

Standard Medicare Part D Formulary Prior Authorization Guidelines

FOREWORD

This document will serve as a reference to assist with administration of clinical and administrative prior authorization (PA) criteria for Part D Standard formulary clients. This document should not be used to determine formulary status or effective date for a PA guideline. To determine formulary status or effective date for a PA guideline, refer to the formulary ASCII and PA ASCII files produced monthly.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ABALOPARATIDE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ABALOPARATIDE	TYMLOS	44231		GPI-10 (3004400500)	

Core			Advantage			Plus (Closed)			Plus (Open)		
Generic	Brand	BvD	Generic	Brand	BvD	Generic	Brand	BvD	Generic	Brand	BvD
No	Yes	No	No	Yes	No	No	Yes	No	No	Yes	No

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have **ONE** of the following diagnoses?
Postmenopausal osteoporosis (ICD-10 M81.0, Group M80.0) in a female
Osteoporosis (ICD-10 Group M80.0) in a male

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Has the patient received a total of 24 months cumulative treatment with any parathyroid hormone therapy (e.g., Forteo [teriparatide], Tymlos [abaloparatide])?

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #3.

ABALOPARATIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient meet **ONE** of the following criteria?

The patient is at high risk for fractures (defined as history of osteoporotic fracture or multiple risk factors for fracture)

The patient has failed or is intolerant to other osteoporosis therapy (e.g., Fosamax [alendronate], Actonel [risedronate])

If yes, **approve for 24 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABALOPARATIDE (Tymlos)** requires the following rule(s) be met for approval:

The request is for ONE of the following:
- Postmenopausal osteoporosis (a type of bone condition in women after menopause)
- Osteoporosis (a type of bone condition in a male)

You have NOT received a total of 24 months of cumulative treatment with any parathyroid hormone therapy (such as Forteo [teriparatide], Tymlos [abaloparatide])

You meet ONE of the following:
- You are at high risk for fractures (defined as history of osteoporotic fracture [a type of complete or partial break in a bone] or multiple risk factors for fracture)
- You have failed or could not tolerate other available osteoporosis therapy (such as Fosamax [alendronate], Actonel [risedronate])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Tymlos.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
- The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dosegreater than or equal to 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)

  If yes, **approve for 6 months by HICL or GPI-14.**
  APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

  If no, continue to #2.

ABATACEPT - IV (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 6 months by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by, or in consultation with a rheumatologist or dermatologist
- Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ABATACEPT - IV (PART D)

INITIAL CRITERIA (CONTINUED)

Is the request for prophylaxis of acute graft versus host disease (aGVHD) and the patient meets **ALL** of the following criteria?

- The patient is 2 years of age or older
- The patient is undergoing hematopoietic stem cell transplantation (HSCT) from a matched OR one allele-mismatched unrelated-donor
- Orencia will be used in combination with a calcineurin inhibitor (e.g., cyclosporine, tacrolimus, pimecrolimus) and methotrexate
- Orencia will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of aGVHD prophylaxis

If yes, **approve for 1 month by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABATACEPT - IV (Orencia intravenous)** requires the following rule(s) be met for approval:

The request is for ONE of the following:

- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Prophylaxis (prevention) of acute graft versus host disease (aGVHD: a short-term type of immune disorder)

If you have moderate to severe rheumatoid arthritis, approval also requires:

- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
- You have tried or have a contraindication to (harmful for you to use) 3 months of ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose greater than or equal to 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)

(Initial denial text continued on next page)

ABATACEPT - IV (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

If the request is for prophylaxis of acute graft versus host disease, approval also requires:
- You are 2 years of age or older
- You are undergoing hematopoietic stem cell transplantation (HSCT: a type of cell transplantation) from a matched OR one allele (version of a gene)-mismatched unrelated-donor
- Orencia will be used in combination with a calcineurin inhibitor (such as cyclosporine, tacrolimus, pimecrolimus) and methotrexate
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of acute graft versus host disease prophylaxis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ABATACEPT - IV (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of acute graft versus host disease (aGVHD), please refer to the Initial Criteria section.

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 12 months by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Orencia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABATACEPT - IV (Orencia intravenous)** requires the following rule(s) be met for renewal:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

ABATACEPT - IV (PART D)

For Part D use only:

ABATACEPT - IV (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST.
Coverage Duration	RA, PJIA, PSA: INITIAL: 6 MOS, RENEWAL: 12 MOS. ACUTE GRAFT VERSUS HOST DISEASE (AGVHD): 1 MO.
Other Criteria	INITIAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RA: TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF PATIENT TRIED METHOTREXATE, THEN TRIAL AT A DOSE GREATER THAN OR EQUAL TO 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. RENEWAL: RA, PJIA, PSA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION.

Created 05/05
Effective: 01/01/26 Client Approval: 10/25 P&T Approval: 10/24

ABATACEPT - SQ (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABATACEPT - SQ (Orencia SQ [subcutaneous])** requires the following rule(s) be met for renewal:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Orencia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Orencia.

ABATACEPT - SQ (PART D)

For Part D use only:

ABATACEPT - SQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF A PATIENT TRIED METHOTREXATE, THEN TRIAL AT A DOSE OF AT LEAST 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, PJIA, PSA: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 11/11
Effective: 01/01/26 Client Approval: 10/25 P&T Approval: 10/24

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of breast cancer (ICD-10 Group C50)?

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Is the patient's cancer in early stage and the patient meets **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative, node-positive
- Verzenio will be used in combination with endocrine therapy (tamoxifen or an aromatase inhibitor [e.g., anastrozole, letrozole, exemestane]) for adjuvant treatment
- The patient is at high risk of recurrence

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Is the patient's cancer advanced or metastatic and the patient meets **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative

If yes, continue to #4.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ABEMACICLIB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient meet **ONE** of the following criteria?

- Verzenio will be used in combination with an aromatase inhibitor (e.g., anastrozole, letrozole, exemestane) as initial endocrine-based therapy
- Verzenio will be used in combination with fulvestrant (Faslodex) AND the patient has experienced disease progression following endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)
- Verzenio will be used as monotherapy AND the patient has experienced disease progression following endocrine therapy (e.g., anastrozole, letrozole, tamoxifen) and prior chemotherapy in the metastatic setting

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABEMACICLIB (Verzenio)** requires the following rules be met for approval:
You have breast cancer
If you have early breast cancer, approval also requires:

- You are 18 years of age or older
- Your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative, node-positive (cancer that has spread to the lymph nodes)
- Verzenio will be used in combination with endocrine therapy (tamoxifen or an aromatase inhibitor [such as letrozole, anastrozole, exemestane]) for adjuvant (add-on) treatment
- You are at high risk of recurrence (disease returning)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

ABOBOTULINUM TOXIN A BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ABOBOTULINUM TOXIN A BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ABOBOTULINUM TOXIN A (Dysport)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Cervical dystonia (a type of muscle condition)
- Spasticity (stiffness or tightness of the muscles)

If you have cervical dystonia, approval also requires:
- You are 18 years of age or older

If you have spasticity, approval also requires:
- You are 2 years of age or older

NOTE: This medication will not be approved for the treatment of a cosmetic indication (such as wrinkles - glabellar lines, lateral canthal lines, forehead lines).

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Dysport. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
- Cibinqo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
- The patient had a trial of or contraindication to ONE of the following preferred agents: Dupixent (dupilumab), Rinvoq (upadacitinib)

If yes, continue to #2.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ABROCITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a trial of or contraindication to **ONE** of the following?
- High potency topical corticosteroid (e.g., halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
- Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
- Topical PDE-4 inhibitor (e.g., crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
- Topical AhR agonist (e.g., Vtama [tapinarof])
- Topical JAK inhibitor (e.g., ruxolitinib [Opzelura])

If yes, **approve for 6 months by HICL or GPI-10.**
If no, do not approve.

INITIAL DENIAL TEXT: Our guideline named **ABROCITINIB (Cibinqo)** requires the following rule(s) be met for approval:
- You have moderate to severe atopic dermatitis (AD: a type of skin condition)
- You are 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
- You will NOT use Cibinqo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
- You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Dupixent (dupilumab), Rinvoq (upadacitinib)
- You have tried or have a contraindication to (harmful for you to use) ONE of the following:
  - High potency topical corticosteroid (such as halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
  - Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
  - Topical PDE-4 inhibitor (such as crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
  - Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
  - Topical JAK inhibitor (such as ruxolitinib [Opzelura])

PRIOR AUTHORIZATION GUIDELINES

ABROCITINIB (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
The patient has shown improvement while on Cibinqo
Cibinqo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

RENEWAL DENIAL TEXT: Our guideline named **ABROCITINIB (Cibinqo)** requires the following rule(s) be met for renewal:
You have moderate to severe atopic dermatitis (AD: a type of skin condition)
You have shown improvement while on Cibinqo
You will NOT use Cibinqo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

---

RATIONALE

GUIDELINES FOR USE

Does the patient have a diagnosis of mantle cell lymphoma (MCL) (ICD-10 Group C83.1) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #2.
If no, continue to #4.

Is the patient previously untreated and meets **ALL** of the following criteria?
Calquence will be used in combination with bendamustine and rituximab
The patient is ineligible for autologous hematopoietic stem cell transplantation (HSCT)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Has the patient received at least one prior therapy (e.g., CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone]-based regimen)?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ACALABRUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) OR small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ACALABRUTINIB (Calquence)** requires the following rules be met for approval:
You have ONE of the following:
- Mantle cell lymphoma (MCL: a type of blood cancer)
- Chronic lymphocytic leukemia (CLL: a type of blood cancer)
- Small lymphocytic lymphoma (SLL: a type of blood cancer)

If you have untreated mantle cell lymphoma, approval also requires:
- You are 18 years of age or older
- Calquence will be used in combination with bendamustine and rituximab
- You are NOT eligible for autologous hematopoietic stem cell transplantation (HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells)

If you have treated mantle cell lymphoma, approval also requires:
- You are 18 years of age or older
- You have received at least one prior therapy (such as a CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone]-based regimen)

If you have chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
- You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ACETAMINOPHEN DAILY LIMIT (PART D)

Generic	Brand	HICL	GCN	Exception/other
N/A	N/A	N/A	N/A	N/A

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request then a verbal MRF must be completed. Please check the applicable CS note for processing.

GUIDELINES FOR USE

Is the claim rejecting with any of the following error codes?
NCPDP Reject Code: TQ (Dosage Exceeds Product Labeling Limit)
REJ-38: INGREDIENT CUMULATIVE DAILY DOSAGE EXCEEDS LIMIT

If yes, continue to #2.
If no, guideline does not apply.

Is the patient taking a dose of the requested drug in an amount exceeding 4000mg of acetaminophen per day?

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.
If no, continue to #3.

Is the requested medication being taken together with other acetaminophen containing product(s) and the combination will exceed 4000mg of acetaminophen per day?

If yes, continue to #4.
If no, **approve for one month, for one fill count, by GPID, for the requested medication. Set override type MAXINGREDIENTDOSE to a value of "Y". NOTE: Include the quantity limit based on any applicable restriction(s):**
The requested drug has a plan limit of **[XX tablets/capsules/mL]** per **[XX]** days.

Will the patient discontinue the concurrent acetaminophen containing drug(s) that place the patient over 4000mg of acetaminophen per day?

If yes, **approve for one month, for one fill count, by GPID, for the requested medication. Set override type MAXINGREDIENTDOSE to a value of "Y". NOTE: Include the quantity limit based on any applicable restriction(s):**
The requested drug has a plan limit of **[XX tablets/capsules/mL]** per **[XX]** days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ACETAMINOPHEN DAILY LIMIT (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our safety program for acetaminophen will cause a claim to deny when the dose of 4000mg of acetaminophen per day is exceeded. The claim will also deny if the requested drug is being used at the same time (concurrently) with other acetaminophen containing product(s) that exceed 4000mg of acetaminophen per day limit. Our safety program named **ACETAMINOPHEN DAILY LIMIT** will allow an approval for the requested drug if the patient will discontinue the concurrent acetaminophen containing drug(s) that cause the daily acetaminophen dose to exceed 4000mg. Please consult your physician if you have any questions about this prescription and work with them to obtain a safe and effective acetaminophen dose.

According to our records, you are taking [INSERT APAP-CONTAINING DRUGS] which totals [TOTAL DAILY APAP DOSE]. We do not have information showing you are reducing or discontinuing the total daily amount of acetaminophen. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

To ensure appropriate use of acetaminophen products and address overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. The maximum daily dose for an adult is 4000 mg. However, in some people, taking the maximum daily dose or more for an extended period of time can lead to serious liver damage.
A claim may reject at POS due to exceeding the acetaminophen daily limit as a result of concurrent use with other acetaminophen products. An approval is granted if the the concurrent acetaminophen containing product will be discointinued. In some cases, the member's history claim may have an incorrect day supply due to a pharmacy error. This will cause the new claim to reject at POS for exceeding the acetaminophen daily limit. This is addressed in question #3.

ACORAMIDIS (PART D)

INITIAL CRITERIA (CONTINUED)

Is the patient's diagnosis confirmed by **ONE** of the following?
- A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP
  *(**Note:** Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)*
- A biopsy of tissue of affected organ(s) (cardiac and possibly non-cardiac sites) to confirm amyloid presence AND chemical typing to confirm presence of transthyretin (TTR) protein

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ACORAMIDIS (Attruby)** requires the following rule(s) be met for approval:
- You have cardiomyopathy of wild-type or variant transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), transthyretin amyloidosis (ATTR) specialist, or medical geneticist (doctor who treats gene disorders)
- You have New York Heart Association (NYHA) Class I, II, or III heart failure (classification of heart failure symptoms)
- You will NOT use Attruby concurrently (at the same time) with other ATTR-CM TTR (transthyretin) stabilizers (such as tafamidis [Vyndaqel, Vyndamax])
- Your diagnosis is confirmed by ONE of the following:
  - A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP (a type of imaging test) (Note: Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)
  - A biopsy of tissue of the affected organ(s) (removal of cells or tissue from the body for examination) (can be heart or non-heart related organs) to confirm amyloid (type of protein) presence AND chemical typing to confirm presence of transthyretin (TTR) protein

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The patient's cancer has a KRAS G12C mutation as determined by an FDA-approved test
Krazati will be used in combination with Erbitux (cetuximab)
The patient has received prior treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

If yes, **approve for 12 months by HICL** or GPI-10**.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ADAGRASIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADAGRASIB (Krazati)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to nearby tissue or lymph nodes or to other parts of the body)
- Locally advanced or metastatic colorectal cancer (CRC; a type of digestive tract cancer that has spread to nearby tissue or lymph nodes or to other parts of the body)

If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
- You are 18 years of age or older
- Your cancer has a KRAS G12C mutation (a type of abnormal gene) as determined by a Food and Drug Association (FDA)-approved test
- You have received at least one prior systemic therapy

If you have locally advanced or metastatic colorectal cancer, approval also requires:
- You are 18 years of age or older
- Your cancer has a KRAS G12C mutation (a type of abnormal gene) as determined by a Food and Drug Administration (FDA)-approved test
- Krazati will be used in combination with Erbitux (cetuximab)
- You have received prior treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (drugs used to treat cancer)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient is 2 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist
Humira will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 5 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, continue to #8.
If no, continue to #9.

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
- The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
- The patient is switching from a different biologic (e.g., Remicade [infliximab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- Humira will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist
- The patient does NOT have isolated anterior uveitis
- Humira will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB (Humira)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

(Initial denial text continued on next page)

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

If you have ankylosing spondylitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
- You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

ADALIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe Crohn's disease, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

If you have moderate to severe ulcerative colitis, approval also requires:
- You are 5 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of body surface area (BSA) or psoriatic lesions (rashes) affecting your hands, feet, face, scalp, or genital area
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
- You meet ONE of the following:
  - You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
  - You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
  - You are switching from a different biologic (such as Remicade [infliximab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

ADALIMUMAB (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of AS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

ADALIMUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51)
AND meet the following criterion?
Humira will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #8.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #9.

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Humira will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

ADALIMUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB (Humira)** requires the following rule(s) be met for renewal:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

(Renewal denial text continued on next page)

ADALIMUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have ankylosing spondylitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

If you have moderate to severe Crohn's disease, renewal also requires:
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

If you have moderate to severe ulcerative colitis, renewal also requires:
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe hidradenitis suppurativa, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

If you have non-infectious intermediate, posterior, or panuveitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Humira concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ADALIMUMAB (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Humira.

REFERENCES

Humira [Prescribing Information]. North Chicago, IL: AbbVie Inc.; February 2024.

For Part D use only:

ADALIMUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RA, PJIA, ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST OR RHEUMATOLOGIST. PSO, HIDRADENITIS SUPPURATIVA (HS): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH GASTROENTEROLOGIST. UVEITIS: PRESCRIBED BY OR IN CONSULTATION WITH OPHTHALMOLOGIST.
Coverage Duration	INITIAL: RA, PSO, PJIA, AS, PSA, CD, UC, UVEITIS: 6 MONTHS, HS: 12 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RHEUMATOID ARTHRITIS (RA): TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF PATIENT TRIED METHOTREXATE, THEN TRIAL AT A DOSE OF AT LEAST 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. AS: TRIAL OF OR CONTRAINDICATION TO AN NSAID. PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. UVEITIS: DOES NOT HAVE ISOLATED ANTERIOR UVEITIS.

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA), PSA, AS, PSO, HS, UVEITIS: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 05/03
Effective: 01/01/26 Client Approval: 10/25 P&T Approval: 10/24

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, continue to #8.
If no, continue to #9.

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
- The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
- The patient is switching from a different biologic (e.g., Remicade [infliximab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist
- The patient does NOT have isolated anterior uveitis
- The requested medication will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-AATY (Yuflyma)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

(Initial denial text continued on next page)

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

If you have ankylosing spondylitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
- You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

ADALIMUMAB-AATY (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe Crohn's disease, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

If you have moderate to severe ulcerative colitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of body surface area (BSA) or psoriatic lesions (rashes) affecting your hands, feet, face, scalp, or genital area
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
- You meet ONE of the following:
  - You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
  - You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
  - You are switching from a different biologic (such as Remicade [infliximab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

ADALIMUMAB-AATY (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

CONTINUED ON NEXT PAGE

ADALIMUMAB-AATY (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

ADALIMUMAB-AATY (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #8.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #9.

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
The requested medication will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

ADALIMUMAB-AATY (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-AATY (Yuflyma)** requires the following rule(s) be met for renewal:

You have ONE of the following:

- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

(Renewal denial text continued on next page)

ADALIMUMAB-AATY (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have ankylosing spondylitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

If you have moderate to severe Crohn's disease, renewal also requires:
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn’s disease

If you have moderate to severe ulcerative colitis, renewal also requires:
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe hidradenitis suppurativa, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

If you have non-infectious intermediate, posterior, or panuveitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis

Yuflyma [Prescribing Information]. Jersey City, NJ: Celltrion USA, Inc.; November 2025.

For Part D use only:

ADALIMUMAB-AATY (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RA, PJIA, ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST OR RHEUMATOLOGIST. PSO, HIDRADENITIS SUPPURATIVA (HS): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH GASTROENTEROLOGIST. UVEITIS: PRESCRIBED BY OR IN CONSULTATION WITH OPHTHALMOLOGIST.
Coverage Duration	INITIAL: RA, PSO, PJIA, AS, PSA, CD, UC, UVEITIS: 6 MONTHS, HS: 12 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RHEUMATOID ARTHRITIS (RA): TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF PATIENT TRIED METHOTREXATE, THEN TRIAL AT A DOSE OF AT LEAST 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. AS: TRIAL OF OR CONTRAINDICATION TO AN NSAID. PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. UVEITIS: DOES NOT HAVE ISOLATED ANTERIOR UVEITIS. INITIAL/RENEWAL: ALL INDICATIONS:

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA), PSA, AS, PSO, HS, UVEITIS: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 03/25
Effective: 03/28/26 Client Approval: 03/26 P&T Approval: 01/26

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient is 2 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of AS
The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
The patient is 6 years of age or older
Therapy is prescribed by or in consultation with a gastroenterologist
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, continue to #8.
If no, continue to #9.

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
- The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
- The patient is switching from a different biologic (e.g., Remicade [infliximab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist
- The patient does NOT have isolated anterior uveitis
- Cyltezo will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do no approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-ADBM (Cyltezo)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

(Initial denial text continued on next page)

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

If you have ankylosing spondylitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
- You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe Crohn's disease, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

If you have moderate to severe ulcerative colitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of body surface area (BSA) or psoriatic lesions (rashes) affecting your hands, feet, face, scalp, or genital area
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
- You meet ONE of the following:
  - You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
  - You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
  - You are switching from a different biologic (such as Remicade [infliximab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

ADALIMUMAB-ADBM (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe hidradenitis suppurativa, approval also requires:
- You are 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

If you have non-infectious intermediate, posterior, or panuveitis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor)
- You do NOT have isolated anterior uveitis (a different type of eye inflammation)
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ADALIMUMAB-ADBM (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB-ADBM (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of AS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

ADALIMUMAB-ADBM (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51)
AND meet the following criterion?
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #8.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #9.

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Cyltezo will NOT be used concurrently with another systemic biologic or targetedsmall molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

ADALIMUMAB-ADBM (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-ADBM (Cyltezo)** requires the following rule(s) be met for renewal:

You have ONE of the following:

- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition) Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

If you have psoriatic arthritis, renewal also requires:

- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

(Renewal denial text continued on next page)

ADALIMUMAB-ADBM (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have ankylosing spondylitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

If you have moderate to severe Crohn's disease, renewal also requires:
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn’s disease

If you have moderate to severe ulcerative colitis, renewal also requires:
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

If you have moderate to severe hidradenitis suppurativa, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

If you have non-infectious intermediate, posterior, or panuveitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Cyltezo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Cyltezo [Prescribing Information]. Ridgefield, CT: Boehringer Ingelheim Pharmaceuticals, Inc.; October 2025.

For Part D use only:

ADALIMUMAB-ADBM (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RA, PJIA, ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST OR RHEUMATOLOGIST. PSO, HIDRADENITIS SUPPURATIVA (HS): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH GASTROENTEROLOGIST. UVEITIS: PRESCRIBED BY OR IN CONSULTATION WITH OPHTHALMOLOGIST
Coverage Duration	INITIAL: RA, PSO, PJIA, AS, PSA, CD, UC, UVEITIS: 6 MONTHS, HS: 12 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RHEUMATOID ARTHRITIS (RA): TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF PATIENT TRIED METHOTREXATE, THEN TRIAL AT A DOSE OF AT LEAST 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. AS: TRIAL OF OR CONTRAINDICATION TO AN NSAID. PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. UVEITIS: DOES NOT HAVE ISOLATED

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	ANTERIOR UVEITIS. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA), PSA, AS, PSO, HS, UVEITIS: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 03/25
Effective: 01/01/26 Client Approval: 10/25 P&T Approval: 01/26

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient is 2 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, continue to #8.
If no, continue to #9.

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
- The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
- The patient is switching from a different biologic (e.g., Remicade [infliximab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- Hadlima will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist
- The patient does NOT have isolated anterior uveitis
- Hadlima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-BWWD (Hadlima)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

(Initial denial text continued on next page)

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition in children)

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

If you have ankylosing spondylitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
- You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe Crohn's disease, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

If you have moderate to severe ulcerative colitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of body surface area (BSA) or psoriatic lesions (rashes) affecting your hands, feet, face, scalp, or genital area
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
- You meet ONE of the following:
  - You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
  - You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
  - You are switching from a different biologic (such as Remicade [infliximab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

ADALIMUMAB-BWWD (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe hidradenitis suppurativa, approval also requires:
- You are 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa (a type of skin condition)

If you have non-infectious intermediate, posterior, or panuveitis, approval also requires:
- You are 2 years of age or older
- Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor)
- You do NOT have isolated anterior uveitis (a different type of eye inflammation)
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis (a type of eye condition)

ADALIMUMAB-BWWD (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Enbrel [etanercept]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

ADALIMUMAB-BWWD (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

ADALIMUMAB-BWWD (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51)
AND meet the following criterion?
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Remicade [infliximab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)],PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #8.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic (e.g., Cosentyx [secukinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #9.

Does the patient have a diagnosis of non-infectious intermediate, posterior, or panuveitis (ICD-10 Group H44.11) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Hadlima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of uveitis

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

ADALIMUMAB-BWWD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADALIMUMAB-BWWD (Hadlima)** requires the following rule(s) be met for renewal:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
- Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe Crohn's disease (CD: a type of bowel disorder)
- Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
- Non-infectious intermediate, posterior, or panuveitis (a type of eye condition)

If you have moderate to severe rheumatoid arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Enbrel [etanercept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition in children)

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

(Renewal denial text continued on next page)

ADALIMUMAB-BWWD (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have ankylosing spondylitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

If you have moderate to severe Crohn's disease, renewal also requires:
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

If you have moderate to severe ulcerative colitis, renewal also requires:
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Remicade [infliximab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

If you have moderate to severe hidradenitis suppurativa, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic (such as Cosentyx [secukinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa (a type of skin condition)

If you have non-infectious intermediate, posterior, or panuveitis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Hadlima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of uveitis (a type of eye condition)

Hadlima [Prescribing Information]. Jersey City, NJ: Organon LLC; April 2026.

For Part D use only:

ADALIMUMAB-BWWD (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RA, PJIA, ANKYLOSING SPONDYLITIS (AS): PRESCRIBED BY OR IN CONSULTATION WITH RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST OR RHEUMATOLOGIST. PSO, HIDRADENITIS SUPPURATIVA (HS): PRESCRIBED BY OR IN CONSULTATION WITH DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH GASTROENTEROLOGIST. UVEITIS: PRESCRIBED BY OR IN CONSULTATION WITH OPHTHALMOLOGIST.
Coverage Duration	INITIAL: RA, PSO, PJIA, AS, PSA, CD, UC, UVEITIS: 6 MONTHS, HS: 12 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RHEUMATOID ARTHRITIS (RA): TRIAL OF OR CONTRAINDICATION TO 3 MONTHS OF TREATMENT WITH ONE CONVENTIONAL SYNTHETIC DMARD (DISEASE-MODIFYING ANTIRHEUMATIC DRUG) - IF PATIENT TRIED METHOTREXATE, THEN TRIAL OF AT LEAST 20 MG PER WEEK OR MAXIMALLY TOLERATED DOSE IS REQUIRED. AS: TRIAL OF OR CONTRAINDICATION TO AN NSAID. PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. UVEITIS: DOES NOT HAVE ISOLATED ANTERIOR UVEITIS.

No	No	Yes	No	No	Yes	No	No	Yes	No	Yes	Yes

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

ADAMTS13 RECOMBINANT-KRHN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ADO-TRASTUZUMAB EMTANSINE (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the patient's cancer in early stage and the patient meets **ALL** of the following criteria?
- The patient's cancer is HER2-positive
- The patient has residual invasive disease after neoadjuvant taxane (e.g., docetaxel, paclitaxel) and trastuzumab-based treatment

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ADO-TRASTUZUMAB EMTANSINE (Kadcyla)** requires the following rule(s) be met for approval:
You have breast cancer
If you have metastatic breast cancer (cancer that has spread to other parts of the body), approval also requires:
- Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
- You have previously received trastuzumab and a taxane (such as docetaxel, paclitaxel)
- You have received prior therapy for metastatic disease OR have developed disease recurrence (disease has returned) during or within 6 months of completing adjuvant (add-on) therapy

If you have early breast cancer (cancer has not spread to other parts of the body), approval also requires:
- Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
- You have residual (remaining) invasive disease after neoadjuvant (given before main treatment) taxane (such as docetaxel, paclitaxel) and trastuzumab-based treatment (types of cancer treatment)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
- The patient's tumor has a non-resistant epidermal growth factor receptor (EGFR) mutation as detected by an FDA-approved test
- Gilotrif will NOT be used concurrently with an EGFR tyrosine kinase inhibitor (e.g., Tarceva [erlotinib], Iressa [gefitinib], Vizimpro [dacomitinib], Tagrisso [osimertinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
- The patient's disease has progressed after platinum-based chemotherapy (i.e., cisplatin, carboplatin, oxaliplatin)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

AFATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AFATINIB (Gilotrif)** requires the following rule(s) be met for approval:
You have non-small cell lung cancer (NSCLC: a type of lung cancer)
If you have metastatic non-small cell lung cancer (cancer that has spread to other parts of the body), approval also requires:
Your tumor has a non-resistant epidermal growth factor receptor (EGFR: type of protein) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
You will NOT use Gilotrif concurrently (at the same time) with an epidermal growth factor receptor (EGFR) tyrosine kinase inhibitor (such as Tarceva [erlotinib], Iressa [gefitinib], Vizimpro [dacomitinib], Tagrisso [osimertinib])
If you have metastatic squamous non-small cell lung cancer (cancer that begins in the squamous cells of the lung and has spread to other parts of the body), approval also requires:
Your disease has progressed (worsened) after using platinum-based chemotherapy (cisplatin, carboplatin, oxaliplatin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Gilotrif.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of symptomatic obstructive hypertrophic cardiomyopathy (HCM) (ICD-10 I42.1) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a cardiologist
- The patient has New York Heart Association (NYHA) functional class II or III
- The patient has a peak left ventricular outflow tract (LVOT) gradient of at least 50 mmHg at rest or with provocation test
- Myqorzo will NOT be used concurrently with another myosin inhibitor (e.g., Camzyos [mavacamten]) for the treatment of hypertrophic cardiomyopathy
- The patient had a trial of, contraindication, or intolerance to ONE agent from any of the following clinical standard of care classes: a beta-blocker (e.g., metoprolol, carvedilol), a non-dihydropyridine calcium channel blocker (e.g., verapamil, diltiazem)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

AFICAMTEN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AFICAMTEN (Myqorzo)** requires the following rule(s) be met for approval:
You have symptomatic obstructive hypertrophic cardiomyopathy (HCM: a type of heart condition)
You are 18 years of age or older
Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor)
You have New York Heart Association (NYHA) functional class II or III (a way to classify the severity of symptoms)
You have a peak left ventricular outflow tract (LVOT) gradient (evaluates the severity of disease) of at least 50 mmHg at rest or with provocation test (a type of technique to evaluate how the heart performs under stress)
You will NOT use Myqorzo concurrently (at the same time) with another myosin inhibitor (such as Camzyos [mavacamten]) for the treatment of hypertrophic cardiomyopathy (a type of heart condition)
You have tried, have a contraindication (harmful for you to use), or intolerance to (side effect) ONE medication from any of the following clinical standard of care classes: beta- blocker (such as metoprolol, carvedilol), non-dihydropyridine calcium channel blocker (such as verapamil, diltiazem)

AFICAMTEN (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of symptomatic obstructive hypertrophic cardiomyopathy (HCM) (ICD-10 I42.1) and meet **ALL** of the following criteria?
- The patient has experienced continued clinical benefit (e.g., reduction of symptoms, NYHA classification improvement)
- Myqorzo will NOT be used concurrently with another myosin inhibitor (e.g., Camzyos [mavacamten]) for the treatment of hypertrophic cardiomyopathy

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AFICAMTEN (Myqorzo)** requires the following rule(s) be met for renewal:
- You have symptomatic obstructive hypertrophic cardiomyopathy (HCM: a type of heart condition)
- You have experienced continued clinical benefit (such as reduction of symptoms, New York Heart Association [NYHA] classification [a way to classify severity of symptoms] improvement)
- You will NOT use Myqorzo concurrently (at the same time) with another myosin inhibitor (such as Camzyos [mavacamten]) for the treatment of hypertrophic cardiomyopathy (a type of heart condition)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Myqorzo.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with a nephrologist, cardiologist, or specialist in genetics or inherited metabolic disorders
- Fabrazyme will NOT be used concurrently with another Fabry disease therapy (e.g., Elfabrio [pegunigalsidase alfa-iwxj], Galafold [migalastat])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Is the request for a female patient who meets the following criterion?
- The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

AGALSIDASE BETA (PART D)

INITIAL CRITERIA (CONTINUED)

Is the request for a male patient who meets **ONE** of the following criteria?
The patient has an alpha galactosidase A (a-Gal-A) deficiency as indicated by an enzyme assay
The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AGALSIDASE BETA (Fabrazyme)** requires the following rule(s) be met for approval:
You have Fabry disease (a rare genetic disease)
You are 2 years of age or older
Therapy is prescribed by or in consultation with a nephrologist (kidney doctor), cardiologist (heart doctor), or a doctor specializing in genetics or inherited metabolic disorders
You will NOT use Fabrazyme concurrently (at the same time) with another Fabry disease medication (such as Elfabrio [pegunigalsidase alfa-iwxj], Galafold [migalastat])
If you are a female, approval also requires:
You have a galactosidase alpha (GLA: a type of gene) gene mutation by genetic testing
If you are a male, approval also requires ONE of the following:
You do not have enough alpha galactosidase A (a-Gal-A: a type of protein) as indicated by an enzyme assay (a type of lab test)
You have a galactosidase alpha (GLA: a type of gene) gene mutation by genetic testing

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of house dust mite (HDM)-induced allergic rhinitis (ICD-10 J30.89) and meet **ALL** of the following criteria?

- The patient is 5 to 65 years of age
- The patient's diagnosis is confirmed by in vitro testing for IgE antibodies to *Dermatophagoides farinae* or *Dermatophagoides pteronyssinus* house dust mites, OR by skin testing to licensed house dust mite allergen extracts
- Therapy is prescribed by or in consultation with an allergist, immunologist, or other physician experienced in the diagnosis and treatment of allergic diseases
- The patient has persistent symptoms of allergic rhinitis (defined as symptoms presenting for at least 4 days a week or for at least 4 weeks)
- The patient has moderate-to-severe symptoms of allergic rhinitis (including one or more of the following: troublesome symptoms, sleep disturbance, impairment of daily activities, or impairment of school or work)
- The patient has a current claim or prescription for an auto-injectable epinephrine within the past 365 days

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ALLERGEN EXTRACT-HOUSE DUST MITE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ALLERGEN EXTRACT-HOUSE DUST MITE (Odactra)** requires the following rule(s) be met for approval:
You have allergic rhinitis (itchy, watery eyes, sneezing) caused by house dust mites
You are 5 to 65 years of age
Your diagnosis is confirmed by in vitro testing (testing outside of the body in a tube) for IgE (immunoglobulin E) antibodies to *Dermatophagoides farinae* or *Dermatophagoides pteronyssinus* house dust mites, OR by skin testing to licensed house dust mite allergen extracts
Therapy is prescribed by or in consultation with an allergist (allergy doctor), immunologist (immune system doctor), or other physician experienced in the diagnosis and treatment of allergic diseases
You have persistent symptoms of allergic rhinitis (defined as symptoms presenting for at least 4 days a week or for at least 4 weeks)
You have moderate-to-severe symptoms of allergic rhinitis (including one or more of the following: troublesome symptoms, sleep disturbance, impairment of daily activities, or impairment of school or work)
You have a current claim or prescription for an auto-injectable epinephrine within the past 365 days

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of PIK3CA-related overgrowth spectrum (PROS) and meet **ALL** of the following criteria?
The patient is 2 years of age or older
The patient has severe manifestations of PROS that require systemic therapy

If yes, **approve for 12 months by GPID or GPI-10 for all strengths.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ALPELISIB - VIJOICE** requires the following rule(s) be met for approval:
You have PIK3CA-related overgrowth spectrum (PROS: group of disorders that cause overgrowth of parts of the body due to mutations in a type of gene)
You are 2 years of age or older
You have severe manifestations (symptoms) of PROS that require systemic therapy (treatment that targets the entire body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

AMBRISENTAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AMBRISENTAN (Letairis)** requires the following rule(s) be met for approval:

- You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
- Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
- Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
  - Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
  - Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
  - Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units
- You do NOT have idiopathic pulmonary fibrosis (lung disease that causes scarring for unknown reason)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit).**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Does the patient have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations?

If yes, continue to #3.
If no, continue to #5.

Does the patient meet **ALL** of the following criteria?
The patient's mutation is detected by an FDA-approved test
Rybrevant Faspro will be used in combination with lazertinib (Lazcluze)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

AMIVANTAMAB-HYALURONIDASE-LPUJ BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient meet **ALL** of the following criteria?
- Rybrevant Faspro will be used in combination with carboplatin and pemetrexed
- The patient's disease has progressed while on or after epidermal growth factor receptor (EGFR) tyrosine kinase-inhibitor therapy (e.g., Tagrisso [osimertinib], Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Does the patient have epidermal growth factor receptor (EGFR) exon 20 insertion mutations, as detected by an FDA-approved test, and meet **ONE** of the following criteria?
- Rybrevant Faspro will be used in combination with carboplatin and pemetrexed
- Rybrevant Faspro will be used as a single agent and the patient's disease has progressed on or after platinum-based chemotherapy (e.g., cisplatin, carboplatin)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AMIVANTAMAB-HYALURONIDASE-LPUJ (Rybrevant Faspro)** requires the following rule(s) be met for approval:
- You have locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to nearby tissue, lymph nodes, or other parts of the body)
- You are 18 years of age or older

(Denial text continued on next page)

AMIVANTAMAB-HYALURONIDASE-LPUJ BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have epidermal growth factor receptor (EGFR: a type of protein) exon 19 deletions or exon 21 L858R substitution mutations (abnormal changes in a type of gene), approval also requires ONE of the following:

Your mutation is detected by a Food and Drug Administration (FDA)-approved test AND Rybrevant Faspro will be used in combination with lazertinib (Lazcluze)

Rybrevant Faspro will be used in combination with carboplatin and pemetrexed AND your disease has progressed while on or after epidermal growth factor receptor (EGFR) tyrosine kinase-inhibitor therapy (such as Tagrisso [osimertinib], Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

If you have epidermal growth factor receptor (EGFR: a type of protein) exon 20 insertion mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test, approval also requires you meet ONE of the following:

Rybrevant Faspro will be used in combination with carboplatin and pemetrexed

Rybrevant Faspro will be used as a single agent AND your disease has progressed on or after platinum-based chemotherapy (such as cisplatin, carboplatin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Rybrevant Faspro.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, continue to #6.
If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, continue to #6.
If no, continue to #5.

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

AMIVANTAMAB-VMJW BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the drug administered via an implantable pump?

If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field.).**

If no, continue to #7.

Is the drug administered using an external pump?

If yes, continue to #8.
If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Is the drug specifically infused through an external infusion pump covered by Medicare?

If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of confirmed or suspected vasospastic angina (Prinzmetal's or variant angina) (ICD-10 I20.1) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient has a contraindication to or is unable to swallow amlodipine tablets

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

Does the patient have a diagnosis of angiographically documented coronary artery disease (CAD) (ICD-10 Group I25) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient does not have heart failure OR an ejection fraction of less than 40%
The patient has a contraindication to or is unable to swallow amlodipine tablets

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AMLODIPINE (Sdmalo)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Hypertension (high blood pressure)
- Chronic stable angina (a type of heart condition)
- Confirmed or suspected vasospastic angina (Prinzmetal's or variant angina) (a type of heart condition)
- Angiographically documented coronary artery disease (a type of heart condition that has been confirmed by a type of imaging test)

If you have hypertension, approval also requires:
- You are 6 years of age or older
- You have a contraindication to (harmful for you to use) or are unable to swallow amlodipine tablets

If you have chronic stable angina, approval also requires:
- You are 18 years of age or older
- You have a contraindication to (harmful for you to use) or are unable to swallow amlodipine tablets

AMPHETAMINE SULFATE DvE (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AMPHETAMINE SULFATE (Evekeo)** requires the following rule(s) be met for approval:
You have ONE of the following:
Narcolepsy (a type of sleep condition)
Attention deficit disorder with hyperactivity (a type of mental health disorder)
If you have narcolepsy, approval also requires:
You are 6 years of age or older
If you have attention deficit disorder with hyperactivity, approval also requires:
You are 3 years of age or older

Note: The requested medication will NOT be approved if the request is for exogenous obesity (a condition of higher than normal body fat)

RATIONALE

To limit the coverage of Evekeo to the Medicare Part D covered indication of attention deficit disorder with hyperactivity and narcolepsy, and exclude coverage for the treatment of obesity. For further information, please refer to the Prescribing Information and/or Drug Monograph for Evekeo.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Is the request for the treatment of coronavirus disease 2019 (COVID-19) in a hospitalized adult?

If yes, **do not approve**. [NOTE: This indication is for hospital use only.]
DENIAL TEXT: See initial denial text at the end of the guideline.

If no, continue to #2.

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Orencia (abatacept)
- Kineret will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #3.

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of cryopyrin-associated periodic syndrome (CAPS), including neonatal-onset multisystem inflammatory disease (NOMID) (ICD-10 M04.2) and meet **ALL** of the following criteria?
- The patient had genetic testing for gain-of-function mutations in the NLRP3 gene OR has inflammatory markers (i.e., elevated CRP, ESR, serum amyloid A protein (SAA) or S100 proteins)
- The patient has TWO of the following: urticarial-like rash (neutrophilic dermatitis), cold-triggered episodes, sensorineural hearing loss, musculoskeletal symptoms, chronic aseptic meningitis, skeletal abnormalities
- Kineret will NOT be used concurrently with another systemic biologic (e.g., Arcalyst [rilonacept]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CAPS, including NOMID

If yes, **approve for lifetime by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

Does the patient have a diagnosis of deficiency of interleukin-1 receptor antagonist (DIRA) (ICD-10 M04.8) and meet **ALL** of the following criteria?
- The patient had genetic testing for gain-of-function mutations in the IL1RN gene OR has inflammatory markers (i.e., elevated CRP, ESR)
- The patient has ONE of the following: pustular psoriasis-like rashes, osteomyelitis, absence of bacterial osteomyelitis, nail changes (i.e., onychomadesis)
- Kineret will NOT be used concurrently with another systemic biologic (e.g., Arcalyst [rilonacept]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DIRA

If yes, **approve for lifetime by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See initial denial text at the end of the guideline.

ANAKINRA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ANAKINRA (Kineret)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe rheumatoid arthritis (a type of joint condition)
- Cryopyrin-associated periodic syndromes (CAPS) including neonatal-onset multisystem inflammatory disease (NOMID) (types of immune system disorders)
- Deficiency of interleukin-1 receptor antagonist (DIRA: a type of immune system disorder)

If you have moderate to severe rheumatoid arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Orencia (abatacept)
- You will NOT use Kineret concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

(Initial denial text continued on next page)

ANAKINRA (PART D)

INITIAL CRITERIA (CONTINUED)

If you have cryopyrin-associated periodic syndromes, including neonatal-onset multisystem inflammatory disease, approval also requires:

- You had genetic testing for gain-of-function mutations (abnormal change in gene) in the *NLRP3* gene (a type of gene), OR you have inflammatory markers (elevated C-reactive protein [CRP: sign of inflammation], erythrocyte sedimentation rate [ESR: a type of blood test], serum amyloid A protein [SAA: a type of protein] or S100 proteins [a type of protein])
- You have TWO of the following: urticarial-like rash (neutrophilic dermatitis: a type of skin condition), cold-triggered episodes, sensorineural hearing loss (SNHL: a type of hearing loss), musculoskeletal symptoms (symptoms related to the muscles and bones), chronic aseptic meningitis (inflammation of the brain and spinal cord), skeletal (bone) abnormalities
- You will NOT use Kineret concurrently (at the same time) with another systemic biologic (such as Arcalyst [rilonacept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of cryopyrin-associated periodic syndromes, including neonatal-onset multisystem inflammatory disease

If you have deficiency of interleukin-1 receptor antagonist, approval also requires:

- You had genetic testing for gain-of-function mutations (abnormal change in gene) in the *IL1RN gene* (a type of gene), OR you have inflammatory markers (elevated C-reactive protein [CRP: sign of inflammation], erythrocyte sedimentation rate [ESR: a type of blood test])
- You have ONE of the following: pustular psoriasis-like rashes (a type of skin condition), osteomyelitis (bone infection), absence of bacterial osteomyelitis, nail changes (onychomadesis: nail shedding)
- You will NOT use Kineret concurrently (at the same time) with another systemic biologic (such as Arcalyst [rilonacept]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of deficiency of interleukin-1 receptor antagonist

NOTE: Kineret will not be approved for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized adults

ANAKINRA (PART D)

RENEWAL CRITERIA

NOTE: For neonatal-onset multisystem inflammatory disease (NOMID) cryopyrin-associated periodic syndromes (CAPS) or deficiency of interleukin-1 receptor antagonist (DIRA), please refer to the Initial Criteria section.

Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Kineret will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ANAKINRA (Kineret)** requires the following rule(s) be met for renewal:
You have moderate to severe rheumatoid arthritis (a type of joint condition)
You continue to benefit from the medication
You will NOT use Kineret concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

RATIONALE
For further information, please refer to the prescribing information and/or Drug Monograph for Kineret.

ANAKINRA (PART D)

For Part D use only:

ANAKINRA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	CORONAVIRUS DISEASE 2019 (COVID-19) IN HOSPITALIZED ADULTS.
Required Medical Information	INITIAL: CRYOPYRIN-ASSOCIATED PERIODIC SYNDROMES (CAPS): 1) ONE OF THE FOLLOWING: (A) GENETIC TEST FOR GAIN-OF-FUNCTION MUTATIONS IN THE NLRP3 GENE, OR (B) HAS INFLAMMATORY MARKERS (I.E., ELEVATED CRP, ESR, SERUM AMYLOID A PROTEIN (SAA) OR S100 PROTEINS), AND 2) TWO OF THE FOLLOWING: URTICARIAL-LIKE RASH (NEUTROPHILIC DERMATITIS), COLD-TRIGGERED EPISODES, SENSORINEURAL HEARING LOSS, MUSCULOSKELETAL SYMPTOMS, CHRONIC ASEPTIC MENINGITIS, SKELETAL ABNORMALITIES. DEFICIENCY OF INTERLEUKIN-1 RECEPTOR ANTAGONIST (DIRA): 1) ONE OF THE FOLLOWING: (A) GENETIC TEST FOR GAIN-OF-FUNCTION MUTATIONS IN THE IL1RN GENE, OR (B) HAS INFLAMMATORY MARKERS (I.E., ELEVATED CRP, ESR), AND 2) ONE OF THE FOLLOWING: PUSTULAR PSORIASIS-LIKE RASHES, OSTEOMYELITIS, ABSENCE OF BACTERIAL OSTEOMYELITIS, ONYCHOMADESIS.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST.
Coverage Duration	RA: INITIAL: 6 MONTHS, RENEWAL: 12 MONTHS. CAPS, DIRA: LIFETIME.
Other Criteria	INITIAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. RENEWAL: RA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe systemic lupus erythematosus (SLE) (ICD-10 Group M32) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient is receiving standard SLE therapy (e.g., oral corticosteroids, antimalarials, immunosuppressants)
- Saphnelo will NOT be used concurrently with another systemic biologic (e.g., Benlysta [belimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SLE

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ANTI-NAUSEA AGENT BVD DETERMINATION (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the prescription written for a full therapeutic replacement for an intravenous anti-emetic drug as part of a cancer chemotherapeutic regimen for use within 48 hours of the patient receiving cancer treatment?

If yes, **approve for 12 months under Part B by HICL or GPI-10 (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, **approve for 12 months under Part D by HICL or GPI-10 (Populate the B vs. D field with a 'D' in the PA override field).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

Does the patient meet **ALL** of the following criteria?

The patient is receiving the oral anti-emetic drug as full therapeutic replacement for an intravenous anti-emetic drug as part of a cancer chemotherapeutic regimen, for use within 48 hours of the patient receiving cancer treatment

Emend (aprepitant) will be used as part of the three-drug regimen which includes ALL of the following drugs:
Emend (aprepitant)
5-HT3 antagonist (e.g., granisetron, ondansetron, dolasetron)
Dexamethasone (a corticosteroid)
[**NOTE**: Recent claims for a 5-HT3 antagonist and Dexamethasone can be assumed as being used in combination with Emend (aprepitant)].

If yes, **approve for 12 months under Part B by HICL or GPI-10 (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, **approve for 12 months under Part D by HICL or GPI-10 (Populate the B vs. D field with a 'D' in the PA override field).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

ANTI-NAUSEA AGENT BVD DETERMINATION (PART D)

RATIONALE

This drug may be covered under Medicare part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.

Ensure that any use as a full therapeutic replacement for an intravenous anti-emetic drug as part of a cancer chemotherapeutic regimen within 48 hours of the patient receiving cancer treatment is billed under Part B.

Aprepitant (Emend) will be covered under Part B when used as part of a 3-drug combination regimen: Days 1- 3 of the oral anti-emetic 3-drug combination of Emend, a 5-HT3 antagonist, and dexamethasone. This regimen acts as a full replacement for IV anti-emetic therapy for patients receiving one or more anti-cancer chemotherapeutic agents.

APALUTAMIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APALUTAMIDE (Erleada)** requires the following rule(s) be met for approval:

You have ONE of the following:
- Metastatic castration-sensitive prostate cancer (mCSPC: prostate cancer that has spread to other parts of the body and responds to hormone therapy)
- Non-metastatic castration-resistant prostate cancer (nmCRPC: prostate cancer that has not spread to other parts of the body and does not respond to hormone therapy)

You meet ONE of the following:
- You have received a bilateral orchiectomy (surgical removal of both testicles)
- You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
- Erleada will be used concurrently (at the same time) with a gonadotropin releasing hormone analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the prescribing information and/or drug monograph for Erleada.

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APOMORPHINE - SL (Kynmobi)** requires the following rule(s) be met for approval:
You have Parkinson's disease (a type of movement disorder)
You are 18 years of age or older
Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
Kynmobi will be used for acute, intermittent treatment (sudden and periodic treatment) of 'OFF' episodes (when symptoms return due to your medication for Parkinson's disease wearing off)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

APOMORPHINE - SL (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of Parkinson's disease (ICD-10 Group G20) **AND** meet the following criterion?

The patient has had improvement with motor fluctuations during 'OFF' episodes with the use of Kynmobi (e.g., improvement in speech, facial expression, tremor at rest, action or postural tremor of hands, rigidity, finger taps, hand movements, rapid alternating movements of hands, posture, leg agility, arising from chair)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APOMORPHINE - SL (Kynmobi)** requires the following rule(s) be met for renewal:
You have Parkinson's disease (a type of movement disorder)
You have had improvement with motor fluctuations during 'OFF' episodes (when symptoms return due to your medications for Parkinson's disease wearing off) with the use of Kynmobi (such as improvement in speech, facial expression, tremor at rest, action or postural tremor of hands, rigidity, finger taps, hand movements, rapid alternating movements of hands, posture, leg agility, arising from chair)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Kynmobi.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
The patient is 6 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of plaque psoriasis (PsO) (ICD-10 L40.0)?

If yes, continue to #3.
If no, continue to #7.

APREMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

Is the patient's disease mild and the patient meets **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient had a trial of or contraindication to one conventional systemic agent (e.g., methotrexate, acitretin, cyclosporine) OR one conventional topical therapy (e.g., topical corticosteroids [e.g., clobetasol, betamethasone])
- The requested medication will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Zoryve (roflumilast)]) for the treatment of mild PsO

If yes, continue to #4.
If no, continue to #5.

Does the patient meet **ONE** of the following criteria?
- The patient has psoriasis covering less than 3% of body surface area (BSA)
- The patient has a static Physician Global Assessment (sPGA) score of 2
- The patient has a Psoriasis Area and Severity Index (PASI) score of 2 to 9

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Is the patient's disease moderate to severe and the patient meets **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Zoryve (roflumilast)]) for the treatment of moderate to severe PsO

If yes, continue to #6.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

APREMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
- The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
- The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor, or JAK inhibitor for the same indication

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of Behcet's disease (ICD-10 M35.2) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient has oral ulcers or a history of recurrent oral ulcers based on clinical symptoms
- The patient had a trial of or contraindication to one or more conservative treatments (e.g., colchicine, topical corticosteroid [e.g., triamcinolone acetonide], oral corticosteroid [e.g., prednisone, methylprednisolone])
- The requested medication will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of Behcet's disease

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

APREMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APREMILAST (Otezla, Otezla XR)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Plaque psoriasis (PsO: a type of skin condition)
- Behcet's disease (a type of inflammation disorder)

If you have psoriatic arthritis, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of PsA

If you have mild plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have tried or have a contraindication to (harmful for you to use) one conventional (standard) systemic (treatment that targets the entire body) medication (such as methotrexate, acitretin, cyclosporine) OR one conventional topical treatment (such as topical corticosteroids [such as clobetasol, betamethasone])
- You will NOT use Otezla concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Zoryve (roflumilast)] for the treatment of mild plaque psoriasis
- You meet ONE of the following:
  - You have psoriasis covering less than 3% of your body surface area (BSA)
  - You have a static Physician Global Assessment (sPGA: a measure used to evaluate severity of the disease) score of 2
  - You have a Psoriasis Area and Severity Index (PASI: a measure used to evaluate severity of the disease) score of 2 to 9

(Initial denial text continued on next page)

APREMILAST (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of your body surface area (BSA) or psoriatic lesions (rashes) affecting your hands, feet, face, scalp, or genital area
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Zoryve (roflumilast)]) for the treatment of moderate to severe plaque psoriasis
- You meet ONE of the following:
  - You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
  - You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
  - You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor, or JAK (Janus kinase) inhibitor for the same indication

If you have Behcet's disease, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You have oral ulcers or a history of repeated oral ulcers based on your symptoms
- You have tried or have a contraindication to (harmful for you to use) one or more conservative treatments (such as colchicine, topical corticosteroid [such as triamcinolone acetonide], oral corticosteroid [such as prednisone, methylprednisolone])
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Behcet's disease

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

APREMILAST (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of psoriatic arthritis

If you have mild plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Zoryve (roflumilast) for the treatment of mild plaque psoriasis

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Zoryve (roflumilast) for the treatment of moderate to severe plaque psoriasis

If you have Behcet's disease, renewal also requires:
- You continue to benefit from the medication
- You will NOT use the requested medication concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Behcet's disease

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Otezla/Otezla XR.

	AREA (BSA), 2) STATIC PHYSICIAN GLOBAL ASSESSMENT (SPGA) SCORE OF 2, OR 3) PSORIASIS AREA AND SEVERITY INDEX (PASI) SCORE OF 2 TO 9. MODERATE TO SEVERE PSO: PSORIASIS COVERING 3 PERCENT OR MORE OF BSA, OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. BEHCETS DISEASE: PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: MILD PSO: TRIAL OF OR CONTRAINDICATION TO ONE CONVENTIONAL SYSTEMIC THERAPY (E.G., METHOTREXATE, ACITRETIN, CYCLOSPORINE) OR ONE CONVENTIONAL TOPICAL THERAPY (E.G., TOPICAL CORTICOSTEROIDS). MODERATE TO SEVERE PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. BEHCETS DISEASE: 1) HAS ORAL ULCERS OR A HISTORY OF RECURRENT ORAL ULCERS BASED ON CLINICAL SYMPTOMS, AND 2) TRIAL OF OR CONTRAINDICATION TO ONE OR MORE CONSERVATIVE TREATMENTS (E.G., COLCHICINE, TOPICAL CORTICOSTEROID, ORAL CORTICOSTEROID). INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: ALL INDICATIONS: CONTINUES TO BENEFIT FROM THE MEDICATION.

GUIDELINES FOR USE

INITIAL CRITERA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of hypertension (ICD-10 I10) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a cardiologist, nephrologist, or endocrinologist
- The patient's blood pressure is NOT controlled on at least three anti-hypertensive agents of different pharmacologic classes (e.g., an angiotensin receptor blocker [e.g., valsartan], a calcium channel blocker [e.g., amlodipine], a diuretic [e.g., hydrochlorothiazide]) at a maximally tolerated dose for at least 4 weeks
- The patient does NOT have resistant hypertension due to white coat effect, medical inertia, poor therapeutic adherence, or secondary causes of hypertension (except sleep apnea)
- Tryvio will be used concurrently with at least three other anti-hypertensive agents (e.g., valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses
- The patient had a trial of or contraindication to a potent diuretic (i.e., chlorthalidone or indapamide) AND a mineralocorticoid receptor antagonist (i.e., spironolactone or eplerenone)

If yes, **approve for 2 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

APROCITENTAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APROCITENTAN (Tryvio)** requires the following rule(s) be met for approval:
You have hypertension (high blood pressure)
You are 18 years of age or older
Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), nephrologist (a type of kidney doctor), or endocrinologist (a type of hormone doctor)
Your blood pressure is NOT controlled on at least three anti-hypertensive medications (drugs used to treat high blood pressure) with different mechanisms of action (such as an angiotensin receptor blocker [such as valsartan], a calcium channel blocker [such as amlodipine], a diuretic [such as hydrochlorothiazide]) at a maximally tolerated dose for at least 4 weeks
You do NOT have resistant hypertension (a type of high blood pressure) due to white coat effect (a condition where blood pressure is higher in a medical setting), medical inertia (when healthcare providers do not make changes to treatment even if the medical condition is poorly controlled), poor therapeutic adherence (not keeping up with therapy), or secondary causes of hypertension (high blood pressure that is caused by another medical condition) (except sleep apnea [a type of sleep condition with difficulty breathing])
You will use Tryvio concurrently (at the same time) with at least three other anti-hypertensive medications (drugs used to treat high blood pressure such as valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses
You have tried or have a contraindication to (harmful for you to use) a potent diuretic (chlorthalidone or indapamide) AND a mineralocorticoid receptor antagonist (spironolactone or eplerenone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

APROCITENTAN (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of hypertension (ICD-10 I10) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Tryvio will be used concurrently with at least three other anti-hypertensive agents (e.g., valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **APROCITENTAN (Tryvio)** requires the following rule(s) be met for renewal:
You have hypertension (high blood pressure)
You continue to benefit from Tryvio
You will use Tryvio concurrently (at the same time) with at least three other anti-hypertensive medications (drugs used to treat high blood pressure such as valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of perinatal/infantile-onset hypophosphatasia (HPP) (ICD-10 E83.39) and meet **ALL** of the following criteria?
Therapy is prescribed by or in consultation with an endocrinologist, geneticist, or a metabolic specialist
The patient was 6 months of age or younger at onset of hypophosphatasia

If yes, continue to #2.
If no, continue to #4.

Does the patient have a positive tissue non-specific alkaline phosphatase (TNSALP) (ALPL) gene mutation as confirmed by genetic testing?

If yes, continue to #7.
If no, continue to #3.

ASFOTASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet TWO of the following criteria?
- The patient has a serum alkaline phosphatase (ALP) level below the normal range for patient age
- The patient has an elevated serum pyridoxal-5'-phosphate (PLP) level AND has not received vitamin B6 supplementation in the previous week
- The patient has a urine phosphoethanolamine (PEA) level above the normal range for patient age
- The patient has radiographic evidence of hypophosphatasia (HPP) (e.g., flared and frayed metaphyses, osteopenia, widened growth plates, areas of radiolucency or sclerosis)
- The patient has at least TWO of the following:
  - Rachitic chest deformity
  - Craniosynostosis (premature closure of skull bones)
  - Delay in skeletal growth resulting in delay of motor development
  - History of vitamin B6 dependent seizures
  - Nephrocalcinosis or history of elevated serum calcium
  - History or presence of non-traumatic postnatal fracture and delayed fracture healing

  If yes, continue to #7.
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of juvenile-onset hypophosphatasia (HPP) (ICD-10 E83.39) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist, geneticist, or a metabolic specialist
- The patient was 18 years of age or younger at onset of hypophosphatasia

  If yes, continue to #5.
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a positive tissue non-specific alkaline phosphatase (TNSALP) (ALPL) gene mutation as confirmed by genetic testing?

  If yes, continue to #7.
  If no, continue to #6.

ASFOTASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **TWO** of the following criteria?
- The patient has a serum alkaline phosphatase (ALP) level below the normal range for patient age
- The patient has an elevated serum pyridoxal-5'-phosphate (PLP) level AND has not received vitamin B6 supplementation in the previous week
- The patient has a urine phosphoethanolamine (PEA) level above the normal range for patient age
- The patient has radiographic evidence of hypophosphatasia (HPP) (e.g., flared and frayed metaphyses, osteopenia, osteomalacia, widened growth plates, areas of radiolucency or sclerosis)
- The patient has TWO of the following:
  - Rachitic deformities (rachitic chest, bowed legs, knock-knees)
  - Premature loss of primary teeth prior to 5 years of age
  - Delay in skeletal growth resulting in delay of motor development
  - History or presence of non-traumatic fractures or delayed fracture healing

  If yes, continue to #7.
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient meet **ALL** of the following criteria?
- The patient is NOT currently receiving treatment with a bisphosphonate (e.g., Boniva [ibandronate], Fosamax [alendronate], Actonel [risedronate])
- The patient does NOT have serum calcium or phosphate levels below the normal range
- The patient does NOT have a treatable form of rickets

  If yes, **approve for 6 months by HICL or GPI-10.**
  APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

ASFOTASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ASFOTASE ALFA (Strensiq)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Perinatal/infantile hypophosphatasia (HPP: a type of genetic condition)
- Juvenile-onset hypophosphatasia (HPP: a type of genetic condition)

If you have perinatal/infantile-onset hypophosphatasia, approval also requires:
- You were 6 months of age or younger at the onset of hypophosphatasia
- Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), geneticist (a doctor who treats gene disorders), or a metabolic specialist
- You will NOT use Strensiq together with a bisphosphonate (such as Boniva [ibandronate], Fosamax [alendronate], Actonel [risedronate])
- Your serum (blood) calcium or phosphate levels are NOT below the normal range
- You do NOT have a treatable form of rickets (a type of bone condition in children)
- You meet ONE of the following:
  - You are positive for a tissue non-specific alkaline phosphatase (TNSALP: a type of enzyme) gene mutation (abnormal change) as confirmed by genetic testing
  - You meet TWO of the following:
    - Your serum alkaline phosphatase (type of lab test) level is below the normal range for your age
    - Your serum pyridoxal-5'-phosphate (PLP: type of lab test) level is elevated AND you have NOT received vitamin B6 supplementation in the previous week
    - Your urine phosphoethanolamine (PEA: type of lab test) level is above the normal range for your age
    - You have radiographic (X-ray) evidence of hypophosphatasia (such as flared and frayed metaphyses [a part of the long bone], osteopenia [bone loss], widened growth plates, areas of radiolucency [ability to see through with X-rays/ radiation] or sclerosis [hardening of an area])
    - You have TWO of the following:
      - Rachitic chest deformity (chest bones are abnormal)
      - Craniosynostosis (premature closure of skull bones)
      - Delay in skeletal growth leading to motor development delay
      - History of vitamin B6 dependent seizures
      - Nephrocalcinosis (high calcium levels in kidney) or history of elevated serum calcium
      - History or presence of fracture after birth not due to injury and delayed fracture healing

(Initial denial text continued on next page)

ASFOTASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

If you have juvenile-onset hypophosphatasia, approval also requires:
- You were 18 years of age or younger at the onset of hypophosphatasia
- Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), geneticist (a doctor who treats gene disorders), or a metabolic specialist
- You will NOT use Strensiq together with a bisphosphonate (such as Boniva [ibandronate], Fosamax [alendronate], Actonel [risedronate])
- Your serum (blood) calcium or phosphate levels are NOT below the normal range
- You do NOT have a treatable form of rickets (a type of bone condition in children)
- You meet ONE of the following:
  - You are positive for a tissue non-specific alkaline phosphatase (TNSALP: a type of enzyme) gene mutation (abnormal change) as confirmed by genetic testing
  - You meet TWO of the following:
    - Your serum alkaline phosphatase (type of lab test) level is below the normal range for your age
    - Your serum pyridoxal-5'-phosphate (PLP: type of lab test) level is elevated AND you have NOT received vitamin B6 supplementation in the previous week
    - Your urine phosphoethanolamine (PEA: type of lab test) level is above the normal range for your age
    - You have radiographic (X-ray) evidence of hypophosphatasia (such as flared and frayed metaphyses [a part of the long bone], osteopenia [bone loss], osteomalacia [bone softening], widened growth plates, areas of radiolucency [ability to see through with X-rays/radiation] or sclerosis [hardening of an area])
    - You have TWO of the following:
      - Rachitic deformities (rachitic chest, bowed legs, knock-knees)
      - Premature loss of primary teeth prior to 5 years of age
      - Delay in skeletal growth leading to motor development delay
      - History or presence of fracture after birth not due to injury or delayed fracture healing

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ASFOTASE ALFA (PART D)

RENEWAL CRITERIA

Has the patient experienced an improvement in the skeletal characteristics of hypophosphatasia (HPP) (e.g., improvement of the irregularity of the provisional zone of calcification, physeal widening, metaphyseal flaring, radiolucencies, patchy osteosclerosis, ratio of mid-diaphyseal cortex to bone thickness, gracile bones, bone formation and fractures)?

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

Is the patient currently receiving treatment with a bisphosphonate (e.g., Boniva [ibandronate], Fosamax [alendronate], Actonel [risedronate])?

If yes, do not approve.
If no, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ASFOTASE ALFA (Strensiq)** requires the following rule(s) be met for renewal:
You have experienced an improvement in skeletal characteristics (bones, teeth) of hypophosphatasia (HPP: a type of genetic condition)
You will NOT use Strensiq together with a bisphosphonate (such as Boniva [ibandronate], Fosamax [alendronate], Actonel [risedronate])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Strensiq.

ASFOTASE ALFA (PART D)

For Part D use only:

ASFOTASE ALFA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	HYPOPHOSPHATASIA (HPP): INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST, GENETICIST, OR METABOLIC SPECIALIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PERINATAL/INFANTILE-ONSET HPP: 1) 6 MONTHS OF AGE OR YOUNGER AT ONSET OF HPP, AND 2) POSITIVE FOR A TISSUE NON-SPECIFIC ALKALINE PHOSPHATASE (TNSALP) (ALPL) GENE MUTATION AS CONFIRMED BY GENETIC TESTING OR TWO OF THE FOLLOWING: (A) SERUM ALKALINE PHOSPHATASE (ALP) LEVEL BELOW THAT OF NORMAL RANGE FOR PATIENT AGE, (B) ELEVATED SERUM PYRIDOXAL-5'-PHOSPHATE (PLP) LEVELS AND NO VITAMIN B6 SUPPLEMENTATION IN THE PREVIOUS WEEK, (C) URINE PHOSPHOETHANOLAMINE (PEA) LEVEL ABOVE THAT OF NORMAL RANGE FOR PATIENT AGE, (D) RADIOGRAPHIC EVIDENCE OF HPP, (E) AT LEAST TWO OF THE FOLLOWING: (I) RACHITIC CHEST DEFORMITY, (II) CRANIOSYNOSTOSIS, (III) DELAY IN SKELETAL GROWTH RESULTING IN DELAY OF MOTOR DEVELOPMENT, (IV) HISTORY OF VITAMIN B6 DEPENDENT SEIZURES, (V) NEPHROCALCINOSIS OR HISTORY OF ELEVATED SERUM CALCIUM, (VI) HISTORY OR PRESENCE OF NON-TRAUMATIC POSTNATAL FRACTURE AND DELAYED FRACTURE HEALING. JUVENILE-ONSET HPP: 1) 18 YEARS OF AGE OR YOUNGER AT ONSET OF HPP, AND 2) POSITIVE FOR A TNSALP ALPL GENE MUTATION AS CONFIRMED BY GENETIC TESTING OR TWO OF THE FOLLOWING: (A) SERUM ALP LEVEL BELOW THAT OF NORMAL RANGE FOR PATIENT AGE, (B) ELEVATED SERUM PLP LEVELS AND NO VITAMIN B6 SUPPLEMENTATION IN THE PREVIOUS WEEK, (C) URINE PEA LEVEL ABOVE THAT OF NORMAL RANGE FOR PATIENT AGE, (D) RADIOGRAPHIC EVIDENCE OF HPP, (E) AT LEAST TWO OF THE FOLLOWING: (I) RACHITIC DEFORMITIES, (II) PREMATURE LOSS OF PRIMARY TEETH PRIOR TO 5 YEARS OF AGE, (III) DELAY IN SKELETAL GROWTH RESULTING IN DELAY OF MOTOR DEVELOPMENT, (IV) HISTORY OR PRESENCE OF NON-TRAUMATIC

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of acute lymphoblastic leukemia (ALL) (ICD-10 Group C91.0) or lymphoblastic lymphoma (LBL) (ICD-10 C83.5) and meet **ALL** of the following criteria?
The patient is 1 month of age or older
The patient has developed hypersensitivity to E. coli-derived asparaginase
Rylaze will be used as a component of a multi-agent chemotherapeutic regimen

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ASPARAGINASE ERWINIA-RYWN (RYLAZE)** requires the following rule(s) be met for approval:
You have acute lymphoblastic leukemia (ALL: type of blood cancer) or lymphoblastic lymphoma (LBL: type of cancer affecting the immune system)
You are 1 month of age or older
You have developed hypersensitivity to E. coli-derived asparaginase (you are allergic to an enzyme/protein that is from a type of bacteria)
Rylaze will be used as a component of a multi-agent chemotherapeutic regimen (treatment using multiple drugs)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #2.
If no, continue to #6.

Is the patient's cancer stage II to IIIA and the patient meets **ALL** of the following criteria?
Tecentriq will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
The patient has tumor(s) that express PD-L1 on at least 1% of tumor cells, as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the patient's cancer metastatic without an EGFR or ALK mutation and the patient meets **ONE** of the following criteria?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
- The patient has tumor(s) that have high PD-L1 expression (PD-L1 stained at least 50% of tumor cells [TC at least 50%] or PD-L1 stained tumor-infiltrating immune cells [IC] covering at least 10% of the tumor area [IC at least 10%]), as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

Is the patient's cancer metastatic with an ALK mutation **AND** the patient meets the following criterion?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) AND ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Is the patient's cancer metastatic with an EGFR mutation **AND** the patient meets the following criterion?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) AND EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of metastatic non-squamous non-small cell lung cancer (NSq NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient's cancer does NOT have EGFR or ALK genomic tumor aberrations
Tecentriq will be used in combination with bevacizumab, paclitaxel, and carboplatin, OR in combination with paclitaxel protein-bound and carboplatin

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of extensive-stage small cell lung cancer (ES-SCLC) (ICD-10 Group C34) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #8.
If no, continue to #9.

Does the patient meet **ONE** of the following criteria?
Tecentriq will be used in combination with carboplatin and etoposide
Tecentriq will be used in combination with Zepzelca (lurbinectedin) AND the patient's disease has not progressed after first-line induction therapy with Tecentriq or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs), carboplatin, and etoposide

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient has not received prior systemic therapy
Tecentriq will be used in combination with bevacizumab

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Tecentriq will be used in combination with cobimetinib (Cotellic) and vemurafenib (Zelboraf)
The patient's cancer is BRAF V600 mutation-positive

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #11.

Does the patient have a diagnosis of unresectable or metastatic alveolar soft part sarcoma (ASPS) (ICD-10 C49.9) **AND** meet the following criterion?
The patient is 2 years of age or older

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #12.

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of muscle invasive bladder cancer (MIBC) (ICD-10 Group C67) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Tecentriq will be used as adjuvant treatment after a cystectomy
- The patient has circulating tumor DNA molecular residual disease (ctDNA MRD), as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ATEZOLIZUMAB (Tecentriq)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Non-small cell lung cancer (NSCLC: a type of lung cancer)
- Metastatic non-squamous non-small cell lung cancer (NSq NSCLC: a type of lung cancer that has spread to other parts of the body)
- Extensive-stage small cell lung cancer (ES-SCLC: a type of lung cancer)
- Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be removed by surgery or has spread to other parts of the body)
- Unresectable or metastatic melanoma (a type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
- Unresectable or metastatic alveolar soft part sarcoma (ASPS: a type of soft tissue cancer that cannot be removed by surgery or has spread to other parts of the body)
- Muscle invasive bladder cancer (MIBC: a type of bladder cancer that has spread to the muscle)

(Denial text continued on next page)

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have non-small cell lung cancer, approval also requires:

- You are 18 years of age or older
- You meet ONE of the following:
  - Your cancer is stage II to IIIA, Tecentriq will be used as adjuvant (add-on) treatment following resection (removal of tissue or organ) and platinum-based chemotherapy (a type of therapy to treat cancer such as cisplatin, carboplatin, oxaliplatin), AND your tumor(s) express programmed death-ligand 1 (PD-L1: type of protein) on at least 1% of tumor cells, as determined by a Food and Drug Administration (FDA)-authorized test
  - Your cancer is metastatic (has spread to other parts of the body) and you meet ONE of the following:
    - Your cancer does NOT have an epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); AND your disease has gotten worse during or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
    - Your cancer does NOT have an epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); AND you have tumor(s) that have high programmed death-ligand 1 (PD-L1: type of protein) expression (PD-L1 stained at least 50% of tumor cells OR PD-L1 stained tumor-infiltrating immune cells covering at least 10% of the tumor area), as determined by a Food and Drug Administration (FDA)-authorized test
    - Your cancer has an anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); your disease has gotten worse during or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin) AND ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
    - Your cancer has an epidermal growth factor receptor (EGFR: a type of protein) mutation (abnormal change in a type of gene); your disease has gotten worse during or after treatment with a platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin) AND EGFR-directed therapy [such as Tarceva (erlotinib), Iressa (gefitinib), Gilotrif (afatinib)]

ATEZOLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have metastatic non-squamous non-small cell lung cancer, approval also requires:
- You are 18 years of age or older
- Your cancer does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) genomic tumor abnormalities (type of abnormal gene)
- Tecentriq will be used in combination with bevacizumab, paclitaxel, and carboplatin, OR in combination with paclitaxel protein-bound and carboplatin

If you have extensive-stage small cell lung cancer, approval also requires:
- You are 18 years of age or older
- You meet ONE of the following:
  - Tecentriq will be used in combination with carboplatin and etoposide
  - Tecentriq will be used in combination with Zepzelca (lurbinectedin) AND your disease has not progressed (worsened) after first-line induction therapy (start of treatment) with Tecentriq or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs), carboplatin, and etoposide

If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:
- You are 18 years of age or older
- You have NOT previously been treated with systemic therapy (treatment that targets the entire body)
- Tecentriq will be used in combination with bevacizumab

If you have unresectable or metastatic melanoma, approval also requires:
- You are 18 years of age or older
- Tecentriq will be used in combination with cobimetinib (Cotellic) and vemurafenib (Zelboraf)
- Your cancer is BRAF V600 mutation (abnormal change in a type of gene) positive

If you have unresectable or metastatic alveolar soft part sarcoma, approval also requires:
- You are 2 years of age or older

If you have muscle invasive bladder cancer, approval also requires:
- You are 18 years of age or older
- Tecentriq will be used as adjuvant (add-on) treatment after a cystectomy (bladder removal surgery)
- You have circulating tumor DNA molecular residual disease (ctDNA MRD: traces of cancer DNA in your body), as determined by a Food and Drug Administration (FDA)-authorized test

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

CONTINUED ON NEXT PAGE

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #2.
If no, continue to #6.

Is the patient's cancer stage II to IIIA and the patient meets **ALL** of the following criteria?
Tecentriq Hybreza will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
The patient has tumor(s) that express PD-L1 on at least 1% of tumor cells, as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the patient's cancer metastatic without an EGFR or ALK mutation and the patient meets **ONE** of the following criteria?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
- The patient has tumor(s) that have high PD-L1 expression (PD-L1 stained at least 50% of tumor cells [TC at least 50%] or PD-L1 stained tumor-infiltrating immune cells [IC] covering at least 10% of the tumor area [IC at least 10%]), as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

Is the patient's cancer metastatic with an ALK mutation **AND** the patient meets the following criterion?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) AND ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Is the patient's cancer metastatic with an EGFR mutation **AND** the patient meets the following criterion?
- The patient has experienced disease progression during or following treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) AND EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of metastatic non-squamous non-small cell lung cancer (NSq NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient's cancer does NOT have EGFR or ALK genomic tumor aberrations
- Tecentriq Hybreza will be used in combination with bevacizumab, paclitaxel, and carboplatin, OR in combination with paclitaxel protein-bound and carboplatin

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

Does the patient have a diagnosis of extensive-stage small cell lung cancer (ES-SCLC) (ICD-10 Group C34) **AND** meet the following criterion?
- The patient is 18 years of age or older

If yes, continue to #8.
If no, continue to #9.

Does the patient meet **ONE** of the following criteria?
- Tecentriq Hybreza will be used in combination with carboplatin and etoposide
- Tecentriq Hybreza will be used in combination with Zepzelca (lurbinectedin) AND the patient's disease has not progressed after first-line induction therapy with Tecentriq Hybreza or intravenous Tecentriq (atezolizumab), carboplatin, and etoposide

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient has NOT received prior systemic therapy
- Tecentriq Hybreza will be used in combination with bevacizumab

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Tecentriq Hybreza will be used in combination with cobimetinib (Cotellic) and vemurafenib (Zelboraf)
- The patient's cancer is BRAF V600 mutation-positive, as determined by an FDA-approved test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #11.

Does the patient have a diagnosis of unresectable or metastatic alveolar soft part sarcoma (ASPS) (ICD-10 C49.9) **AND** meet the following criterion?
- The patient is 18 years of age or older

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #12.

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of muscle invasive bladder cancer (MIBC) (ICD-10 Group C67) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Tecentriq Hybreza will be used as adjuvant treatment after a cystectomy
The patient has circulating tumor DNA molecular residual disease (ctDNA MRD), as determined by an FDA-authorized test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ATEZOLIZUMAB-HYALURONIDASE-TQJS (Tecentriq Hybreza)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Non-small cell lung cancer (NSCLC: a type of lung cancer)
- Metastatic non-squamous non-small cell lung cancer (NSq NSCLC: a type of lung cancer that has spread to other parts of the body)
- Extensive-stage small cell lung cancer (ES-SCLC: a type of lung cancer)
- Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be removed by surgery or has spread to other parts of the body)
- Unresectable or metastatic melanoma (a type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
- Unresectable or metastatic alveolar soft part sarcoma (ASPS: a type of soft tissue cancer that cannot be removed by surgery or has spread to other parts of the body)
- Muscle invasive bladder cancer (MIBC: a type of bladder cancer that has spread to the muscle)

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have non-small cell lung cancer, approval also requires:

- You are 18 years of age or older
- You meet ONE of the following:
  - Your cancer is stage II or IIIA; Tecentriq Hybreza will be used as adjuvant treatment (additional treatment) following resection (removal of tissue or organ) and platinum-based chemotherapy (such as cisplatin, carboplatin, oxaliplatin); AND your tumor(s) express programmed death-ligand 1 (PD-L1: type of protein) on at least 1% of tumor cells, as determined by a Food and Drug Administration (FDA)-authorized test
  - Your cancer is metastatic (has spread to other parts of the body) and you meet ONE of the following:
    - Your cancer does NOT have an epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); AND you have experienced disease progression (worsening) during or after treatment with a platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
    - Your cancer does NOT have an epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); AND you have tumors that have high programmed death-ligand 1 (PD-L1: type of protein) expression (PD-L1 stained at least 50% of tumor cells OR PD-L1 stained tumor-infiltrating immune cells covering at least 10% of the tumor area), as determined by a Food and Drug Administration (FDA)-authorized test
    - Your cancer has an anaplastic lymphoma kinase (ALK: a type of protein) mutation (abnormal change in a type of gene); your disease has gotten worse during or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin) AND ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
    - Your cancer has an epidermal growth factor receptor (EGFR: a type of protein) mutation (abnormal change in a type of gene); your disease has gotten worse during or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin) AND EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

ATEZOLIZUMAB-HYALURONIDASE-TQJS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

- **If you have metastatic non-squamous non-small cell lung cancer, approval also requires:**
  - You are 18 years of age or older
  - You do NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of protein) genomic tumor abnormalities (type of abnormal gene)
  - Tecentriq Hybreza will be used in combination with bevacizumab, paclitaxel, and carboplatin, OR in combination with paclitaxel protein-bound and carboplatin
- **If you have extensive-stage small cell lung cancer, approval also requires:**
  - You are 18 years of age or older
  - You meet ONE of the following:
    - Tecentriq Hybreza will be used in combination with carboplatin and etoposide
    - Tecentriq Hybreza will be used in combination with Zepzelca (lurbinectedin) AND your disease has not progressed (worsened) after first-line induction therapy (start of treatment) with Tecentriq Hybreza or intravenous (injection into the vein) Tecentriq (atezolizumab), carboplatin, and etoposide
- **If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:**
  - You are 18 years of age or older
  - You have NOT previously been treated with systemic therapy (treatment that targets the entire body)
  - Tecentriq Hybreza will be used in combination with bevacizumab
- **If you have unresectable or metastatic melanoma, approval also requires:**
  - You are 18 years of age or older
  - Tecentriq Hybreza will be used in combination with cobimetinib (Cotellic) and vemurafenib (Zelboraf)
  - Your cancer is BRAF V600 mutation (abnormal change in a type of gene)-positive as determined by a Food and Drug Administration (FDA)-approved test
- **If you have unresectable or metastatic alveolar soft part sarcoma, approval also requires:**
  - You are 18 years of age or older
- **If you have muscle invasive bladder cancer, approval also requires:**
  - You are 18 years of age or older
  - Tecentriq Hybreza will be used as adjuvant (add-on) treatment after a cystectomy (bladder removal surgery)
  - You have circulating tumor DNA molecular residual disease (ctDNA MRD: traces of cancer DNA in your body), as determined by a Food and Drug Administration (FDA)-authorized test

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Is the request for the preventive treatment of migraines (ICD Group G43) and the patient meets **ALL** of the following criteria?
The patient is 18 years of age or older
Qulipta will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ATOGEPANT (Qulipta)** requires the following rule(s) be met for approval:
The request is for the preventive treatment of migraines (a type of headache)
You are 18 years of age or older
You will NOT use Qulipta concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient is at risk of rapid disease progression (e.g., urine protein-to-creatinine ratio [UPCR] of at least 1.5 g/g)
- Therapy is prescribed by or in consultation with a nephrologist
- The patient's IgAN diagnosis is confirmed by a biopsy
- The patient has proteinuria of at least 0.5 g/day
- The patient has an eGFR of at least 30 mL/min/1.73 m(2)
- The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes

If yes, **approve for 9 months by HICL or GPI-10.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ATRASENTAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ATRASENTAN (Vanrafia)** requires the following rule(s) be met for approval:
You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
You are 18 years of age or older
You are at risk of rapid disease progression (such as a urine protein-to-creatinine ratio [UPCR: a test that measures the amount of protein in urine] of at least 1.5 g/g)
Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
Your diagnosis is confirmed by a biopsy (removal of cells or tissue for examination)
You have proteinuria (increased levels of protein in the urine) of at least 0.5 g/day
You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes

ATRASENTAN (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) **AND** meet the following criterion?
The patient has improved or stable kidney function compared to baseline OR has a reduction in proteinuria

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ATRASENTAN (Vanrafia)** requires the following rule(s) be met for renewal:
You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
You have improved or stable kidney function compared to baseline (before starting Vanrafia) OR you have a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine)

RATIONALE

AVACOPAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AVACOPAN (Tavneos)** requires the following rule(s) be met for approval:
You have severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis (inflammation of blood vessels) (granulomatosis with polyangiitis [GPA] or microscopic polyangiitis [MPA]: conditions that affect the blood vessels)
You are 18 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or nephrologist (a type of kidney doctor)
You are ANCA seropositive for anti-PR3 or anti-MPO (a type of lab test)
Tavneos will be used as adjunctive (add-on) therapy in combination with standard therapy including glucocorticoids (such as methylprednisolone, prednisone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

AVACOPAN (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis (granulomatosis with polyangiitis [GPA] ormicroscopic polyangiitis [MPA]) (ICD-10 I77.82) **AND** meet the following criterion?
The patient continues to benefit from therapy (e.g., improvement of clinical manifestations, if renal vasculitis - improvement in eGFR and proteinuria values, reduction of corticosteroid dose without disease flares)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AVACOPAN (Tavneos)** requires the following rule(s) be met for renewal:
You have severe active anti-neutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis (inflammation of blood vessels) (granulomatosis with polyangiitis [GPA] or microscopic polyangiitis [MPA]: conditions that affect the blood vessels)
You continue to benefit from the medication (such as improvement of clinical symptoms, if renal vasculitis [inflammation of blood vessels] - improvement in estimated glomerular filtration rate [eGFR: a tool for evaluating kidney function] and proteinuria [increased levels of protein in the urine] values, reduction of corticosteroid [a type of drug used to treat inflammation] dose without disease flares)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This PA is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, continue to #6.
If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, continue to #6.
If no, continue to #5.

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

AVALGLUCOSIDASE ALFA-NGPT BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the drug administered via an implantable pump?

If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field.).**
If no, continue to #7.

Is the drug administered using an external pump?

If yes, continue to #8.
If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field.).**

Is the drug specifically covered under the applicable Medicare Part B coverage policies (National and/or Local Coverage Policies)?

If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field.).**

If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field.).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

AVALGLUCOSIDASE ALFA-NGPT BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Nexviazyme.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for BvD review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

AVAPRITINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of indolent systemic mastocytosis (ISM) (ICD-10 D47.02) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AVAPRITINIB (Ayvakit)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Unresectable or metastatic gastrointestinal stromal tumor (GIST: a type of digestive tumor that cannot be removed through surgery or has spread to other parts of the body)
- Advanced systemic mastocytosis (AdvSM: a type of blood disorder), including aggressive systemic mastocytosis (ASM: a type of blood disorder), systemic mastocytosis with an associated hematological neoplasm (SM-AHN: a type of blood disorder), or mast cell leukemia (MCL: a type of blood cancer)
- Indolent systemic mastocytosis (ISM: a type of blood disorder)

If you have unresectable or metastatic gastrointestinal stromal tumor, approval also requires:
- You are 18 years of age or older
- You have a platelet-derived growth factor receptor alpha (PDGFRA) exon 18 mutation, including PDGFRA D842V mutations (abnormal change in a type of genes)

If you have advanced systemic mastocytosis, approval also requires:
- You are 18 years of age or older

If you have indolent systemic mastocytosis, approval also requires:
- You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of thrombocytopenia in chronic liver disease and meet **ALL** of the following criteria?

The patient is 18 years of age or older

Therapy is prescribed by or in consultation with a hematologist, gastroenterologist, hepatologist, immunologist, endocrinologist, or surgeon

The patient is scheduled to undergo a procedure 10 to 13 days following the initiation of Doptelet therapy

Doptelet will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Nplate [romiplostim], Promacta [eltrombopag])

If yes, **approve for 1 month by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

AVATROMBOPAG (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of persistent or chronic immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?

- The patient is 1 year of age or older
- Therapy is prescribed by or in consultation with a hematologist or immunologist
- The patient had a trial of or contraindication to one corticosteroid (e.g., prednisone) or immunoglobulin (e.g., Panzyga [immune globulin]), OR had an insufficient response to a splenectomy
- The patient has a platelet count of less than 30 x10^9/L, OR a platelet count of less than 50 x 10^9/L and a prior bleeding event
- The requested medication will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Nplate [romiplostim], Promacta [eltrombopag])

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

AVATROMBOPAG (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **AVATROMBOPAG (Doptelet, Doptelet Sprinkle)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Thrombocytopenia (a type of blood disorder) in chronic (long-term) liver disease
- Persistent or chronic immune thrombocytopenia (TIP: a type of blood disorder)

If you have thrombocytopenia in chronic liver disease, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor), gastroenterologist (doctor who treats digestive conditions), hepatologist (a type of liver doctor), immunologist (a type of immune system doctor), endocrinologist (hormone doctor), or surgeon
- You are scheduled to undergo a procedure 10 to 13 days after starting Doptelet (avatrombopag) therapy
- You will NOT use Doptelet concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Nplate [romiplostim], Promacta [eltrombopag])

If you have persistent or chronic immune thrombocytopenia, approval also requires:
- You are 1 year of age or older
- Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or immunologist (a type of immune system doctor)
- You have tried or have a contraindication to (harmful for you to use) one corticosteroid (such as prednisone) or immunoglobulin (such as Panzyga [immune globulin]), OR you had an insufficient response to a splenectomy (surgical removal of spleen did not work)
- You have a platelet (a type of blood cell) count of less than 30 x10^9/L, OR you have a platelet count of less than 50 x 10^9/L and had a prior bleeding event
- You will NOT use the requested medication concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-Ras, such as Nplate [romiplostim], Promacta [eltrombopag])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

AVELUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
Bavencio will be used in combination with Inlyta (axitinib)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it

Our guideline named **AVELUMAB (Bavencio)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Metastatic Merkel cell carcinoma (MCC: a type of skin cancer)
- Locally advanced or metastatic urothelial carcinoma (UC: a type of bladder cancer that has spread from where it started to nearby tissue/lymph nodes or to other parts of the body)
- Advanced renal cell carcinoma (RCC: a type of kidney cancer)

If you have metastatic Merkel cell carcinoma, approval also requires:
- You are 12 years of age or older

If you have locally advanced or metastatic urothelial carcinoma, approval also requires ONE of the following:
- Your disease has worsened during or after platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
- Your disease has worsened within 12 months of neoadjuvant (treatment given before a main treatment) or adjuvant treatment (add-on to a main treatment) with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
- Your disease has not worsened with first-line platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin), AND Bavencio will be used as first-line maintenance treatment

If you have advanced renal cell carcinoma, approval also requires:
- Bavencio will be used in combination with Inlyta (axitinib)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of hypertension (ICD-10 I10) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a cardiologist, nephrologist, or endocrinologist
- The patient's blood pressure is NOT controlled on at least three anti-hypertensive agents of different pharmacologic classes (e.g., an angiotensin receptor blocker [e.g., valsartan], a calcium channel blocker [e.g., amlodipine]), with at least one being a diuretic (e.g., hydrochlorothiazide), at maximally tolerated doses for at least 4 weeks
- The patient does NOT have resistant hypertension due to white coat effect, medical inertia, poor therapeutic adherence, or secondary causes of hypertension (except primary aldosteronism and sleep apnea)
- The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: spironolactone, eplerenone

If yes, **approve for 6 months by HICL or GPI-10.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

BAXDROSTAT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **BAXDROSTAT (Baxfendy)** requires the following rule(s) be met for approval:

You have hypertension (high blood pressure)

You are 18 years of age or older

Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), nephrologist (a type of kidney doctor), or endocrinologist (a type of hormone doctor)

Your blood pressure is NOT controlled on at least three anti-hypertensive medications (medications used to treat high blood pressure) with different mechanisms of action (such as an angiotensin receptor blocker [such as valsartan], a calcium channel blocker [such as amlodipine]), with at least one being a diuretic (such as hydrochlorothiazide), at maximally tolerated doses for at least 4 weeks

You do NOT have resistant hypertension (a type of high blood pressure) due to white coat effect (a condition where blood pressure is higher in a medical setting), medical inertia (when healthcare providers do not make changes to treatment even if the medical condition is poorly controlled), poor therapeutic adherence (not keeping up with therapy), or secondary causes of hypertension (except primary aldosteronism [a type of hormone disorder] and sleep apnea [a type of sleep condition with difficulty breathing])

You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: spironolactone, eplerenone

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

BELANTAMAB MAFODOTIN-BLMF BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

BELANTAMAB MAFODOTIN-BLMF BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Blenrep will be used in combination with bortezomib and dexamethasone
The patient has received at least two prior lines of therapy, including a proteasome inhibitor (e.g., Ninlaro [ixazomib], Kyprolis [carfilzomib]) and an immunomodulatory agent (e.g., Revlimid [lenalidomide], Pomalyst [pomalidomide])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BELANTAMAB MAFODOTIN-BLMF (Blenrep)** requires the following rule(s) be met for approval:
You have relapsed or refractory multiple myeloma (a type of blood cancer that has returned or did not respond to treatment)
You are 18 years of age or older
Blenrep will be used in combination with bortezomib and dexamethasone
You have received at least two prior lines of therapy, including a proteasome inhibitor (such as Ninlaro [ixazomib], Kyprolis [carfilzomib]) and an immunomodulatory agent (such as Revlimid [lenalidomide], Pomalyst [pomalidomide])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of systemic lupus erythematosus (SLE) (ICD-10 Group M32) and meet **ALL** of the following criteria?
The patient is 5 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist
The patient is currently taking corticosteroids, antimalarials, NSAIDs or immunosuppressive agents)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of lupus nephritis (ICD-10 M32.14) and meet **ALL** of the following criteria?
The patient is 5 years of age or older
Therapy is prescribed by or in consultation with a rheumatologist or nephrologist
The patient is receiving standard therapy (e.g., steroids, antimalarials, NSAIDs, immunosuppressives)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

BELIMUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BELIMUMAB (Benlysta)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Systemic lupus erythematosus (SLE: a type of immune condition)
- Lupus nephritis (a type of immune condition that affects the kidneys)

If you have systemic lupus erythematosus, approval also requires:
- You are 5 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You are currently taking corticosteroids, antimalarials, non-steroidal anti-inflammatory drugs (NSAIDs), or immunosuppressives

If you have lupus nephritis, approval also requires:
- You are 5 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or nephrologist (a type of kidney doctor)
- You are receiving standard treatment (such as steroids, antimalarials, nonsteroidal anti-inflammatory drugs [NSAIDs], immunosuppressives)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

BELIMUMAB (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of systemic lupus erythematosus (SLE) (ICD-10 Group M32) **AND** meet the following criterion?
The patient has shown clinical improvement

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of lupus nephritis (ICD-10 M32.14) **AND** meet the following criterion?
The patient has shown improvement in renal response from baseline laboratory values (i.e., eGFR or proteinuria) and/or clinical parameters (e.g., fluid retention, use of rescue drugs, glucocorticoid dose)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BELIMUMAB (Benlysta)** requires the following rule(s) be met for renewal:
You have ONE of the following:
- Systemic lupus erythematosus (SLE: a type of immune condition)
- Lupus nephritis (a type of immune condition that affects the kidneys)

If you have systemic lupus erythematosus, renewal also requires:
- You have shown clinical improvement while on Benlysta

If you have lupus nephritis, renewal also requires:
- You have shown improvement in kidney response as compared to baseline laboratory values (estimated glomerular filtration rate [eGFR: a tool for evaluating kidney function] or proteinuria [level of protein in the urine]) and/or clinical parameters (such as fluid retention, use of rescue drugs, steroid dose)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

BELZUTIFAN (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient has renal cell carcinoma with a clear cell component (ccRCC)
- The patient was previously treated with a programmed death receptor-1 (PD-1) inhibitor (e.g., Keytruda [pembrolizumab]) OR a programmed death-ligand 1 (PD-L1) inhibitor (e.g., Bavencio [avelumab])
- The patient was previously treated with a vascular endothelial growth factor tyrosine kinase inhibitor (VEGF-TKI) (e.g., Nexavar [sorafenib])

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #4.

Does the patient have a diagnosis of pheochromocytoma (ICD-10 Groups D35.0, C74.1) or paraganglioma (PPGL) (ICD-10 D44.7, C75.5) and meet **ALL** the following criteria?
- The patient is 12 years of age or older
- The patient's tumor is locally advanced, unresectable, or metastatic

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

DENIAL TEXT: Our guideline named **BELZUTIFAN (Welireg)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Von Hippel-Lindau (VHL) disease (a genetic disorder that causes tumors to grow in the body)
- Renal cell carcinoma (RCC: a type of kidney cancer)
- Pheochromocytoma (a type of rare tumor) or paraganglioma (a type of nerve condition)

If you have von Hippel-Lindau disease, approval also requires:
- You are 18 years of age or older
- You require therapy for associated renal cell carcinoma (RCC: a type of kidney cancer), central nervous system (CNS) hemangioblastomas (tumor in the brain or spinal cord), or pancreatic neuroendocrine tumors (pNET: tumor in the pancreas)
- You do NOT require immediate surgery

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?

- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
- The patient has a blood eosinophil level of at least 150 cells/mcL within the past 12 months
- Fasenra will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (e.g., triamcinolone acetonide, beclomethasone, mometasone) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
- Fasenra will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

If yes, continue to #2.
If no, continue to #4.

BENRALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?
- The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
- The patient has experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months

If yes, **approve for 12 months by HICL or GPI-10.**

If no, continue to #3.

Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
- Daytime asthma symptoms more than twice per week
- Any night waking due to asthma
- Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
- Any activity limitation due to asthma

If yes, **approve for 12 months by HICL or GPI-10.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Fasenra will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

If yes, **approve for 12 months by HICL or GPI-10.**

If no, continue to #5.

BENRALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and meet **ALL** of the following criteria?
The patient is 12 years of age or older
The patient has HES without an identifiable non-hematologic secondary cause
Fasenra will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of HES

If yes, **approve for 12 months by HICL or GPI-10.**

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BENRALIZUMAB (Fasenra)** requires the following rule(s) be met for approval:
You have ONE of the following:
Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)
Hypereosinophilic syndrome (HES: a type of blood disorder)
(Initial denial text continued on next page)

BENRALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

If you have severe asthma with an eosinophilic phenotype, approval also requires:

- You are 6 years of age or older
- Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) medicine or allergy medicine
- You have a blood eosinophil level (a type of lab test) of at least 150 cells/mcL within the past 12 months
- Fasenra will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as triamcinolone acetonide, beclomethasone, mometasone) AND at least ONE other maintenance medication (taken on a regular basis) (such as a long-acting inhaled beta-2-agonist [such as salmeterol, formoterol], a long-acting muscarinic antagonist [such as Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [such as montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [such as prednisone])
- You will NOT use Fasenra concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor for the treatment of eosinophilic phenotype asthma
- You meet ONE of the following:
  - You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
  - You have experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months
  - You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
    - Daytime asthma symptoms more than twice per week
    - Any night waking due to asthma
    - Use of a short-acting beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
    - Any activity limitation due to asthma

If you have eosinophilic granulomatosis with polyangiitis, approval also requires:

- You are 18 years of age or older
- You will NOT use Fasenra concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis

BENRALIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

If you have hypereosinophilic syndrome, approval also requires:

- You are 12 years of age or older
- You have hypereosinophilic syndrome (HES: a type of blood disorder) without an identifiable non-hematologic (not present in the blood) secondary cause (HES is not caused by another condition)
- You will NOT use Fasenra concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK inhibitor, PDE-4 inhibitor) for the treatment of hypereosinophilic syndrome (a type of blood disorder)

BENRALIZUMAB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of hypereosinophilic syndrome (HES), please refer to the Initial Criteria section.

Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
- The patient will continue to use an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline, an oral corticosteroid [e.g., prednisone])
- Fasenra will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

If yes, continue to #2.
If no, continue to #3.

Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
- Reduction in asthma exacerbations from baseline
- Decreased utilization of rescue medications (e.g., albuterol)
- Increase in percent predicted FEV1 from pretreatment baseline
- Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
- The patient has a reduction in EGPA symptoms compared to baseline OR has been able to reduce/eliminate corticosteroid (e.g., prednisone) use
- Fasenra will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

BENRALIZUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BENRALIZUMAB (Fasenra)** requires the following rule(s) be met for renewal:

You have ONE of the following:
- Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
- Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)

If you have severe asthma with an eosinophilic phenotype, renewal also requires:
- You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline, or an oral corticosteroid (such as prednisone)
- You will NOT use Fasenra concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
- You have shown a clinical response as evidenced by ONE the following:
  - You have experienced a decrease in asthma exacerbations (worsening of symptoms) from baseline
  - You have decreased your use of rescue medications (such as albuterol)
  - Your percent predicted FEV1 (amount of air exhaled in one second) has increased from pretreatment baseline (before starting Fasenra)
  - You have experienced a reduction in severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

If you have eosinophilic granulomatosis with polyangiitis, renewal also requires:
- You have a reduction in EGPA symptoms compared to baseline (before starting Fasenra), OR you have been able to decrease or eliminate (stop) corticosteroid (such as prednisone) use
- You will NOT use Fasenra concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis

For Part D use only:

BENRALIZUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: ASTHMA: BLOOD EOSINOPHIL LEVEL OF AT LEAST 150 CELLS/MCL WITHIN THE PAST 12 MONTHS.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: ASTHMA: PRESCRIBED BY OR IN CONSULTATION WITH A PHYSICIAN SPECIALIZING IN ALLERGY OR PULMONARY MEDICINE.
Coverage Duration	ASTHMA, EGPA: INITIAL/RENEWAL: 12 MO. HYPEREOSINOPHILIC SYNDROME (HES): 12 MO.
Other Criteria	INITIAL: ASTHMA: 1) CONCURRENT THERAPY WITH A MEDIUM, HIGH-DOSE, OR MAXIMALLY TOLERATED DOSE OF AN INHALED CORTICOSTEROID (ICS) AND ONE OTHER MAINTENANCE MEDICATION, AND 2) ONE ASTHMA EXACERBATION REQUIRING SYSTEMIC CORTICOSTEROID BURST LASTING AT LEAST 3 DAYS WITHIN THE PAST 12 MONTHS, OR AT LEAST ONE SERIOUS EXACERBATION REQUIRING HOSPITALIZATION OR ER VISIT WITHIN THE PAST 12 MONTHS, OR POOR SYMPTOM CONTROL DESPITE CURRENT THERAPY AS EVIDENCED BY AT LEAST THREE OF THE FOLLOWING WITHIN THE PAST 4 WEEKS: (A) DAYTIME ASTHMA SYMPTOMS MORE THAN TWICE/WEEK, (B) ANY NIGHT WAKING DUE TO ASTHMA, (C) SABA RELIEVER FOR SYMPTOMS MORE THAN TWICE/WEEK, (D) ANY ACTIVITY LIMITATION DUE TO ASTHMA. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: ASTHMA: 1) CONTINUED USE OF ICS AND ONE OTHER MAINTENANCE MEDICATION, AND 2) CLINICAL RESPONSE AS EVIDENCED BY: (A) REDUCTION IN ASTHMA EXACERBATIONS FROM BASELINE, (B) DECREASED UTILIZATION OF RESCUE MEDICATIONS, (C) INCREASE IN PERCENT PREDICTED FEV1 FROM PRETREATMENT BASELINE, OR (D) REDUCTION IN SEVERITY OR FREQUENCY OF ASTHMA-RELATED SYMPTOMS. EOSINOPHILIC GRANULOMATOSIS WITH POLYANGIITIS (EGPA): REDUCTION IN EGPA SYMPTOMS COMPARED TO BASELINE OR ABILITY TO REDUCE/ELIMINATE CORTICOSTEROID USE.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?

The patient is 2 years of age or older

Orladeyo will be used for prophylaxis against HAE attacks

Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist

Orladeyo will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Takhzyro [lanadelumab-flyo], Haegarda [C1 esterase inhibitor], Cinryze [C1 esterase inhibitor], danazol, Andembry [garadacimab-gxii])

If yes, continue to #2.
If no, do not approve.

BETAINE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
BETAINE	CYSTADANE, BETAINE ANHYDROUS	12233		GPI-10 (3090452000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of homocystinuria (ICD-10 E72.11) (including cystathionine beta-synthase [CBS] deficiency [ICD-10 E72.11], 5,10-methylenetetrahydrofolate reductase [MTHFR] deficiency [ICD-10 E72.12], cobalamin cofactor metabolism [cbl] defect)?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BETAINE (Cystadane)** requires the following rule(s) be met for approval:
You have homocystinuria (a type of genetic metabolic disorder), including cystathionine beta-synthase (CBS: a type of enzyme) deficiency, 5,10-methylenetetrahydrofolate reductase (MTHFR: a type of enzyme) deficiency, cobalamin cofactor metabolism (cbl: vitamin B12 that is required for enzyme activity) defect

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**
If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**
If no, continue to #5.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) **AND** meet the following criterion?
The patient had a trial of or contraindication to the following preferred agent: Zirabev (bevacizumab-bvzr)

If yes, continue to #2.
If no, continue to #4.

Will Avastin be used in combination with intravenous 5-fluorouracil based chemotherapy?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient meet **ALL** of the following criteria?
Avastin will be used in combination with fluoropyrimidine-irinotecan- (e.g., FOLFIRI) or fluoropyrimidine-oxaliplatin- (e.g., FOLFOX, CapeOx) based chemotherapy
The patient's disease has progressed on a first-line bevacizumab product-containing regimen

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

BEVACIZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BEVACIZUMAB (Avastin)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Metastatic colorectal cancer (mCRC: colon cancer that has spread to other parts of the body)
- Unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer (NSCLC: a type of lung cancer that cannot be completely removed with surgery or has spread/returned)
- Recurrent glioblastoma (GBM: type of brain cancer that has returned)
- Metastatic renal cell carcinoma (mRCC: type of kidney cancer that has spread to other parts of the body)
- Persistent, recurrent, or metastatic cervical cancer (type of uterus cancer that continues to exist, returns, or has spread to other parts of the body)
- Epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancers)
- Unresectable or metastatic hepatocellular carcinoma (HCC: type of liver cancer that cannot be completely removed with surgery or has spread to other parts of the body)

If you have metastatic colorectal cancer, approval also requires:
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)
- You meet ONE of the following:
  - Avastin will be used in combination with intravenous (given into the vein) 5-fluorouracil based chemotherapy
  - Avastin will be used in combination with fluoropyrimidine-irinotecan- (such as FOLFIRI) or fluoropyrimidine-oxaliplatin- (such as FOLFOX, CapeOx) based chemotherapy AND your disease has worsened on a first-line bevacizumab product-containing regimen

(Denial text continued on next page)

BEVACIZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer, approval also requires:
- Avastin will be used in combination with carboplatin and paclitaxel
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have recurrent glioblastoma, approval also requires:
- You are 18 years of age or older
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have metastatic renal cell carcinoma, approval also requires:
- Avastin will be used in combination with interferon alfa
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have persistent, recurrent, or metastatic cervical cancer, approval also requires:
- Avastin will be used in combination with paclitaxel and cisplatin OR paclitaxel and topotecan
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)
- You meet ONE of the following:
  - You have stage III or IV epithelial ovarian, fallopian tube or primary peritoneal cancer; Avastin will be used following initial surgical resection (removal); AND Avastin will be used in combination with carboplatin and paclitaxel, OR as a single medication after previous use in combination with carboplatin and paclitaxel
  - You have platinum-resistant, recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (cancer that no longer responds to a type of treatment and has returned); Avastin will be used in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan; AND you have received no more than two prior chemotherapy regimens
  - You have platinum-sensitive, recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (cancer that responds to a type of treatment and has returned); AND Avastin will be used in combination with carboplatin and paclitaxel, OR with carboplatin and gemcitabine, OR as a single medication after previous use in combination with one of these carboplatin-containing chemotherapy regimens

You have ONE of the following:
- Metastatic colorectal cancer (mCRC: colon cancer that has spread to other parts of the body)
- Unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer (NSCLC: type of lung cancer that cannot be completely removed with surgery or has spread/returned)
- Recurrent glioblastoma (GBM: type of brain cancer that has returned)
- Metastatic renal cell carcinoma (mRCC: type of kidney cancer that has spread to other parts of the body)
- Persistent, recurrent, or metastatic cervical cancer (type of uterus cancer that continues to exist, returns, or has spread to other parts of the body)
- Epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancers)

BEVACIZUMAB-ADCD BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have metastatic colorectal cancer, approval also requires:
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)
- You meet ONE of the following:
  - Vegzelma will be used in combination with intravenous (given into the vein) 5-fluorouracil based chemotherapy
  - Vegzelma will be used in combination with fluoropyrimidine-irinotecan- (such as FOLFIRI) or fluoropyrimidine-oxaliplatin- (such as FOLFOX, CapeOx) based chemotherapy AND your disease has worsened on a first-line bevacizumab product-containing regimen

If you have unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer, approval also requires:
- Vegzelma will be used in combination with carboplatin and paclitaxel
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have recurrent glioblastoma, approval also requires:
- You are 18 years of age or older
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have metastatic renal cell carcinoma, approval also requires:
- Vegzelma will be used in combination with interferon alfa
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have persistent, recurrent, or metastatic cervical cancer, approval also requires:
- Vegzelma will be used in combination with paclitaxel and cisplatin OR paclitaxel and topotecan
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

BEVACIZUMAB-ADCD BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have epithelial ovarian, fallopian tube or primary peritoneal cancer, approval also requires:

You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

You meet ONE of the following:

- You have stage III or IV epithelial ovarian, fallopian tube, or primary peritoneal cancer; Vegzelma will be used following initial surgical resection (removal); AND Vegzelma will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel
- You have platinum-resistant recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (cancer that no longer responds to a type of treatment and has returned); Vegzelma will be used in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan; AND you have received no more than two prior chemotherapy regimens
- You have platinum-sensitive recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (cancer that responds to a type of treatment and has returned); AND Vegzelma will be used in combination with carboplatin and paclitaxel, OR with carboplatin and gemcitabine, OR as a single medication after previous use in combination with one of the carboplatin-containing chemotherapy regimens listed above

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vegzelma.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) **AND** meet the following criterion?
The patient had a trial of or contraindication to the following preferred agent: Zirabev (bevacizumab-bvzr)

If yes, continue to #2.
If no, continue to #3.

Does the patient meet **ONE** of the following criteria?
Mvasi will be used in combination with intravenous 5-fluorouracil based chemotherapy
Mvasi will be used in combination with fluoropyrimidine-irinotecan- (e.g., FOLFIRI) or fluoropyrimidine-oxaliplatin- (e.g., FOLFOX, CapeOx) based chemotherapy AND the patient's disease has progressed on a first-line bevacizumab product-containing regimen

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

BEVACIZUMAB-AWWB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BEVACIZUMAB-AWWB (Mvasi)** requires the following rule(s) be met for approval:

You have ONE of the following:
- Metastatic colorectal cancer (mCRC: colon cancer that has spread to other parts of the body)
- Unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer (NSCLC: type of lung cancer that cannot be completely removed with surgery or has spread/returned)
- Recurrent glioblastoma (GBM: type of brain cancer that has returned)
- Metastatic renal cell carcinoma (mRCC: type of kidney cancer that has spread to other parts of the body)
- Persistent, recurrent, or metastatic cervical cancer (type of uterus cancer that continues to exist, returns, or has spread to other parts of the body)
- Epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancers)

If you have metastatic colorectal cancer, approval also requires:
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)
- You meet ONE of the following:
  - Mvasi will be used in combination with intravenous (given into the vein) 5-fluorouracil based chemotherapy
  - Mvasi will be used in combination with fluoropyrimidine-irinotecan- (such as FOLFIRI) or fluoropyrimidine-oxaliplatin- (such as FOLFOX, CapeOx) based chemotherapy AND your disease has worsened on a first-line bevacizumab product-containing regimen

If you have unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer, approval also requires:
- Mvasi will be used in combination with carboplatin and paclitaxel
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have recurrent glioblastoma, approval also requires:
- You are 18 years of age or older
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

You have ONE of the following:
- Metastatic colorectal cancer (mCRC: colon cancer that has spread to other parts of the body)
- Unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer (NSCLC: a type of lung cancer that cannot be completely removed with surgery or has spread/returned)
- Recurrent glioblastoma (GBM: type of brain cancer that has returned)
- Metastatic renal cell carcinoma (mRCC: type of kidney cancer that has spread to other parts of the body)
- Persistent, recurrent, or metastatic cervical cancer (type of uterus cancer that continues to exist, returns, or has spread to other parts of the body)
- Epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancers)

If you have metastatic colorectal cancer, approval also requires ONE of the following:
- Zirabev will be used in combination with intravenous (given into the vein) 5-fluorouracil based chemotherapy
- Zirabev will be used in combination with fluoropyrimidine-irinotecan- (such as FOLFIRI) or fluoropyrimidine-oxaliplatin- (such as FOLFOX, CapeOX) based chemotherapy AND your disease has progressed (gotten worse) on a first-line bevacizumab product-containing regimen

If you have unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer, approval also requires:
- Zirabev will be used in combination with carboplatin and paclitaxel

If you have recurrent glioblastoma, approval also requires:
- You are 18 years of age or older

If you have metastatic renal cell carcinoma, approval also requires:
- Zirabev will be used in combination with interferon-alfa

BEVACIZUMAB-BVZR BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have persistent, recurrent, or metastatic cervical cancer, approval also requires:
Zirabev will be used in combination with paclitaxel and cisplatin OR paclitaxel and topotecan

If you have epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires ONE of the following:
You have stage III or IV epithelial ovarian, fallopian tube, or primary peritoneal cancer; Zirabev will be used following initial surgical resection (removal); AND Zirabev will be used in combination with carboplatin and paclitaxel, OR as a single medication after previous use in combination with carboplatin and paclitaxel

You have platinum-resistant, recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer (cancer that no longer responds to a type of treatment and has returned); Zirabev will be used in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan; AND you have received no more than two prior chemotherapy regimens

You have platinum-sensitive, recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer (cancer that responds to a type of treatment and has returned); AND Zirabev will be used in combination with carboplatin and paclitaxel, OR with carboplatin and gemcitabine, OR as a single medication after previous use in combination with one of these carboplatin-containing chemotherapy regimens

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zirabev. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

BEVACIZUMAB-MALY BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) **AND** meet the following criterion?
The patient had a trial of or contraindication to the following preferred agent: Zirabev (bevacizumab-bvzr)

If yes, continue to #2.
If no, continue to #4.

Will Alymsys be used in combination with intravenous 5-fluorouracil based chemotherapy?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient meet **ALL** of the following criteria?
Alymsys will be used in combination with fluoropyrimidine-irinotecan- (e.g., FOLFIRI) or fluoropyrimidine-oxaliplatin- (e.g., FOLFOX, CapeOx) based chemotherapy
The patient's disease has progressed on a first-line bevacizumab product-containing regimen

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

BEVACIZUMAB-MALY BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BEVACIZUMAB-MALY (Alymsys)** requires the following rule(s) be met for approval:

You have ONE of the following:
- Metastatic colorectal cancer (mCRC: colon cancer that has spread to other parts of the body)
- Unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer (NSCLC: type of lung cancer that cannot be completely removed with surgery or has spread/returned)
- Recurrent glioblastoma (GBM: type of brain cancer that has returned)
- Metastatic renal cell carcinoma (mRCC: type of kidney cancer that has spread to other parts of the body)
- Persistent, recurrent, or metastatic cervical cancer (type of uterus cancer that continues to exist, returns, or has spread to other parts of the body)
- Platinum-resistant, recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (types of reproductive system or abdomen cancers that no longer respond to a type of treatment and have returned)

If you have metastatic colorectal cancer, approval also requires:

You meet ONE of the following:
- Alymsys will be used in combination with intravenous (given into the vein) 5-fluorouracil based chemotherapy
- Alymsys will be used in combination with fluoropyrimidine-irinotecan- (for example FOLFIRI) or fluoropyrimidine-oxaliplatin- (for example FOLFOX, CapeOx) based chemotherapy AND your disease has worsened on a first-line bevacizumab product-containing regimen

You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have unresectable, locally advanced, recurrent or metastatic non-squamous non-small cell lung cancer, approval also requires:

Alymsys will be used in combination with carboplatin and paclitaxel

You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have recurrent glioblastoma, approval also requires:

You are 18 years of age or older

You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

(Denial text continued on next page)

- Jobevne will be used in combination with interferon alfa
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

If you have persistent, recurrent, or metastatic cervical cancer, approval also requires:
- Jobevne will be used in combination with paclitaxel and cisplatin OR paclitaxel and topotecan
- You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

BEVACIZUMAB-NWGD BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:

You meet ONE of the following:

- Your cancer is stage III or IV; Jobevne will be used following initial surgical resection (removal); AND Jobevne will be used in combination with carboplatin and paclitaxel, or as a single agent after previous use in combination with carboplatin and paclitaxel
- Your cancer is platinum-resistant recurrent; Jobevne will be used in combination with paclitaxel, pegylated liposomal doxorubicin, or topotecan; AND you have received no more than two prior chemotherapy regimens
- Your cancer is platinum-sensitive recurrent; AND Jobevne will be used in combination with carboplatin and paclitaxel, OR with carboplatin and gemcitabine, OR as a single agent after previous use in combination with one of these carboplatin- containing chemotherapy regimens

You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Zirabev (bevacizumab-bvzr)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Jobevne. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

TARGRETIN (BEXAROTENE) CAPSULE

Does the patient have a diagnosis of cutaneous T-cell lymphoma (CTCL) (ICD-10 Group C84.A)
AND meet the following criterion?
The patient is refractory to at least one prior systemic therapy (e.g., gemcitabine, methotrexate, liposomal doxorubicin, bortezomib)

If yes, **approve for 12 months by GPID or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **BEXAROTENE (Targretin capsule)** requires the following rule(s) be met for approval:
You have cutaneous T-cell lymphoma (CTCL: a type of blood cancer)
You are refractory (resistant) to at least one prior systemic therapy (therapy that spreads through the blood, such as gemcitabine, methotrexate, liposomal doxorubicin, bortezomib)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

BIMEKIZUMAB-BKZX (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi/Yesintek/ustekinumab-aauz
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Tremfya (guselkumab)
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Orencia (abatacept)
  - Otezla (apremilast)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

BIMEKIZUMAB-BKZX (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The patient has C-reactive protein (CRP) levels above the upper limit of normal, OR has sacroiliitis on magnetic resonance imaging (MRI)
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Cimzia (certolizumab pegol)])
  - Cimzia (certolizumab pegol)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor] for the treatment of AS
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #5.

BIMEKIZUMAB-BKZX (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS
- The patient had a trial of or contraindication to ONE of the following preferred agents: Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Cosentyx (secukinumab)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BIMEKIZUMAB-BKZX (Bimzelx)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Moderate to severe plaque psoriasis (PsO: a type of skin condition)
- Psoriatic arthritis (PsA: a type of skin and joint condition)
- Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
- Ankylosing spondylitis (AS: a type of joint condition)
- Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)

(Initial denial text continued on next page)

BIMEKIZUMAB-BKZX (PART D)

INITIAL CRITERIA (CONTINUED)

If you have moderate to severe plaque psoriasis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
- You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
- You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

If you have psoriatic arthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis
- You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
  - Cosentyx (secukinumab)
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Selarsdi/Yesintek/ustekinumab-aauz
  - Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/ Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Tremfya (guselkumab)
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/ Yuflyma (adalimumab-aaty)/Hadlima])
  - Skyrizi (risankizumab-rzaa)
  - Orencia (abatacept)
  - Otezla (apremilast)

BIMEKIZUMAB-BKZX (PART D)

INITIAL CRITERIA (CONTINUED)

If you have non-radiographic axial spondyloarthritis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- Your C-reactive protein (CRP: indicator of inflammation) levels are above the upper limit of normal, OR you have sacroiliitis (inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: type of imaging lab)
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
- You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
  - Cosentyx (secukinumab)
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Cimzia (certolizumab pegol)])
  - Cimzia (certolizumab pegol)

If you have ankylosing spondylitis, approval also requires:
- You are 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
- You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred agents:

BIMEKIZUMAB-BKZX (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient continues to benefit from the medication
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient continues to benefit from the medication
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
- The patient continues to benefit from the medication
- Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

BIMEKIZUMAB-BKZX (PART D)

RENEWAL CRITERIA (CONTINUED)

Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor] for the treatment of AS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
The patient continues to benefit from the medication
Bimzelx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BIMEKIZUMAB-BKZX (Bimzelx)** requires the following rule(s) be met for renewal:
You have ONE of the following:
Moderate to severe plaque psoriasis (PsO: a type of skin condition)
Psoriatic arthritis (PsA: a type of skin and joint condition)
Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
Ankylosing spondylitis (AS: a type of joint condition)
Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)
(Renewal denial text continued on next page)

BIMEKIZUMAB-BKZX (PART D)

RENEWAL CRITERIA (CONTINUED)

If you have moderate to severe plaque psoriasis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

If you have psoriatic arthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

If you have non-radiographic axial spondyloarthritis, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis

If you have ankylosing spondylitis, renewal also requires:
- You continue to benefit from the medication
- You will not use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

If you have moderate to severe hidradenitis suppurativa, renewal also requires:
- You continue to benefit from the medication
- You will NOT use Bimzelx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

BINIMETINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BINIMETINIB (Mektovi)** requires the following rule(s) be met for approval:
You have ONE of the following:
- Unresectable or metastatic melanoma (a type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
- Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)

If you have unresectable or metastatic melanoma, approval also requires:
- You have a BRAF V600E or V600K mutation (types of gene mutations), as detected by a Food and Drug Administration (FDA)-approved test
- Mektovi will be used in combination with Braftovi (encorafenib)

If you have metastatic non-small cell lung cancer, approval also requires:
- You are 18 years of age or older
- You have a BRAF V600E mutation (a type of gene mutation), as detected by a Food and Drug Administration (FDA)-approved test
- Mektovi will be used in combination with Braftovi (encorafenib)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Mektovi.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, continue to #6.
If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, continue to #6.
If no, continue to #5.

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

BLINATUMOMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the drug administered via an implantable pump?

> If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
> If no, continue to #7.

Is the drug administered via an external pump?

> If yes, continue to #8.
> If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Is the drug specifically infused through an external infusion pump covered by Medicare?

> If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
>
> If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

BLINATUMOMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the cancer Philadelphia chromosome-negative **AND** the patient meets the following criterion?
The patient is in the consolidation phase of multiphase chemotherapy

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BLINATUMOMAB (Blincyto)** requires the following rule(s) be met for approval:
You have CD19 (a type of protein)-positive B-cell precursor acute lymphoblastic leukemia (ALL: a type of blood cancer)
You are 1 month of age and older
You meet ONE of the following:
- You have minimal residual disease (MRD)-positive acute lymphoblastic leukemia (a small number of cancer cells remain after treatment), you are in first or second complete remission (no symptoms or signs of disease), AND you have minimal residual disease of at least 0.1%
- You have relapsed or refractory acute lymphoblastic leukemia (a type of blood cancer that has returned or did not respond to treatment)
- You have Philadelphia chromosome-negative acute lymphoblastic leukemia (a type of blood cancer) AND you are in the consolidation phase (treatment following initial therapy) of multiphase chemotherapy (cancer treatment that involves multiple courses of therapy)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

BLINATUMOMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Blincyto.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

BOSENTAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BOSENTAN (Tracleer)** requires the following rule(s) be met for approval:
- You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
- You are 3 years of age or older
- Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
- Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
  - Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
  - Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
  - Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units
- You do not have elevated liver enzymes (ALT [alanine transaminase], AST [aspartate transaminase]) greater than 3 times the upper limit of normal or increases in bilirubin two or more times the upper limit of normal
- You will NOT use the requested medication concurrently (at the same time) with cyclosporine A or glyburide

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

BOSENTAN (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD- 10 I27.0, Group I27.2) **AND** meet the following criterion?
The requested medication will NOT be used concurrently with cyclosporine A or glyburide

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BOSENTAN (Tracleer)** requires the following rule(s) be met for renewal:
You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
You will NOT use the requested medication concurrently (at the same time) with cyclosporine A or glyburide

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph(s) for Tracleer.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

BOSUTINIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
BOSUTINIB	BOSULIF, BOSUTINIB	39590		GPI-10 (2153181200)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of Philadelphia chromosome-positive chronic myelogenous leukemia (Ph+ CML) (ICD-10 Group C92.1)?

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Is the Ph+ CML in chronic phase (CP) **AND** the patient meets the following criterion?
The patient is 1 year of age or older

If yes, continue to #3.
If no, continue to #5.

Is the patient newly diagnosed (e.g., starting or previously started Bosulif treatment at the time of diagnosis)?

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #4.

BOSUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a resistance or intolerance to a prior therapy (e.g., Gleevec [imatinib], Sprycel [dasatinib], Tasigna [nilotinib]) **AND** meet the following criterion?
The patient had a mutational analysis prior to initiation of therapy AND therapy is appropriate based on the NCCN guideline table for treatment recommendations based on BCR-ABL1 mutation profile *(Please see header CML-5 of the current NCCN guidelines)*

If yes, **approve for 12 months by HICL or GPI-10.**

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Is the Ph+ CML in accelerated phase (AP) or blast phase (BP), and the patient meets **ALL** of the following criteria?
The patient is 18 years of age or older
The patient has a resistance or intolerance to prior therapy (e.g., Gleevec [imatinib], Sprycel [dasatinib], Tasigna [nilotinib])
The patient had a mutational analysis prior to initiation of therapy AND therapy is appropriate based on the NCCN guideline table for treatment recommendations based on BCR-ABL1 mutation profile *(Please see header CML-5 of the current NCCN guidelines)*

If yes, **approve for 12 months by HICL or GPI-10.**

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

BOSUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **BOSUTINIB (Bosulif)** requires the following rule(s) be met for approval:
You have Philadelphia chromosome-positive chronic myelogenous leukemia (Ph+ CML: a type of blood cell cancer)
If you have Philadelphia chromosome-positive chronic myelogenous leukemia in chronic phase (CP), approval also requires:
You are 1 year of age or older
You meet ONE of the following:
You are newly diagnosed (such as you are starting or previously started Bosulif treatment at the time your condition was identified)
You have a resistance (medication no longer works as well) or intolerance (side effect) to prior therapy (such as Gleevec [imatinib], Sprycel [dasatinib], Tasigna [nilotinib]); you had a mutational analysis (a type of lab test) prior to the start of therapy; AND therapy is appropriate based on the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR- ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile
If you have Philadelphia chromosome-positive chronic myelogenous leukemia in accelerated phase (AP) or blast phase (BP), approval also requires:
You are 18 years of age or older
You have a resistance (medication no longer works as well) or intolerance (side effect) to prior therapy (such as Gleevec [imatinib], Sprycel [dasatinib], Tasigna [nilotinib])
You had a mutational analysis (a type of lab test) prior to the start of therapy; AND therapy is appropriate based on the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

BRENTUXIMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).
For PAC's: Send an email to plan (reference UNSAD section of PACIP).

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

GUIDELINES FOR USE

Does the patient have a diagnosis of classical Hodgkin lymphoma (cHL) (ICD-10 Group C81)?

If yes, continue to #2.
If no, continue to #7.

Is the patient's cancer at stage III or IV and the patient meets **ALL** of the following criteria?
The patient is 18 years of age or older
The patient has not been previously treated
Adcetris will be used in combination with doxorubicin, vinblastine, and dacarbazine

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

Is the patient's cancer considered high-risk and the patient meets **ALL** of the following criteria?
The patient is 2 years of age or older
The patient has not been previously treated
Adcetris will be used in combination with doxorubicin, vincristine, etoposide, prednisone, and cyclophosphamide

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

BRENTUXIMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Is the patient at high risk of relapse or disease progression post-autologous hematopoietic stem cell transplant (auto-HSCT) **AND** the patient meets the following criterion?
The patient is 18 years of age or older

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

Has the patient's cancer relapsed **AND** the patient meets the following criterion?
The patient is 18 years of age or older

If yes, continue to #6.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Does the patient meet **ONE** of the following criteria?
The patient has failed an autologous hematopoietic stem cell transplant (auto-HSCT)
The patient is not an auto-HSCT candidate AND has failed at least two prior multi-agent chemotherapy regimens (e.g., ABVD [doxorubicin, bleomycin, vinblastine, dacarbazine], Stanford V [doxorubicin, vinblastine, mechlorethamine, etoposide, vincristine, bleomycin, prednisone], BEACOPP [bleomycin, etoposide, doxorubicin, cyclophosphamide, vincristine, procarbazine, prednisone])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

Does the patient have a diagnosis of systemic anaplastic large cell lymphoma (sALCL) (ICD-10 Groups C84.6, C84.7) **AND** meet the following criterion?
The patient is 18 years of age or older

If yes, continue to #8.
If no, continue to #10.

BRENTUXIMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

Does the patient have a diagnosis of large B-cell lymphoma (LBCL) (ICD-10 Groups C83.3, C85.2), including diffuse large B-cell lymphoma (DLBCL) not other specified (ICD-10 Group C83.3), DLBCL arising from indolent lymphoma (ICD-10 Group C83.3), or high-grade B-cell lymphoma (HGBL), and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient's cancer is relapsed or refractory
Adcetris will be used in combination with Revlimid (lenalidomide) AND a rituximab product (e.g., Rituxan [rituximab], Truxima [rituximab-abbs])
The patient has tried at least two lines of systemic therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])
The patient is not eligible for auto-HSCT or chimeric antigen receptor (CAR) T-cell therapy (e.g., Yescarta [axicabtagene ciloleucel], Kymriah [tisagenlecleucel])

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BRENTUXIMAB (Adcetris)** requires the following rule(s) be met for approval:
You have ONE of the following:
Classical Hodgkin lymphoma (a type of blood cancer)
Systemic anaplastic large cell lymphoma (a type of blood cancer)
CD30-expressing peripheral T-cell lymphomas (a type of blood cancer)
Primary cutaneous anaplastic large cell lymphoma (a type of blood cancer)
Mycosis fungoides (a type of blood cancer affecting the skin)
Large B-cell lymphoma (LBCL), which includes diffuse large B-cell lymphoma (DLBCL) not other specified, DLBCL arising from indolent lymphoma, or high-grade B-cell lymphoma (HGBL) (types of blood cancer)

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

If you have classical Hodgkin lymphoma, approval also requires ONE of the following:
- Your cancer is stage III or IV; you are 18 years of age or older; you have not been previously treated; AND Adcetris will be used in combination with doxorubicin, vinblastine, and dacarbazine
- Your cancer is considered high-risk; you are 2 years of age or older; you have not been previously treated; AND Adcetris will be used in combination with doxorubicin, vincristine, etoposide, prednisone, and cyclophosphamide
- You are at high risk of relapse (disease comes back) or disease progression (disease gets worse) after having autologous hematopoietic stem cell transplant (auto-HSCT: transplant cells are from your own body) AND you are 18 years of age or older
- Your cancer has relapsed; you are 18 years of age or older; AND you have failed auto-HSCT
- Your cancer has relapsed; you are 18 years of age or older; you are not a candidate for auto-HSCT; AND you have failed at least two multi-agent chemotherapy regimens (such as ABVD [doxorubicin, bleomycin, vinblastine, dacarbazine], Stanford V [doxorubicin, vinblastine, mechlorethamine, etoposide, vincristine, bleomycin, prednisone], BEACOPP [bleomycin, etoposide, doxorubicin, cyclophosphamide, vincristine, procarbazine, prednisone])

If you have systemic anaplastic large cell lymphoma, approval also requires:
- You are 18 years of age or older
- You meet ONE of the following:
  - You have not been previously treated AND Adcetris will be used in combination with cyclophosphamide, doxorubicin, and prednisone
  - Your cancer has relapsed (disease that has returned) AND you have failed at least one multi-agent chemotherapy regimen (such as CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], CHOEP [cyclophosphamide, doxorubicin, vincristine, etoposide, prednisone])

If you have CD30-expressing peripheral T-cell lymphomas, including angioimmunoblastic T-cell lymphoma or peripheral T-cell lymphoma not otherwise specified, approval also requires:
- You are 18 years of age or older
- You have not been previously treated
- Adcetris will be used in combination with cyclophosphamide, doxorubicin, and prednisone

(Denial text continued on next page)

BRENTUXIMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

If you have primary cutaneous anaplastic large cell lymphoma, approval also requires:
- You are 18 years of age or older
- You have received prior systemic therapy (treatment that targets the entire body such as CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], methotrexate)

If you have mycosis fungoides, approval also requires:
- You are 18 years of age or older
- Your cancer is CD30 (a type of protein)-positive
- You have received prior systemic therapy (treatment that targets the entire body such as Istodax [romidepsin], methotrexate)

If you have large B-cell lymphoma, which includes diffuse large B-cell lymphoma not other specified, diffuse large B-cell lymphoma arising from indolent lymphoma, or high-grade B-cell lymphoma, approval also requires:
- You are 18 years of age or older
- Your cancer is relapsed (disease that has returned) or refractory (did not respond to treatment)
- Adcetris will be used in combination with Revlimid (lenalidomide) AND a rituximab product (such as Rituxan [rituximab], Truxima [rituximab-abbs])
- You have has tried at least two lines of systemic therapy (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])
- You are not eligible for autologous hematopoietic stem cell transplantation (auto-HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells) or chimeric antigen receptor (CAR) T-cell therapy (such as Yescarta [axicabtagene ciloleucel], Kymriah [tisagenlecleucel])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Adcetris.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
The patient's tumor is positive for anaplastic lymphoma kinase (ALK) fusion oncogene, as detected by an FDA-approved test

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BRIGATINIB (Alunbrig)** requires the following rule(s) be met for approval:
You have metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of the body)
You are 18 years of age or older
Your tumors are positive for anaplastic lymphoma kinase (ALK) fusion oncogene (mutated gene), as detected by a Food and Drug Administration (FDA)-approved test

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- The patient is a candidate for phototherapy or systemic therapy
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
- The patient has been counseled on and expresses understanding of the risk of suicidal ideation and behavior
- Siliq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of plaque psoriasis
- The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

BRODALUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BRODALUMAB (Siliq)** requires the following rule(s) be met for approval:
You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
You are 18 years of age or older
You are a candidate for phototherapy (light therapy) or systemic therapy (therapy that travels through the entire body)
Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
You have been counseled on and express an understanding of the risk of suicidal thoughts and behavior
You will NOT use Siliq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

BRODALUMAB (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient continues to benefit from the medication
- The patient has not developed or reported worsening depressive symptoms or suicidal ideation and behaviors while on treatment with Siliq
- Siliq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BRODALUMAB (Siliq)** requires the following rule(s) be met for renewal:
- You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
- You continue to benefit from the medication
- You have not developed or reported worsening depressive symptoms or suicidal thoughts and behaviors while on treatment with Siliq
- You will NOT use Siliq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

BUDESONIDE - TARPEYO (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:*Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BUDESONIDE - TARPEYO** requires the following rule(s) be met for approval:
You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
You are 18 years of age or older
Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use OR you have a contraindication to (harmful for you to use) both of these medication classes
You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 35 mL/min/1.73m(2)
You have a progressively declining glomerular filtration rate (GFR: a tool for evaluating kidney function) and/or worsening proteinuria (high level of protein in the urine, such as greater than 1 gram of protein in a 24-hour urine collection, or at least 1 g/g urine protein to creatinine ratio [UPCR: test that measures the amount of protein in urine])

STANDARD PART D
PRIOR AUTHORIZATION GUIDELINES

BULEVIRTIDE-GMOD (PART D)

RENEWAL CRITERIA

Does the patient have a diagnosis of chronic hepatitis delta virus (HDV) (ICD-10 B18.0) and meet **ALL** of the following criteria?

The patient has compensated cirrhosis OR does not have cirrhosis

The patient had a virological or biochemical response (e.g., undetectable HDV RNA or a decrease by 2 log10 IU/mL from baseline or ALT normalization or a trend towards these items)

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

RENEWAL DENIAL TEXT: Our guideline named **BULEVIRTIDE-GMOD (Hepcludex)** requires the following rule(s) be met for renewal:

You have chronic (long-term) hepatitis delta virus (HDV: liver inflammation caused by a type of virus)

You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) OR you do not have cirrhosis (liver damage or scarring)

You had a virological or biochemical response (measures that show Hepcludex therapy is effective, such as an undetectable HDV RNA or a decrease by 2 log10 IU/mL from baseline [a type of lab test that shows a suppressed or reduced viral load from before start of treatment] or alanine transaminase [ALT: a type of liver enzyme test] normalization or a trend towards these items)

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

Does the patient have a diagnosis of edema (ICD-10 Group R60) associated with congestive heart failure, hepatic disease or renal disease (including nephrotic syndrome) and meet **ALL** of the following criteria?
The patient is 18 years of age or older
Therapy is prescribed by or in consultation with a cardiologist, nephrologist, hepatologist, or gastroenterologist
The patient has a contraindication to or is unable to swallow bumetanide tablets

If yes, **approve for 30 days by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **BUMETANIDE (Enbumyst)** requires the following rule(s) be met for approval:
You have edema (swelling caused by fluid build-up in the body) associated with congestive heart failure (a type of heart condition), hepatic (liver) disease or renal (kidney) disease (including nephrotic syndrome [a type of kidney disorder])
You are 18 years of age or older
(Denial text continued on the next page)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

Is this a pharmacy call?

If yes, continue to #3.
If no, continue to #2.

Is the requested medication going to be filled at a pharmacy?

If yes, continue to #3.
If no, **Refer to plan. (This should be processed under the member's medical benefit)**

Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #4.

Is the pharmacy dispensing the drug directly to the member or member's representative?

If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

If no, continue to #5.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- Berinert will be used for the treatment of acute HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist or pulmonologist
- Berinert will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Kalbitor [ecallantide])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

Does the patient meet **ONE** of the following criteria?
- The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
- The patient has Type III HAE

If yes, **approve for 12 months by NDC.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

C1 ESTERASE INHIBITOR - BERINERT BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **C1 ESTERASE INHIBITOR - BERINERT** requires the following rule(s) be met for approval:
You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
Berinert will be used for the treatment of acute (sudden and severe) hereditary angioedema attacks
Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor) or pulmonologist (lung/breathing doctor)
You will NOT use Berinert concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) hereditary angioedema attacks (such as Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Kalbitor [ecallantide])
You meet ONE of the following:
- You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
- You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Our guideline named **C1 ESTERASE INHIBITOR - CINRYZE** requires the following rule(s) be met for renewal:
You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
You will NOT use Cinryze concurrently (at the same time) with an alternative preventive medication for HAE attacks (such as Takhzyro [lanadelumab-flyo], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

C1 ESTERASE INHIBITOR - CINRYZE BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cinryze.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Haegarda will be used for routine prophylaxis against HAE attacks
- Therapy is prescribed by or in consultation with a hematologist, immunologist, allergist, or pulmonologist
- Haegarda will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Takhzyro [lanadelumab-flyo], Cinryze [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

C1 ESTERASE INHIBITOR - HAEGARDA (PART D)

INITIAL CRITERIA (CONTINUED)

Does the patient meet **ONE** of the following criteria?

The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q

The patient has Type III HAE

If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **C1 ESTERASE INHIBITOR - HAEGARDA** requires the following rule(s) be met for approval:
You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
You are 6 years of age or older
Haegarda will be used for the routine prevention of hereditary angioedema attacks
Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor), immunologist (a type of immune system doctor), allergist (a type of allergy doctor), or pulmonologist (lung/breathing doctor)
You will NOT use Haegarda concurrently (at the same time) with an alternative preventive medication for HAE attacks (such as Takhzyro [lanadelumab-flyo], Cinryze [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii])
You meet ONE of the following:
- You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
- You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CABOZANTINIB TABLET (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have advanced renal cell carcinoma, approval also requires ONE of the following:
1. Cabometyx will be used as a single agent (used alone)
2. Cabometyx will be used in combination with Opdivo (nivolumab) as first-line treatment (you have NOT received prior treatment for advanced renal cell carcinoma)

C. If you have hepatocellular carcinoma, approval also requires:
1. You have been previously treated with Nexavar (sorafenib)

D. If you have locally advanced or metastatic differentiated thyroid cancer, approval also requires:
1. You are 12 years of age or older
2. You have disease progression (worsening) following prior vascular endothelial growth factor receptor (VEGFR)-targeted therapy (such as Lenvima [lenvatinib])
3. You are radioactive iodine-refractory (resistant to) or ineligible

E. If you have a pancreatic or extra-pancreatic neuroendocrine tumor, approval also requires:
1. You are 12 years of age or older
2. Your tumor is unresectable (unable to remove by surgery), locally advanced or metastatic (cancer that has spread to nearby tissue/lymph nodes or to other parts of the body), and well-differentiated
3. Your tumor has been previously treated

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cryopyrin-associated periodic syndromes (CAPS), including familial cold autoinflammatory syndrome (FCAS) or Muckle-Wells syndrome (MWS) (ICD-10 M04.2), and meet **ALL** of the following criteria?
   - The patient is 4 years of age or older
   - The patient had genetic testing for gain-of-function mutations in the NLRP3 gene OR has inflammatory markers (i.e., elevated CRP, ESR, serum amyloid A protein (SAA) or S100 proteins)
   - The patient has TWO of the following: urticarial-like rash (neutrophilic dermatitis), cold-triggered episodes, sensorineural hearing loss, musculoskeletal symptoms, chronic aseptic meningitis, skeletal abnormalities
   - Ilaris will NOT be used concurrently with other IL-1 inhibitors (e.g., Arcalyst [rilonacept], Kineret [anakinra])

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

CANAKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of **ONE** of the following periodic fever syndromes?
   - Tumor necrosis factor receptor associated periodic syndrome (TRAPS) (ICD-10 M04.1)
   - Hyperimmunoglobulin D syndrome (HIDS)/mevalonate kinase deficiency (MKD) (ICD-10 M04.1)
   - Familial Mediterranean fever (FMF) (ICD-10 M04.1)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Ilaris will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of adult-onset Still's disease (AOSD) (ICD-10 M06.1) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Ilaris will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of AOSD

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

CANAKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of gout (ICD-10 Group M10) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ilaris will be used for the symptomatic treatment of gout flares (e.g., episodes of pain, swelling)
   - The patient had an inadequate response, intolerance, or contraindication to NSAIDs (non-steroidal anti-inflammatory drugs) (e.g., ibuprofen, naproxen, indomethacin)
   - The patient had an inadequate response, intolerance, or contraindication to colchicine
   - The patient is not able to receive repeated courses of corticosteroids (e.g., triamcinolone acetonide)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Ilaris will NOT be used concurrently with other IL-1 inhibitors (e.g., Arcalyst [rilonacept], Kineret [anakinra])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CANAKINUMAB (Ilaris)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Cryopyrin-associated periodic syndromes (CAPS), including familial cold auto-inflammatory syndrome (FCAS: inherited inflammatory disorder that is triggered with cold) or Muckle-Wells syndrome (MWS: disorder characterized by periodic episodes of skin rash, fever, and joint pain)
      2. Tumor necrosis factor receptor associated periodic syndrome (TRAPS: a type of genetic disease)
      3. Hyperimmunoglobulin D syndrome (HIDS)/mevalonate kinase deficiency (MKD) (types of genetic disorders)
      4. Familial Mediterranean fever (FMF: a type of genetic disorder)
      5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
      6. Adult-onset Still's disease (AOSD: an autoinflammatory disease)
      7. Gout (a type of joint condition)

CANAKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have cryopyrin-associated periodic syndromes, including familial cold autoinflammatory syndrome or Muckle-Wells syndrome, approval also requires:
1. You are 4 years of age or older
2. You had genetic testing for gain-of-function mutations (abnormal change in gene) in the NLRP3 gene (a type of gene) OR you have inflammatory markers (elevated C-reactive protein [CRP: sign of inflammation], erythrocyte sedimentation rate [ESR: a type of blood test], serum amyloid A protein [SAA: a type of protein] or S100 proteins [a type of protein])
3. You have TWO of the following: urticarial-like rash (neutrophilic dermatitis: a type of skin condition), cold-triggered episodes, sensorineural hearing loss (SNHL: a type of hearing loss), musculoskeletal symptoms (symptoms related to muscles and bones), chronic aseptic meningitis (inflammation of the brain and spinal cord), skeletal (bone) abnormalities
4. Ilaris will NOT be used concurrently (at the same time) with other IL-1 inhibitors (such as Arcalyst [rilonacept], Kineret [anakinra])

C. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Ilaris concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

D. If you have adult-onset Still's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
2. You will NOT use Ilaris concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of adult-onset Still's disease

CANAKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have gout, approval also requires:

1. You are 18 years of age or older
2. Ilaris will be used for the symptomatic treatment of gout flares (such as episodes of pain or swelling)
3. You had an inadequate response (drug did not work), intolerance (side effect) of, or contraindication to (harmful for you to use) NSAIDs (non-steroidal anti-inflammatory drugs, such as ibuprofen, naproxen, indomethacin)
4. You had an inadequate response, intolerance of, or contraindication to colchicine
5. You are not able to receive repeated treatments of corticosteroids (such as triamcinolone acetonide)
6. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
7. You will NOT use Ilaris concurrently (at the same time) with other IL-1 inhibitors (such as Arcalyst [rilonacept], Kineret [anakinra])

CANAKINUMAB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of cryopyrin-associated periodic syndromes (CAPS), including familial cold autoinflammatory syndrome (FCAS), Muckle-Wells syndrome (MWS), tumor necrosis factor receptor associated periodic syndrome (TRAPS), hyperimmunoglobulin D syndrome (HIDS)/mevalonate kinase deficiency (MKD) or familial Mediterranean fever (FMF), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Ilaris will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of adult-onset Still's disease (AOSD) (ICD-10 M06.1) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Ilaris will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of AOSD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of gout (ICD-10 Group M10) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Ilaris will NOT be used concurrently with other IL-1 inhibitors (e.g., Arcalyst [rilonacept], Kineret [anakinra])
   - The patient has improvement in gout flares (e.g., episodes of pain, swelling)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

CANAKINUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CANAKINUMAB (Ilaris)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
   2. Adult-onset Still's disease (AOSD: an autoinflammatory disorder)
   3. Gout (a type of joint condition)

B. If you have systemic juvenile idiopathic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Ilaris concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

C. If you have adult-onset Still's disease, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Ilaris concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of adult-onset Still's disease

D. If you have gout, renewal also requires:
   1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   2. You will NOT use Ilaris concurrently (at the same time) with other IL-1 inhibitors (such as Arcalyst [rilonacept], Kineret [anakinra])
   3. You have improvement in gout flares (such as episodes of pain, swelling)

CANAKINUMAB (PART D)

For Part D use only:

CANAKINUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: CRYOPYRIN-ASSOCIATED PERIODIC SYNDROMES (CAPS): 1) ONE OF THE FOLLOWING: (A) GENETIC TEST FOR GAIN-OF-FUNCTION MUTATIONS IN THE NLRP3 GENE, OR (B) HAS INFLAMMATORY MARKERS (I.E., ELEVATED CRP, ESR, SERUM AMYLOID A PROTEIN (SAA) OR S100 PROTEINS), AND 2) TWO OF THE FOLLOWING: URTICARIAL-LIKE RASH (NEUTROPHILIC DERMATITIS), COLD-TRIGGERED EPISODES, SENSORINEURAL HEARING LOSS, MUSCULOSKELETAL SYMPTOMS, CHRONIC ASEPTIC MENINGITIS, SKELETAL ABNORMALITIES.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: SYSTEMIC JUVENILE IDIOPATHIC ARTHRITIS (SJIA), ADULT-ONSET STILLS DISEASE (AOSD): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST, DERMATOLOGIST, OR IMMUNOLOGIST. GOUT: PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. RENEWAL: GOUT: PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST.
Coverage Duration	INITIAL: AOSD/SJIA: 6 MO, CAPS: LIFETIME, ALL OTHER DIAGNOSES: 12 MO. RENEWAL: AOSD/SJIA/GOUT: 12 MO
Other Criteria	INITIAL: CAPS: NO CONCURRENT USE WITH OTHER IL-1 INHIBITORS. AOSD: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR AOSD. SJIA: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR SJIA. GOUT: NO CONCURRENT USE WITH OTHER IL-1 INHIBITORS. RENEWAL: AOSD: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR AOSD. SJIA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR SJIA. GOUT: 1) NO CONCURRENT USE WITH OTHER IL-1 INHIBITORS, AND 2) IMPROVEMENT IN GOUT FLARES.

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

CAPIVASERTIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
CAPIVASERTIB	TRUQAP	49313		GPI-10 (2153032000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truqap will be used in combination with Faslodex (fulvestrant)
   - The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative, with one or more PIK3CA/AKT1/PTEN-alterations, as detected by an FDA-approved test
   - The patient has disease progression on or after an endocrine-based regimen (e.g., letrozole, anastrozole, tamoxifen)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic androgen pathway modulation-naive or -sensitive (mAPMN/S) prostate cancer (ICD-10 C61, Z19.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truqap will be used in combination with abiraterone (Zytiga) and prednisone
   - The cancer is PTEN-deficient as detected by an FDA-authorized test

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

CAPIVASERTIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **CAPIVASERTIB (Truqap)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally advanced or metastatic breast cancer (breast cancer that has spread to nearby tissue or lymph nodes or to other parts of the body)
   2. Metastatic androgen pathway modulation-naive or -sensitive (mAPMN/S) prostate cancer (cancer that has spread to other parts of the body and has not been treated with, or may respond to, testosterone-lowering treatment)

B. If you have locally advanced or metastatic breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Truqap will be used together with Faslodex (fulvestrant)
   3. Your breast cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative, with one or more PIK3CA/AKT1/PTEN-mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   4. You have experienced disease progression (your condition has worsened) on or after an endocrine (hormone)-based regimen (such as letrozole, anastrozole, tamoxifen)

C. If you have metastatic androgen pathway modulation-naive or -sensitive prostate cancer, approval also requires:
   1. You are 18 years of age or older
   2. Truqap will be used in combination with abiraterone (Zytiga) and prednisone
   3. Your prostate cancer is PTEN-deficient (loss of a type of gene) as detected by a Food and Drug Administration (FDA)-authorized test

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Truqap.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acquired thrombotic thrombocytopenia purpura (aTTP) (ICD-10 Group M31.1) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - Cablivi was previously initiated as part of an FDA-approved treatment regimen in combination with plasma exchange and immunosuppressive therapy within an inpatient setting

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient experienced more than TWO recurrences of aTTP while on Cablivi therapy (i.e., new drop in platelet count requiring repeat plasma exchange during 30 days post-plasma exchange therapy [PEX] and up to 28 days of extended therapy)?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

PRIOR AUTHORIZATION GUIDELINES

CAPLACIZUMAB-YHDP (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CAPLACIZUMAB-YHDP (Cablivi)** requires the following rule(s) be met for approval:

A. You have acquired thrombotic thrombocytopenia purpura (aTTP: a type of blood disorder)
B. You are 12 years of age or older
C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
D. Cablivi was previously initiated as part of a Food and Drug Administration (FDA)-approved treatment regimen in combination with plasma exchange (filtering of blood) and immunosuppressive therapy (treatment that weakens your immune system) within an inpatient setting
E. You have NOT experienced more than TWO recurrences of acquired thrombotic thrombocytopenia purpura (aTTP: a type of blood disorder) while on Cablivi therapy. Recurrences include a new drop in platelet (a type of blood cell) count requiring repeat plasma exchange during 30 days post-plasma exchange therapy (PEX: filtering of blood) and up to 28 days of extended therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cablivi.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acute or chronic hyperammonemia (HA) due to N-acetylglutamate synthase (NAGS) deficiency (ICD-10 E72.29) **AND** meet the following criterion?
   - The patient's NAGS gene mutation is confirmed by biochemical or genetic testing

   If yes, **approve by HICL or GPI-10 as follows:**
   - **For acute HA due to NAGS deficiency: approve for 7 days.**
   - **For chronic HA due to NAGS deficiency: approve for 6 months.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of acute hyperammonemia (HA) due to propionic acidemia (PA) (ICD-10 E71.121) as confirmed by **ONE** of the following criteria?
   - The patient has elevated methylcitric acid and normal methylmalonic acid
   - The patient has genetic testing that confirms mutation in the PCCA or PCCB gene

   If yes, **approve for 7 days by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

CARGLUMIC ACID (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of acute hyperammonemia (HA) due to methylmalonic acidemia (MMA) (ICD-10 E71.120) as confirmed by **ONE** of the following criteria?
   - The patient has elevated methylmalonic acid, methylcitric acid
   - The patient has genetic testing that confirms mutation in the MMUT, MMA, MMAB or MMADHC genes

   If yes, **approve for 7 days by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.
   Our guideline named **CARGLUMIC ACID (Carbaglu)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Acute or chronic hyperammonemia (HA) due to N-acetylglutamate synthase (NAGS) deficiency (short-term or long-term high ammonia blood levels due to a genetic disorder)
      2. Acute hyperammonemia (HA) due to propionic acidemia (PA) or methylmalonic acidemia (MMA) (short-term high ammonia blood levels due to a genetic disorder)

   B. If you have acute or chronic hyperammonemia due to N-acetylglutamate synthase deficiency, approval also requires:
      1. Your N-acetylglutamate synthase gene mutation (abnormal change in gene) is confirmed by biochemical or genetic testing (types of lab test)

   C. If you have acute hyperammonemia due to propionic acidemia, approval also requires your diagnosis is confirmed by ONE of the following:
      1. You have elevated methylcitric acid and normal methylmalonic acid (substances that indicates presence of a disease)
      2. You had a genetic testing that confirms mutation in the PCCA or PCCB gene (abnormal change in types of genes)

   D. If you have acute hyperammonemia due to methylmalonic acidemia, approval also requires your diagnosis is confirmed by ONE of the following:
      1. You have elevated methylmalonic acid, methylcitric acid (substances that indicates presence of a disease)
      2. You have a genetic testing that confirms mutation in the MMUT, MMA, MMAB or MMADHC genes (abnormal change in types of genes)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CARGLUMIC ACID (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of acute HA due to NAGS deficiency or acute HA due to PA or MMA, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of chronic hyperammonemia (HA) due to N-acetylglutamate synthase (NAGS) deficiency (ICD-10 E72.29) **AND** meet the following criterion?
   - The patient has shown clinical improvement

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CARGLUMIC ACID (Carbaglu)** requires the following rule(s) be met for renewal:
   A. You have chronic hyperammonemia (HA) due to N-acetylglutamate synthase (NAGS) (long-term high ammonia blood levels due to a genetic disorder)
   B. You have shown clinical improvement

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered using an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

CASIMERSEN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet the following criterion?
   - The patient has a confirmed mutation in the DMD gene that is amenable to exon 45 skipping

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CASIMERSEN (Amondys-45)** requires the following rule(s) be met for approval:
   A. You have Duchenne muscular dystrophy (a type of muscle disorder)
   B. You have a confirmed mutation in the DMD gene that is responsive to exon 45 skipping (a type of gene mutation)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CASIMERSEN BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Amondys-45.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for BvD review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

CEMIPLIMAB-RWLC (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of metastatic or locally advanced basal cell carcinoma (BCC) (ICD-10 C44.91, C44.01, C44.41, C44.81; Groups C44.11, C44.21, C44.31, C44.51, C44.61, C44.71) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has previously been treated with a hedgehog pathway inhibitor (e.g., Erivedge [vismodegib], Odomzo [sonidegib]) OR for whom a hedgehog pathway inhibitor is not appropriate

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is metastatic OR locally advanced (where the patient is not a candidate for surgical resection or definitive chemoradiation)
   - The patient's tumors do not have EGFR, ALK, or ROS1 aberrations

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - Libtayo will be used as a single agent AND the patient's tumors have high PD-L1 expression [Tumor Proportion Score (TPS) ≥ 50%], as determined by an FDA-approved test
   - Libtayo will be used in combination with platinum-based chemotherapy (e.g., carboplatin, cisplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

CEMIPLIMAB-RWLC (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CEMIPLIMAB-RWLC (Libtayo)** requires the following rules be met for approval:

A. You have ONE of the following:
   1. Cutaneous squamous cell carcinoma (a type of skin cancer)
   2. Metastatic or locally advanced basal cell carcinoma (a type of skin cancer that has spread to other parts of the body or to nearby tissue or lymph nodes)
   3. Non-small cell lung cancer (a type of lung cancer)

B. If you have cutaneous squamous cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. Your cancer is metastatic or locally advanced (cancer that has spread to other parts of the body or to nearby tissue or lymph nodes) AND you are not a candidate for curative (to cure) surgery or curative radiation
      b. Your cancer is at high risk of recurrence (returns) after surgery and radiation AND Libtayo will be used as adjuvant (additional) treatment

C. If you have metastatic or locally advanced basal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously been treated with a hedgehog pathway inhibitor (such as Erivedge [vismodegib], Odomzo [sonidegib]) OR a hedgehog pathway inhibitor is not appropriate for you

(Denial text continued on next page)

CEMIPLIMAB-RWLC (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have non-small cell lung cancer, approval also requires:

1. You are 18 years of age or older
2. Your cancer is metastatic (cancer that has spread to other parts of the body) OR locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes, where you are not a candidate for surgical resection [remove by surgery] or definitive chemoradiation [a type of cancer treatment])
3. Your tumors do not have EGFR, ALK or ROS1 aberrations (types of abnormal genes)
4. You meet ONE of the following:
   a. Libtayo will be used as a single agent AND your tumors have high PD-L1 (programmed death-ligand: type of protein) expression [Tumor Proportion Score (TPS) at least 50%], as determined by a Food and Drug Administration (FDA)-approved test
   b. Libtayo will be used in combination with platinum-based chemotherapy (such as carboplatin, cisplatin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CEQUR SIMPLICITY (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient's glycosylated hemoglobin level (HbA1c) is greater than 7%
   - The patient has a history of recurring hypoglycemia
   - The patient has wide fluctuations in blood glucose before mealtime
   - The patient experiences the dawn phenomenon with fasting blood glucose levels frequently exceeding 200 mg/dL
   - The patient has a history of severe glycemic excursions (i.e., sudden spikes in blood sugar levels)

   If yes, **approve for 12 months by HICL or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.
   Our guideline named **CEQUR SIMPLICITY** requires the following rule(s) be met for approval:
   A. You have diabetes mellitus (type 1 or type 2) (a disorder with high blood sugar)
   B. You are 21 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. You follow a maintenance program of at least 3 injections of insulin per day
   E. You require bolus insulin dosing in increments of 2 units per bolus
   F. You have worked with your doctor to adjust your dose of insulin for the past 6 months and have not met your glucose (blood sugar) goals
   G. You had a trial of ONE of the following preferred devices: Omnipod or V-Go
   H. You meet ONE of the following:
      1. You have a glycosylated hemoglobin level (HbA1c: a type of lab test) greater than 7 percent
      2. You have a history of recurring hypoglycemia (low blood sugar)
      3. You have wide fluctuations (variations) in blood glucose before mealtime
      4. You experience the dawn phenomenon (abnormal early morning increase in blood sugar) with fasting blood glucose levels frequently exceeding 200 mg/dL
      5. You have a history of severe glycemic excursions (sudden spikes in blood sugar levels)

PRIOR AUTHORIZATION GUIDELINES

CEQUR SIMPLICITY (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of diabetes mellitus (type 1 or type 2) (ICD-10 Groups E08, E09, E10, E11, E13) and meet **ALL** of the following criteria?
   - The patient has shown a positive response to therapy
   - The patient is adherent to physician follow-up visits

   If yes, **approve for 12 months by HICL or GPI-14.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CEQUR SIMPLICITY** requires the following rule(s) be met for renewal:
   A. You have diabetes mellitus (type 1 or type 2) (a disorder with high blood sugar)
   B. You have shown a positive response to therapy
   C. You are adherent to (keeping up with) your doctor follow-up visits

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for CeQur Simplicity.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

CEQUR SIMPLICITY (PART D)

For Part D use only:

CEQUR SIMPLICITY (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	DIABETES MELLITUS (DM): INITIAL: ONE OF THE FOLLOWING: 1) HBA1C GREATER THAN 7 PERCENT, 2) HISTORY OF RECURRING HYPOGLYCEMIA, 3) WIDE FLUCTUATIONS IN BLOOD GLUCOSE BEFORE MEALTIME, 4) EXPERIENCES THE DAWN PHENOMENON WITH FASTING BLOOD GLUCOSE LEVELS FREQUENTLY EXCEEDING 200 MG/DL, OR 5) HISTORY OF SEVERE GLYCEMIC EXCURSIONS (I.E., SUDDEN SPIKES IN BLOOD SUGAR LEVELS).
Age Restrictions	N/A
Prescriber Restrictions	DM: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL:12 MONTHS.
Other Criteria	DM: INITIAL: 1) RECEIVING AT LEAST 3 INJECTIONS OF INSULIN PER DAY, 2) REQUIRES BOLUS INSULIN DOSING IN INCREMENTS OF 2 UNITS PER BOLUS, 3) WORKED WITH PHYSICIAN TO ADJUST DOSE OF INSULIN FOR THE PAST 6 MONTHS AND GLUCOSE GOALS HAVE NOT BEEN MET, AND 4) TRIAL OF ONE OF THE FOLLOWING PREFERRED DEVICES: OMNIPOD OR V-GO. RENEWAL: 1) POSITIVE RESPONSE TO THERAPY, AND 2) ADHERENT TO PHYSICIAN FOLLOW-UP VISITS.

Created: 08/22
Effective: 08/15/26 Client Approval: 08/26 DMC Approval: 08/11/26

CERITINIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
CERITINIB	ZYKADIA	41111		GPI-10 (21530514000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors are anaplastic lymphoma kinase (ALK)-positive, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CERITINIB (Zykadia)** requires the following rule(s) be met for approval:
   A. You have metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. Your tumors are anaplastic lymphoma kinase (ALK: a type of enzyme) positive as confirmed by a Food and Drug Administration (FDA)-approved test

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

     If yes, continue to #2.
     If no, continue to #3.

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient is pregnant, breastfeeding, or trying to become pregnant
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, continue to #4.
   If no, continue to #5.

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient is pregnant, breastfeeding, or trying to become pregnant
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Orencia (abatacept)
     - Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, continue to #6.
   If no, continue to #7.

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is pregnant, breastfeeding, or trying to become pregnant
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cosentyx (secukinumab)
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #8.
   If no, continue to #9.

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

8. Does the patient meet **ONE** of the following criteria?
   - The patient is pregnant, breastfeeding, or trying to become pregnant
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Selarsdi/Yesintek/ustekinumab-aauz
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

9. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #10.
   If no, continue to #11.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is pregnant, breastfeeding, or trying to become pregnant
    - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek/ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

    If yes, **approve for 6 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

11. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Therapy is prescribed by or in consultation with a rheumatologist
    - The patient has C-reactive protein (CRP) levels above the upper limit of normal, OR has sacroiliitis on magnetic resonance imaging (MRI)
    - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
    - The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

    If yes, **approve for 6 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #12.

12. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
    - The patient is 2 years of age or older
    - Therapy is prescribed by or in consultation with a rheumatologist
    - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

    If yes, continue to #13.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

13. Does the patient meet **ONE** of the following criteria?
    - The patient is pregnant, breastfeeding, or trying to become pregnant
    - The patient had a trial of or contraindication to TWO of the following preferred agents:
        - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
        - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
        - Orencia (abatacept)
        - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

    If yes, **approve for 6 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **CERTOLIZUMAB PEGOL (Cimzia)** requires the following rule(s) be met for approval:

    A. You have ONE of the following:
        1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
        2. Psoriatic arthritis (PsA: a type of skin and joint condition)
        3. Ankylosing spondylitis (AS: a type of joint condition)
        4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
        5. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
        6. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
        7. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
4. You meet ONE of the following:
   a. You are pregnant, breastfeeding, or trying to become pregnant
   b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      ii. Xeljanz (tofacitinib extended-release or immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Orencia (abatacept)

(Initial denial text continued on next page)

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You meet ONE of the following:
   a. You are pregnant, breastfeeding, or trying to become pregnant
   b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Cosentyx (secukinumab)
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Xeljanz (tofacitinib extended-release or immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima]
      iv. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn’s disease
4. You meet ONE of the following:
   a. You are pregnant, breastfeeding, or trying to become pregnant
   b. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Selarsdi/Yesintek/ustekinumab-aauz
      ii. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iv. Skyrizi (risankizumab-rzaa)
      v. Tremfya (guselkumab)

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
4. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You are pregnant, breastfeeding, or trying to become pregnant
   b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

G. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. Your C-reactive protein (CRP: indicator of inflammation) levels are above the upper limit of normal, OR you have sacroiliitis (inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: type of imaging lab)
4. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
5. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

CERTOLIZUMAB PEGOL (PART D)

INITIAL CRITERIA (CONTINUED)

H. If you have polyarticular juvenile idiopathic arthritis, approval also requires:

1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You meet ONE of the following:
   a. You are pregnant, breastfeeding, or trying to become pregnant
   b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      ii. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      iii. Orencia (abatacept)
      iv. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

CERTOLIZUMAB PEGOL (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9; M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

CERTOLIZUMAB PEGOL (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

CERTOLIZUMAB PEGOL (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cimzia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CERTOLIZUMAB PEGOL (Cimzia)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      5. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      6. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
      7. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   (Renewal denial text continued on next page)

CERTOLIZUMAB PEGOL (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

F. If you have moderate to severe plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

G. If you have non-radiographic axial spondyloarthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis

H. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cimzia concurrently (at the same time) with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

REFERENCES
Cimzia [Prescribing Information]. Smyrna, GA: UCB, Inc.; September 2025.

For Part D use only:

CERTOLIZUMAB PEGOL (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA. NON-RADIOGRAPHIC AXIAL SPONDYLOARTHRITIS (NR-AXSPA): 1) C-REACTIVE PROTEIN (CRP) LEVELS ABOVE THE UPPER LIMIT OF NORMAL, OR 2) SACROILIITIS ON MAGNETIC RESONANCE IMAGING (MRI).
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), ANKYLOSING SPONDYLITIS (AS), NR-AXSPA, POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. CROHNS DISEASE (CD): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PSA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, XELJANZ, RINVOQ, SKYRIZI, TREMFYA, ORENCIA, OTEZLA. AS: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: COSENTYX, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ. CD: TRIAL OF OR CONTRAINDICATION TO ONE OF THE FOLLOWING PREFERRED AGENTS: SELARSDI/YESINTEK/USTEKINUMAB-AAUZ, HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, RINVOQ, SKYRIZI, TREMFYA. PSO: TRIAL OF OR CONTRAINDICATION TO TWO OF

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

CETUXIMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
CETUXIMAB	ERBITUX	25947		GPI-10 (2136001500)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

CETUXIMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field)**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field)**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field.**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field)**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

CETUXIMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally or regionally advanced squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) **AND** meet the following criterion?
   - Erbitux will be used in combination with radiation therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of recurrent locoregional disease or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) **AND** meet the following criterion?
   - Erbitux will be used in combination with platinum-based therapy (e.g., cisplatin, carboplatin, oxaliplatin) and fluorouracil (5-FU)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

CETUXIMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) **AND** meet the following criterion?
   - The patient has failed prior platinum-based therapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19)?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Is the patient's cancer KRAS wild-type (without mutation), epidermal growth factor receptor (EGFR)-expressing, as determined by an FDA-approved test, and the patient meets **ONE** of the following criteria?
   - Erbitux will be used in combination with FOLFIRI (irinotecan, 5-fluorouracil, leucovorin)
   - Erbitux will be used in combination with irinotecan AND the patient is refractory to irinotecan-based chemotherapy
   - The patient has failed oxaliplatin-based and irinotecan-based chemotherapy OR the patient is intolerant to irinotecan

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

GUIDELINES FOR USE (CONTINUED)

6. Does the patient's cancer have a BRAF V600E mutation, as determined by an FDA-approved test, and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Erbitux will be used in combination with Braftovi (encorafenib) after prior therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CETUXIMAB (Erbitux)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Locally or regionally advanced squamous cell carcinoma of the head and neck (SCCHN) (a type of head and neck cancer that has spread from where it started to nearby tissue or lymph nodes)
      2. Recurrent locoregional disease or metastatic squamous cell carcinoma of the head and neck (SCCHN) (a type of head and neck cancer that has returned or has spread to other parts of the body)
      3. Recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (a type of head and neck cancer that has returned or has spread to other parts of the body)
      4. Metastatic colorectal cancer (mCRC) (a type of digestive cancer that has spread to other parts of the body)

   B. If you have locally or regionally advanced squamous cell carcinoma of the head and neck, approval also requires:
      1. Erbitux will be used in combination with radiation therapy

   C. If you have recurrent locoregional disease or metastatic squamous cell carcinoma of the head and neck, approval also requires:
      1. Erbitux will be used in combination with platinum-based therapy (such as cisplatin, carboplatin, oxaliplatin) and 5-fluorouracil (5-FU)

   D. If you have recurrent or metastatic squamous cell carcinoma of the head and neck, approval also requires:
      1. You have previously failed platinum-based therapy (such as cisplatin, carboplatin, oxaliplatin)

   (Denial text continued on next page)

CETUXIMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic colorectal cancer, approval also requires ONE of the following:

1. Your cancer is KRAS wild-type (a type of gene with NO mutation), epidermal growth factor receptor (EGFR)-expressing, as determined by a Food and Drug Administration (FDA)-approved test, AND you meet ONE of the following:
   a. Erbitux will be used in combination with FOLFIRI (irinotecan, 5-fluorouracil, leucovorin)
   b. Erbitux will be used in combination with irinotecan if you are refractory (resistant) to irinotecan-based chemotherapy
   c. You have failed oxaliplatin-based and irinotecan-based chemotherapy OR you are intolerant to irinotecan
2. Your cancer has a BRAF V600 mutation (abnormal change in a type of gene), as determined by a Food and Drug Administration (FDA)-approved test, and you meet ALL of the following:
   a. You are 18 years of age or older
   b. Erbitux will be used in combination with Braftovi (encorafenib) after prior therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the prescribing information and/or Drug Monograph for Erbitux.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

CHORIONIC GONADOTROPIN DvE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CHORIONIC GONADOTROPIN (Pregnyl, Novarel)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Prepubertal cryptorchidism not due to an anatomic obstruction (your testicles have not descended into your scrotum before puberty and this is not due to a blockage)
   2. Hypogonadism secondary to a pituitary deficiency (low levels of testosterone) and you are a male patient

This medication is not covered under Medicare Part D when used for induction of ovulation and pregnancy in an anovulatory (no release of egg during menstrual cycle), infertile (not able to get pregnant) woman.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

To limit the coverage of chorionic gonadotropin to the Medicare Part D covered indication of prepubertal cryptorchidism not due to anatomic obstruction or hypogonadism secondary to a pituitary deficiency in males, and exclude coverage for induction of ovulation and pregnancy (infertility).

For further information, please refer to the Prescribing Information and/or Drug Monograph for Novarel or Pregnyl.

CLOBAZAM-SYMPAZAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CLOBAZAM-SYMPAZAN** requires the following rule(s) be met for approval:

A. You have Lennox-Gastaut syndrome (type of seizure disorder in young children)
B. Sympazan will be used for adjunctive (add-on) treatment of seizures associated with Lennox-Gastaut syndrome
C. You are 2 years of age or older
D. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
E. You have a contraindication to (harmful for you to use) or are unable to swallow clobazam tablets or suspension

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

COLLAGENASE INJECTION BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

COLLAGENASE INJECTION BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **COLLAGENASE INJECTION (Xiaflex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Dupuytren's contracture (a genetic disorder) with a palpable cord (thick cord in the palm of the hand that can be felt)
   2. Peyronie's disease (painful erection and a curved penis caused by scar tissue)

B. Your doctor has completed Xiaflex training as provided by the Risk Evaluation and Mitigation Strategy (REMS) program

C. If you have Dupuytren's contracture with a palpable cord, approval also requires:
   1. You are 18 years of age or older

D. If you have Peyronie's disease, approval also requires:
   1. You are 18 years of age or older
   2. You are a male
   3. You have a palpable plaque (scar tissue) and curvature deformity (abnormality) of at least 30 degrees at the start of therapy (painful erection and a curved penis caused by scar tissue)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Xiaflex. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

CORTICOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, allergist/immunologist, ophthalmologist, pulmonologist or nephrologist
   - The patient had a trial of or contraindication to intravenous (IV) corticosteroids

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CORTICOTROPIN (Acthar, Cortrophin)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Infantile spasms (a type of seizure disorder in infancy and childhood)
      2. Acute exacerbation (sudden worsening of your symptoms) of multiple sclerosis (MS: a type of nerve disorder)
      3. Rheumatic disorders (disease affecting joints in the body)
         a. Psoriatic arthritis (a type of skin and joint condition)
         b. Rheumatoid arthritis (including juvenile rheumatoid arthritis: a type of joint condition)
         c. Ankylosing spondylitis (a type of joint condition)
      4. Collagen disease (diseases associated with defects in collagen)
         a. Systemic lupus erythematosus (a type of immune condition)
         b. Systemic dermatomyositis (polymyositis: a type of muscle and skin disorder)
      5. Dermatologic disease (diseases relating to the skin)
         a. Severe erythema multiforme (a type of immune condition)
         b. Stevens-Johnson syndrome (a serious skin disorder)
      6. Allergic disease
         a. Serum sickness (a type of immune hypersensitivity reaction)
      7. Ophthalmic disease (diseases involving the eye)
         a. Severe acute and chronic allergic and inflammatory processes involving the eye and its parts (such as keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis, optic neuritis, chorioretinitis, or anterior segment inflammation)

   (Initial denial text continued on next page)

CORTICOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

8. Respiratory disease (disease involving the lungs)
   a. Symptomatic sarcoidosis (a type of inflammatory disorder)
9. Edematous state (accumulation of excessive amount of fluid)
   a. To induce a diuresis (excessive urination) or a remission (reduction) of proteinuria (urine in protein) in the nephrotic syndrome without uremia of the idiopathic type, or that due to lupus erythematosus

B. If you have infantile spasms, approval also requires:
1. You are younger than 2 years of age

C. If you have an acute exacerbation of multiple sclerosis, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) IV (intravenous: injection into the vein) corticosteroids

D. For all other Food and Drug Administration (FDA) approved indications (except infantile spasms and multiple sclerosis), approval also requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), allergist/immunologist (a type of allergy/immune system doctor), ophthalmologist (a type of eye doctor), pulmonologist (a type of lung/breathing doctor) or nephrologist (a type of kidney doctor)
2. You have tried or have a contraindication to (harmful for you to use) IV (intravenous: injection into the vein) corticosteroids

NOTE: Our guideline does not approve corticotropin for diagnostic purposes (please consider cosyntropin [Cortrosyn]).

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CORTICOTROPIN (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of infantile spasms or multiple sclerosis, please refer to the Initial Criteria section.

1. Is the patient diagnosed with **ONE** of the following FDA approved indications?
   - A rheumatic disorder
     - Psoriatic arthritis (ICD-10 Group L40.5)
     - Rheumatoid arthritis, including juvenile rheumatoid arthritis (ICD-10 M06.9; Groups M05.7, M05.8, M05.9, M06.0, M06.8, M08.2)
     - Ankylosing spondylitis (ICD-10 Group M45. Exclude M45.A)
   - A collagen disease
     - Systemic lupus erythematosus (ICD-10 Group M32)
     - Systemic dermatomyositis (polymyositis) (ICD-10 M36.0; Group M33)
   - A dermatologic disease
     - Severe erythema multiforme (ICD-10 Group L51)
     - Stevens-Johnson syndrome (ICD-10 L51.1, L51.3)
   - An allergic disease
     - Serum sickness (ICD-10 T80.69XA; Group T80.6)
   - An ophthalmic disease
     - Severe acute and chronic allergic and inflammatory processes involving the eye and its adnexa (such as keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis, optic neuritis, chorioretinitis, or anterior segment inflammation)
   - A respiratory disease
     - Symptomatic sarcoidosis (ICD-10 Group D86)
   - An edematous state
     - To induce a diuresis or a remission of proteinuria in the nephrotic syndrome without uremia of the idiopathic type or that due to lupus erythematosus

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet the following criterion?
   - The patient demonstrated clinical benefit while on therapy as indicated by symptom resolution and/or normalization of laboratory tests

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

CORTICOTROPIN (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CORTICOTROPIN (Acthar Gel, Cortrophin)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Rheumatic disorders (disease affecting joints in the body)
      a. Psoriatic arthritis (a type of skin and joint condition)
      b. Rheumatoid arthritis (including juvenile rheumatoid arthritis: a type of joint condition)
      c. Ankylosing spondylitis (a type of joint condition)
   2. Collagen disease (diseases associated with defects in collagen)
      a. Systemic lupus erythematosus (a type of immune condition)
      b. Systemic dermatomyositis (polymyositis: a type of muscle and skin disorder)
   3. Dermatologic disease (diseases relating to the skin)
      a. Severe erythema multiforme (a type of immune condition)
      b. Stevens-Johnson syndrome (a serious skin disorder)
   4. Allergic disease
      a. Serum sickness (a type of immune hypersensitivity reaction)
   5. Ophthalmic disease (diseases involving the eye)
      a. Severe acute and chronic allergic and inflammatory processes involving the eye and its parts (such as keratitis, iritis, iridocyclitis, diffuse posterior uveitis and choroiditis, optic neuritis, chorioretinitis, or anterior segment inflammation)
   6. Respiratory disease (disease involving the lungs)
      a. Symptomatic sarcoidosis (a type of inflammatory disorder)
7. Edematous state (accumulation of excessive amount of fluid)
      a. To induce a diuresis (excessive urination) or a remission (reduction) of proteinuria (urine in protein) in the nephrotic syndrome without uremia of the idiopathic type, or that due to lupus erythematosus

B. You have experienced a clinical benefit while on treatment as indicated by symptom resolution (improvement) and/or normalization of laboratory tests

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CRIZANLIZUMAB-TMCA BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of sickle cell disease (ICD-10 Group D57) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient 16 to 17 years of age?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

CRIZANLIZUMAB-TMCA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient 18 years of age or older and meet **ONE** of the following criteria?
   - The patient had at least 2 sickle cell crises in the past year (a sickle cell crisis is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered narcotic or parenterally administered ketorolac, the occurrence of acute chest syndrome, priapism, or splenic sequestration)
   - The patient is having sickle-cell associated symptoms (e.g., pain or anemia) which are interfering with activities of daily living
   - The patient has a history of or has recurrent acute chest syndrome (ACS)

   If yes, **approve for 12 months by HICL or GPI-10**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CRIZANLIZUMAB-TMCA (Adakveo)** requires the following rule(s) be met for approval:
   A. You have sickle cell disease (type of red blood cell disorder)
   B. You are 16 years of age or older
   C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   D. If you are 18 years of age or older, approval also requires ONE of the following:
      1. You had at least 2 sickle cell crises in the past year. A sickle cell crisis is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered (given into the vein) narcotic or parenterally administered ketorolac, the occurrence of acute chest syndrome (ACS: chest pain, cough, fever and low oxygen levels), priapism (prolonged erection of penis), or splenic sequestration (suppressing spleen)
      2. You are having sickle-cell associated symptoms (such as pain or anemia) which are interfering with activities of daily living
      3. You have a history of or have recurrent acute chest syndrome (ACS: chest pain, cough, fever and low oxygen levels)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CRIZANLIZUMAB-TMCA BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of sickle cell disease (ICD-10 Group D57) **AND** meet the following criterion?
   - The patient has maintained or experienced a reduction in acute complications of sickle cell disease (e.g., number of sickle cell crises, hospitalizations, acute chest syndrome [ACS])

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CRIZANLIZUMAB-TMCA (Adakveo)** requires the following rule(s) be met for renewal:
   A. You have sickle cell disease (type of red blood cell disorder)
   B. You have maintained or experienced a reduction in acute (short term) complications of sickle cell disease (such as the number of sickle cell crises, hospitalizations, acute chest syndrome [chest pain, cough, fever and low oxygen levels])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Adakveo. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient's tumor is anaplastic lymphoma kinase (ALK)-positive as detected by an FDA-approved test
   - The patient's tumor is ROS1-positive as detected by an FDA-approved test

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of relapsed or refractory, systemic anaplastic large cell lymphoma (ALCL) (ICD-10 Group C84.6) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient's tumor is anaplastic lymphoma kinase (ALK)-positive

   If yes, continue to #5.
   If no, continue to #4.

CRIZOTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of unresectable, recurrent, or refractory inflammatory myofibroblastic tumor (IMT) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient's tumor is anaplastic lymphoma kinase (ALK)-positive

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Is the request for Xalkori (200mg or 250mg) capsules?

   If yes, **approve both 200mg and 250mg capsules for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Is the request for Xalkori (20mg, 50mg or 150mg) pellets **AND** the patient meets the following criterion?
   - The patient is unable to swallow capsules

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CRIZOTINIB (Xalkori)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
      2. Relapsed (disease that has returned) or refractory (disease does not respond to treatment), systemic anaplastic large cell lymphoma (ALCL: a type of blood cell cancer)
      3. Unresectable (unable to remove by surgery), recurrent, or refractory (disease does not respond to treatment) inflammatory myofibroblastic tumor (IMT: a rare type of tumor)

   (Denial text continued on next page)

CRIZOTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor is anaplastic lymphoma kinase (ALK: a type of enzyme)-positive or ROS1 (a type of gene)-positive as detected by a Food and Drug Administration (FDA)-approved test

C. If you have relapsed or refractory systemic anaplastic large cell lymphoma, approval also requires:
1. You are 1 year of age or older
2. Your tumor is anaplastic lymphoma kinase (ALK: a type of enzyme)-positive

D. If you have unresectable, recurrent, or refractory inflammatory myofibroblastic tumor, approval also requires:
1. You are 1 year of age or older
2. Your tumor is anaplastic lymphoma kinase (ALK: a type of enzyme)-positive

E. If the request is for Xalkori oral pellets, approval also requires:
1. You are not able to swallow capsules

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CROVALIMAB-AKKZ BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision).**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 13 years of age or older
   - The patient weighs at least 40 kgs (88 lbs)
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient has flow cytometry demonstrating at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes) AND a PNH granulocyte clone size of 10 percent or greater
   - Piasky will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]), C3 complement inhibitor therapy (e.g., Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CROVALIMAB-AKKZ BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **CROVALIMAB-AKKZ (Piasky)** requires the following rule(s) be met for approval:

A. You have paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
B. You are 13 years of age or older
C. You weigh at least 40 kilograms (88 pounds)
D. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
E. You have flow cytometry (a type of lab test) demonstrating at least 2 different GPI-protein deficiencies (you are missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell]) AND a PNH granulocyte clone size of 10 percent or greater
F. You will NOT use Piasky concurrently (at the same time) with C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]), C3 complement inhibitor therapy (such as Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

CROVALIMAB-AKKZ BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has had a clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase and hemoglobin levels) compared to baseline
   - Piasky will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]), C3 complement inhibitor therapy (e.g., Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CROVALIMAB-AKKZ (Piasky)** requires the following rule(s) be met for renewal:
   A. You have paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   B. You have had a clinical benefit (such as reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [an enzyme] and hemoglobin [type of protein in red blood cells] levels) compared to baseline (before you started treatment)
   C. You will NOT use Piasky concurrently (at the same time) with C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]), C3 complement inhibitor therapy (such as Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Piasky. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

CYCLOPHOSPHAMIDE BVD DETERMINATION (PART D)

RATIONALE

This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.
The 2019 Call Letter provided new guidance on how Part D sponsors are expected to determine whether immunosuppressants are coverable under Part D. Beginning in 2019, when the Part D plan receives new information from CMS (in MARx, ABII, or through a CMS program audit) indicating a Medicare covered transplant, it should rely on the new CMS information from that point forward, even if it is in conflict with the plan's prior research. ABII will not include renal transplants at this time, plans will continue to rely on MARx for renal transplant information).

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the request for the treatment of a venous thromboembolic event (VTE) (ICD-10 Groups I82.4, I82.5, I82.62, I82.72, I82.9, I26) **AND** the patient meets the following criterion?
   - The patient has been treated with a parenteral anticoagulation agent for at least 5 days

   If yes, continue to #3.
   If no, continue to #2.

2. Is the request to reduce the risk of venous thromboembolic event (VTE) recurrence **AND** the patient meets the following criterion?
   - The patient has been previously treated

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 3 months to 7 years of age
   - The patient is 8 to 11 years of age AND unable to swallow dabigatran (Pradaxa) capsules

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DABIGATRAN (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Has the patient had a trial of or contraindication to rivaroxaban (Xarelto) suspension?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DABIGATRAN (Pradaxa)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Treatment of a venous thromboembolic event (VTE: blood clot in the vein)
   2. To reduce the risk of a venous thromboembolic event recurrence (happening again)

B. If the request is for the treatment of a venous thromboembolic event, approval also requires:
   1. You have been treated with a parenteral (injected into the vein) anticoagulation agent (a type of medication that prevents blood clot formation) for at least 5 days
   2. You meet ONE of the following:
      a. You are 3 months to 7 years of age
      b. You are 8 to 11 years of age AND are unable to swallow dabigatran (Pradaxa) capsules
   3. You had a trial of or contraindication to (harmful for you to use) rivaroxaban (Xarelto) suspension

C. If the request is to reduce the risk of venous thromboembolic event recurrence, approval also requires:
   1. You have been previously treated
   2. You meet ONE of the following:
      a. You are 3 months to 7 years of age
      b. You are 8 to 11 years of age AND are unable to swallow dabigatran (Pradaxa) capsules
   3. You had a trial of or contraindication to (harmful for you to use) rivaroxaban (Xarelto) suspension

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DABRAFENIB CAPSULES (Tafinlar)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Unresectable or metastatic melanoma (skin cancer that cannot be completely removed by surgery or has spread to other parts of the body)
      2. Melanoma (a type of skin cancer)
      3. Metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of the body)
      4. Locally advanced or metastatic anaplastic thyroid cancer (ATC: a type of thyroid cancer that has spread from where it started to nearby tissue or lymph nodes or it has spread to other parts of the body)
      5. Unresectable or metastatic solid tumor (a tumor that cannot be completely removed by surgery or has spread to other parts of the body)
      6. Low-grade glioma (LGG: a type of brain cancer)

   B. If you have unresectable or metastatic melanoma, approval also requires ONE of the following:
      1. You have a BRAF V600E mutation (type of gene mutation) as detected by an FDA (Food and Drug Administration)-approved test AND Tafinlar will be used as a single agent (by itself)
      2. You have a BRAF V600E or V600K mutation (types of gene mutation) as detected by an FDA (Food and Drug Administration)-approved test AND Tafinlar will be used in combination with Mekinist (trametinib)

DABRAFENIB CAPSULES (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have melanoma, approval also requires:
1. You have a BRAF V600E or V600K mutation (type of gene mutations) as detected by an FDA (Food and Drug Administration)-approved test
2. Tafinlar will be used in combination with Mekinist (trametinib) for adjuvant (additional) treatment
3. There is involvement of lymph node(s) following complete resection (remove by surgery)

D. If you have metastatic non-small cell lung cancer, approval also requires:
1. You have a BRAF V600E mutation (type of gene mutation) as detected by an FDA (Food and Drug Administration)-approved test
2. Tafinlar will be used in combination with Mekinist (trametinib)

E. If you have locally advanced or metastatic anaplastic thyroid cancer, approval also requires:
1. You have a BRAF V600E mutation (type of gene mutation)
2. Tafinlar will be used in combination with Mekinist (trametinib)
3. You have no satisfactory locoregional (restricted to a localized region of the body) treatment options available

F. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You are 1 year of age or older
2. You have a BRAF V600E mutation (type of gene mutation)
3. Tafinlar will be used in combination with Mekinist (trametinib)
4. Your disease has progressed following prior treatment and has no satisfactory alternative treatment options

G. If you have low-grade glioma, approval also requires:
1. You are 1 to 17 years of age
2. You have a BRAF V600E mutation (type of gene mutation)
3. Tafinlar will be used in combination with Mekinist (trametinib)
4. You require systemic therapy (treatment that targets the entire body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DABRAFENIB SUSPENSION (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the patient unable to swallow Tafinlar (dabrafenib) capsules?

If yes, **approve for 12 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DABRAFENIB SUSPENSION (Tafinlar)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (skin cancer that cannot be completely removed by surgery or has spread to other parts of the body)
   2. Melanoma (a type of skin cancer)
   3. Metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of the body)
   4. Locally advanced or metastatic anaplastic thyroid cancer (ATC: a type of thyroid cancer that has spread from where it started to nearby tissue or lymph nodes, or it has spread to other parts of the body)
   5. Unresectable or metastatic solid tumor (a tumor that cannot be completely removed by surgery or has spread to other parts of the body)
   6. Low-grade glioma (LGG: a type of brain cancer)

B. You are unable to swallow Tafinlar (dabrafenib) capsules

C. If you have unresectable or metastatic melanoma, approval also requires ONE of the following:
   1. You have a BRAF V600E mutation (type of gene mutation) as detected by a Food and Drug Administration (FDA)-approved test AND Tafinlar will be used as a single agent (by itself)
   2. You have a BRAF V600E or V600K mutation (types of gene mutation) as detected by a Food and Drug Administration (FDA)-approved test AND Tafinlar will be used in combination with Mekinist (trametinib)

D. If you have melanoma, approval also requires:
   1. You have a BRAF V600E or V600K mutation (type of gene mutations) as detected by a Food and Drug Administration (FDA)-approved test
   2. Tafinlar will be used in combination with Mekinist (trametinib) for adjuvant (additional) treatment
   3. There is involvement of lymph node(s) following complete resection (remove by surgery)

   Our guideline named **DACOMITINIB (Vizimpro)** requires the following rule(s) be met for approval:
   A. You have metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
   B. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletion or exon 21 L858R substitution mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   C. You will NOT use Vizimpro concurrently (at the same time) with an epidermal growth factor receptor (EGFR) tyrosine kinase-inhibitor (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib], Tagrisso [osimertinib])

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of multiple sclerosis (MS) (ICD-10 G35) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has symptoms of a walking disability (e.g., mild to moderate bilateral lowerextremity weakness, unilateral weakness with lower extremity or truncal ataxia)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DALFAMPRIDINE (Ampyra)** requires the following rule(s) be met for approval:
   A. You have multiple sclerosis (MS: a type of nerve disorder)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
   D. You have symptoms of a walking disability (such as mild to moderate bilateral [bothsides] lower extremity weakness, unilateral [one side] weakness with lower extremity or truncal ataxia [impaired balance or coordination])

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - Voydeya will be used for the treatment of extravascular hemolysis (EVH)
   - The patient has anemia (Hgb level less than or equal to 9.5 g/dL) with an absolute reticulocyte count of at least 120 x 10^9/L
   - The patient has flow cytometry demonstrating at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes) AND a PNH granulocyte clone size of at least 10 percent
   - Voydeya will be used concurrently with C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab])
   - Voydeya will NOT be used concurrently with C3 complement inhibitor therapy (e.g., Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   If yes, **approve for 4 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

DANICOPAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DANICOPAN (Voydeya)** requires the following rule(s) be met for approval:

A. You have paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
D. You will use Voydeya for the treatment of extravascular hemolysis (EVH: break down of blood cells outside of your blood stream)
E. You have anemia (a hemoglobin [Hgb: a type of protein in red blood cells] level less than or equal to 9.5 g/dL) with an absolute reticulocyte (immature red blood cell) count of at least 120 x 10^9/L
F. You have flow cytometry (a type of lab test) demonstrating at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell]) AND a PNH granulocyte clone size of at least 10 percent
G. You will use Voydeya concurrently (at the same time) with C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab])
H. You will NOT use Voydeya concurrently (at the same time) with C3 complement inhibitor therapy (such as Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (such as Fabhalta [iptacopan])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   - Darzalex Faspro will be used in combination with bortezomib (Velcade), thalidomide (Thalomid), and dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Is the patient's disease relapsed or refractory and the patient meets **ONE** of the following criteria?
   - The patient has received at least one prior therapy, AND Darzalex Faspro will be used in combination with lenalidomide (Revlimid) and dexamethasone
   - The patient has received one to three prior lines of therapy, AND Darzalex Faspro will be used in combination with carfilzomib (Kyprolis) and dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Has the patient received at least one prior therapy **AND** meets the following criterion?
   - Darzalex Faspro will be used in combination with bortezomib (Velcade) and dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

DARATUMUMAB-HYALURONIDASE-FIHJ (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Has the patient received at least one prior line of therapy, including lenalidomide (Revlimid) anda proteasome inhibitor [e.g., bortezomib (Velcade), carfilzomib (Kyprolis), ixazomib (Ninlaro)] **AND** meets the following criterion?
   - Darzalex Faspro will be used in combination with pomalidomide (Pomalyst) and dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Will Darzalex Faspro be used as monotherapy and the patient meets **ONE** of the following criteria?
   - The patient has received at least three prior lines of therapy, including a proteasome inhibitor (e.g., bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro]) and an immunomodulatory agent (e.g., lenalidomide [Revlimid], pomalidomide [Pomalyst], thalidomide [Thalomid])
   - The patient is refractory to both a proteasome inhibitor (e.g., bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro]) and an immunomodulatory agent (e.g., lenalidomide [Revlimid], pomalidomide [Pomalyst], thalidomide [Thalomid])
   - The patient has high-risk smoldering multiple myeloma

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have newly diagnosed light chain (AL) amyloidosis (ICD-10 E85.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Darzalex Faspro will be used in combination with bortezomib (Velcade), cyclophosphamide, and dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DARATUMUMAB-HYALURONIDASE-FIHJ (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DARATUMUMAB-HYALURONIDASE-FIHJ (Darzalex Faspro)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Multiple myeloma (a type of blood cancer)
   2. Newly diagnosed light chain (AL) amyloidosis (a buildup of proteins in the tissues causing organ dysfunction)

B. You are 18 years of age or older

C. If you have multiple myeloma, approval also requires ONE of the following:
   1. Your disease is newly diagnosed and you meet ONE of the following:
      a. You are NOT eligible for an autologous stem cell transplant (a type of procedure to replace damaged bone marrow with cells from your own body) and you meet ONE of the following:
         i. You will use Darzalex Faspro in combination with bortezomib (Velcade), melphalan, and prednisone
         ii. You will use Darzalex Faspro in combination with lenalidomide (Revlimid) and dexamethasone
         iii. You will use Darzalex Faspro in combination with bortezomib (Velcade), lenalidomide (Revlimid) and dexamethasone
      b. You are eligible for an autologous stem cell transplant (a type of procedure to replace damaged bone marrow with cells from your own body) and you meet ONE of the following:
         i. You will use Darzalex Faspro in combination with bortezomib (Velcade), lenalidomide (Revlimid), and dexamethasone for induction (start of treatment) and consolidation treatment (treatment following initial therapy)
         ii. You will use Darzalex Faspro in combination with bortezomib (Velcade), thalidomide (Thalomid), and dexamethasone
   2. Your disease is relapsed or refractory (disease has returned or did not respond to treatment) and you meet ONE of the following:
      a. You have received at least one prior therapy AND you will use Darzalex Faspro in combination with lenalidomide (Revlimid) and dexamethasone
      b. You have received one to three prior lines of therapy AND you will use Darzalex Faspro in combination with carfilzomib (Kyprolis) and dexamethasone
   3. You have received at least one prior therapy AND you will use Darzalex Faspro in combination with bortezomib (Velcade) and dexamethasone
   4. You have received at least one prior line of therapy, including lenalidomide (Revlimid) and a proteasome inhibitor (such as bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro]), AND you will use Darzalex Faspro in combination with pomalidomide (Pomalyst) and dexamethasone

DARATUMUMAB-HYALURONIDASE-FIHJ (PART D)

GUIDELINES FOR USE (CONTINUED)

5. You will use Darzalex Faspro as monotherapy (one drug treatment) and meet ONE of the following:
   a. You have received at least three prior lines of therapy, including a proteasome inhibitor (such as bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro]) AND an immunomodulatory agent (such as lenalidomide [Revlimid], pomalidomide [Pomalyst], thalidomide [Thalomid])
   b. You are refractory (disease did not respond to treatment) to both a proteasome inhibitor (such as bortezomib [Velcade], carfilzomib [Kyprolis], ixazomib [Ninlaro]) AND an immunomodulatory agent (such as lenalidomide [Revlimid], pomalidomide [Pomalyst], thalidomide [Thalomid])
   c. You have high-risk smoldering multiple myeloma (the stage before active disease)

D. If you have newly diagnosed light chain amyloidosis, approval also requires:

1. You will use Darzalex Faspro in combination with bortezomib (Velcade), cyclophosphamide, and dexamethasone

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

DARAXONRASIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
DARAXONRASIB	RASONQUE	51500		GPI-10 (2153432000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic pancreatic adenocarcinoma (ICD-10 Group C25) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - The patient has received at least one prior systemic therapy OR is not a candidate for a multiagent systemic therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: Our guideline named **DARAXONRASIB (Rasonque)** requires the following rule(s) be met for approval:
   A. You have metastatic pancreatic adenocarcinoma (a type of pancreas cancer that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   D. You have received at least one prior systemic therapy (treatment that targets the entire body) OR you are not a candidate for a multiagent systemic therapy

RATIONALE

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, **do NOT approve under Part D. Finalize as follows:**

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment which is paid under Medicare Part B and is not a Part D eligible drug. Please follow your internal procedures for denial.

   If no, review the clinical criteria for Part D coverage below if applicable. (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

Guideline interpretation beyond this point requires Clinical/Technician review.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of anemia due to chronic kidney disease (CKD) (ICD-10 D63.1) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10 g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of anemia due to the effects of concomitantly administered cancer chemotherapy (ICD-10 D64.81) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10 g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DARBEPOETIN ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DARBEPOETIN ALFA (Aranesp)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Anemia (low amount of healthy red blood cells) due to chronic kidney disease (CKD)
   2. Anemia due to the effects of concomitantly administered (given at the same time) cancer chemotherapy

B. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)

C. Your hemoglobin level (type of blood test) is less than 10 g/dL

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DARBEPOETIN ALFA (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of anemia due to chronic kidney disease (CKD) (ICD-10 D63.1) **AND** meet the following criterion?
   - The patient is NOT receiving dialysis treatment
     [Note: If the patient is currently receiving dialysis treatment, the requested medication is included in the bundle dialysis facility payment which is paid under Medicare Part B]. Please refer to CRITERIA FOR PART B vs PART D DETERMINATION above.

     If yes, continue to #2.
     If no, continue to #4.

2. Is the patient an adult (18 years of age or older) and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level has reached 10 g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #3.

3. Is the request for a pediatric (less than 18 years of age) patient and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level has approached or exceeds 12 g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

DARBEPOETIN ALFA (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of anemia due to the effects of concomitantly administered cancer chemotherapy (ICD-10 D64.81) and meet **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level does not exceed a level needed to avoid red blood cell (RBC) transfusion

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DARBEPOETIN ALFA (Aranesp)** requires the following rules be met for renewal.

   A. You have ONE of the following:
      1. Anemia (low amount of healthy red blood cells) due to chronic kidney disease (CKD)
      2. Anemia due to the effects of concomitantly administered (given at the same time) cancer chemotherapy

   B. If you are an adult with anemia due to chronic kidney disease, renewal also requires:
      1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
      2. Your hemoglobin level (type of blood test) is less than 10 g/dL OR has reached 10 g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

   C. If you are a pediatric patient with anemia due to chronic kidney disease, renewal also requires:
      1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
      2. Your hemoglobin level (a type of blood test) is less than 10 g/dL OR has approached or exceeds 12 g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

   D. If you have anemia due to the effects of concomitantly administered cancer chemotherapy, renewal also requires ONE of the following:
      1. Your hemoglobin level (type of blood test) is less than 10 g/dL
      2. Your hemoglobin level does not exceed a level needed to avoid red blood cell (RBC) transfusion

   (Renewal denial text continued on next page)

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-metastatic castration resistant prostate cancer (nmCRPC) (ICD-10 Z19.2, C61) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic castration-sensitive prostate cancer (mCSPC) (ICD-10 Z19.1, C61) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DAROLUTAMIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient has received a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., less than 50 ng/dL)
   - Nubeqa will be used concurrently with a gonadotropin releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DAROLUTAMIDE (Nubeqa)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Non-metastatic castration resistant prostate cancer (nmCRPC: prostate cancer that has not spread to other parts of the body and does not respond to hormone therapy)
      2. Metastatic castration-sensitive prostate cancer (mCSPC: prostate cancer that has spread to other parts of the body and responds to hormone therapy)
   B. You are 18 years of age or older
   C. You meet ONE of the following:
      1. You have received a bilateral orchiectomy (both testicles have been surgically removed)
      2. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
      3. Nubeqa will be used concurrently (at the same time) with a gonadotropin releasing hormone analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DASATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DASATINIB (Sprycel)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Philadelphia chromosome-positive chronic myeloid leukemia (Ph+ CML: a type of blood cell cancer)
   2. Philadelphia chromosome-positive acute lymphoblastic leukemia (Ph+ ALL: a type of blood cell cancer)

B. If you have Philadelphia chromosome-positive chronic myeloid leukemia in chronic phase, approval also requires ONE of the following:
   1. You are 18 years of age or older AND you are newly diagnosed (such as you are starting or previously started treatment with the requested medication at the time your condition was identified)
   2. You are between 1 and 17 years of age

C. If you have Philadelphia chromosome-positive chronic myeloid leukemia in chronic phase, accelerated phase, myeloid or lymphoid blast phase, approval also requires:
   1. You are 18 years of age or older
   2. You have resistance (medication no longer works as well) or intolerance (side effect) to prior therapy including imatinib (Gleevec)
   3. You had a mutational analysis (a type of lab test) prior to start of therapy AND the requested medication is appropriate based on the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile

D. If you have Philadelphia chromosome-positive acute lymphoblastic leukemia, approval also requires ONE of the following:
   1. You are 18 years of age or older AND have a resistance (medication no longer works as well) or intolerance (side effect) to prior therapy (such as imatinib [Gleevec] or nilotinib [Tasigna])
   2. You are between 1 and 17 years of age; you are newly diagnosed (such as you are starting or previously started treatment with the requested medication at the time your condition was identified); AND you will be using the requested medication in combination with chemotherapy (medications used to treat cancer)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

DAXIBOTULINUMTOXINA-LANM BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

DAXIBOTULINUMTOXINA-LANM BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the request for treatment of a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8; Group L81)?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of cervical dystonia (ICD-10 G24.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DAXIBOTULINUMTOXINA-LANM BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DAXIBOTULINUMTOXINA-LANM (Daxxify)** requires the following rule(s) be met for approval:

A. You have cervical dystonia (a type of muscle condition)
B. You are 18 years of age or older
C. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

NOTE: This medication will not be approved for the treatment of a cosmetic indication (such as wrinkles - glabellar [between the eyebrows] lines, lateral canthal [outer corner of eye] lines, forehead lines).

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Daxxify. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

DECITABINE/CEDAZURIDINE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet **ALL** of the following criteria?
   - The patient is newly diagnosed (e.g., starting or previously started Inqovi treatment at the time of diagnosis)
   - Inqovi will be used in combination with Venclexta (venetoclax)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient is 75 years of age or older
   - The patient is 18 years of age or older with comorbidities that preclude the use of intensive induction chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DECITABINE/CEDAZURIDINE (Inqovi)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Myelodysplastic syndromes (MDS: a type of blood cancer)
      2. Chronic myelomonocytic leukemia (CMML: a type of blood cancer)
      3. Acute myeloid leukemia (AML: a type of blood and bone marrow cancer)

   B. If you have myelodysplastic syndromes, approval also requires:
      1. You are 18 years of age or older
      2. You have an International Prognostic Scoring System (IPSS: a tool for evaluating severity of myelodysplastic syndrome) group of intermediate-1, intermediate-2, or high-risk

   C. If you have chronic myelomonocytic leukemia, approve also requires:
      1. You are 18 years of age or older

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic iron overload due to blood transfusions (transfusion dependent) (ICD-10 E83.111) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or hematologist/oncologist
   - The patient has serum ferritin levels that are consistently greater than 1000 mcg/L

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of thalassemia (ICD-10 Group D56) and meet **ALL** of the following criteria?
   - The patient is 10 years of age or older
   - The patient has chronic iron overload resulting from non-transfusion dependent thalassemia (NTDT) syndrome
   - Therapy is prescribed by or in consultation with a hematologist or hematologist-oncologist
   - The patient has serum ferritin levels that are consistently greater than 300 mcg/L (at least two lab values in the previous 3 months)
   - The patient has a liver iron concentration (LIC) of at least 5 mg Fe/g of liver dry weight

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at end of guideline.

DEFERASIROX (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for Exjade (deferasirox) tablet for oral suspension or Jadenu (deferasirox) tablets?

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of both Exjade (deferasirox) tablet for oral suspension and Jadenu (deferasirox) tablets.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the request for Jadenu (deferasirox) sprinkle packets **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to generic deferasirox tablet OR deferasirox tablet for oral suspension

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DEFERASIROX (Exjade, Jadenu, Jadenu Sprinkle)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Chronic iron overload due to blood transfusions (too much iron in the body caused by blood transfers)
      2. Thalassemia (a type of blood disorder)

   B. If you have chronic iron overload due to blood transfusions, approval also requires:
      1. You are 2 years of age or older
      2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or hematologist/oncologist (a type of cancer doctor)
      3. Your serum ferritin levels (a type of lab test) are consistently greater than 1000 mcg/L

   (Initial denial text continued on next page)

DEFERASIROX (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have thalassemia, approval also requires:
1. You are 10 years of age or older
2. You have chronic iron overload (too much iron in the body) resulting from non-transfusion dependent thalassemia (NDDT: type of blood disorder that does not require regular blood transfusion) syndrome
3. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or hematologist-oncologist (a type of cancer doctor)
4. Your serum ferritin levels (a type of lab test) are consistently greater than 300 mcg/L (at least TWO lab values in the previous 3 months)
5. You have a liver iron concentration (LIC) of at least 5 mg of iron per gram (Fe/g) of liver dry weight

D. If you are requesting Jadenu (deferasirox) sprinkle packets, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) generic deferasirox tablet OR deferasirox tablet for oral suspension

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEFERASIROX (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of chronic iron overload due to blood transfusions (ICD-10 E83.111) **AND** meet the following criterion?
   - The patient has serum ferritin levels that are consistently greater than 500 mcg/L

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of thalassemia (ICD-10 Group D56) and meet **ONE** of the following criteria?
   - The patient has serum ferritin levels that are consistently greater than 300 mcg/L (at least two lab values in the previous 3 months)
   - The patient has a liver iron concentration (LIC) of at least 3 mg Fe/g of liver dry weight (*Liver iron concentration supersedes serum ferritin level when both measurements are available*)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

DEFERASIROX (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEFERASIROX (Exjade, Jadenu, Jadenu Sprinkle)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Chronic iron overload due to blood transfusions (too much iron in the body caused by blood transfers)
   2. Thalassemia (a type of blood disorder)

B. If you have chronic iron overload due to blood transfusions, renewal also requires:
   1. Your serum ferritin levels (a type of lab test) are consistently greater than 500 mcg/L

C. If you have thalassemia, renewal also requires ONE of the following:
   1. Your serum ferritin levels (a type of lab test) are consistently greater than 300 mcg/L (at least TWO lab values in the previous 3 months)
   2. You have a liver iron concentration (LIC) of at least 3 mg of iron per gram (Fe/g) of liver dry weight

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEFERIPRONE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEFERIPRONE (Ferriprox)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Thalassemia (a blood disorder)
   2. Sickle cell disease (a type of blood disorder)
   3. Anemia (a type of blood disorder)

B. If you have thalassemia, approval also requires:
   1. You have transfusional iron overload (too much iron in the body caused by blood transfusions)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or hematologist-oncologist (a type of cancer doctor)
   3. You meet ONE of the following:
      a. You had a trial of, contraindication to (harmful for you to use), intolerable toxicities with, or clinically significant adverse effects with a formulary version of deferasirox (Exjade, Jadenu) OR deferoxamine (Desferal)
      b. Your current chelation therapy (a type of drug that lowers iron level) (Exjade [deferasirox], Jadenu [deferasirox], or Desferal [deferoxamine]) is not working well enough

C. If you have sickle cell disease or anemia, approval also requires:
   1. You have transfusional iron overload (too much iron in the body caused by blood transfusions)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or hematologist-oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) a formulary version of deferasirox (Exjade, Jadenu) OR deferoxamine (Desferal)

D. If the request is for Ferriprox (deferiprone) tablets, approval also requires:
   1. You are 8 years of age or older

E. If the request is for Ferriprox (deferiprone) oral solution, approval also requires:
   1. You are 3 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEFERIPRONE (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Thalassemia (ICD-10 Group D56)
   - Sickle cell disease (ICD-10 Group D57)
   - Anemia (ICD-10 Group D64)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet the following criterion?
   - The patient's serum ferritin levels are consistently above 500 mcg/L (at least two lab values in the previous 3 months)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Is the request for Ferriprox (deferiprone) tablets **AND** the patient meets the following criterion?
   - The patient is 8 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the request for Ferriprox (deferiprone) oral solution **AND** the patient meets the following criterion?
   - The patient is 3 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for the oral solution formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

DEFERIPRONE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEFERIPRONE (Ferriprox)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Thalassemia (a type of blood disorder)
   2. Sickle cell disease (a type of blood disorder)
   3. Anemia (a type of blood disorder)

B. Your serum ferritin levels (a type of lab test) are consistently above 500 mcg/L (at least TWO lab values in the previous 3 months)

C. If the request is for Ferriprox (deferiprone) tablets, renewal also requires:
   1. You are 8 years of age or older

D. If the request is for Ferriprox (deferiprone) oral solution, renewal also requires:
   1. You are 3 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ferriprox.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Does the patient have a diagnosis of end stage renal disease (ESRD) (ICD-10 N18.6) and is on dialysis?

   If yes, please process as follows:

   CSR Note: If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3. If the caller is a pharmacy, please advise the pharmacy to bill the medication as part of the bundled dialysis facility payment or that the pharmacy contact the provider or member to submit a PA for further review.

   PAC Note: Please defer to a pharmacist for denial.

   Clinical specialist Note: This medication is included in the bundled dialysis facility payment and is not a Part D eligible drug. Please follow the process within the HQ notes and internal procedures for denial.

   If no, continue to #2.

2. Is this a pharmacy call?

   If yes, continue to #4.
   If no, continue to #3.

3. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #4.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

4. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #7.
   If no, continue to #5.

DEFEROXAMINE BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #7.
   If no, continue to #6.

6. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field). If MI does not process Part B for the client, refer the caller/request back to the Health plan).**

7. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan).**

   If no, continue to #8.

8. Is the drug administered via an external pump?

   If yes, continue to #9.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

DEFEROXAMINE BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

9. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

DEFEROXAMINE BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acute iron intoxication (ICD-10 Group T45.4)?

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of transfusional iron overload with chronic anemia and meet **ALL** of the following criteria?
   - The patient is 3 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or hematologist-oncologist
   - The patient's serum ferritin levels are consistently greater than 1000 mcg/L (at least two lab values in the previous 3 months)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DEFEROXAMINE BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEFEROXAMINE (Desferal)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Acute (short-term) iron intoxication
   2. Transfusional iron overload with chronic anemia (too much iron in the body caused by blood transfusions due to a long-term blood condition)

B. If you have transfusional iron overload with chronic anemia, approval also requires:
   1. You are 3 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or hematologist-oncologist (a type of cancer doctor)
   3. Your serum ferritin levels (a type of lab test) are consistently greater than 1000 mcg/L (at least TWO lab values in the previous 3 months)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEFEROXAMINE BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of acute iron intoxication (ICD-10 Group T45.4)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of transfusional iron overload with chronic anemia **AND** meet the following criterion?
   - The patient's serum ferritin levels are consistently greater than 500 mcg/L (at least two lab values in the previous 3 months)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DEFEROXAMINE (Desferal)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Acute (short-term) iron intoxication
      2. Transfusional iron overload with chronic anemia (too much iron in the body caused by blood transfusions due to a long-term blood condition)

   B. If you have transfusional iron overload with chronic anemia, renewal also requires:
      1. Your serum ferritin levels (a type of lab test) are consistently greater than 500 mcg/L (at least two lab values in the previous 3 months)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEFEROXAMINE BvD (PART D)

RATIONALE

For further information, please refer to the prescribing information and/or Drug monograph for Desferal.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx. Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis of DMD is confirmed by genetic testing

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient tried prednisone or prednisolone?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Did the patient experience an adverse effect (e.g., weight gain) on prednisone or prednisolone?

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

DEFLAZACORT (PART D)

INITIAL CRITERIA (CONTINUED)

4. Did the patient experience a lack of efficacy with prednisone or prednisolone and meets **ALL** of the following criteria?
   - The patient is not in Stage 1 of the disease (the pre-symptomatic phase)
   - Steroid myopathy has been ruled out
   - The patient has experienced deterioration in ambulation, functional status, or pulmonary function that is consistent with advancing disease

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DEFLAZACORT (Emflaza, Jaythari, Kymbee, Pyquvi)** requires the following rule(s) be met for approval:
   A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
   D. Your diagnosis of Duchenne muscular dystrophy is confirmed by genetic testing
   E. You have tried prednisone or prednisolone and meet ONE of the following:
      1. You have experienced an adverse effect (side effects such as weight gain) on prednisone or prednisolone
      2. Prednisone or prednisolone did not work for you, and you meet ALL of the following:
         a. You are not in Stage 1 of the disease (the pre-symptomatic phase)
         b. There is no steroid myopathy (muscle disease due to steroid use)
         c. You have experienced a decrease in your walking, functional status, or breathing that is consistent with advancing disease

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   If no, continue to #4.

4. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to ONE of the following agents for ABSSSI:
     - Gram positive targeting antibiotic (e.g., linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin)
     - Penicillin antibiotic (e.g., amoxicillin)
     - Fluoroquinolone antibiotic (e.g., levofloxacin, ciprofloxacin, moxifloxacin)
     - Cephalosporin antibiotic (e.g., ceftriaxone, cephalexin, cefazolin)

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient have a diagnosis of community-acquired bacterial pneumonia (CABP) (ICD-10 J15.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's CABP infection is caused by any of the following susceptible microorganisms: *Streptococcus pneumoniae, Staphylococcus aureus (methicillin-susceptible* [MSSA] *isolates only), Klebsiella pneumoniae, Escherichia coli, Pseudomonas aeruginosa, Haemophilus influenzae, Haemophilus parainfluenzae, Chlamydia pneumoniae, Legionella pneumophila,* or *Mycoplasma pneumoniae*

   If yes, continue to #6.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DELAFLOXACIN (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Is the request for continuation of care from an inpatient setting?

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is therapy prescribed by or in consultation with an infectious disease (ID) specialist?

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to TWO standard of care agents for CABP (e.g., macrolide [e.g., azithromycin], doxycycline, alternative fluoroquinolone [e.g., levofloxacin, moxifloxacin], beta-lactam [e.g., amoxicillin, ceftriaxone], linezolid)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Baxdela

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to TWO standard of care agents for CABP (e.g., macrolide [azithromycin], doxycycline, levofloxacin, moxifloxacin, beta-lactam [amoxicillin, ceftriaxone], linezolid)

   If yes, **approve for 1 month by HICL or GPI-10 for one fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

DELAFLOXACIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DELAFLOXACIN (Baxdela)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Acute bacterial skin and skin structure infection (ABSSSI: a type of skin condition)
   2. Community-acquired bacterial pneumonia (CABP: type of lung infection)

B. If you have an acute bacterial skin and skin structure infection, approval also requires:
   1. You are 18 years of age or older
   2. Your infection is caused by any of the following bacteria: Staphylococcus aureus (including methicillin-resistant [MRSA] and methicillin-susceptible [MSSA] isolates), Staphylococcus haemolyticus, Staphylococcus lugdunensis, Streptococcus agalactiae, Streptococcus anginosus Group (including Streptococcus anginosus, Streptococcus intermedius, and Streptococcus constellatus), Streptococcus pyogenes, Enterococcus faecalis, Escherichia coli, Enterobacter cloacae, Klebsiella pneumoniae, or Pseudomonas aeruginosa
   3. You meet ONE of the following:
      a. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
      b. Your antimicrobial susceptibility testing (lab test that shows what medications work on which bacteria) shows ALL of the following:
         i. The bacteria at the infection site are resistant (medication will not work for that bacteria) to ONE standard of care medication for acute bacterial skin and skin structure infection (such as sulfamethoxazole/trimethoprim, levofloxacin, clindamycin, cephalexin, vancomycin)
         ii. Baxdela will work against the bacteria
      c. If antimicrobial susceptibility results (lab test that shows what medications work on which bacteria) are not available, approval requires that you had a trial of or contraindication to (harmful for you to use) ONE of the following medications for acute bacterial skin and skin structure infection: a penicillin (such as amoxicillin), a fluoroquinolone (such as levofloxacin, ciprofloxacin, moxifloxacin), a cephalosporin (such as ceftriaxone, cephalexin, cefazolin), or a gram positive targeting antibiotic (such as linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin)

(Denial text continued on next page)

DELAFLOXACIN (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have community-acquired bacterial pneumonia, approval also requires:

1. You are 18 years of age or older
2. Your infection is caused by any of the following bacteria: Streptococcus pneumoniae, Staphylococcus aureus (methicillin-susceptible [MSSA] isolates only), Klebsiella pneumoniae, Escherichia coli, Pseudomonas aeruginosa, Haemophilus influenzae, Haemophilus parainfluenzae, Chlamydia pneumoniae, Legionella pneumophila or Mycoplasma pneumoniae
3. You meet ONE of the following:
   a. Your request is for continuation of care from an inpatient setting (a healthcare facility where medical treatment is given overnight or longer)
   b. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   c. Your antimicrobial susceptibility testing (lab test showing what medications work on which bacteria) shows ALL of the following:
      i. The bacteria at the infection site are resistant (medication will not work for that bacteria) to TWO standard of care medications for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)
      ii. Baxdela will work against the bacteria
   d. If antimicrobial susceptibility results (lab test that shows what medications work on which bacteria) are not available, we require that you had a trial of or contraindication to (harmful for you to use) TWO standard of care medications for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe chronic hand eczema (CHE) (ICD-10 L30.8, L30.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a modified Investigator's Global Assessment for Chronic Hand Eczema (IGA-CHE) score of 3 or 4
   - The patient had a trial of or contraindication to a topical corticosteroid of medium potency or greater (e.g., triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])
   - The patient had a trial of or contraindication to Eucrisa (crisaborole)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DELGOCITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Will Anzupgo be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
   - Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Zoryve (roflumilast)], JAKinhibitors [e.g., Opzelura (ruxolitinib)], AhR agonists [e.g., Vtama (tapinarof)])
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 4 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DELGOCITINIB (Anzupgo)** requires the following rule(s) be met for approval:
   A. You have moderate to severe chronic hand eczema (CHE: a type of skin condition)
   B. You are 18 years of age or older
   C. You have a modified Investigator's Global Assessment for Chronic Hand Eczema (IGA-CHE: a tool for evaluating the severity of your condition) score of 3 or 4
   D. You have tried or have a contraindication to (harmful for you to use) a topical corticosteroid of medium potency or greater (such as triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])
   E. You have tried or have a contraindication to (harmful for you to use) Eucrisa (crisaborole)
   (Initial denial text continued on next page)

DELGOCITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

F. You will NOT use Anzupgo concurrently (at the same time) with ANY of the following for the treatment of atopic dermatitis (a type of skin condition):
   1. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole), Zoryve (roflumilast)], JAK [Janus kinase] inhibitors [such as Opzelura (ruxolitinib)], AhR [aryl hydrocarbon receptor] agonists [such as Vtama (tapinarof)])
   2. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   3. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   4. Potent immunosuppressants (such as azathioprine, cyclosporine)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

DENOSUMAB-BMWO - OSENVELT BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of hypercalcemia of malignancy **AND** meet the following criterion?
   - The patient is refractory to a bisphosphonate therapy (e.g., Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DENOSUMAB-BMWO - OSENVELT** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Multiple myeloma (a type of blood cancer)
      2. Bone metastases from a solid tumor (tumor has spread to the bone)
      3. Giant cell tumor of bone (noncancerous tumor)
      4. Hypercalcemia (high level of calcium in the blood) of malignancy (cancer)

   B. If you have multiple myeloma or bone metastases from a solid tumor, approval also requires:
      1. Osenvelt will be used to prevent skeletal-related events (such as bone fractures, bone pain requiring radiation [a type of treatment])

   C. If you have giant cell tumor of bone, approval also requires:
      1. Your tumor is unresectable (unable to remove by surgery) or surgical resection (removal) is likely to result in severe morbidity (illness)

   D. If you have hypercalcemia of malignancy, approval also requires:
      1. You are refractory (disease did not respond to treatment) to a prior bisphosphonate therapy (such as Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DENOSUMAB-XGEVA (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
DENOSUMAB	XGEVA		29261	GPI-14 (30044530002030)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (ICD-10 Group C90.0) OR bone metastases from solid tumor **AND** meet the following criterion?
   - Xgeva will be used to prevent skeletal-related events (e.g., bone fractures, bone pain requiring radiation)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell tumor of bone (ICD-10 D48.0) **AND** meet the following criterion?
   - The patient's tumor is unresectable or surgical resection is likely to result in severe morbidity

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

DENOSUMAB-XGEVA (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of hypercalcemia of malignancy **AND** meet the following criterion?
   - The patient is refractory to a bisphosphonate therapy (e.g., Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DENOSUMAB-XGEVA** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Multiple myeloma (a type of blood cancer) or bone metastases from a solid tumor (abnormal mass)
      2. Giant cell tumor of bone (noncancerous tumor)
      3. Hypercalcemia (high level of calcium in the blood) of malignancy (cancer)
   B. If you have multiple myeloma or bone metastases from a solid tumor, approval also requires:
      1. Xgeva is being used to prevent skeletal-related events (such as bone fractures, bone pain requiring radiation)
   C. If you have giant cell tumor of bone, approval also requires:
      1. Your tumor is unresectable (unable to remove by surgery) or surgical removal is likely to result in severe morbidity (illness)
   D. If you have hypercalcemia of malignancy, approval also requires:
      1. You are refractory (disease did not respond to treatment) to a prior bisphosphonate therapy (such as Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the prescribing information and/or Drug Monograph for Xgeva.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01,ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

DEPEMOKIMAB-ULAA BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary medicine
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the last 12 months
   - Exdensur will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline)
   - Exdensur will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)

     If yes, continue to #2.
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

DEPEMOKIMAB-ULAA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g. prednisone) burst lasting at least 3 days within the past 12 months
   - The patient experienced at least ONE serious asthma exacerbation requiring hospitalization or emergency room visit within the past 12 months

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DEPEMOKIMAB-ULAA BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEPEMOKIMAB-ULAA (Exdensur)** requires the following rule(s) be met for approval:

A. You have severe eosinophilic phenotype asthma (a type of inflammatory asthma)
B. You are 12 years of age or older
C. Therapy is prescribed by or in consultation with a doctor specializing in allergy or pulmonary (lung/breathing) medicine
D. You have a blood eosinophil level (type of white blood cell) of at least 150 cells/mcL within the last 12 months
E. Exdensur will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), or theophylline
F. You will NOT use Exdensur concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma (a type of inflammatory asthma)
G. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)
H. You meet ONE of the following:
    1. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
    2. You have experienced at least ONE serious asthma exacerbation requiring hospitalization or emergency room visit within the past 12 months
    3. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
        i. Daytime asthma symptoms more than twice per week
        ii. Any night waking due to asthma
        iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
        iv. Any activity limitation due to asthma

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEPEMOKIMAB-ULAA BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline)
   - Exdensur will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DEPEMOKIMAB-ULAA (Exdensur)** requires the following rule(s) be met for renewal:
   A. You have severe eosinophilic phenotype asthma (a type of inflammatory asthma)
   B. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), or theophylline

   (Renewal denial text continued on the next page)

DEPEMOKIMAB-ULAA BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

C. You will NOT use Exdensur concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma (a type of inflammatory asthma)
D. You have shown a clinical response as evidenced by ONE of the following:
   1. You have experienced a reduction in asthma exacerbations (worsening of symptoms) from baseline
   2. You have decreased your use of rescue medications (such as albuterol)
   3. Your percent predicted FEV1 (amount of air exhaled in one second) has increased from pretreatment baseline (before starting Exdensur)
   4. You have experienced a reduction in severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Exdensur. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

DEUTETRABENAZINE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEUTETRABENAZINE (Austedo, Austedo XR)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Chorea (involuntary movements) associated with Huntington's disease (a type of brain disorder)
   2. Tardive dyskinesia (uncontrolled body movements)

B. If you have chorea associated with Huntington's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or movement disorder specialist

C. If you have tardive dyskinesia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), movement disorder specialist, or psychiatrist (mental health doctor)
   3. You have a history of using medications (such as Haldol [haloperidol], Abilify [aripiprazole]) that cause tardive dyskinesia (uncontrolled body movements)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the treatment of acute agitation associated with schizophrenia or bipolar I or II disorder (ICD-10 R45.1, F31.81) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a psychiatrist
   - The patient had a trial and failure of or contraindication to TWO antipsychotics (e.g., olanzapine, haloperidol, ziprasidone)

   If yes, **approve for 1 month by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DEXMEDETOMIDINE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEXMEDETOMIDINE (Igalmi)** requires the following rule(s) be met for approval:

A. The request is for the treatment of acute (short-term) agitation associated with schizophrenia (a type of mental health disorder) or bipolar I or II disorder (a type of mood disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a psychiatrist (type of mental health doctor)
D. You have tried and failed or have a contraindication to (harmful for you to use) TWO antipsychotics (such as olanzapine, haloperidol, ziprasidone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DEXMEDETOMIDINE (PART D)

RENEWAL CRITERIA

1. Is the request for treatment of acute agitation associated with schizophrenia or bipolar I or II disorder (ICD-10 R45.1, F31.81)?

   If yes, continue to #2.
   If no, do no approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient's maintenance therapy for the underlying psychiatric disorder currently being adjusted or optimized to reduce or eliminate the need for continued PRN medications for acute agitation?

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Have attempts to adjust medications been exhausted **AND** the physician has determined that chronic PRN medications are required for the continued safety of the patient or caregivers?

   If yes, **approve for 6 months HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

DEXMEDETOMIDINE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DEXMEDETOMIDINE (Igalmi)** requires the following rule(s) be met for renewal:

A. The request is for the treatment of acute (short-term) agitation associated with schizophrenia (a type of mental health disorder) or bipolar I or II disorder (a type of mood disorder)
B. You meet ONE of the following:
    1. Your maintenance therapy for your underlying psychiatric (mental) disorder is currently being adjusted or optimized to reduce or eliminate the need for continued PRN (as needed) medications for acute agitation
    2. Attempts to adjust medications have been exhausted AND your doctor has determined that chronic PRN (long-term as needed) medications are required for the continued safety of you or your caregivers

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

Prior authorization on Flector is required due to a high potential for non-Part D use (D vs. E payment determination only). Flector should NOT be used for non-medically accepted indications as defined in section 1860D-2(e)(4) of the Act. For further information, please refer to the Prescribing Information and/or Drug Monograph for Flector patch.

PRIOR AUTHORIZATION GUIDELINES

DICLOFENAC-LICART TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
DICLOFENAC EPOLAMINE	LICART		45883	GPI-14 (90210030208520)	

These are TIRF-Like drugs requiring a payment determination for 'Part D' or 'Non-Part D'.

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of acute pain due to minor strains, sprains, or contusions (ICD-10 G89.11)?

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or memberto pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Dawnzera will be used for prophylaxis against HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Dawnzera will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Takhzyro [lanadelumab-flyo], Haegarda [C1 esterase inhibitor], Cinryze [C1 esterase inhibitor], Orladeyo [berotralstat], danazol, Andembry [garadacimab-gxii])
- The patient had a trial of or contraindication to ONE of the following preferred agents: Cinryze (C1 esterase inhibitor), Haegarda (C1 esterase inhibitor), Takhzyro (lanadelumab-flyo)

  If yes, continue to #2.
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

DONIDALORSEN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
   - The patient has Type III HAE

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DONIDALORSEN (Dawnzera)** requires the following rule(s) be met for approval:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You are 12 years of age or older
   C. Dawnzera will be used for the prevention of hereditary angioedema attacks
   D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
   E. You will NOT use Dawnzera concurrently (at the same time) with an alternative preventive medication for HAE attacks (such as Takhzyro [lanadelumab-flyo], Haegarda [C1 esterase inhibitor], Cinryze [C1 esterase inhibitor], Orladeyo [berotralstat], danazol, Andembry [garadacimab-gxii])
   F. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Cinryze (C1 esterase inhibitor), Haegarda (C1 esterase inhibitor), Takhzyro (lanadelumab-flyo)
   G. You meet ONE of the following:
      1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
      2. You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding for the indication of nausea and vomiting associated with cancer chemotherapy.

1. Is the prescription written for greater than a 2-day (48-hours) supply?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with a 'D' in the PA override field)**

   If no, continue to #2.

2. Is the prescription written for a full therapeutic replacement for an intravenous anti-emetic drug as part of a cancer chemotherapeutic regimen and is for use within 48 hours of the patient receiving cancer treatment?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with a'D' in the PA override field)**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

DRONABINOL CAPSULE BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **DRONABINOL CAPSULE (Marinol)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Anorexia (loss of appetite) or weight loss
   2. Nausea and vomiting caused by cancer chemotherapy (medications used to treat cancer)

B. If you have anorexia or weight loss, approval also requires:
   1. You are 18 years of age or older
   2. You have acquired immunodeficiency syndrome (AIDS: a type of immune system disorder caused by a virus infection)

C. If you have nausea and vomiting caused by cancer chemotherapy, approval also requires:
   1. You are 18 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) ONE antiemetic therapy (medications used to treat nausea and vomiting, such as ondansetron, steroids indicated for emesis [vomiting], aprepitant)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Marinol.

Ensure that any use as a full therapeutic replacement for an intravenous anti-emetic drug as part of a cancer chemotherapeutic regimen within 48 hours of the patient receiving cancer treatment is billed under Part B. The assumption is that any prescription that exceeds a 2 day supply is by default not intended to specifically comply with the Medicare Part B requirement for Part B coverage of antiemetics, and therefore should be covered under Part D, irrespective of the timing relative to chemo (i.e. even if the prescription is filled within 48 hours of chemo).

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neurogenic orthostatic hypotension (NOH) (ICD-10 G90.3) and meet **ALL** of the following criteria?
   - The patient's NOH is caused by ONE of the following: primary autonomic failure (Parkinson's disease, multiple system atrophy, or pure autonomic failure), dopamine beta-hydroxylase deficiency, or non-diabetic autonomic neuropathy
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or cardiologist
   - The prescriber performed baseline blood pressure readings while the patient is sitting and also within 3 minutes of standing from a supine (lying face up) position
   - The patient has a decrease of at least 20 mmHg in systolic blood pressure or 10 mmHg diastolic blood pressure within three minutes after standing from a sitting position
   - The patient has symptoms of orthostatic dizziness, lightheadedness, or the 'feeling that you are about to black out'

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DROXIDOPA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DROXIDOPA (Northera)** requires the following rule(s) be met for approval:

A. You have neurogenic orthostatic hypotension (a type of low blood pressure) caused by ONE of the following:
   1. Primary autonomic failure (Parkinson's disease [a type of movement disorder], multiple system atrophy [a type of nervous system disorder], or pure autonomic failure [a type of nervous system disorder])
   2. Dopamine beta-hydroxylase deficiency (missing a type of enzyme)
   3. Non-diabetic autonomic neuropathy (a type of nerve disorder)

B. B. You are 18 years of age or older

C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or cardiologist (a type of heart doctor)

D. Your doctor performed baseline blood pressure readings while you are sitting and also within 3 minutes of standing from a supine (lying face up) position

E. You have a decrease of at least 20 mmHg in systolic blood pressure or 10 mmHg diastolic blood pressure within three minutes after standing from a sitting position

F. You have symptoms of orthostatic dizziness, lightheadedness, or the feeling that you are about to 'black out'

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

DROXIDOPA (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of neurogenic orthostatic hypotension (NOH) (ICD-10 G90.3) **AND** meet the following criterion?
   - The patient continues to benefit from the medication

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DROXIDOPA (Northera)** requires the following rule(s) be met for renewal:
   A. You have neurogenic orthostatic hypotension (a type of low blood pressure)
   B. You continue to benefit from the medication

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Northera.

DROXIDOPA (PART D)

For Part D use only:

DROXIDOPA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	NEUROGENIC ORTHOSTATIC HYPOTENSION (NOH): INITIAL: 1) BASELINE BLOOD PRESSURE READINGS WHILE THE PATIENT IS SITTING AND ALSO WITHIN 3 MINUTES OF STANDING FROM A SUPINE POSITION. 2) A DECREASE OF AT LEAST 20 MMHG IN SYSTOLIC BLOOD PRESSURE OR 10 MMHG DIASTOLIC BLOOD PRESSURE WITHIN THREE MINUTES AFTER STANDING FROM A SITTING POSITION.
Age Restrictions	N/A
Prescriber Restrictions	NOH: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A NEUROLOGIST OR CARDIOLOGIST.
Coverage Duration	NOH: INITIAL: 3 MONTHS RENEWAL: 12 MONTHS
Other Criteria	NOH: RENEWAL: CONTINUES TO BENEFIT FROM THE MEDICATION.

Core	Advantage	Plus
Yes	Yes	Yes

Part D Effective: 01/01/25 Created: 05/14
Commercial Effective: N/A Client Approval: 08/24 P&T Approval: 11/16

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 6 months of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Adbry [tralokinumab-ldrm]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have a trial of or contraindication to **ONE** of the following?
   - Topical corticosteroid (e.g., hydrocortisone, clobetasol propionate, halobetasol propionate)
   - Topical calcineurin inhibitor (e.g., Protopic [tacrolimus], Elidel [pimecrolimus])
   - Topical PDE-4 inhibitor (e.g., Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., Opzelura [ruxolitinib])

   If yes, **approve for 6 months by HICL or GPI-10.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient has a blood eosinophil level of 150 to 1500 cells/mcL within the past 12 months
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #5.
   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe oral corticosteroid-dependent asthma (ICD-10 J45.909) **AND** meet the following criteria?
   - Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of oral corticosteroid-dependent asthma

   If yes, continue to #5.
   If no, continue to #8.

5. Does the patient meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
   - Dupixent will be used in combination with a medium, high-dose, or maximally-tolerated dose of an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring hospitalization or an ER visit within the past 12 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #7.

7. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Dupixent will be used as add-on maintenance treatment
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE intranasal corticosteroid (e.g., mometasone, fluticasone, beclomethasone)
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #9.

9. Does the patient have a diagnosis of eosinophilic esophagitis (EoE) (ICD-10 K20.0) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient weighs at least 15 kg (33 lbs)
   - Therapy is prescribed by or in consultation with a gastroenterologist, allergist, or immunologist
   - The patient's diagnosis is confirmed by an esophagogastroduodenoscopy (EGD) with biopsy
   - Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EoE

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #10.

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

10. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Therapy is prescribed by or in consultation with a dermatologist, immunologist, or allergist
    - The patient has chronic pruritus (itch lasting longer than 6 weeks), multiple pruriginous lesions (localized or general), and a history or sign of a prolonged scratching behavior
    - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nemluvio [nemolizumab-ilto]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of PN

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and ICD-10 J44.81) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has an eosinophilic phenotype COPD
    - Therapy is prescribed by or in consultation with a pulmonologist
    - Dupixent will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
    - Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAKinhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

CONTINUED ON NEXT PAGE

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

12. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
    - The patient is 2 years of age or older
    - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
    - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
    - The patient had a trial of and is maintained on, OR has a contraindication to, a second generation H1 anti-histamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
    - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, continue to #13.

13. Does the patient have a diagnosis of bullous pemphigoid (BP) (ICD-10 L12.0) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #14.

14. Does the patient have a diagnosis of allergic fungal rhinosinusitis (AFRS) (ICD-10 J30.89) and meet **ALL** of the following criteria?
    - The patient is 6 years of age or older
    - The patient has a history of sino-nasal surgery

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **DUPILUMAB (Dupixent)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   2. Moderate to severe asthma (a type of lung condition)
   3. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   4. Eosinophilic esophagitis (EoE: a type of immune system disorder)
   5. Prurigo nodularis (PN: a type of skin condition)
   6. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
   7. Chronic spontaneous urticaria (CSU: also called chronic idiopathic urticaria)[severe itching with unknown cause]
   8. Bullous pemphigoid (BP: a type of skin condition)
   9. Allergic fungal rhinosinusitis (AFRS: inflammation of nasal and sinus ways due to an allergic reaction to fungi)

B. If you have moderate to severe atopic dermatitis, approval also requires:
   1. You are 6 months of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
   3. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Adbry [tralokinumab-ldrm]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   4. You have tried or have a contraindication to (harmful for you to use) ONE of the following: topical corticosteroid (such as hydrocortisone, clobetasol propionate, halobetasol propionate), topical calcineurin inhibitor (such as Protopic [tacrolimus], Elidel [pimecrolimus]), topical phosphodiesterase-4 inhibitor (such as Eucrisa [crisaborole]), Adquey [difamilast], Zoryve [roflumilast]), topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof]), or topical JAK inhibitor (such as Opzelura [ruxolitinib])

(Initial denial text continued on next page)

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe asthma, approval also requires:

1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a doctor specializing in pulmonary (lung/breathing) or allergy medicine
3. You meet ONE of the following:
   a. You have an eosinophilic phenotype asthma (a type of inflammatory asthma) and meet all of the following:
      i. You have a blood eosinophil level (a type of lab test) of 150 to 1500 cells/mcL within the past 12 months
      ii. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
   b. You have oral corticosteroid-dependent asthma, AND you will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of oral corticosteroid-dependent asthma
4. Dupixent will be used in combination with a medium, high-dose, or maximally-tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as Tudorza (aclidinium)], Spiriva (tiotropium), Incruse Ellipta (umeclidinium), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline
5. You meet ONE of the following:
   a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

(Initial denial text continued on next page)

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have chronic rhinosinusitis with nasal polyps, approval also requires:
1. You are 12 years of age or older
2. Dupixent will be used as add-on maintenance treatment (taken on a regular basis)
3. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
5. You have inadequately controlled disease
6. You had a 56-day trial of ONE intranasal corticosteroid (such as mometasone, fluticasone, beclomethasone)
7. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

E. If you have eosinophilic esophagitis, approval also requires:
1. You are 1 year of age or older
2. You weigh at least 15 kilograms (33 pounds)
3. Therapy is prescribed by or in consultation with a gastroenterologist (a type of doctor who treats digestive conditions), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. Your diagnosis is confirmed by an esophagogastroduodenoscopy (EGD) with biopsy (a test to look at the lining of the food pipe, stomach, and small intestine)
5. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic esophagitis

F. If you have prurigo nodularis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), immunologist (a type of immune system doctor), or allergist (a type of allergy doctor)
3. You have chronic pruritus (itch lasting longer than 6 weeks), multiple pruriginous lesions (wounds), and a history or sign of a prolonged scratching behavior
4. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nemluvio [nemolizumab-ilto]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis

(Initial denial text continued on next page)

DUPILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

G. If you have chronic obstructive pulmonary disease, approval also requires:
1. You are 18 years of age or older
2. You have an eosinophilic phenotype chronic obstructive pulmonary disease (COPD)(a type of inflammatory long-term lung condition)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
4. Dupixent will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
5. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

H. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
4. You have tried and are maintained on, OR you have a contraindication to (harmful for you to use), a second generation H1 anti-histamine (type of allergy medication, such as Clarinex [desloratadine], Xyzal [levocetirizine])
5. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK[Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

I. If you have bullous pemphigoid, approval also requires:
1. You are 18 years of age or older

J. If you have allergic fungal rhinosinusitis, approval also requires:
1. You are 6 years of age or older
2. You have a history of sino-nasal surgery (a type of surgery)

DUPILUMAB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of bullous pemphigoid (BP) and allergic fungal rhinosinusitis (AFRS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on Dupixent
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Adbry [tralokinumab-ldrm]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient continues to use an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #4.
   If no, continue to #3.

DUPILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe oral corticosteroid-dependent asthma (ICD-10 J45.909) and meet **ALL** of the following criteria?
   - The patient continues to use an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of oral corticosteroid-dependent asthma

   If yes, continue to #4.
   If no, continue to #5.

4. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown improvement on Dupixent
   - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #6.

DUPILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of eosinophilic esophagitis (EoE) (ICD-10 K20.0) and meet **ALL** of the following criteria?
- The patient has shown improvement while on Dupixent (e.g., symptom improvement or achieving histological remission defined as peak esophageal intraepithelial eosinophil count of 6 eos/hpf or less)
- Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EoE

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #7.

7. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
- The patient has had improvement (reduction) of pruritus or pruriginous lesions
- Dupixent will NOT be used concurrently with another systemic biologic (e.g., Nemluvio [nemolizumab-ilto]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PN

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #8.

8. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and ICD-10 J44.81) and meet **ALL** of the following criteria?
- The patient has an eosinophilic phenotype COPD
- Dupixent will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
- Dupixent will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

If yes, continue to #9.
If no, continue to #10.

DUPILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

9. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - The patient has a reduction in COPD exacerbations from baseline
   - The patient has a reduction in severity or frequency of COPD-related symptoms (e.g., wheezing, shortness of breath, coughing, sputum production)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

10. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
    - The patient is maintained on, OR has a contraindication to, a second generation H1 anti-histamine (e.g., Clarinex [desloratadine], Xyzal [levocetirizine])
    - Dupixent will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.

    RENEWAL DENIAL TEXT: Our guideline named **DUPILUMAB (Dupixent)** requires the following rule(s) be met for renewal:
    A. You have ONE of the following:
       1. Moderate to severe atopic dermatitis (AD: a type of skin condition)
       2. Moderate to severe asthma (a type of lung condition)
       3. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
       4. Eosinophilic esophagitis (EoE: a type of immune system disorder)
       5. Prurigo nodularis (PN: a type of skin condition)
       6. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
       7. Chronic spontaneous urticaria (CSU: also called chronic idiopathic urticaria) [severe itching with unknown cause]

    B. If you have moderate to severe atopic dermatitis, renewal also requires:
       1. You have shown improvement on Dupixent
       2. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Adbry [tralokinumab-ldrm]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

    (Renewal denial text continued on next page)

DUPILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have moderate to severe asthma, renewal also requires:
1. You meet ONE of the following:
   a. You have an eosinophilic phenotype asthma (a type of inflammatory asthma), AND you will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
   b. You have oral corticosteroid-dependent asthma, AND you will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of oral corticosteroid-dependent asthma
2. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist [such as Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [such as montelukast, zafirlukast, zileuton], theophylline)
3. You have shown a clinical response as evidenced by ONE the following:
   a. You have experienced a reduction (decrease) in asthma exacerbations (worsening of symptoms) from baseline (before treatment)
   b. You have decreased your use of rescue medications (such as albuterol)
   c. Your percent predicted FEV1 (amount of air exhaled in one second) has increased from pretreatment baseline (before starting Dupixent)
   d. You have experienced a reduction in severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

D. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
1. You have shown improvement on Dupixent
2. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

E. If you have eosinophilic esophagitis, renewal also requires:
1. You have shown improvement while on Dupixent (such as symptom improvement or achieving histological remission defined as peak esophageal intraepithelial eosinophil count of 6 eos/hpf or less [a type of test that evaluates disease status])
2. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic esophagitis

(Renewal denial text continued on next page)

DUPILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

F. If you have prurigo nodularis, renewal also requires:
1. You have experienced improvement or reduction of pruritus (itching) or pruriginous lesions (wounds)
2. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Nemluvio [nemolizumab-ilto]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis

G. If you have chronic obstructive pulmonary disease, renewal also requires:
1. You have an eosinophilic phenotype chronic obstructive pulmonary disease (COPD) (a type of inflammatory long-term lung condition)
2. Dupixent will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere, Spiriva with Symbicort)
3. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD
4. You have shown a clinical response as evidenced by ONE the following:
   a. You have a reduction (decrease) in COPD exacerbations (worsening of symptoms) from baseline (before starting Dupixent)
   b. You have a reduction in severity or frequency of COPD-related symptoms (such as wheezing, shortness of breath, coughing, sputum [mucus] production)

H. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), renewal also requires:
1. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
2. You are maintained on, OR you have a contraindication to (harmful for you to use), a second generation H1 antihistamine (type of allergy medication, such as Clarinex [desloratadine], Xyzal [levocetirizine])
3. You will NOT use Dupixent concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

RATIONALE

DUPILUMAB (PART D)

For Part D use only:

DUPILUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: EOSINOPHILIC ASTHMA: BLOOD EOSINOPHIL LEVEL OF 150 TO 1500 CELLS/MCL WITHIN THE PAST 12 MONTHS. EOSINOPHILIC ESOPHAGITIS (EOE): DIAGNOSIS CONFIRMED BY ESOPHAGOGASTRODUODENOSCOPY (EGD) WITH BIOPSY.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: AD, PN, CSU: PRESCRIBED OR IN CONSULTATION WITH A DERMATOLOGIST, ALLERGIST OR IMMUNOLOGIST. ASTHMA: PRESCRIBED OR IN CONSULTATION WITH ALLERGIST OR PULMONOLOGIST. CRSWNP: PRESCRIBED OR IN CONSULTATION WITH OTOLARYNGOLOGIST, ALLERGIST OR IMMUNOLOGIST. EOE: PRESCRIBED OR IN CONSULTATION WITH GASTROENTEROLOGIST, ALLERGIST, OR IMMUNOLOGIST. COPD: PRESCRIBED OR IN CONSULTATION WITH PULMONOLOGIST. RENEWAL: CSU: PRESCRIBED OR IN CONSULTATION WITH ALLERGIST, DERMATOLOGIST, OR IMMUNOLOGIST.
Coverage Duration	BP, AFRS: 12 MO. AD/CRSWNP/EOE/PN/CSU: INITIAL/RENEWAL: 6 MO/12 MO. ASTHMA/COPD: INIT/RENEW: 12 MO.
Other Criteria	INITIAL: AD: TRIAL OF OR CONTRAINDICATION TO ONE TOPICAL (CORTICOSTEROID, CALCINEURIN INHIBITOR, PDE4 INHIBITOR, AHR AGONIST OR JAK INHIBITOR). ASTHMA: 1) CONCURRENT THERAPY WITH A MEDIUM, HIGH-DOSE OR MAXIMALLY-TOLERATED DOSE OF AN INHALED CORTICOSTEROID (ICS) AND ONE OTHER MAINTENANCE MEDICATION, AND 2) ONE ASTHMA EXACERBATION REQUIRING SYSTEMIC CORTICOSTEROID BURST LASTING AT LEAST 3 DAYS WITHIN THE PAST 12 MONTHS, OR ONE SERIOUS EXACERBATION REQUIRING HOSPITALIZATION OR ER VISIT WITHIN THE PAST 12 MONTHS, OR POOR SYMPTOM CONTROL DESPITE CURRENT THERAPY AS EVIDENCED BY AT LEAST THREE OF THE FOLLOWING WITHIN THE PAST 4 WEEKS: (A) DAYTIME ASTHMA SYMPTOMS MORE THAN TWICE/WEEK, (B) ANY NIGHT WAKING DUE TO ASTHMA, (C) SABA RELIEVER FOR SYMPTOMS MORE THAN TWICE/WEEK, (D) ANY ACTIVITY LIMITATION DUE TO ASTHMA. CHRONIC RHINOSINUSITIS WITH NASAL POLYPS (CRSWNP): 1) A 56 DAY TRIAL OF ONE TOPICAL NASAL CORTICOSTEROID, 2)

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

	EVIDENCE OF NASAL POLYPS BY DIRECT EXAMINATION, ENDOSCOPY, OR SINUS CT SCAN, AND 3) INADEQUATELY CONTROLLED DISEASE. PRURIGO NODULARIS (PN): CHRONIC PRURITUS (ITCH MORE THAN 6 WEEKS), MULTIPLE PRURIGINOUS LESIONS, AND HISTORY OR SIGN OF A PROLONGED SCRATCHING BEHAVIOR. EOSINOPHILIC COPD: USED IN COMBINATION WITH A LAMA/LABA/ICS. CHRONIC SPONTANEOUS URTICARIA (CSU): 1) TRIAL OF AND MAINTAINED ON, OR CONTRAINDICATION TO A SECOND GENERATION H1 ANTI-HISTAMINE AND 2) STILL EXPERIENCES HIVES OR ANGIOEDEMA MOST DAYS OF THE WEEK FOR AT LEAST 6 WEEKS. INITIAL/RENEWAL : ALL INDICATIONS EXCEPT BULLOUS PEMPHIGOID (BP): NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: AD, CRSWNP, EOE: IMPROVEMENT WHILE ON THERAPY. ASTHMA: 1) CONTINUED USE OF ICS AND ONE OTHER MAINTENANCE MEDICATION, AND 2) CLINICAL RESPONSE AS EVIDENCED BY: (A) REDUCTION IN ASTHMA EXACERBATIONS FROM BASELINE, (B) DECREASED UTILIZATION OF RESCUE MEDICATIONS, (C) INCREASE IN PERCENT PREDICTED FEV1 FROM PRETREATMENT BASELINE, OR (D) REDUCTION IN SEVERITY OR FREQUENCY OF ASTHMA-RELATED SYMPTOMS. PN: IMPROVEMENT OR REDUCTION OF PRURITUS OR PRURIGINOUS LESIONS. EOSINOPHILIC COPD: 1) USED IN COMBINATION WITH A LAMA/LABA/ICS, AND 2) CLINICAL RESPONSE AS EVIDENCED BY ONE OF THE FOLLOWING: (A) REDUCTION IN COPD EXACERBATIONS FROM BASELINE, OR (B) REDUCTION IN SEVERITY OR FREQUENCY OF COPD-RELATED SYMPTOMS. CSU: MAINTAINED ON OR CONTRAINDICATION TO A SECOND GENERATION H1 ANTI-HISTAMINE.

Created: 01/17

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

DURVALUMAB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
DURVALUMAB	IMFINZI	44230		GPI-10 (2135822900)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #5.

2. Does the patient have resectable (node positive or tumors are at least 4 cm) cancer and meet **ALL** of the following criteria?
   - The patient has no known epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) rearrangements
   - Imfinzi will be used in combination with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery and prior use in combination with platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

CONTINUED ON NEXT PAGE

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have unresectable Stage III cancer **AND** meet the following criterion?
   - The patient's disease has NOT progressed following concurrent platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) and radiation therapy (cCRT)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have metastatic cancer and meet **ALL** of the following criteria?
   - The patient does NOT have sensitizing epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - Imfinzi will be used in combination with Imjudo (tremelimumab-actl) and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient have a diagnosis of small cell lung cancer (SCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #6.
   If no, continue to #8.

6. Does the patient have limited-stage (LS) cancer **AND** meet the following criterion?
   - The patient's disease has NOT progressed following concurrent platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) and radiation therapy (cCRT)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

CONTINUED ON NEXT PAGE

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Does the patient have extensive-stage (ES) cancer **AND** meet the following criterion?
   - Imfinzi will be used in combination with etoposide, AND either carboplatin or cisplatin

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

8. Does the patient have a diagnosis of locally advanced or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Imfinzi will be used in combination with gemcitabine and cisplatin

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient have a diagnosis of unresectable hepatocellular carcinoma (uHCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Imfinzi will be used in combination with Imjudo (tremelimumab-actl)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

10. Does the patient have a diagnosis of primary advanced or recurrent endometrial cancer (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is mismatch repair deficient (dMMR), as determined by an FDA-approved test
    - Imfinzi will be used in combination with carboplatin and paclitaxel, OR as a single agent after prior use in combination with carboplatin and paclitaxel

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #11.

11. Does the patient have a diagnosis of high-risk non-muscle invasive bladder cancer (NMIBC) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient is Bacillus Calmette-Guerin (BCG) naive
    - Imfinzi will be used in combination with Bacillus Calmette-Guerin (BCG)

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #12.

12. Does the patient have a diagnosis of muscle invasive bladder cancer (MIBC) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Imfinzi will be used in combination with gemcitabine and cisplatin as neoadjuvant treatment, OR as a single agent as adjuvant treatment following radical cystectomy and prior use in combination with gemcitabine and cisplatin

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #13.

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

13. Does the patient have a diagnosis of resectable gastric or gastroesophageal junction adenocarcinoma (GC/GEJC) (ICD-10 Group C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Imfinzi will be used in combination with fluorouracil, leucovorin, oxaliplatin and docetaxel (FLOT) as neoadjuvant and adjuvant treatment, OR as a single-agent after prior use in combination with FLOT

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **DURVALUMAB (Imfinzi)** requires the following rule(s) be met for approval:

    A. You have ONE of the following:
        1. Non-small cell lung cancer (NSCLC: a type of lung cancer)
        2. Small cell lung cancer (SCLC: a type of lung cancer)
        3. Locally advanced or metastatic biliary tract cancer (a type of biliary tract cancer that has spread from where it started to nearby tissue or lymph nodes or has spread to other parts of the body)
        4. Unresectable hepatocellular carcinoma (a type of liver cancer that cannot be completely removed by surgery)
        5. Primary advanced or recurrent endometrial cancer (a type of uterus cancer that has spread or has returned after treatment)
        6. High-risk non-muscle invasive bladder cancer (NMIBC: bladder cancer that has not spread to the muscles)
        7. Muscle invasive bladder cancer (MIBC: bladder cancer that has spread to the muscles)
        8. Resectable gastric or gastroesophageal junction adenocarcinoma (GC/GEJC) (a type of digestive system cancer that can be removed by surgery)

    (Denial text continued on next page)

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is resectable (can be removed by surgery) (node positive [has spread to the lymph nodes] or tumors are at least 4 cm); you have no known epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK: a type of enzyme) rearrangements; and Imfinzi will be used in combination with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin) as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant treatment (additional treatment) after surgery and previous use in combination with platinum-containing chemotherapy
   b. Your cancer is Stage III and unresectable (cannot be completely removed by surgery); and your disease has NOT progressed (worsened) after using concurrent (at the same time) platinum-based chemotherapy (such as cisplatin, carboplatin, oxaliplatin) and radiation therapy (cCRT: concurrent chemoradiotherapy)
   c. Your cancer is metastatic (cancer that has spread to other parts of the body); you do NOT have sensitizing epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (a type of abnormal gene); and Imfinzi will be used in combination with Imjudo (tremelimumab-actl) and platinum-based chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

C. If you have small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have limited-stage cancer (LS: cancer that is contained in a single area on one side of the chest) AND your disease has NOT progressed (worsened) following concurrent (at the same time) platinum-based chemotherapy (such as cisplatin, carboplatin, oxaliplatin) and radiation therapy (cCRT: concurrent chemoradiotherapy)
   b. You have extensive-stage cancer (ES: cancer that has spread widely throughout the lungs or other parts of the body) and Imfinzi will be used in combination with etoposide, AND either carboplatin or cisplatin

D. If you have locally advanced or metastatic biliary tract cancer, approval also requires:
1. You are 18 years of age or older
2. Imfinzi will be used in combination with gemcitabine and cisplatin

E. If you have unresectable hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. Imfinzi will be used in combination with Imjudo (tremelimumab-actl)

(Denial text continued on next page)

DURVALUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

F. If you have primary advanced or recurrent endometrial cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is mismatch repair deficient (dMMR: a type of gene mutation [abnormal change]), as determined by a Food and Drug Administration (FDA)-approved test
3. Imfinzi will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel

G. If you have high-risk non-muscle invasive bladder cancer, approval also requires:
1. You are 18 years of age or older
2. You are Bacillus Calmette-Guerin (BCG: a type of bladder cancer treatment) naive (have not previously used BCG)
3. You will use Imfinzi in combination with Bacillus Calmette-Guerin (BCG)

H. If you have muscle invasive bladder cancer, approval also requires:
1. You are 18 years of age or older
2. Imfinzi will be used in combination with gemcitabine and cisplatin as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant treatment (additional treatment) following radical cystectomy (bladder removal surgery) and previous use in combination with gemcitabine and cisplatin

I. If you have resectable gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Imfinzi will be used in combination with fluorouracil, leucovorin, oxaliplatin and docetaxel (FLOT) as neoadjuvant (given before main treatment) and adjuvant (add-on) treatment, OR as a single-agent after prior use in combination with FLOT

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) or small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least two prior therapies for CLL or SLL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **DUVELISIB (Copiktra)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Relapsed or refractory chronic lymphocytic leukemia (CLL: a type of blood cancer that has returned after treatment or did not fully respond to treatment)
      2. Small lymphocytic lymphoma (SLL: a type of blood cancer)
   B. You are 18 years of age or older
   C. You have received at least two prior therapies for chronic lymphocytic leukemia or small lymphocytic lymphoma

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ECALLANTIDE BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Kalbitor will be used for the treatment of acute HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Kalbitor will be administered by a healthcare professional with appropriate medical supportto manage anaphylaxis and/or angioedema
- Kalbitor will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Berinert [C1 esterase inhibitor])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
- The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
- The patient has Type III HAE

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ECALLANTIDE BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ECALLANTIDE (Kalbitor)** requires the following rule(s) be met for approval:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You are 12 years of age or older
C. Kalbitor will be used for the treatment of acute (sudden and severe) hereditary angioedema attacks
D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
E. Kalbitor will be administered by a healthcare professional with appropriate medical support to manage anaphylaxis (severe allergic reaction) and/or angioedema (a type of swelling)
F. You will NOT use Kalbitor concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) HAE attacks (such as Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Berinert [C1 esterase inhibitor])
G. You meet ONE of the following:
    1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
    2. You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ECALLANTIDE BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) **AND** meet the following criterion?
   - Kalbitor will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Berinert [C1 esterase inhibitor])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ECALLANTIDE (Kalbitor)** requires the following rule(s) be met for renewal:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You will NOT use Kalbitor concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) HAE attacks (such as Ruconest [C1 esterase inhibitor], Firazyr [icatibant], Berinert [C1 esterase inhibitor])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ECULIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Soliris will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor B inhibitor (e.g., Fabhalta [iptacopan])
   - The patient has tried and failed (as evidenced by hemoglobin levels less than 10.5 g/dL directly following at least 3 months of stable dosing) OR has a contraindication to Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - The patient is anti-acetylcholine receptor (AchR) antibody positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is in Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Soliris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

ECULIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Soliris will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Uplizna [inebilizumab-cdon], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz])
   - The patient had a trial of or contraindication to the preferred C5 inhibitor: Ultomiris (ravulizumab-cwvz)

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ECULIZUMAB (Soliris)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
      2. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
      4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

   (Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

ECULIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. Soliris is NOT being used for hemolytic uremic syndrome related to Shiga toxin E. coli (a type of bacteria causing small blood vessels in the kidneys to become damaged and inflamed)

C. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
3. Your PNH diagnosis is confirmed by ALL of the following through flow cytometry (test to measure characteristics of cells):
   a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
   b. PNH granulocyte clone size is at least 10%
4. You will NOT use Soliris concurrently (at the same time) with another C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor B inhibitor (such as Fabhalta [iptacopan])
5. You meet ONE of the following:
   a. You have tried and failed (drug did not work) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz), as shown by hemoglobin (a type of protein in red blood cells) levels less than 10.5 g/dL directly following at least 3 months of stable dosing
   b. You have a contraindication to (harmful for you to use) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

D. If you have generalized myasthenia gravis, approval also requires:

1. You are 6 years of age or older
2. You are anti-acetylcholine receptor (AchR) antibody positive (an indicator of disease)
3. Therapy is prescribed by or in consultation with a neurologist (type of brain and nervous system doctor)
4. You are in Myasthenia Gravis Foundation of America class II, III, or IV (indicates severity of disease)
5. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
6. You have tried or have a contraindication to (harmful for you to use) ONE non-steroidal immunosuppressive therapy (treatment that lowers the body's immune system activity, such as azathioprine, cyclophosphamide, methotrexate)
7. You will NOT use Soliris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

(Initial denial text continued on next page)

ECULIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have neuromyelitis optica spectrum disorder, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or ophthalmologist (a type of eye doctor)
3. You have a positive serologic (blood) test for anti-aquaporin-4 (AQP4: type of protein) antibodies
4. You will NOT use Soliris concurrently (at the same time) with another neuromyelitis optica spectrum disorder (NMOSD) medication (such as Rituxan [rituximab], Uplizna [inebilizumab-cdon], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz])
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Ultomiris (ravulizumab-cwvz)
6. You have at least ONE of the following core clinical characteristics:
   a. Optic neuritis (inflammation that damages eye nerve)
   b. Acute myelitis (sudden and severe spinal cord inflammation)
   c. Area postrema syndrome (attacks of uncontrollable nausea, vomiting, or hiccups for several days)
   d. Acute brainstem syndrome (problems with vision, hearing, swallowing and muscle weakness in the head)
   e. Symptomatic narcolepsy (sudden sleepiness) or acute diencephalic clinical syndrome (tumor in a part of brain) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
   f. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ECULIZUMAB BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS) (ICD-10 D59.31)?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase and hemoglobin levels) compared to baseline
   - Soliris will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor B inhibitor (e.g., Fabhalta [iptacopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

ECULIZUMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Soliris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline (e.g., reduction in relapse frequency)
   - Soliris will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Uplizna [inebilizumab-cdon], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ECULIZUMAB (Soliris)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
      4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

   (Renewal denial text continued on next page)

ECULIZUMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

B. Soliris is NOT being used for hemolytic uremic syndrome related to Shiga toxin E. coli (a type of bacteria causing small blood vessels in the kidneys to become damaged and inflamed)

C. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
1. You have had clinical benefit (such as reduction in number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [an enzyme] and hemoglobin [a type of protein in red blood cells] levels) compared to baseline (before treatment)
2. You will NOT use Soliris concurrently (at the same time) with another C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor B inhibitor (such as Fabhalta [iptacopan])

D. If you have generalized myasthenia gravis, renewal also requires:
1. You have had clinical benefit compared to baseline (such as shown by the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
2. You will NOT use Soliris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

E. If you have neuromyelitis optica spectrum disorder, renewal also requires:
1. You have had clinical benefit compared to baseline (before treatment) (such as a reduction in relapse frequency)
2. You will NOT use Soliris concurrently (at the same time) with another neuromyelitis optical spectrum disorder (NMOSD) medication (such as Rituxan [rituximab], Uplizna [inebilizumab-cdon], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ECULIZUMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Review for Soliris.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

For Part D use only:

ECULIZUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: SHIGA TOXIN E. COLI RELATED HEMOLYTIC UREMIC SYNDROME (STEC-HUS).
Required Medical Information	INITIAL: PAROXYSMAL NOCTURNAL HEMOGLOBINURIA (PNH): DIAGNOSIS CONFIRMED VIA FLOW CYTOMETRY: 1) AT LEAST TWO DIFFERENT GPI PROTEIN DEFICIENCIES ON AT LEAST TWO CELL LINEAGES, AND 2) PNH GRANULOCYTE CLONE SIZE OF AT LEAST 10 PERCENT.
Age Restrictions	INITIAL: PNH: 18 YEARS OF AGE OR OLDER.
Prescriber Restrictions	INITIAL: PNH: PRESCRIBED BY OR IN CONSULTATION WITH A HEMATOLOGIST. GENERALIZED MYASTHENIA GRAVIS (GMG): PRESCRIBED BY OR IN CONSULTATION WITH A NEUROLOGIST. NEUROMYELITIS OPTICA SPECTRUM DISORDER (NMOSD): PRESCRIBED BY OR IN CONSULTATION WITH A NEUROLOGIST OR OPHTHALMOLOGIST.
Coverage Duration	INITIAL: AHUS, NMOSD: 12 MONTHS. PNH, GMG: 6 MONTHS. RENEWAL (ALL INDICATIONS): 12 MONTHS.
Other Criteria	INITIAL: PNH: 1) NO CONCURRENT USE WITH ANOTHER C5 COMPLEMENT INHIBITOR THERAPY, C3 COMPLEMENT INHIBITOR, OR FACTOR B INHIBITOR, AND 2) TRIAL AND FAILURE OF (AS EVIDENCED BY HEMOGLOBIN LEVELS LESS THAN 10.5 G/DL DIRECTLY FOLLOWING AT LEAST 3 MONTHS OF STABLE DOSING) OR CONTRAINDICATION TO FABHALTA OR ULTOMIRIS. GMG: 1) MYASTHENIA GRAVIS FOUNDATION OF AMERICA CLASS II, III, OR IV, 2) TRIAL OF OR CONTRAINDICATION TO ONE CORTICOSTEROID, 3) TRIAL OF OR CONTRAINDICATION TO ONE NON-STEROIDAL

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ECULIZUMAB-AAGH BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ECULIZUMAB-AAGH BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS) (ICD-10 D59.31)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

ECULIZUMAB-AAGH BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Epysqli will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or Factor B inhibitor (e.g., Fabhalta [iptacopan])
   - The patient has tried and failed (as evidenced by hemoglobin levels less than 10.5 g/dL directly following at least 3 months of stable dosing) OR has a contraindication to Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AchR) antibody positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is in Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Epysqli will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ECULIZUMAB-AAGH BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ECULIZUMAB-AAGH (Epysqli)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
   2. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)

B. Epysqli will NOT be used for hemolytic uremic syndrome related to Shiga toxin E. coli (STEC-HUS: a type of bacteria causing small blood vessels in the kidneys to become damaged and inflamed)

C. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   3. Your PNH diagnosis is confirmed by ALL of the following through flow cytometry (test to measure characteristics of cells):
      a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
      b. PNH granulocyte clone size is at least 10%
   4. You will NOT use Epysqli concurrently (at the same time) with another C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or Factor B inhibitor (such as Fabhalta [iptacopan])
   5. You meet ONE of the following:
      a. You have tried and failed (drug did not work) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz), as shown by hemoglobin (a type of protein in red blood cells) levels less than 10.5 g/dL directly following at least 3 months of stable dosing
      b. You have a contraindication to (harmful for you to use) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

(Initial denial text continued on next page)

ECULIZUMAB-AAGH BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have generalized myasthenia gravis, approval also requires:

1. You are 18 years of age or older
2. You are anti-acetylcholine receptor (AchR) antibody positive (an indicator of disease)
3. Therapy is prescribed by or in consultation with a neurologist (type of brain and nervous system doctor)
4. You are in Myasthenia Gravis Foundation of America class II, III, or IV (indicates severity of disease)
5. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
6. You have tried or have a contraindication to (harmful for you to use) ONE non-steroidal immunosuppressive therapy (treatment that lowers the body's immune system activity, such as azathioprine, cyclophosphamide, methotrexate)
7. You will NOT use Epysqli concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ECULIZUMAB-AEEB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ECULIZUMAB-AEEB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS) (ICD-10 D59.31)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

ECULIZUMAB-AEEB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Bkemv will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or Factor B inhibitor (e.g., Fabhalta [iptacopan])
   - The patient has tried and failed (as evidenced by hemoglobin levels less than 10.5 g/dL directly following at least 3 months of stable dosing) OR has a contraindication to Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AchR) antibody positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is in Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Bkemv will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ECULIZUMAB-AEEB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ECULIZUMAB-AEEB (Bkemv)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
   2. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   3. Generalized myasthenia gravis (gMG: a chronic [long-term] autoimmune disorder)

B. Bkemv will NOT be used for hemolytic uremic syndrome related to Shiga toxin E. coli (STEC-HUS: a type of bacteria causing small blood vessels in the kidneys to become damaged and inflamed)

C. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   3. Your PNH diagnosis is confirmed by ALL of the following through flow cytometry (test to measure characteristics of cells):
      a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
      b. PNH granulocyte clone size is at least 10%
   4. You will NOT use Bkemv concurrently (at the same time) with another C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or Factor B inhibitor (such as Fabhalta [iptacopan])
   5. You meet ONE of the following:
      a. You have tried and failed (drug did not work) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz), as shown by hemoglobin (a type of protein in red blood cells) levels less than 10.5 g/dL directly following at least 3 months of stable dosing
      b. You have a contraindication to (harmful for you to use) Fabhalta (iptacopan) or Ultomiris (ravulizumab-cwvz)

(Initial denial text continued on next page)

ECULIZUMAB-AEEB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have generalized myasthenia gravis, approval also requires:

1. You are 18 years of age or older
2. You are anti-acetylcholine receptor (AchR) antibody positive (an indicator of disease)
3. Therapy is prescribed by or in consultation with a neurologist (type of brain and nervous system doctor)
4. You are in Myasthenia Gravis Foundation of America class II, III, or IV (indicates severity of disease)
5. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
6. You have tried or have a contraindication to (harmful for you to use) ONE non-steroidal immunosuppressive therapy (treatment that lowers the body's immune system activity, such as azathioprine, cyclophosphamide, methotrexate)
7. You will NOT use Bkemv concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ECULIZUMAB-AEEB BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Shiga toxin E. coli related hemolytic uremic syndrome (STEC-HUS) (ICD-10 D59.31)?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase and hemoglobin levels) compared to baseline
   - Bkemv will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or Factor B inhibitor (e.g., Fabhalta [iptacopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

ECULIZUMAB-AEEB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Bkemv will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ECULIZUMAB-AEEB (Bkemv)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
      2. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   B. Bkemv will NOT be used for hemolytic uremic syndrome related to Shiga toxin E. coli (STEC-HUS: a type of bacteria causing small blood vessels in the kidneys to become damaged and inflamed)
   C. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
      1. You have had clinical benefit (such as reduction in number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [an enzyme] and hemoglobin [a type of protein in red blood cells] levels) compared to baseline (before treatment)
      2. You will NOT use Bkemv concurrently (at the same time) with another C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or Factor B inhibitor (such as Fabhalta [iptacopan])

   (Renewal denial text continued on next page)

ECULIZUMAB-AEEB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have generalized myasthenia gravis, renewal also requires:

1. You have had clinical benefit compared to baseline (such as shown by the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
2. You will NOT use Bkemv concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Review for Bkemv.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

EDARAVONE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **EDARAVONE (Radicava)** requires the following rule(s) be met for approval:

A. You have amyotrophic lateral sclerosis (ALS: a type of brain and nerve condition)
B. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ALS specialist at an ALS Specialty Center or Care Clinic
C. You have had the disease (from onset of symptoms) for 2 years or less
D. You have normal respiratory (breathing) function (such as Forced Vital Capacity [FVC: a type of lung test] of at least 80 percent)
E. You have mild to moderate ALS with a score of 2 or higher in all of the following 12 items of the Amyotrophic Lateral Sclerosis Functional Rating Scale-Revised (ALSFRS-R: a tool for evaluating functional status): speech, salivation, swallowing, handwriting, cutting food, dressing and hygiene, turning in bed, walking, climbing stairs, dyspnea (difficulty breathing), orthopnea (shortness of breath while lying down), respiratory insufficiency (a type of breathing condition)
F. You have tried riluzole tablet OR are currently taking riluzole tablet

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of amyotrophic lateral sclerosis (ALS) (ICD-10 G12.21) and meet **ALL** the following?
   - Therapy is prescribed by or in consultation with a neurologist or ALS specialist at an ALS Specialty Center or Care Clinic
   - The duration of patient's disease (from onset of symptoms) is 3 years or less
   - The patient has a forced vital capacity (FVC) greater than 70 percent
   - The patient has mild to moderate ALS with a score of 2 or higher in all of the following 12 items of the Amyotrophic Lateral Sclerosis Functional Rating Scale Revised (ALSFRS-R): speech, salivation, swallowing, handwriting, cutting food, dressing and hygiene, turning in bed, walking, climbing stairs, dyspnea, orthopnea, respiratory insufficiency
   - The patient has tried riluzole tablet OR is currently taking riluzole tablet

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

EDARAVONE ORAL (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **EDARAVONE ORAL (Radicava ORS)** requires the following rule(s) be met for approval:

A. You have amyotrophic lateral sclerosis (ALS: a type of brain and nerve condition)
B. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ALS specialist at an ALS Specialty Center or Care Clinic
C. You have had ALS (from onset of symptoms) for 3 years or less
D. You have a forced vital capacity (FVC: amount of air exhaled from lungs) of greater than 70 percent
E. You have mild to moderate ALS with a score of 2 or higher in all of the following 12 items of the Amyotrophic Lateral Sclerosis Functional Rating Scale Revised (ALSFRS-R: a tool for evaluating functional status): speech, salivation, swallowing, handwriting, cutting food, dressing and hygiene, turning in bed, walking, climbing stairs, dyspnea (difficulty breathing), orthopnea (shortness of breath while lying down), respiratory insufficiency (a type of breathing condition)
F. You have tried riluzole tablet OR are currently taking riluzole tablet

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

EDARAVONE ORAL (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of amyotrophic lateral sclerosis (ALS) (ICD-10 G12.21) and meet **ALL** of the following criteria?
   - The patient does not require invasive ventilation
   - The patient has improved baseline functional ability OR the patient has maintained a score of 2 or greater in all 12 items of the ALSFRS-R

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EDARAVONE ORAL (Radicava ORS)** requires the following rule(s) be met for renewal:
   A. You have amyotrophic lateral sclerosis (ALS: a type of brain and nerve condition)
   B. You do not require invasive ventilation (inserting a breathing tube into your throat)
   C. You have improved baseline functional ability OR you have maintained a score of 2 or greater in all 12 items of the Amyotrophic Lateral Sclerosis Functional Rating Scale Revised (ALSFRS-R)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

EFINACONAZOLE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **EFINACONAZOLE (Jublia)** requires the following rule(s) be met for approval:

A. You have onychomycosis of the toenail(s) (toenail fungus infection)

B. If you have onychomycosis due to trichophyton rubrum (a type of fungus), approval also requires:
   1. You have tried or have a contraindication to (harmful for you to use) ciclopirox topical solution AND either oral terbinafine or oral itraconazole

C. If you have onychomycosis due to trichophyton mentagrophytes (a type of fungus), approval also requires:
   1. You have tried or have a contraindication to (harmful for you to use) oral terbinafine OR oral itraconazole

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) as confirmed by at least **TWO** of the following criteria?
   - The patient has an elevated alkaline phosphatase (ALP) level
   - The patient has the presence of antimitochondrial antibodies (AMA) OR other PBC-specific autoantibodies, including sp100 or gp210, if AMA is negative
   - The patient has histologic evidence (obtained by liver biopsy) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ELAFIBRANOR (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist or hepatologist
   - The patient does not have decompensated cirrhosis (Child-Pugh B or C)
   - Iqirvo will NOT be used concurrently with any other second-line PBC treatment (i.e., Ocaliva [obeticholic acid], Livdelzi [seladelpar])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Iqirvo will be used as monotherapy in a patient who is unable to tolerate ursodiol (UDCA)
   - Iqirvo will be used in combination with ursodiol (UDCA) in a patient who had an inadequate response to at least 1 year of treatment with ursodiol (UDCA) monotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ELAFIBRANOR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ELAFIBRANOR (Iqirvo)** requires the following rule(s) be met for approval:

A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct), as confirmed by TWO of the following:
   1. You have an elevated (high) alkaline phosphatase (ALP) level (a type of lab test)
   2. You have the presence of antimitochondrial antibodies (AMA: indicator of the body attacking its own cells) or other PBC-specific autoantibodies (indicator of the body attacking its own cells), including sp100 or gp210, if AMA is negative
   3. You have histologic evidence (lab data obtained by liver biopsy [removal of cells or tissue from the liver for examination]) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts (symptoms of liver disease)

B. You are 18 years of age or older

C. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions) or hepatologist (a type of liver doctor)

D. You do not have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage)

E. You will NOT use Iqirvo concurrently (at the same time) with any other second-line therapy for PBC (Ocaliva [obeticholic acid], Livdelzi [seladelpar])

F. You meet ONE of the following:
   1. Iqirvo will be used as monotherapy (one drug treatment) if you are unable to tolerate ursodiol (UDCA)
   2. Iqirvo will be used in combination (together) with ursodiol (UDCA) if you had an inadequate (poor) response to at least 1 year of treatment with ursodiol (UDCA) monotherapy (one drug treatment)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ELAFIBRANOR (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Iqirvo will NOT be used concurrently with any other second-line PBC treatment (i.e., Ocaliva [obeticholic acid], Livdelzi [seladelpar])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ELAFIBRANOR (Iqirvo)** requires the following rule(s) be met for renewal:
   A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct)
   B. You continue to benefit from the medication
   C. You will NOT use Iqirvo concurrently (at the same time) with any other second-line therapy for PBC (Ocaliva [obeticholic acid], Livdelzi [seladelpar])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INITIAL DENIAL TEXT:

Our guideline named **ELAGOLIX (Orilissa)** requires the following rule(s) be met for approval:

A. You have moderate to severe pain associated with endometriosis (a condition affecting the uterus)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with an obstetrician or gynecologist (a type of women's health doctor)
D. You have tried or have a contraindication to (harmful for you to use) a nonsteroidal anti-inflammatory drug (NSAID such as ibuprofen, meloxicam, naproxen) AND a progestin-containing preparation (such as combination hormonal contraceptive preparation, progestin-only therapy)
E. Orilissa will NOT be used at the same time with another GnRH-modulating agent (such as Lupron Depot [leuprolide], Synarel [nafarelin], Zoladex [goserelin])

ELAGOLIX (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe pain associated with endometriosis (ICD-10 R52 and Group N80) and meet **ALL** of the following criteria?
   - The patient has had improvement in pain associated with endometriosis while on Orilissa therapy
   - Orilissa will NOT be used concurrently with another GnRH-modulating agent (e.g., Lupron Depot [leuprolide], Synarel [nafarelin], Zoladex [goserelin])

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **ELAGOLIX (Orilissa)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe pain associated with endometriosis (a condition affecting the uterus)
   B. You have had improvement in pain related to endometriosis while on Orilissa therapy
   C. Orilissa will NOT be used at the same time with another GnRH-modulating agent (such as Lupron Depot [leuprolide], Synarel [nafarelin], Zoladex [goserelin])

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Orilissa.

ELBASVIR/GRAZOPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ANY** of the following criteria?
   - The patient has moderate or severe hepatic impairment (decompensated cirrhosis; Child-Pugh B or C)
   - Zepatier will be used concurrently with any of the following medications: phenytoin, carbamazepine, rifampin, efavirenz (e.g., Atripla, Sustiva), atazanavir (e.g., Evotaz, Reyataz), darunavir (e.g., Prezcobix, Prezista), lopinavir, saquinavir, Aptivus (tipranavir), cyclosporine, nafcillin, ketoconazole, modafinil, bosentan, etravirine, elvitegravir/cobicistat/emtricitabine/tenofovir (e.g., Stribild, Genvoya), atorvastatin at doses greater than 20 mg daily, rosuvastatin at doses greater than 10 mg daily, Sovaldi (sofosbuvir), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Mavyret (pibrentasvir/glecaprevir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir)

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #4.

4. Is the patient treatment-naïve **AND** meets the following criterion?
   - The patient has an intolerance or contraindication to ONE of the following preferred agents: Epclusa, Harvoni

   If yes, continue to #5.
   If no, continue to #7.

5. Does the patient meet **ONE** of the following criteria?
   - The patient has genotype 1a infection AND does not have baseline NS5A polymorphisms
   - The patient has genotype 1b infection
   - The patient has genotype 4 infection
   - The patient is post-kidney transplant AND does not have baseline NS5A RAS polymorphisms

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

GUIDELINES FOR USE (CONTINUED)

6. Does the patient meet **ALL** of the following criteria?
   - The patient has genotype 1a infection
   - The patient has baseline NS5A polymorphisms
   - Zepatier will be used with ribavirin

   If yes, **approve for 16 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is the patient treatment-experienced **AND** meets the following criterion?
   - The patient has an intolerance or contraindication to ONE of the following preferred agents: Epclusa, Harvoni

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

8. Does the patient have genotype 1 infection and meet **ONE** of the following criteria?
   - The patient has genotype 1a infection, without baseline NS5A polymorphisms, AND failed prior treatment with peginterferon/ribavirin
   - The patient has genotype 1b infection AND failed prior treatment with peginterferon/ribavirin
   - The patient failed prior treatment with a peginterferon/ribavirin/protease inhibitor triple regimen AND Zepatier will be used with ribavirin

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

ELBASVIR/GRAZOPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient has genotype 1a infection with baseline NS5A polymorphisms, failed priortreatment with peginterferon/ribavirin, AND Zepatier will be used with ribavirin
   - The patient has genotype 4 infection, failed prior treatment with peginterferon/ribavirin, AND Zepatier will be used with ribavirin

   If yes, **approve for 16 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

10. Is the patient post-kidney transplant and meets **ALL** of the following criteria?
    - The patient failed prior treatment with a non-direct acting antiviral agent (e.g., interferon)
    - The patient does not have baseline NS5A RAS polymorphisms

    If yes, **approve for 12 weeks by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, continue to #11.

11. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

    If yes, **approve as indicated per guidance in AASLD/IDSA.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

ELBASVIR/GRAZOPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ELBASVIR/GRAZOPREVIR (Zepatier)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 12 years of age or older OR weigh at least 30 kilograms (66 pounds)
C. You have genotype 1 or 4 hepatitis C infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
E. You do NOT have moderate or severe liver impairment (decompensated cirrhosis [a condition where there is liver damage and scarring with major symptoms]; Child-Pugh B or C: [a score that evaluates the severity of liver damage])
F. You will NOT use Zepatier concurrently (at the same time) with any of the following medications: phenytoin, carbamazepine, rifampin, efavirenz (such as Atripla, Sustiva), atazanavir (such as Evotaz, Reyataz), darunavir (such as Prezcobix, Prezista), lopinavir, saquinavir, Aptivus (tipranavir), cyclosporine, nafcillin, ketoconazole, modafinil, bosentan, etravirine, elvitegravir/cobicistat/emtricitabine/tenofovir (such as Stribild, Genvoya), atorvastatin at doses greater than 20mg daily, rosuvastatin at doses greater than 10mg daily, Sovaldi (sofosbuvir), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Mavyret (pibrentasvir/glecaprevir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir)
G. You have an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Epclusa, Harvoni
H. If you are treatment-naive (no prior treatment), approval also requires ONE of the following:
    1. You have genotype 1a infection AND you do not have baseline NS5A polymorphisms (variations in a type of hepatitis C virus protein)
    2. You have genotype 1b infection
    3. You have genotype 4 infection
    4. You received a kidney transplant (replaced your kidney) AND you do not have baseline NS5A resistance-associated substitution (RAS) polymorphisms (variations in a type of hepatitis C virus protein)
    5. You have genotype 1a infection, with baseline NS5A polymorphisms, AND Zepatier will be used with ribavirin

ELBASVIR/GRAZOPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

I. **If you are treatment-experienced (failed prior treatment), approval also requires ONE of the following:**
   1. You have genotype 1a infection, without baseline NS5A polymorphisms (variations in a type of hepatitis C virus protein), AND were previously treated with peginterferon/ribavirin
   2. You have genotype 1b infection AND were previously treated with peginterferon/ribavirin
   3. You have genotype 1 infection, were previously treated with a peginterferon/ribavirin/protease inhibitor triple regimen, AND Zepatier will be used with ribavirin
   4. You have genotype 1a infection with baseline NS5A polymorphisms, were previously treated with peginterferon/ribavirin, AND Zepatier will be used with ribavirin
   5. You have genotype 4 infection, were previously treated with peginterferon/ribavirin, AND Zepatier will be used with ribavirin
   6. You received a kidney transplant (replaced your kidney), were previously treated with a non-direct acting antiviral (such as interferon), AND you do not have baseline NS5A resistance-associated substitution (RAS) polymorphisms (variations in a type of hepatitis C virus protein)

J. Zepatier will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zepatier.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Trikafta will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient has at least ONE variant in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is either responsive to Trikafta based on clinical or in vitro data or that results in the production of CFTR protein

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ELEXACAFTOR-TEZACAFTOR-IVACAFTOR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ELEXACAFTOR-TEZACAFTOR-IVACAFTOR (Trikafta)** requires the following rule(s) be met for approval:

A. You have cystic fibrosis (CF: a type of lung disorder)
B. You are 2 years of age or older
C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
D. You will NOT use Trikafta concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
E. You have at least ONE variant in the cystic fibrosis transmembrane conductance regulator (CFTR) gene (a type of gene) that is either responsive to Trikafta based on clinical or in vitro data (testing outside of the body in a tube) or that results in the production of CFTR protein

ELEXACAFTOR-TEZACAFTOR-IVACAFTOR (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in clinical status
   - Trikafta will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ELEXACAFTOR-TEZACAFTOR-IVACAFTOR (Trikafta)** requires the following rule(s) be met for renewal:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You have experienced an improvement in your clinical status
   C. You will NOT use Trikafta concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

RATIONALE

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ELRANATAMAB-BCMM BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ELRANATAMAB-BCMM BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least four prior lines of therapy, including a proteasome inhibitor (e.g., Velcade [bortezomib], Kyprolis [carfilzomib]), an immunomodulatory agent (e.g., Revlimid [lenalidomide], Pomalyst [pomalidomide]), and an anti-CD38 monoclonal antibody (e.g., Darzalex [daratumumab])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ELRANATAMAB-BCMM (Elrexfio)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory multiple myeloma (a type of blood cancer that has returned or did not respond to treatment)
   B. You are 18 years of age or older
   C. You have received at least four prior lines of therapy, including a proteasome inhibitor (such as Velcade [bortezomib], Kyprolis [carfilzomib]), an immunomodulatory agent (such as Revlimid [lenalidomide], Pomalyst [pomalidomide]), and an anti-CD38 monoclonal antibody (such as Darzalex [daratumumab])
   (Initial denial text continued on next page)

ELRANATAMAB-BCMM BVD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient has received at least 24 weeks of treatment with Elrexfio
   - The patient has responded to treatment (partial response [PR] or better), and has maintained this response for at least 2 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ELRANATAMAB-BCMM (Elrexfio)** requires the following rule(s) be met for renewal:
   A. You have relapsed or refractory multiple myeloma (a type of blood cancer that has returned or did not respond to treatment)
   B. You have received at least 24 weeks of treatment with Elrexfio
   C. You have responded to treatment (partial response [PR] or better), and have maintained this response for at least 2 months

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Elrexfio. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

ELTROMBOPAG - ALVAIZ (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ELTROMBOPAG - ALVAIZ** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Persistent or chronic immune (idiopathic) thrombocytopenia (ITP: a type of blood disorder)
   2. Thrombocytopenia (a type of blood disorder) due to chronic hepatitis C (a type of liver infection)
   3. Severe aplastic anemia (a type of blood disorder)

B. If you have persistent or chronic immune (idiopathic) thrombocytopenia, approval also requires:
   1. You are 6 years of age and older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or immunologist (a type of immune system doctor)
   3. You have tried or have a contraindication to (harmful for you to use) one corticosteroid or immunoglobulin, or you did not have a good enough response to a splenectomy (spleen removal)
   4. You will NOT use Alvaiz concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Promacta [eltrombopag], Doptelet [avatrombopag], Nplate [romiplostim])
   5. You meet ONE of the following:
      a. You have a platelet (a type of blood cell) count of less than 30 x 10^9/L
      b. You have a platelet (a type of blood cell) count of less than 50 x 10^9/L AND a prior bleeding event

C. If you have thrombocytopenia due to chronic hepatitis C, approval also requires:
   1. You are 18 years of age or older
   2. Your thrombocytopenia does not allow you to start interferon-based therapy (a type of drug for hepatitis) or limits your ability to maintain interferon-based therapy

D. If you have severe aplastic anemia, approval also requires:
   1. You are 18 years of age or older
   2. You did not have a good enough response to immunosuppressive therapy (treatment that lowers the activity of the body's immune system)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ELTROMBOPAG - ALVAIZ (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of thrombocytopenia due to chronic hepatitis C or severe aplastic anemia, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of persistent or chronic immune (idiopathic) thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as having an improvementin platelet count from baseline OR a reduction in bleeding events
   - Alvaiz will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Promacta [eltrombopag], Doptelet [avatrombopag], Nplate [romiplostim])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ELTROMBOPAG - ALVAIZ** requires the following rules be met for renewal:
   A. You have persistent or chronic immune (idiopathic) thrombocytopenia (ITP: a type of blood disorder)
   B. You have shown a clinical response to therapy, defined as having an improvement in platelet (a type of blood cell) count from baseline (before starting Alvaiz) OR a decreasein bleeding events
   C. You will NOT use Alvaiz concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Promacta [eltrombopag], Doptelet [avatrombopag], Nplate [romiplostim])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ELTROMBOPAG - PROMACTA (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for Promacta (eltrombopag) oral suspension packets and the patient meets **ONE** of the following criteria?
   - The patient had a trial of Promacta (eltrombopag) tablet
   - The patient is unable to tolerate the tablet formulation

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following strengths:**
   - **12.5mg packets.**
   - **25mg packets.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, **approve for 6 months by GPID or GPI-14 for all of the following strengths:**
   - **12.5mg tablet.**
   - **25mg tablet.**
   - **50mg tablet.**
   - **75mg tablet.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

4. Does the patient have a diagnosis of thrombocytopenia due to chronic hepatitis C **AND** meet the following criterion?
   - The patient's thrombocytopenia prevents the initiation of interferon-based therapy or limits the ability to maintain interferon-based therapy

   If yes, continue to #6.
   If no, continue to #5.

5. Does the patient have a diagnosis of severe aplastic anemia (ICD-10 D61.9) and meet **ONE** ofthe following criteria?
   - The patient is 2 years of age or olderAND the requested drug will be used in combination with standard immunosuppressive therapy as first-line treatment
   - The patient had an insufficient response to immunosuppressive therapy

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ELTROMBOPAG - PROMACTA (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have persistent or chronic immune thrombocytopenia, approval also requires:
1. You are 1 year of age or older
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or immunologist (a type of immune system doctor)
3. You have tried or have a contraindication to (harmful for you to use) one corticosteroid (such as prednisone) or immunoglobulin (such as Panzyga [immune globulin]), OR you had an insufficient response to splenectomy (surgical removal of spleen did not work)
4. You meet ONE of the following:
   a. You have a platelet (a type of blood cell) count of less than 30 x 10^9/L
   b. You have a platelet (a type of blood cell) count of less than 50 x 10^9/L AND had a prior bleeding event
5. You will NOT use the requested drug concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-Ras, such as Nplate [romiplostim], Doptelet [avatrombopag])

C. If you have thrombocytopenia due to chronic hepatitis C, approval also requires:
1. Your thrombocytopenia does not allow you to start interferon-based therapy (type of drug for hepatitis) or limits your ability to maintain interferon-based therapy

D. If you have severe aplastic anemia, approval also requires ONE of the following:
1. You are 2 years of age or older AND the requested drug will be used in combination with standard immunosuppressive therapy (treatment that lowers the activity of the body's immune system) as first-line treatment
2. You did not have a good enough response to immunosuppressive therapy

E. If the request is for Promacta (eltrombopag) oral suspension packets (for any indication), approval also requires:
1. You had a trial of Promacta (eltrombopag) tablet OR you are unable to tolerate the tablet formulation

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of irritable bowel syndrome with diarrhea (IBS-D) (ICD-10 K58.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The patient had a trial of or contraindication to dicyclomine AND the preferred agent: Xifaxan (rifaximin)

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ELUXADOLINE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ELUXADOLINE (Viberzi)** requires the following rule(s) be met for approval:

A. You have irritable bowel syndrome with diarrhea (a type of bowel disease)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
D. You have tried or have a contraindication to (harmful for you to use) dicyclomine AND the preferred medication: Xifaxan (rifaximin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary (familial) hemophagocytic lymphohistiocytosis (HLH) (ICD-10 D76.1) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an immunologist, hematologist, or oncologist
   - Gamifant will be used concurrently with dexamethasone
   - The patient has refractory, recurrent, or progressive disease OR the patient had a trial of or intolerance to conventional HLH therapy (chemotherapy, steroids, immunotherapy)

   If yes, continue to #2.
   If no, continue to #3.

EMAPALUMAB-LZSG (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the patient's primary HLH diagnosis confirmed by **ONE** of the following criteria?
   - The patient has undergone a genetic test identifying HLH-associated gene mutation (e.g., PRF1, UNC13D)
   - The patient has at least five of the following eight diagnostic criteria for HLH: fever; splenomegaly; cytopenias (affecting at least 2 of 3 cell lineages); hypertriglyceridemia and/or hypofibrinogenemia; hemophagocytosis in bone marrow or spleen or lymph nodes, and no evidence of malignancy; low or absent natural killer-cell activity; ferritin level of at least 500 mcg/L; soluble CD25 level of at least 2,400 U/mL

   If yes, **approve for 8 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of hemophagocytic lymphohistiocytosis (HLH)/macrophage activation syndrome (MAS) (ICD-10 D76.1) and meet **ALL** of the following criteria?
   - The patient has known or suspected Still's disease or systemic juvenile idiopathic arthritis (sJIA)
   - The patient had an inadequate response or intolerance to glucocorticoids OR has a recurrent MAS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EMAPALUMAB-LZSG (Gamifant)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Primary (familial) hemophagocytic lymphohistiocytosis (HLH: a type of genetic immune disorder)
      2. Hemophagocytic lymphohistiocytosis (HLH)/macrophage activation syndrome (MAS) (a type of immune disorder)

   (Initial denial text continued on next page)

EMAPALUMAB-LZSG (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have primary hemophagocytic lymphohistiocytosis, approval also requires:
1. Therapy is prescribed by or in consultation with an immunologist (doctor who specializes in immune disorders), hematologist (a type of blood doctor), or oncologist (a type of cancer doctor)
2. Gamifant will be used at the same time with dexamethasone
3. You have refractory, recurrent, or progressive disease (disease does not respond to treatment, returns, or is getting worse) OR you have tried or had an intolerance (side effect) to conventional hemophagocytic lymphohistiocytosis therapy (chemotherapy, steroids, immunotherapy)
4. Your diagnosis is confirmed by ONE of the following:
   a. You have undergone a genetic test identifying a HLH-associated gene mutation (such as PRF1 [type of gene], UNC13D [type of gene])
   b. You have at least five of the following eight diagnostic criteria for HLH: fever; splenomegaly (enlarged spleen); cytopenias (low number of a type of blood cell affecting at least 2 of 3 cell lineages); hypertriglyceridemia (high level of triglycerides, a type of fat in the blood) and/or hypofibrinogenemia (low level of fibrinogen, a type of protein in the blood); hemophagocytosis (destruction of certain types of cells) in bone marrow or spleen or lymph nodes, and no evidence of malignancy (cancer); low or absent natural killer-cell (white blood cells) activity; ferritin level (a type of lab test) of at least 500 mcg/L; soluble CD25 level (a type of lab test) of at least 2,400 U/mL

C. If you have hemophagocytic lymphohistiocytosis/macrophage activation syndrome, approval also requires:
1. You have known or suspected Still's disease (an autoinflammatory disease) or systemic juvenile idiopathic arthritis (sJIA: a type of joint condition)
2. You had an inadequate response (treatment did not work) or intolerance (side effect) to glucocorticoids OR you have a recurrent (disease has returned) macrophage activation syndrome (MAS: a type of immune disorder)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

EMAPALUMAB-LZSG (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of hemophagocytic lymphohistiocytosis (HLH)/macrophage activation syndrome (MAS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of primary (familial) hemophagocytic lymphohistiocytosis (HLH) (ICD-10 D76.1) and meet **ALL** of the following criteria?
   - The patient has not received a successful hematopoietic stem cell transplantation
   - The patient has demonstrated improved immune system response from baseline (e.g., resolution of fever, decreased splenomegaly, improvement in CNS symptoms, improved CBC, increased fibrinogen levels, reduced D-dimer, reduced ferritin, reduced soluble CD25 levels)

   If yes, **approve for 8 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EMAPALUMAB-LZSG (Gamifant)** requires the following rule(s) be met for renewal:
   A. You have primary (familial) hemophagocytic lymphohistiocytosis (HLH: a type of genetic immune disorder)
   B. You have not received a successful hematopoietic stem cell transplantation (bone marrow transplant)
   C. You have demonstrated improved immune system response from baseline (for example, your fever has gone away, decreased splenomegaly [spleen size has gotten smaller], improvement in central nervous system symptoms, improved complete blood count, increased fibrinogen levels, or reduced D-dimer, ferritin, or soluble CD25 [types of proteins] levels)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

4. Does the patient have a diagnosis of bladder cancer (ICD-10 Group C67) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has muscle invasive bladder cancer (MIBC)
   - Padcev will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph) as neoadjuvant treatment and then continued after cystectomy as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ENFORTUMAB (Padcev)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Locally advanced or metastatic urothelial cancer (mUC: a type of urinary system cancer that has spread to nearby tissue or lymph nodes or to other parts of the body)
      2. Bladder cancer

   B. If you have locally advanced or metastatic urothelial cancer, approval also requires:
      1. You are 18 years of age or older
      2. You meet ONE of the following:
         a. Padcev will be used as a single agent, and you meet ONE of the following:
            i. You have previously received a medication that works against a type of protein called programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) AND you have previously received a platinum (such as cisplatin, carboplatin)-containing chemotherapy (type of cancer medication)
            ii. You are not eligible for cisplatin-containing chemotherapy and have previously received one or more prior lines of therapy
         b. Padcev will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph)

   C. If you have bladder cancer, approval also requires:
      1. You are 18 years of age or older
      2. You have muscle invasive bladder cancer (MIBC: bladder cancer that has grown into the muscle wall)
      3. Padcev will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph) as neoadjuvant treatment (given before main treatment), and then continued after cystectomy (bladder removal surgery) as adjuvant treatment (additional treatment)

This is an inhalation drug that normally requires a nebulizer. If Payment Determination has not been assessed and/or is being contested, please reanalyze or refer to the NEBULIZER BVD DETERMINATION guideline in the library.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and ICD-10 J44.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ohtuvayre will be used as maintenance treatment
   - Therapy is prescribed by or in consultation with a pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have a blood eosinophil level of 100 cells/microliter or greater?

   If yes, continue to #3.
   If no, continue to #4.

ENSIFENTRINE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ENSIFENTRINE (Ohtuvayre)** requires the following rule(s) be met for approval:

A. You have chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
B. You are 18 years of age or older
C. Ohtuvayre will be used as maintenance treatment (taken on a regular basis)
D. Therapy is prescribed by or in consultation with a pulmonologist (a type of lung/breathing doctor)
E. You have a history of and will continue on, or you had a contraindication (harmful for you to use) or failure (drug did not work) to, ONE of the following standard of care therapies:
    1. LAMA (long-acting antimuscarinic)/LABA (long-acting beta-2-agonist) combination drug (such as Stiolto Respimat, Anoro Ellipta)
    2. LAMA/LABA/ICS (inhaled corticosteroid) combination drug (such as Trelegy Ellipta, Breztri Aerosphere) if you have a blood eosinophil level of 100 cells/microliter or greater

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ENSIFENTRINE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and ICD-10 J44.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient have a blood eosinophil level of 100 cells/microliter or greater?

   If yes, continue to #3.
   If no, continue to #4.

3. Has the patient had a history of and will continue on, or has a contraindication or failure to, the following standard of care therapy?
   - LAMA (long-acting antimuscarinic)/LABA (long-acting beta-2-agonist)/ICS (inhaled corticosteroid) combination drug (e.g., Trelegy Ellipta, Breztri Aerosphere)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Has the patient had a history of and will continue on, or has a contraindication or failure to, the following standard of care therapy?
   - LAMA (long-acting antimuscarinic)/LABA (long-acting beta-2-agonist) combination drug (e.g., Stiolto Respimat, Anoro Ellipta)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - The patient has a reduction in COPD exacerbations from baseline
   - The patient has a reduction in severity or frequency of COPD-related symptoms (e.g., wheezing, shortness of breath, coughing, sputum production, etc.)
   - The patient has an increase in FEV1 by at least 5 percent from pretreatment baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

ENSIFENTRINE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ENSIFENTRINE (Ohtuvayre)** requires the following rule(s) be met for renewal:

A. You have chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
B. You have a history of and will continue on, or you had a contraindication (harmful for you to use) or failure (drug did not work) to ONE of the following standard of care therapies:
    1. LAMA (long-acting antimuscarinic)/LABA (long-acting beta-2-agonist) combination drug (such as Stiolto Respimat, Anoro Ellipta)
    2. LAMA/LABA/ICS (inhaled corticosteroid) combination drug (such as Trelegy Ellipta, Breztri Aerosphere) if you have a blood eosinophil level of 100 cells/microliter or greater
C. You have shown a clinical response as evidenced by ONE of the following:
    1. You have a reduction (decrease) in COPD exacerbations (worsening of symptoms) from baseline (before starting Ohtuvayre)
    2. You have a reduction in severity or frequency of COPD-related symptoms (such as wheezing, shortness of breath, coughing, sputum (mucus) production, etc.)
    3. You have an increase in FEV1 (a type of lung test) by at least 5 percent from pretreatment baseline (before starting Ohtuvayre)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.
50.16.2 – Inhalation Durable Medical Equipment (DME) Supply Drugs (Rev. 18, 09-17-18)
Medicare Part B covers certain inhalation drugs, such as Albuterol and Levalbuterol nebulizer solutions, as supplies under the DME benefit. The DME benefit, however, is not available to beneficiaries residing in long-term care facilities (i.e. Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities). Consequently, if the beneficiary is not on a Part A stay in one of these facilities, these inhalation drugs can be covered under Medicare Part D. CMS permits Part D sponsors to rely on a patient residence code of “3” or “9” on a pharmacy claim for determining when such inhalation drugs may be covered under Part D. Moreover, we expect that sponsors will only pay claims for these products when the pharmacy claim includes these specified patient residence codes regardless of any prior coverage determination based upon a prescriber statement indicating that the beneficiary resides in a long-term care facility (i.e. the prescriber statement and patient residence code must be aligned). For further information, please refer to the Prescribing Information and/or Drug Monograph for Ohtuvayre.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is *ROS1*-positive, as detected by an FDA-approved test

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of a solid tumor and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - The tumor has a neurotrophic tyrosine receptor kinase (NTRK) gene fusion without a known acquired resistance mutation, as detected by an FDA-approved test
   - The tumor is metastatic, or surgical resection is likely to result in severe morbidity
   - The patient has progressed following treatment or there are no satisfactory alternative treatments

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Is the request for Rozlytrek (100mg or 200mg) capsules?

   If yes, **approve both 100mg and 200mg capsules for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

ENTRECTINIB (PART D)

GUIDELINES FOR USE

4. Is the request for Rozlytrek 50mg pellets and the patient meets **ALL** of the following criteria?
   - The patient had a trial of or contraindication to Rozlytrek capsules made into an oral suspension
   - The patient has difficulty or is unable to swallow capsules

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ENTRECTINIB (Rozlytrek)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
      2. Solid tumor (an abnormal mass)
   B. If you have metastatic non-small cell lung cancer, approval also requires:
      1. You are 18 years of age or older
      2. Your tumor is *ROS1*-positive (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   C. If you have a solid tumor, approval also requires:
      1. You are 1 month of age or older
      2. The tumor has a neurotrophic tyrosine receptor kinase (NTRK) gene fusion without a known acquired resistance mutation (an abnormal change in a type of gene that does not have any known resistance), as detected by a Food and Drug Administration (FDA)-approved test
      3. Your tumor is metastatic (has spread to other parts of the body), or surgical resection (removal) is likely to result in severe morbidity (disease)
      4. You have progressed (gotten worse) after treatment or there are no satisfactory alternative treatments
   D. If the request is for Rozlytrek 50mg pellets, approval also requires:
      1. You have tried or have a contraindication to (harmful for you to use) Rozlytrek capsules that are used to make an oral suspension
      2. You have difficulty or are not able to swallow capsules

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   Our guideline named **ENZALUTAMIDE (Xtandi)** requires the following rules be met for approval:

   A. You have ONE of the following:
      1. Metastatic castration-resistant prostate cancer (mCRPC: cancer that has spread after treatment with hormone therapy)
      2. Metastatic castration-sensitive prostate cancer (mCSPC: cancer that had spread beyond the prostate and responds to hormone therapy)
      3. Non-metastatic castration-resistant prostate cancer (nmCRPC: prostate cancer that has not spread to other parts of the body and does not respond to hormone therapy)
      4. Non-metastatic castration-sensitive prostate cancer (nmCSPC: prostate cancer that has not spread to other parts of the body and responds to hormone therapy)

   B. If you have metastatic castration-resistant prostate cancer, metastatic castration-sensitive prostate cancer, or non-metastatic castration-resistant prostate cancer, approval also requires ONE of the following:
      1. You have received a bilateral orchiectomy (surgical removal of both testicles)
      2. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
      3. Xtandi will be used concurrently (at the same time) with a gonadotropin releasing hormone agonist or antagonist (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

ENZALUTAMIDE (PART D)

GUIDELINES FOR (CONTINUED)

C. If you have non-metastatic castration-sensitive prostate cancer, approval also requires:

1. You are at high risk for metastasis (prostate specific antigen [PSA] level has doubled over 9 months or less)
2. You meet ONE of the following:
   a. You have received a bilateral orchiectomy (surgical removal of both testicles)
   b. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
   c. Xtandi will be used concurrently (at the same time) with a gonadotropin releasing hormone agonist or antagonist (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Xtandi.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

EPCORITAMAB-BYSP BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), including DLBCL arising from indolent lymphoma, or high-grade B-cell lymphoma, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient previously received at least two lines of systemic therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma (FL) (ICD-10 Group C82) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

EPCORITAMAB-BYSP BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - Epkinly will be used in combination with lenalidomide (Revlimid) and rituximab
   - Epkinly will be used as monotherapy after receiving at least two lines of systemic therapy (e.g., Gazyva [obinutuzumab], bendamustine, rituximab, Revlimid [lenalidomide])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EPCORITAMAB-BYSP (Epkinly)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Relapsed or refractory diffuse large B-cell lymphoma (DLBCL: a type of blood cancer that has returned or is not responding to treatment), including DLBCL arising from indolent (slow growing) lymphoma (a type of blood cancer), or high-grade B-cell lymphoma (a type of blood cancer)
      2. Relapsed or refractory follicular lymphoma (FL: a type of blood cancer that has returned or is not responding to treatment)

   B. If you have diffuse large B-cell lymphoma or high-grade B-cell lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. You previously received at least two lines of systemic therapy (treatment that travels throughout the body) (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])

   C. If you have follicular lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. You meet ONE of the following:
         a. Epkinly will be used in combination with lenalidomide (Revlimid) and rituximab
         b. Epkinly will be used as monotherapy (one medication treatment) after receiving at least two lines of systemic therapy (treatment that travels throughout the body) (such as Gazyva [obinutuzumab], bendamustine, rituximab, Revlimid [lenalidomide])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, physician at an amyloidosis treatment center, or medical geneticist
   - The patient is ambulatory (i.e., Familial Amyloid Polyneuropathy [FAP] stage 1 - 2 or Polyneuropathy Disability [PND] Stage I - IIIb polyneuropathy)
   - Wainua will NOT be used concurrently with other hATTR-PN agents (e.g. Tegsedi [inotersen], Amvuttra [vutrisiran], Onpattro [patisiran])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

EPLONTERSEN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the hATTR diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EPLONTERSEN (Wainua)** requires the following rule(s) be met for approval:
   A. You have hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve damage/pain)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve doctor), cardiologist (a type of heart doctor), physician at an amyloidosis treatment center, or medical geneticist (doctor who treats gene disorders)
   D. You are ambulatory (able to walk) (you have Familial Amyloid Polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2 or Polyneuropathy Disability [PND: a tool used to evaluate disease severity] Stage I to IIIb polyneuropathy)
   E. You will NOT use Wainua concurrently (at the same time) with other hATTR-PN medications (such as Tegsedi [inotersen], Amvuttra [vutrisiran], Onpattro [patisiran])
   F. Your diagnosis is confirmed by ONE of the following:
      1. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (a type of abnormal protein) presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
      2. DNA genetic sequencing (a type of lab test) to confirm hATTR mutation (a type of abnormal gene)

   A. You have hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
   B. You have not progressed to Familial Amyloid Polyneuropathy (FAP: a tool used to evaluate disease severity) stage 3 or Polyneuropathy Disability (PND: a tool used to evaluate disease severity) stage 4 polyneuropathy as shown by functional decline (such as being wheelchair-bound or bedridden)
   C. You will NOT use Wainua concurrently (at the same time) with other hATTR-PN medications (such as Tegsedi [inotersen], Amvuttra [vutrisiran], Onpattro [patisiran])

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Wainua. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PLUS CLOSED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

EPLONTERSEN SYRINGE BvD (PART D)

For Part D use only:

EPLONTERSEN SYRINGE (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	HEREDITARY TRANSTHYRETIN-MEDIATED AMYLOIDOSIS WITH POLYNEUROPATHY (HATTR-PN): INITIAL: DIAGNOSIS CONFIRMED BY: 1) BIOPSY OF TISSUE/ORGAN TO CONFIRM AMYLOID PRESENCE AND CHEMICAL TYPING TO CONFIRM PRESENCE OF TTR PROTEIN, OR 2) DNA GENETIC SEQUENCING TO CONFIRM HATTR MUTATION.
Age Restrictions	N/A
Prescriber Restrictions	HATTR-PN: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A NEUROLOGIST, CARDIOLOGIST, PHYSICIAN AT AN AMYLOIDOSIS TREATMENT CENTER, OR MEDICAL GENETICIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	HATTR-PN: INITIAL: 1) FAMILIAL AMYLOID POLYNEUROPATHY (FAP) STAGE 1 OR 2, OR UP TO POLYNEUROPATHY DISABILITY (PND) STAGE IIIB POLYNEUROPATHY, AND 2) NO CONCURRENT USE WITH OTHER HATTR-PN AGENTS. RENEWAL: 1) NOT PROGRESSED TO FAP STAGE 3 OR PND STAGE 4 POLYNEUROPATHY AS EVIDENCED BY FUNCTIONAL DECLINE, AND 2) NO CONCURRENT USE WITH OTHER HATTR-PN AGENTS.

EPOETIN ALFA (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
EPOETIN ALFA	EPOGEN, PROCRIT	04553		GPI-10 (8240102000)	

PAYMENT DETERMINATION CRITERIA

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, **do NOT approve under Part D. Finalize as follows:**

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment which is paid under Medicare Part B and is not a Part D eligible drug. Please follow your internal procedures for denial.

   If no, review the clinical criteria for Part D coverage below if applicable. (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   Guideline interpretation beyond this point requires Clinical/Technician review.

EPOETIN ALFA (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of anemia due to chronic kidney disease (CKD) (ICD-10 D63.1) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10 g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of anemia related to zidovudine (Retrovir) therapy and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10 g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

EPOETIN ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of anemia due to the effects of concomitantly administered cancer chemotherapy (ICD-10 D64.81) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10 g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the patient undergoing elective, noncardiac, nonvascular surgery and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 13 g/dL

   If yes, **approve for 1 month by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EPOETIN ALFA (Procrit, Epogen)** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Anemia (low amount of healthy red blood cells) due to chronic kidney disease (CKD)
      2. Anemia related to zidovudine (Retrovir) therapy (type of drug to treat human immunodeficiency virus)
      3. Anemia due to the effects of concomitantly administered (given at the same time) cancer chemotherapy
      4. You are undergoing elective, noncardiac, nonvascular surgery (surgery not relating to the heart of blood vessels)

   B. If you have anemia due to chronic kidney disease, approval also requires:
      1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)
      2. Your hemoglobin level (type of blood test) is less than 10 g/dL

   (Initial denial text continued on next page)

EPOETIN ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have anemia related to zidovudine (Retrovir) therapy, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)
2. Your hemoglobin level (type of blood test) is less than 10 g/dL

D. If you have anemia due to the effects of concomitantly administered cancer chemotherapy, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)
2. Your hemoglobin level (type of blood test) is less than 10 g/dL

E. If you are undergoing elective, noncardiac, nonvascular surgery, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Retacrit (epoetin alfa-epbx)
2. Your hemoglobin level (type of blood test) is less than 13 g/dL

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

EPOETIN ALFA (PART D)

RENEWAL CRITERIA

NOTE: For the indication of elective, noncardiac, nonvascular surgery, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of anemia due to chronic kidney disease (CKD) (ICD-10 D63.1) **AND** meet the following criterion?
   - The patient is NOT receiving dialysis treatment
     [Note: If the patient is currently receiving dialysis treatment, the requested medication is included in the bundle dialysis facility payment which is paid under Medicare Part B]. Please refer to CRITERIA FOR PART B vs PART D DETERMINATION above.

     If yes, continue to #2.
     If no, continue to #4.

2. Is the patient an adult (18 years of age or older) and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level has reached 10 g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #3.

3. Is the request for a pediatric (less than 18 years of age) patient and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level has approached or exceeds 12 g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

EPOETIN ALFA (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of anemia related to zidovudine (Retrovir) therapy **AND** meet the following criterion?
   - The patient's hemoglobin level is between 10g/dL and 12g/dL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of anemia due to the effects of concomitantly administered cancer chemotherapy (ICD-10 D64.81) and meet **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10 g/dL
   - The patient's hemoglobin level does not exceed a level needed to avoid red blood cell (RBC) transfusion

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EPOETIN ALFA (Procrit, Epogen)** requires the following rules be met for renewal:
   A. The request is for ONE of the following:
      1. Anemia (low amount of healthy red blood cells) due to chronic kidney disease (CKD)
      2. Anemia related to zidovudine (Retrovir) therapy (type of drug to treat human immunodeficiency virus)
      3. Anemia due to the effects of concomitantly administered (given at the same time) cancer chemotherapy

EPOETIN ALFA (PART D)

RENEWAL CRITERIA (CONTINUED)

B. If you are an adult with anemia due to chronic kidney disease, renewal also requires:
1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
2. Your hemoglobin level (type of blood test) is less than 10 g/dL OR has reached 10 g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

C. If you are a pediatric patient with anemia due to chronic kidney disease, renewal also requires:
1. You are NOT receiving dialysis treatment (process of removing excess water, toxins from the blood)
2. Your hemoglobin level (a type of blood test) is less than 10 g/dL OR has approached or exceeds 12 g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

D. If you have anemia related to zidovudine (Retrovir) therapy, renewal also requires:
1. Your hemoglobin level (type of blood test) is between 10 g/dL and 12 g/dL

E. If you have anemia due to the effects of concomitantly administered cancer chemotherapy, renewal also requires ONE of the following:
1. Your hemoglobin level (type of blood test) is less than 10 g/dL
2. Your hemoglobin level does not exceed a level needed to avoid red blood cell (RBC) transfusion

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment which is paid under Medicare Part B.

For further information, please refer to the Prescribing Information and/or Drug Monograph for Procrit or Epogen.

EPOETIN ALFA (PART D)

For Part D use only:

EPOETIN ALFA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: CHRONIC KIDNEY DISEASE (CKD), ANEMIA RELATED TO ZIDOVUDINE OR CANCER CHEMOTHERAPY: HEMOGLOBIN LEVEL IS LESS THAN 10G/DL. ELECTIVE, NON-CARDIAC, NON-VASCULAR SURGERY: HEMOGLOBIN LEVEL IS LESS THAN 13G/DL. RENEWAL: 1) CKD IN ADULTS NOT ON DIALYSIS: (A) HEMOGLOBIN LEVEL IS LESS THAN 10G/DL, OR (B) HEMOGLOBIN LEVEL HAS REACHED 10G/DL AND THE DOSE IS BEING OR HAS BEEN REDUCED/INTERRUPTED TO DECREASE THE NEED FOR BLOOD TRANSFUSIONS. 2) CKD IN PEDIATRIC PATIENTS: (A) HEMOGLOBIN LEVEL IS LESS THAN 10G/DL, OR (B) HEMOGLOBIN LEVEL HAS APPROACHED OR EXCEEDS 12G/DL AND THE DOSE IS BEING OR HAS BEEN REDUCED/INTERRUPTED TO DECREASE THE NEED FOR BLOOD TRANSFUSIONS. 3) ANEMIA RELATED TO ZIDOVUDINE: HEMOGLOBIN LEVEL BETWEEN 10G/DL AND 12G/DL. 4) CANCER CHEMOTHERAPY: (A) HEMOGLOBIN LEVEL IS LESS THAN 10 G/DL, OR (B) HEMOGLOBIN LEVEL DOES NOT EXCEED A LEVEL NEEDED TO AVOID RBC TRANSFUSION.
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	ANEMIA FROM CHEMO/CKD WITHOUT DIALYSIS/ZIDOVUDINE: INITIAL/RENEWAL: 12 MONTHS. SURGERY: 1 MONTH.
Other Criteria	INITIAL: CKD, ANEMIA RELATED TO ZIDOVUDINE OR CANCER CHEMOTHERAPY, OR ELECTIVE, NON-CARDIAC, NON-VASCULAR SURGERY: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT RETACRIT. RENEWAL: CKD: NOT RECEIVING DIALYSIS TREATMENT. THIS DRUG MAY BE EITHER BUNDLED WITH AND COVERED UNDER END STAGE RENAL DISEASE DIALYSIS RELATED SERVICES OR COVERED UNDER MEDICARE D DEPENDING UPON THE CIRCUMSTANCES.

2. Your hemoglobin level (a type of blood test) is less than 10g/dL OR has approached or exceeds 12g/dL and your dose is being or has been reduced/interrupted to decrease the need for blood transfusions

D. If you have anemia related to zidovudine (Retrovir) therapy, renewal also requires:
1. Your hemoglobin level (type of blood test) is between 10g/dL and 12g/dL

E. If you have anemia due to the effects of concomitantly administered cancer chemotherapy, renewal also requires ONE of the following:
1. Your hemoglobin level (type of blood test) is less than 10g/dL
2. Your hemoglobin level does not exceed a level needed to avoid red blood cell (RBC) transfusion

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment which is paid under Medicare Part B.

For further information, please refer to the Prescribing Information and/or Drug Monograph for Retacrit.

EPOETIN ALFA-EPBX (PART D)

For Part D use only:

EPOETIN ALFA-EPBX (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: CHRONIC KIDNEY DISEASE (CKD), ANEMIA RELATED TO ZIDOVUDINE, OR CANCER CHEMOTHERAPY: HEMOGLOBIN LEVEL IS LESS THAN 10G/DL. ELECTIVE, NON-CARDIAC, NON-VASCULAR SURGERY: HEMOGLOBIN LEVEL IS 13G/DL OR LESS. RENEWAL: 1) CKD IN ADULTS NOT ON DIALYSIS: (A) HEMOGLOBIN LEVEL IS LESS THAN 10G/DL, OR (B) HEMOGLOBIN LEVEL HAS REACHED 10G/DL AND THE DOSE IS BEING OR HAS BEEN REDUCED/INTERRUPTED TO DECREASE THE NEED FOR BLOOD TRANSFUSIONS. 2) CKD IN PEDIATRIC PATIENTS: (A) HEMOGLOBIN LEVEL IS LESS THAN 10G/DL, OR (B) HEMOGLOBIN LEVEL HAS APPROACHED OR EXCEEDS 12G/DL AND THE DOSE IS BEING OR HAS BEEN REDUCED/INTERRUPTED TO DECREASE THE NEED FOR BLOOD TRANSFUSIONS. 3) ANEMIA RELATED TO ZIDOVUDINE: HEMOGLOBIN LEVEL BETWEEN 10G/DL AND 12G/DL. 4) CANCER CHEMOTHERAPY: (A) HEMOGLOBIN LEVEL IS LESS THAN 10 G/DL, OR (B) HEMOGLOBIN LEVEL DOES NOT EXCEED A LEVEL NEEDED TO AVOID RBC TRANSFUSION.
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	ANEMIA FROM CHEMO/CKD WITHOUT DIALYSIS/ZIDOVUDINE: INITIAL/RENEWAL: 12 MONTHS. SURGERY: 1 MONTH.
Other Criteria	RENEWAL: CKD: NOT RECEIVING DIALYSIS TREATMENT. THIS DRUG MAY BE EITHER BUNDLED WITH AND COVERED UNDER END STAGE RENAL DISEASE DIALYSIS RELATED SERVICES OR COVERED UNDER MEDICARE D DEPENDING UPON THE CIRCUMSTANCES.

EPOPROSTENOL IV BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
EPOPROSTENOL SODIUM	VELETRI, EPOPROSTENOL SODIUM	37762		GPI-10 (4017004010)	
EPOPROSTENOL SODIUM (GLYCINE)	FLOLAN	07323			

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

EPOPROSTENOL IV BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered using an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

EPOPROSTENOL IV BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by HICL for Flolan and Veletri or by GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

EPOPROSTENOL IV BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **EPOPROSTENOL IV (Veletri, Flolan)** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of lung and heart condition) (World Health Organization Group 1: a way to classify the severity of disease)
B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
C. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
    1. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
    2. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
    3. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

EPOPROSTENOL IV BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2)?

   If yes**, approve for 12 months by HICL for Flolan and Veletri or by GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EPOPROSTENOL IV (Veletri, Flolan)** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH: a type of lung and heart condition) (World Health Organization Group 1: a way to classify the severity of disease)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monographs for Flolan and Veletri.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for BvD review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

   Our guideline named **ERENUMAB-AOOE (Aimovig)** requires the following rule(s) be met for renewal:
   A. The request is for the preventive treatment of migraines (a type of headache)
   B. You will NOT use Aimovig concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Emgality [galcanezumab-gnlm], Nurtec ODT [rimegepant]) for migraine prevention
   C. You meet ONE of the following:
      1. You have experienced a reduction in migraines or headache frequency with therapy
      2. You have experienced a reduction in migraine severity with therapy
      3. You have experienced a reduction in migraine duration with therapy

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ERIBULIN (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ERIBULIN MESYLATE	HALAVEN, ERIBULIN MESYLATE	37256		GPI-10 (2150000920)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient has tried at least TWO chemotherapeutic regimens in the adjuvant or metastatic setting, which include one agent from EACH of the following drug classes: an anthracycline (e.g., daunorubicin, doxorubicin, epirubicin), a taxane (e.g., docetaxel, paclitaxel)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of unresectable or metastatic liposarcoma (ICD-10 Groups C49, C48) **AND** meet the following criterion?
   - The patient has tried an anthracycline-containing regimen (e.g., daunorubicin, doxorubicin, epirubicin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ERIBULIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ERIBULIN (Halaven)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic breast cancer (a type of cancer that has spread to other parts of the body)
   2. Unresectable or metastatic liposarcoma (a type of cancer that begins in the fat cells that cannot be completely removed with surgery or has spread to other parts of the body)

B. If you have metastatic breast cancer, approval also requires:
   1. You have tried at least TWO chemotherapeutic regimens (drugs used to treat cancer) in the adjuvant (add on treatment) or metastatic setting, which include one medication from EACH of the following drug classes:
      a. An anthracycline (a type of cancer treatment such as daunorubicin, doxorubicin, epirubicin)
      b. A taxane (a type of cancer treatment such as docetaxel, paclitaxel)

C. If you have unresectable or metastatic liposarcoma, approval also requires:
   1. You have tried an anthracycline-containing regimen (a type of cancer treatment such as daunorubicin, doxorubicin, epirubicin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of treatment-resistant depression (TRD) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a psychiatrist or other Risk Evaluation and Mitigation Strategy (REMS)-certified provider
   - The patient has non-psychotic, unipolar depression
   - The patient does NOT have active substance abuse

   (**NOTE:** Treatment resistant depression is defined as a treatment failure after trial of two or more antidepressant medications of adequate dose and duration.)

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

ESKETAMINE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of major depressive disorder (MDD) (ICD-10 Groups F32, F33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Spravato will be used in combination with an oral antidepressant (e.g., Zoloft [sertraline], Cymbalta [duloxetine])
   - The patient has acute suicidal ideation or behavior
   - Therapy is prescribed by or in consultation with a psychiatrist or other Risk Evaluation and Mitigation Strategy (REMS)-certified provider
   - The patient has non-psychotic, unipolar depression
   - The patient does NOT have active substance abuse

   If yes, **approve for 4 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ESKETAMINE (Spravato)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Treatment-resistant depression (TRD: depressive symptoms are not responding to treatment)
      2. Major depressive disorder (MDD: a type of mental illness)

   B. If you have treatment-resistant depression, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a psychiatrist (a type of mental health doctor) or other Risk Evaluation and Mitigation Strategy (REMS)-certified provider (a doctor that is authorized to prescribe the requested medication)
      3. You have non-psychotic, unipolar depression (you have no other mental health conditions except depression)
      4. You do NOT have active substance (drug) abuse

   (Initial denial text continued on next page)

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ESRD BVD DETERMINATION (PART D)

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: This PA is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of end stage renal disease (ESRD) and is on dialysis (ICD-10 N18.6)?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the physician indicate that the patient is no longer on dialysis?

   If yes, **approve the requested drug for 12 months by HICL or GPI-10 under Part D.** (**NOTE**: If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   If no, continue to #3.

3. Does the physician attest that the requested medication is being used for an indication that is unrelated to dialysis?

   If yes, **approve the requested drug for 12 months by HICL or GPI-10 under Part D.** (**NOTE:** If the ESRD_Dialysis attribute is present, select the 'ESRD' Override Type within the PA, which is available in the 'Additional Overrides' section.)

   If no, **do NOT approve under Part D. Finalize as follows:**

   PAC NOTE: Please defer to a pharmacist for denial.

   CLINICAL SPECIALIST NOTE: This medication is included in the bundled dialysis facility payment which is paid under Medicare Part B and is not a Part D eligible drug. Please follow your internal procedures for denial.

ESRD BVD DETERMINATION (PART D)

RATIONALE

Patients identified as Part D End Stage Renal Disease (ESRD) undergoing dialysis will be directed to a dialysis treatment center and have their ESRD treatment related drug included in the bundled dialysis facility payment. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.

For Part D use only:

ESRD BVD DETERMINATION (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	12 MONTHS
Other Criteria	THIS DRUG MAY BE EITHER BUNDLED WITH AND COVERED UNDER END STAGE RENAL DISEASE DIALYSIS RELATED SERVICES OR COVERED UNDER MEDICARE D DEPENDING UPON THE CIRCUMSTANCES. INFORMATION MAY NEED TO BE SUBMITTED DESCRIBING THE USE AND SETTING OF THE DRUG TO MAKE THE DETERMINATION.

Created: 02/11
Effective: 07/11/26 Client Approval: 07/26 P&T Approval: 11/14

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ETANERCEPT (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ETANERCEPT	ENBREL	18830		GPI-10 (6629003000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

ETANERCEPT (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

ETANERCEPT (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 4 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ETANERCEPT (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ETANERCEPT (Enbrel)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
      4. Ankylosing spondylitis (AS: a type of joint condition)
      5. Moderate to severe plaque psoriasis (PsO: a type of skin condition)

   B. If you have moderate to severe rheumatoid arthritis, approval also requires:
      1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
      2. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
      3. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   (Initial denial text continued on next page)

ETANERCEPT (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

D. If you have psoriatic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

E. If you have ankylosing spondylitis, approval also requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
3. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

ETANERCEPT (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe plaque psoriasis, approval also requires:

1. You are 4 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (patches) affecting the hands, feet, face, scalp, or genital area
4. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ETANERCEPT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) **AND** meet the following criterion?
   - The patient continues to benefit from the medication
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Enbrel will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

ETANERCEPT (PART D)

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have moderate to severe polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

D. If you have psoriatic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

E. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

F. If you have moderate to severe plaque psoriasis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Enbrel concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

ETEPLIRSEN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ETEPLIRSEN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meets **ALL** of the following criteria?
   - The patient has a confirmed mutation of the DMD gene that is amenable to exon 51 skipping therapy
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is ambulatory
   - The patient is currently receiving treatment with or has a contraindication to corticosteroids (e.g., prednisone, prednisolone)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ETEPLIRSEN (Exondys 51)** requires the following rule(s) be met for approval:

A. You have Duchenne muscular dystrophy (DMD: a type of inherited muscle disorder)
B. You have a confirmed mutation in the DMD gene that will respond to exon 51 skipping therapy (a process that allows a protein to still function with sections of faulty genetic code)
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
D. You are ambulatory (able to walk)
E. You are currently receiving treatment with or you have a contraindication to (harmful for you to use) corticosteroids (such as prednisone, prednisolone)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ETEPLIRSEN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient meet **ONE** of the following criteria?
   - The patient has maintained or demonstrated a less than expected decline in ambulatory ability based on muscle function assessments (e.g., 6-minute walk test)
   - The patient has maintained or demonstrated a less than expected decline in other muscle function (i.e., pulmonary or cardiac function)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ETEPLIRSEN (Exondys 51)** requires ONE of the following rules be met for renewal:
   A. You have maintained or demonstrated a less than expected decline in ambulatory ability (ability to walk) based on muscle function assessments (such as the 6-minute walk test)
   B. You have maintained or demonstrated a less than expected decline in other muscle function (pulmonary [lung] or cardiac [heart] function)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monographs for Exondys 51.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Velsipity will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek/ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ETRASIMOD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ETRASIMOD (Velsipity)** requires the following rule(s) be met for approval:

A. You have moderate to severe ulcerative colitis (UC: a type of digestive disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
D. You will NOT use Velsipity concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
E. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
    1. Selarsdi/Yesintek/ustekinumab-aauz
    2. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
    3. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
    4. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
    5. Skyrizi (risankizumab-rzaa)
    6. Tremfya (guselkumab)

ETRASIMOD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Velsipity will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, do not approve.

     RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

     Our guideline named **ETRASIMOD (Velsipity)** requires the following rule(s) be met for renewal:
     A. You have moderate to severe ulcerative colitis (UC: a type of digestive disorder)
     B. You will NOT use Velsipity concurrently (at the same time) with anothersystemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

EVEROLIMUS-AFINITOR (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have a diagnosis of tuberous sclerosis complex (TSC)-associated subependymal giant cell astrocytoma (SEGA) (ICD-10 Q85.1, D43.2) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient's diagnosis requires therapeutic intervention but cannot be curatively resected

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **EVEROLIMUS-AFINITOR (Afinitor, Torpenz)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Advanced breast cancer
      2. Progressive, neuroendocrine tumors (NET: a rare type of tumor) with unresectable (unable to remove by surgery), locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) or metastatic disease (cancer that has spread to other parts of the body)
      3. Advanced renal cell carcinoma (RCC: type of kidney cancer)
      4. Tuberous sclerosis complex (TSC: a rare type of tumor disorder)-associated renal angiomyolipoma (type of kidney tumor)
      5. Tuberous sclerosis complex (TSC: a rare type of tumor disorder)-associated subependymal giant cell astrocytoma (SEGA: a type of brain tumor)

   B. If you have advanced breast cancer, approval also requires:
      1. You are a postmenopausal woman
      2. Your breast cancer is hormone receptor-positive (HR: a type of protein), human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
      3. The requested medication will be used in combination with Aromasin (exemestane)
      4. You have failed treatment with Femara (letrozole) or Arimidex (anastrozole)

   C. If you have progressive, neuroendocrine tumors with unresectable, locally advanced or metastatic disease, approval also requires:
      1. You are 18 years of age or older
      2. You meet ONE of the following:
         a. You have neuroendocrine tumors of pancreatic origin (PNET: tumor in the pancreas)
         b. You have well-differentiated, non-functional neuroendocrine tumors (NET) of gastrointestinal (GI: relating to the digestive system) or lung origin

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #8.

2. Is the patient's cancer unresectable or metastatic?

   If yes, continue to #3.
   If no, continue to #6.

3. Is the patient's cancer HER2-positive (IHC 3+ or ISH positive) and the patient meets **ONE** of the following criteria?
   - The patient has received a prior anti-HER2-based regimen (e.g., Herceptin [trastuzumab], Kadcyla [ado-trastuzumab emastine]) in the metastatic setting
   - The patient has received a prior anti-HER2-based regimen (e.g., Herceptin [trastuzumab], Kadcyla [ado-trastuzumab emastine]) in the neoadjuvant or adjuvant setting AND has developed disease recurrence during or within 6 months of completing therapy
   - Enhertu will be used in combination with pertuzumab (Perjeta), when cancer is determined by an FDA-authorized test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

FAM-TRASTUZUMAB DERUXTECAN-NXKI (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's cancer HR-positive, HER2-low (IHC 1+ or IHC 2+/ISH-) or HER2-ultralow (IHC 0 with membrane staining), as determined by an FDA-authorized test, **AND** the patient meets the following criterion?
   - The patient's disease has progressed on at least one endocrine therapy (e.g., letrozole, anastrozole, tamoxifen) in the metastatic setting

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient's cancer HER2-low (IHC 1+ or IHC 2+/ISH-), as determined by an FDA-authorized test, and the patient meets **ONE** of the following criteria?
   - The patient has received a prior chemotherapy in the metastatic setting
   - The patient has developed disease recurrence during or within 6 months of completing adjuvant chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the patient's cancer in early Stage II or III and meets **ALL** of the following criteria?
   - The patient's cancer is HER2-positive (IHC3+ or ISH+), as determined by an FDA-authorized test
   - Enhertu will be used as a neodjuvant treatment and followed by a taxane (e.g., paclitaxel), trastuzumab, and pertuzumab (THP)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

FAM-TRASTUZUMAB DERUXTECAN-NXKI (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the patient's cancer in early stage and meets **ALL** of the following criteria?
   - The patient's cancer is HER2-positive (IHC3+ or ISH+)
   - Enhertu will be used as adjuvant treatment
   - The patient has residual invasive disease following neoadjuvant trastuzumab and taxane-based treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

8. Does the patient have unresectable or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors have activating HER2 (ERBB2) mutations, as detected by an FDA-authorized test
   - The patient has received a prior systemic therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

9. Does the patient have a diagnosis of locally advanced or metastatic gastric OR gastroesophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is HER2-positive (IHC 3+ or IHC 2+/ISH positive)
   - The patient has received a prior trastuzumab-based regimen

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #10.

FAM-TRASTUZUMAB DERUXTECAN-NXKI (PART D)

GUIDELINES FOR USE (CONTINUED)

10. Does the patient have a diagnosis of unresectable or metastatic solid tumors and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is HER2-positive (IHC 3+)
    - The patient has received prior systemic treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **FAM-TRASTUZUMAB DERUXTECAN-NXKI (Enhertu)** requires the following rule(s) be met for approval:

    A. You have ONE of the following:
        1. Unresectable or metastatic breast cancer (a type of breast cancer that cannot be removed by surgery or has spread to other parts of the body)
        2. Early breast cancer
        3. Unresectable or metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that cannot be removed by surgery or has spread to other parts of the body)
        4. Locally advanced or metastatic gastric OR gastroesophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that has spread to nearby tissue or lymph nodes, or has spread to other parts of the body)
        5. Unresectable or metastatic solid tumors (a type of abnormal mass that cannot be removed by surgery or has spread to other parts of the body)

    (Denial text continued on next page)

FAM-TRASTUZUMAB DERUXTECAN-NXKI (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have unresectable or metastatic breast cancer, approval also requires:
1. You are 18 years of age or older
2. If your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+ or ISH positive), approval also requires you meet ONE of the following:
   a. You have received a prior anti-HER2-based regimen (type of medication such as Herceptin [trastuzumab], Kadcyla [ado-trastuzumab emastine]) in the metastatic setting (cancer has spread to other parts of the body)
   b. You have received a prior anti-HER2-based regimen (such as Herceptin [trastuzumab], Kadcyla [ado-trastuzumab emastine]) in the neoadjuvant (given before main treatment) or adjuvant (additional treatment) setting AND the disease has returned during or within 6 months of completing therapy
   c. You will use Enhertu in combination with pertuzumab (Perjeta), when your cancer is determined by a Food and Drug Administration (FDA)-authorized test
3. If your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-low (IHC 1+ or IHC 2+/ISH-) or HER2-ultralow (IHC 0 with membrane staining), as determined by a Food and Drug Administration (FDA)-authorized test, approval also requires that your disease has progressed while on at least one endocrine therapies (such as letrozole, anastrozole, tamoxifen) in the metastatic setting (cancer has spread to other parts of the body)
4. If your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-low (IHC 1+ or IHC 2+/ISH-), as determined by a Food and Drug Administration (FDA)-authorized test, approval also requires you meet ONE of the following:
   a. You have received a prior chemotherapy (a type of cancer treatment) in the metastatic setting (cancer has spread to other parts of the body)
   b. You have developed disease recurrence (disease has returned) during or within 6 months of completing adjuvant (additional) chemotherapy

C. If you have early breast cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is early Stage II or III; your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+ or ISH positive), as determined by a Food and Drug Administration (FDA)-authorized test; AND Enhertu will be used as a neoadjuvant treatment (given before main treatment) and followed by a taxane (such as paclitaxel), trastuzumab, and pertuzumab (THP)
