be met for renewal:
   A. You have severe hypertriglyceridemia (sHTG): high levels of fat in the blood)
   B. You have experienced a clinical benefit as shown by a reduction (decrease) in triglyceride (a type of fat) levels or acute pancreatitis (short-term inflammation of the pancreas) events

RATIONALE

OMADACYCLINE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Nuzyra

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of an acute bacterial skin or skin structure infection (ABSSSI) (ICD-10 L02.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's ABSSSI infection is caused by any of the following susceptible microorganisms: *Staphylococcus aureus* (methicillin-susceptible and -resistant isolates), *Staphylococcus lugdunensis, Streptococcus pyogenes, Streptococcus anginosus grp.* (includes *S. anginosus, S. intermedius,* and *S. constellatus), Enterococcus faecalis, Enterobacter cloacae,* or *Klebsiella pneumoniae*

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OMADACYCLINE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMADACYCLINE (Nuzyra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Community-acquired bacterial pneumonia (type of lung infection)
   2. Acute bacterial skin or skin structure infection (ABSSSI: a type of skin condition)

B. If you have community-acquired bacterial pneumonia, approval also requires:
   1. You are 18 years of age or older
   2. Your infection is caused by any of the following microorganisms (bacteria that the medication can work on): *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Haemophilus parainfluenzae, Klebsiella pneumoniae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*
   3. You meet ONE of the following criteria:
      a. Your request is for continuation of care from an inpatient setting (a healthcare facility where medical treatment is given overnight or longer)
      b. Therapy is prescribed by or in consultation with an Infectious Disease specialist (a doctor who specializes in the treatment of infections)
      c. Your antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) shows ALL of the following:
         i. The bacteria at the infection site culture is resistant (medication will not work for that bacteria) to TWO standard of care agents for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)
         ii. Nuzyra will work against the bacteria
      d. If antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) is not available, we require you have tried or have a contraindication to (harmful for you to use) TWO standard of care agents for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)

(Denial text continued on next page)

OMADACYCLINE (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have acute bacterial skin or skin structure infection (ABSSSI), approval also requires:

1. You are 18 years of age or older
2. Your infection is caused by any of the following microorganisms (bacteria that the medication can work on): Staphylococcus aureus (methicillin-susceptible and -resistant isolates), Staphylococcus lugdunensis, Streptococcus pyogenes, Streptococcus anginosus grp. (includes S. anginosus, S. intermedius, and S. constellatus), Enterococcus faecalis, Enterobacter cloacae, or Klebsiella pneumoniae
3. You meet ONE of the following criteria:
   a. Therapy is prescribed by or in consultation with an Infectious Disease specialist (a doctor who specializes in the treatment of infections)
   b. Your antimicrobial susceptibility test (lab test showing what medications work on which bacteria) shows ALL of the following:
      i. The bacteria at the infection site culture is resistant (medication will not work for that bacteria) to TWO standard of care agents for acute bacterial skin or skin structure infection (such as linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)
      ii. Nuzyra will work against the bacteria
   c. If antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) is not available, approval requires you have tried or have a contraindication to (harmful for you to use) TWO standard of care medications for acute bacterial skin or skin structure infection (such as linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary medicine
   - The patient has a positive skin prick or blood test (e.g., ELISA, FEIA) to a perennial aeroallergen
   - The patient has a baseline IgE serum level of at least 30 IU/mL
   - Xolair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of asthma

     If yes, continue to #2.
     If no, continue to #3.

OMALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious exacerbation requiring hospitalization or ER visit within the past 12 months
   - The patient has poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks: Daytime asthma symptoms more than twice per week, any night waking due to asthma, use of a short-acting inhaled beta2-agonist reliever (e.g., albuterol) for symptoms more than twice per week, any activity limitation due to asthma

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Xolair will be used as add-on maintenance treatment
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE topical nasal corticosteroid (e.g., mometasone, fluticasone)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Nucala (mepolizumab), Dupixent (dupilumab)
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

OMALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 Groups L50.1, L50, L50.9) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
   - The patient had a trial of and is maintained on, OR has a contraindication to a second generation H1 anti-histamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)
   - The patient had a trial of or contraindication to the following preferred agent: Dupixent (dupilumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient will continue to avoid food allergens while on Xolair
   - The patient has an IgE serum level of at least 30 IU/mL
   - The patient has a positive skin prick test to at least one food, OR a positive medically monitored food challenge to at least one food
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has an active prescription for epinephrine auto-injector/injection while on Xolair
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text the end of the guideline.

OMALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMALIZUMAB (Xolair)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. Chronic spontaneous urticaria [also called chronic idiopathic urticaria] (severe itching with unknown cause)
   4. IgE-mediated food allergy (body's reaction to a food allergy)

B. If you have moderate to severe persistent asthma, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary (lungs/breathing) medicine
   3. You have a positive skin prick or blood test such as ELISA or FEIA (types of blood tests to identify allergies) to a perennial aeroallergen (airborne particles that cause allergies year-round)
   4. You have a baseline IgE (type of antibody produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
   5. Xolair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
   6. You meet ONE of the following:
      a. You experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
      b. You have experienced at least ONE serious exacerbation requiring hospitalization or emergency room visit within the past 12 months
      c. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks: Daytime asthma symptoms more than twice per week, any night waking due to asthma, use of a short-acting beta-2-agonist (such as albuterol) reliever for symptoms more than twice per week, any activity limitation due to asthma

(Initial denial text continued on next page)

OMALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

7. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Xolair will be used as add-on maintenance treatment
3. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (type of allergy doctor), or immunologist (type of immune system doctor)
4. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
5. You have inadequately controlled disease
6. You had a 56-day trial of ONE topical nasal corticosteroid (such as mometasone, fluticasone)
7. You had a trial of or contraindication to (harmful for) ONE of the following preferred medications: Nucala (mepolizumab), Dupixent (dupilumab)
8. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

D. If you have chronic spontaneous urticaria, approval also requires:

1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with an allergist (type of allergy doctor), dermatologist (type of skin doctor), or immunologist (type of immune system doctor)
3. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
4. You have tried and are maintained on, OR you have a contraindication to (harmful for you to use) a second generation H1 antihistamine (type of allergy medication such as Clarinex [desloratadine] or Xyzal [levocetirizine])
5. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)
6. You have tried or have a contraindication to the preferred medication: Dupixent (dupilumab)

(Initial denial text continued on next page)

OMALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have an IgE-mediated food allergy, approval also requires:

1. You are 1 year of age or older
2. You will continue to avoid food allergens (not eating or coming into contact with food that causes an allergic reaction) while on Xolair
3. You have an IgE (type of antibody that is produced by the immune system) serum (blood) level of at least 30 IU/mL
4. You have a positive skin prick test (a type of allergy test) to at least one food, OR a positive medically monitored food challenge to at least one food
5. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
6. You have an active prescription for epinephrine auto-injector/injection while on Xolair
7. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OMALIZUMAB (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient continues to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., aclidinium, tiotropium, umeclidinium], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)
   - Increase in percent predicted FEV1 from pretreatment baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

OMALIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 Groups L50.1, L50, L50.9) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient is maintained on, OR has a contraindication to a second generation H1 anti-histamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient has persistent IgE-mediated food allergy
   - The patient has an active prescription for epinephrine auto-injector/injection while on Xolair
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Palforzia) ortargeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 24 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMALIZUMAB (Xolair)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. Chronic spontaneous urticaria [also called chronic idiopathic urticaria] (severe itching with unknown cause)
   4. IgE-mediated food allergy (body's reaction to a food allergy)

B. If you have moderate to severe persistent asthma, renewal also requires:
   1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol or formoterol), long-acting muscarinic antagonist (such as aclidinium, tiotropium, umeclidinium), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
   2. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]), or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma
   3. You have had a clinical response as evidenced by ONE the following:
      a. You have experienced a reduction in asthma exacerbations (less sudden and severe worsening of symptoms) from baseline
      b. You have decreased use of rescue medications (such as albuterol)
      c. You have decreased the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)
      d. You have an increase in the percent predicted FEV1 (amount of air you can forcefully exhale) from pretreatment baseline (before starting Xolair)

(Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

OMALIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
1. You have shown a clinical benefit compared to baseline (before starting Xolair) (such as improvements in nasal congestion, sense of smell, size of polyps)
2. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

D. If you have chronic spontaneous urticaria, renewal also requires:
1. Therapy is prescribed by or in consultation with an allergist (type of allergy doctor), dermatologist (type of skin doctor), or immunologist (type of immune system doctor)
2. You are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use) a second generation H1 antihistamine (type of allergy medication such as Clarinex [desloratadine] or Xyzal [levocetirizine])
3. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

E. If you have an IgE-mediated food allergy, renewal also requires:
1. You have persistent IgE-mediated food allergy
2. You have an active prescription for epinephrine auto-injector/injection while on Xolair
3. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OMALIZUMAB (PART D)

For Part D use only:

OMALIZUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: ASTHMA: POSITIVE SKIN PRICK OR BLOOD TEST (E.G., ELISA, FEIA) TO A PERENNIAL AEROALLERGEN AND A BASELINE IGE SERUM LEVEL OF AT LEAST 30 IU/ML. FOOD ALLERGY: 1) IGE SERUM LEVEL OF AT LEAST 30 IU/ML, AND 2) POSITIVE SKIN PRICK TEST TO AT LEAST ONE FOOD, OR POSITIVE MEDICALLY MONITORED FOOD CHALLENGE TO AT LEAST ONE FOOD.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL/RENEWAL: CHRONIC SPONTANEOUS URTICARIA (CSU): PRESCRIBED BY OR IN CONSULTATION WITH AN ALLERGIST, DERMATOLOGIST, OR IMMUNOLOGIST. INITIAL: CHRONIC RHINOSINUSITIS WITH NASAL POLYPS (CRSWNP): PRESCRIBED BY OR IN CONSULTATION WITH AN OTOLARYNGOLOGIST, ALLERGIST OR IMMUNOLOGIST. ASTHMA: PRESCRIBED BY OR IN CONSULTATION WITH A PHYSICIAN SPECIALIZING IN ALLERGY OR PULMONARY MEDICINE. FOOD ALLERGY: PRESCRIBED BY OR IN CONSULTATION WITH ALLERGIST OR IMMUNOLOGIST.
Coverage Duration	INITIAL/RENEWAL: ASTHMA 12 MO/12 MO, CSU 6 MO/12 MO, CRSWNP 6 MO/12 MO, FOOD ALLERGY 12 MO/24 MO
Other Criteria	INITIAL: CSU: 1) TRIAL OF AND MAINTAINED ON, OR CONTRAINDICATION TO A SECOND GENERATION H1 ANTI-HISTAMINE, 2) STILL EXPERIENCES HIVES OR ANGIOEDEMA ON MOST DAYS OF THE WEEK FOR AT LEAST 6 WEEKS, AND 3) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: DUPIXENT. CRSWNP: 1) A 56 DAY TRIAL OF ONE TOPICAL NASAL CORTICOSTEROID, 2) TRIAL OF OR CONTRAINDICATION TO ONE OF THE FOLLOWING PREFERRED AGENTS: NUCALA, DUPIXENT, 3) EVIDENCE OF NASAL POLYPS BY DIRECT EXAMINATION, ENDOSCOPY, OR SINUS CT SCAN, AND 4) INADEQUATELY CONTROLLED DISEASE. ASTHMA: 1) CONCURRENT THERAPY WITH A MEDIUM, HIGH-DOSE OR MAXIMALLY TOLERATED DOSE OF AN INHALED CORTICOSTEROID (ICS) AND AT LEAST ONE OTHER MAINTENANCE MEDICATION, AND 2) ONE OF THE FOLLOWING: (A) AT LEAST ONE ASTHMA EXACERBATION REQUIRING SYSTEMIC CORTICOSTEROID BURST LASTING AT LEAST 3 DAYS WITHIN THE PAST 12 MONTHS OR AT LEAST ONE SERIOUS EXACERBATION REQUIRING HOSPITALIZATION OR ER VISIT WITHIN THE PAST 12 MONTHS, OR (B) POOR SYMPTOM CONTROL DESPITE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	CURRENT THERAPY AS EVIDENCED BY AT LEAST THREE OF THE FOLLOWING WITHIN THE PAST 4 WEEKS: DAYTIME ASTHMA SYMPTOMS MORE THAN TWICE/WEEK, ANY NIGHT WAKING DUE TO ASTHMA, SABA RELIEVER FOR SYMPTOMS MORE THAN TWICE/WEEK, ANY ACTIVITY LIMITATION DUE TO ASTHMA. FOOD ALLERGY: CONCURRENT USE WITH AN ACTIVE PRESCRIPTION FOR EPINEPHRINE AUTO-INJECTOR/INJECTION. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: CSU: MAINTAINED ON OR CONTRAINDICATION TO A SECOND GENERATION H1 ANTI-HISTAMINE. CRSWNP: CLINICAL BENEFIT COMPARED TO BASELINE. ASTHMA: 1) CONTINUED USE OF ICS AND AT LEAST ONE OTHER MAINTENANCE MEDICATION, AND 2) CLINICAL RESPONSE AS EVIDENCED BY ONE OF THE FOLLOWING: (A) REDUCTION IN ASTHMA EXACERBATIONS FROM BASELINE, (B) DECREASED UTILIZATION OF RESCUE MEDICATIONS, (C) REDUCTION IN SEVERITY OR FREQUENCY OF ASTHMA-RELATED SYMPTOMS, OR (D) INCREASE IN PERCENT PREDICTED FEV1 FROM PRETREATMENT BASELINE. FOOD ALLERGY: 1) PERSISTENT IGE-MEDIATED FOOD ALLERGY, AND 2) CONCURRENT USE WITH AN ACTIVE PRESCRIPTION FOR EPINEPHRINE AUTO-INJECTOR/INJECTION.

Created: 08/03
Effective: 01/01/26 Client Approval: 10/25 P&T Approval: 01/25

STANDARD PART D
PRIOR AUTHORIZATION GUIDELINES

OMALIZUMAB-IGEC (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OMALIZUMAB-IGEC	OMLYCLO	50329		GPI-10 (4460306002)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
   - The patient has a positive skin prick or blood test (e.g., ELISA, FEIA) to a perennial aeroallergen
   - The patient has a baseline IgE serum level of at least 30 IU/mL
   - Omlyclo will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

CONTINUED ON NEXT PAGE

OMALIZUMAB-IGEC (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious exacerbation requiring hospitalization or ER visit within the past 12 months
   - The patient has poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks: Daytime asthma symptoms more than twice per week, any night waking due to asthma, use of a short-acting inhaled beta2-agonist reliever (e.g., albuterol) for symptoms more than twice per week, any activity limitation due to asthma

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Omlyclo will be used as add-on maintenance treatment
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE clinical standard of care agent: a topical nasal corticosteroid (e.g., mometasone, fluticasone)
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #4.

OMALIZUMAB-IGEC (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient will continue to avoid food allergens while on Omlyclo
   - The patient has an IgE serum level of at least 30 IU/mL
   - The patient has a positive skin prick test to at least one food, OR a positive medically monitored food challenge to at least one food
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has an active prescription for epinephrine auto-injector/injection while on Omlyclo
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
   - The patient had a trial of and is maintained on, OR has a contraindication to a second generation H1 antihistamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.
   DENIAL TEXT: See the initial denial text the end of the guideline.

OMALIZUMAB-IGEC (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **OMALIZUMAB-IGEC (Omlyclo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) medicine or allergy medicine
   3. You have a positive skin prick or blood test, such as ELISA or FEIA (types of blood tests to identify allergies), to a perennial aeroallergen (airborne particles that cause allergies year-round)
   4. You have a baseline IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
   5. Omlyclo will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
   6. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma (a type of lung condition)

(Initial denial text continued on next page)

OMALIZUMAB-IGEC (PART D)

INITIAL CRITERIA (CONTINUED)

7. You meet ONE of the following:
   a. You have experienced at least ONE asthma (a type of lung condition) exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks: Daytime asthma symptoms more than twice per week, any night waking due to asthma, use of a short-acting beta-2-agonist (such as albuterol) reliever for symptoms more than twice per week, any activity limitation due to asthma

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Omlyclo will be used as add-on maintenance treatment (taken on a regular basis)
3. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
5. You have inadequately controlled disease
6. You had a 56-day trial of ONE clinical standard of care medication: a topical nasal corticosteroid (such as mometasone, fluticasone)
7. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus ways with small growths in the nose)

(Initial denial text continued on next page)

OMALIZUMAB-IGEC (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have an IgE-mediated food allergy, approval also requires:
1. You are 1 year of age or older
2. You will continue to avoid food allergens (not eating or coming into contact with food that causes an allergic reaction) while on Omlyclo
3. You have an IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
4. You have a positive skin prick test (a type of allergy test) to at least one food, OR a positive medically monitored food challenge to at least one food
5. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
6. You have an active prescription for epinephrine auto-injector/injection while on Omlyclo
7. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy (body's reaction to a food allergy)

E. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
4. You have tried and are maintained on, OR you have a contraindication to (harmful for you to use) a second generation H1 antihistamine (type of allergy medication such as Clarinex [desloratadine] or Xyzal [levocetirizine])
5. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria) (severe itching with unknown cause)

OMALIZUMAB-IGEC (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient continues to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., aclidinium, tiotropium, umeclidinium], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

OMALIZUMAB-IGEC (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient has persistent IgE-mediated food allergy
   - The patient has an active prescription for epinephrine auto-injector/injection while on Omlyclo
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 24 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient is maintained on, OR has a contraindication to, a second generation H1 anti-histamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB-IGEC (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT:

Our guideline named **OMALIZUMAB-IGEC (Omlyclo)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, renewal also requires:
   1. You continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as aclidinium, tiotropium, umeclidinium), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
   2. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]), or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma (a type of lung condition)
   3. You have shown a clinical response as evidenced by ONE of the following:
      a. You have experienced a decrease in asthma (a type of lung condition) exacerbations (worsening of symptoms) from baseline (before starting Omlyclo)
      b. You have decreased your use of rescue medications (such as albuterol)
      c. You have an increase in percent predicted FEV1 (type of lung test) from pre-treatment baseline (before starting Omlyclo)
      d. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (before starting Omlyclo) (such as improvements in nasal congestion, sense of smell, size of polyps)
   2. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus ways with small growths in the nose)

(Renewal denial text continued on next page)

OMALIZUMAB-IGEC (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have an IgE-mediated food allergy, renewal also requires:
1. You have persistent IgE-mediated food allergy (body's reaction to a food allergy)
2. You have an active prescription for epinephrine auto-injector/injection while on Omlyclo
3. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy (body's reaction to a food allergy)

E. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), renewal also requires:
1. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
2. You are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use) a second generation H1 antihistamine (type of allergy medication such as Clarinex [desloratadine] or Xyzal [levocetirizine])
3. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria) (severe itching with unknown cause)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Friedreich's ataxia (FA) (ICD-10 G11.11) and meet **ALL** of the following criteria?
   - The patient is 16 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis is confirmed by genetic testing (homozygous for GAA repeat expansion in intron-1 of FXN gene)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

OMAVELOXOLONE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMAVELOXOLONE (Skyclarys)** requires the following rule(s) be met for approval:

A. You have Friedreich's ataxia (FA: a type of nervous system and movement disorder)
B. You are 16 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
D. Your diagnosis is confirmed by genetic testing (homozygous for guanine-adenine-adenine [GAA] repeat expansion in intron-1 of frataxin [FXN] gene [a type of gene mutation])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ONABOTULINUM TOXIN A BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ONABOTULINUMTOXINA	BOTOX	04867		GPI-10 (7440002005)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ONABOTULINUM TOXIN A BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ONABOTULINUM TOXIN A BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for treatment of a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8; Group L81)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic migraine (at least 15 days per month with headache lasting 4 hours a day or longer) (ICD-10 Groups G43.7, G43.E) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Botox will be used for the prophylaxis of headaches
   - The patient had a trial of or contraindication to ONE of the following preventive migraine treatments: propranolol, timolol, topiramate, divalproex sodium

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

ONABOTULINUM TOXIN A BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of overactive bladder (OAB) (ICD-10 N32.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response to or is intolerant of an anticholinergic medication (e.g., oxybutynin, oxybutynin extended-release [Ditropan XL], tolterodine [Detrol], tolterodine extended-release [Detrol LA], fesoterodine [Toviaz], trospium [Sanctura], trospium extended-release [Sanctura XR])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of urinary incontinence (ICD-10 R32) and meet **ALL** of the following criteria?
   - The patient is 5 years of age or older
   - The patient's incontinence is due to detrusor overactivity associated with a neurologic condition (e.g., spinal cord injury, multiple sclerosis, spina bifida)
   - The patient had an inadequate response to or is intolerant of an anticholinergic medication (e.g., oxybutynin, oxybutynin extended-release [Ditropan XL], tolterodine [Detrol], tolterodine extended-release [Detrol LA], fesoterodine [Toviaz], trospium [Sanctura], trospium extended-release [Sanctura XR])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of spasticity (ICD-10 G04.1, G11.4, G80.0, G80.1, G80.2; Group G81.1) **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

ONABOTULINUM TOXIN A BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of cervical dystonia (ICD-10 G24.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Does the patient have a diagnosis of severe axillary hyperhidrosis (ICD-10 L74.510) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Does the patient have a diagnosis of blepharospasm (ICD-10 G24.5) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient have a diagnosis of strabismus (ICD-10 H50.9) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
