   5. Cervical dystonia (a type of muscle condition)
   6. Severe axillary hyperhidrosis (excessive underarm sweating)
   7. Blepharospasm (a type of eye disease)
   8. Strabismus (a type of eye condition)

B. If you have chronic migraine, approval also requires:
   1. You are 18 years of age or older
   2. Botox will be used for the prevention of headaches
   3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preventive migraine treatments: propranolol, timolol, topiramate, divalproex sodium

C. If you have overactive bladder, approval also requires:
   1. You are 18 years of age or older
   2. You had an inadequate response (medication did not work) to or you are intolerant (side-effect) of an anticholinergic medication, such as oxybutynin, oxybutynin extended-release (Ditropan XL), tolterodine (Detrol), tolterodine extended-release (Detrol LA), fesoterodine (Toviaz), trospium (Sanctura), or trospium extended-release (Sanctura XR)

D. If you have urinary incontinence, approval also requires:
   1. You are 5 years of age or older
   2. Your incontinence is due to detrusor (bladder muscle) overactivity associated with a neurologic (nervous system) condition, such as spinal cord injury, multiple sclerosis (a type of nerve disorder), or spina bifida (a type of birth defect of the spine)
   3. You had an inadequate response (medication did not work) to or you are intolerant (side-effect) of an anticholinergic medication, such as oxybutynin, oxybutynin extended-release (Ditropan XL), tolterodine (Detrol), tolterodine extended-release (Detrol LA), fesoterodine (Toviaz), trospium (Sanctura), or trospium extended-release (Sanctura XR)

ONABOTULINUM TOXIN A BvD (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have spasticity, approval also requires:
1. You are 2 years of age or older

F. If you have cervical dystonia, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

G. If you have severe axillary hyperhidrosis, approval also requires:
1. You are 18 years of age or older

H. If you have blepharospasm, approval also requires:
1. You are 12 years of age or older

I. If you have strabismus, approval also requires:
1. You are 12 years of age or older

NOTE: This medication will not be approved for the treatment of a cosmetic indication (such as wrinkles - glabellar [between the eyebrows] lines, lateral canthal [outer corner of eye] lines, forehead lines).

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ONABOTULINUM TOXIN A BvD (PART D)

RENEWAL CRITERIA

NOTE: For a diagnosis other than chronic migraine, please refer to the Initial Criteria section.

1. Is the request for treatment of a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8, Group L81)?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for the prophylaxis of headaches in a patient with chronic migraines (at least 15 days per month with headache lasting 4 hours a day or longer) (ICD-10 Groups G43.7, G43.E) and the patient meets **ONE** of the following criteria?
   - The patient has experienced a reduction in migraine or headache frequency with therapy
   - The patient has experienced a reduction in migraine severity with therapy
   - The patient has experienced a reduction in migraine duration with therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ONABOTULINUM TOXIN A (Botox)** requires the following rule(s) be met for renewal:
   A. The request is for the prevention of headaches for chronic migraines (at least 15 days per month with headache lasting 4 hours a day or longer)
   B. You meet ONE of the following:
      1. You have experienced a reduction in migraine or headache frequency with therapy
      2. You have experienced a reduction in migraine severity with therapy
      3. You have experienced a reduction in migraine duration with therapy

   NOTE: This medication will not be approved for the treatment of a cosmetic indication (such as wrinkles - glabellar [between the eyebrows] lines, lateral canthal [outer corner of eye] lines, forehead lines).
   (Renewal denial text continued on next page)

OPIOID CUMULATIVE DOSING OVERRIDE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
N/A	N/A	N/A	N/A	N/A	N/A

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

GUIDELINES FOR USE

1. Is the request for an opioid product equal to or exceeding the soft-stop threshold (90 mg morphine milligram equivalent (MME)) or hard-stop threshold (200 mg MME)?

   NOTE: Claims should stop for DUR_MAX_CUMUL_DOSE 2 edit with Soft_DENY_LIMIT = 90 or HARD_DENY_LIMIT = 200 (i.e., Cumulative morphine milligram equivalent of (patient's current MME) = / exceeds threshold of (90 mg MME or 200 mg MME per day)).

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the requested medication on the "HOSPICE DRUG LIST"?
   NOTE: Please reference the Formulary Analyzer Tool for drug status.

   If yes, continue to #3.
   If no, continue to #5.

3. Has the patient been identified as being enrolled in hospice (i.e., plan notification, member attribute, physician/member notification on the medication request form)?

   If yes, continue to #4.
   If no, continue to #5.

OPIOID CUMULATIVE DOSING OVERRIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Has the prescriber provided attestation that the requested opioid medication is being used for an indication that is unrelated to the terminal illness?

   If yes, **approve as follows:**
   - **Approve under Part D for 12 months by HICL or GPI-10.**
   - **To enter approvals:**
     - **In the PA override field, override PA_HOSPICE**
     - **Change PA type to HE (Hospice Exception)**
   - **Please enter a class override to override the MME cumulative dosing for theduration of 12 months.**
   - **Ifthe claim rejects after analyzing, then follow the clinical coverage determination process.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of **[XX]** per **[XX]** days.

   If no, do not approve.
   NOTE: This medication is included in the hospice benefit (Part A) and is not a Part D eligible drug.

   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: If you are enrolled in hospice (end of life care), your requested medication will be covered under your Part D benefit if your doctor confirms that the medication is being used for the treatment of a condition that is not related to your terminal illness. If you are enrolled in hospice and are taking the medication for a condition related to your terminal illness, coverage may be available through your hospice benefit (Medicare Part A). Your doctor should contact your hospice provider or health plan for coverage information. This decision was based on Title XVIII of the Social Security Act(Section 1861(t)).

   NOTE: Include the quantity limit based on any applicable restriction(s):
   The requested drug has a plan limit of **[XX tablets/capsules/mL]** per **[XX]** days.

OPIOID CUMULATIVE DOSING OVERRIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve as follows:**
   - **Set PA type as OP**
   - **Approve for 12 months by HICL or GPI-10.**
   - **Please enter a class override to override the MME cumulative dosing for theduration of 12 months.**
   - **Ifthe claim rejects after analyzing, then follow the clinical coverage determination process.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of **[XX]** per **[XX]** days.

   If no, continue to #6.

6. Does the prescriber attest that the higher MME is medically necessary?

   If yes, **approve as follows:**
   - **Set PA type as OE**
   - **Approve for 12 months by HICL or GPI-10.**
   - **Please enter a class override to override the MME cumulative dosing for theduration of 12 months.**
   - **Ifthe claim rejects after analyzing, then follow the clinical coverage determination process.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of **[XX]** per **[XX]** days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID CUMULATIVE DOSING OVERRIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the amount of opiates prescribed and because your opiate amount exceeds or is equal to our limit [90mg morphine milligram equivalent] or [200mg morphine milligram equivalent]. **[Proceed to enter Denial Text below]**

DENIAL TEXT:
***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **OPIOID CUMULATIVE DOSING OVERRIDE** will cause a claim for a pain medication to reject when there are two or more providers prescribing opioid medications and if you are receiving a high quantity of these medications. This guideline will allow you to receive a higher quantity of an opioid medication if ONE of the following rules is met:

- You are receiving palliative care (treatment for comfort from symptoms) or end-of life care
- You are enrolled in hospice (end of life care)
- You are a resident of (living in) a long-term care facility
- You have sickle cell disease (a type of blood disorder)
- Your doctor has stated that the prescribed dose of opioids is medically necessary
- You are being treated for pain related to current or past cancer

Please consult your doctor and/or your pharmacist to discuss your options or if you have any questions about this safety edit on prescription opioid medications and the requirements needed for you to obtain an approval for higher quantities of these medications.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

CONTINUED ON NEXT PAGE

OPIOID CUMULATIVE DOSING OVERRIDE (PART D)

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter.

Prior authorization will be required for opioid prescriptions in excess of hard opioid edit. Soft opioid edit thresholds may be overridden by a dispensing pharmacist or provider/patient may request a coverage determination. MedImpact's standard soft opioid edit is set at ≥ 90 mg morphine milligram equivalent (MME). MedImpact's standard hard opioid edit threshold is set at ≥ 200 mg MME. This requirement should not apply to patients within hospice, those receiving palliative or end of life care, residents of a long-term facility, patients approved by case management or retrospective DUR Programming, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. Additional payment determination is required for patients identified as hospice. Soft-thresholds may also be overridden by the pharmacy via DUR PPS codes or as part of coverage determination process and by certain PPS codes. Hard-thresholds are overridable as part of the coverage determination process. The cumulative opioid edit minimizes false positives by accounting for known exceptions: 1) patients on hospice, have certain cancer diagnosis 2) overlapping dispensing dates for Rx refills and new Rx orders for continuing fills 3) high-dose opioid usage previously determined to be medically necessary (approved PAs, previous coverage determinations, case management) 4) no consecutive high-MME days' criterion as it would not prevent beneficiaries from reaching high opioid doses.

For patients enrolled in hospice, attestation by the prescriber must indicate that the requested opioid medication is being used for the treatment of a diagnosis unrelated to the terminal illness or related condition for coverage under their Part D benefit.

OPIOID LONG-ACTING DUPLICATIVE THERAPY (PART D)

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT: While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of two long-acting opioid drugs together that are from different prescribers. **[Proceed to enter Denial Text below]**

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID LONG-ACTING DUPLICATIVE THERAPY** allows approval of the requested drug when taken together with other long-acting opioid drug(s) from different prescribers. An approval will be provided if you meet ONE of the following conditions:

- You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
- You are enrolled in hospice (end of life care)
- You are a resident of (living in) a long-term care facility
- You have sickle cell disease (a type of blood disorder)
- Your doctor has stated that they are aware that you are concurrently (at the same time) receiving more than one long-acting opioid medication
- You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your doctor and/or your pharmacist to discuss your options or if you have any questions about this prescription medication and the requirements needed for you to obtain an approval for this medication.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

OPIOID LONG-ACTING DUPLICATIVE THERAPY (PART D)

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter: "…we expect all Part D plan sponsors to implement a soft POS safety edit (which can be overridden by the pharmacist) for duplicative LA opioid therapy beginning in 2019, with or without a multiple prescriber criterion." *CMS 2019 Call Letter, page 252.*

Prior authorization will be required for Long Acting (LA) opioid prescriptions when an incoming claim for a long-acting opioid overlaps with another a long acting opioid (different HICL) claim(s) from a different prescriber(s). The edit can be overridden by professional pharmacy professional service (PPS) code at POS or by a PA. This requirement does not apply to patients receiving palliative care or end-of-life care, those enrolled in hospice or resident of a long-term care facility, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. This guideline also allows an override when there is physician attestation that the prescriber is aware that the patient is concurrently receiving long acting duplicative therapy and would like to proceed with treatment for a clinically appropriate indication.
For patients enrolled in hospice, attestation by the prescriber must indicate that the requested opioid medication is being used for the treatment of a diagnosis unrelated to the terminal illness or related condition for coverage under their Part D benefit.
For patients enrolled in hospice who are taking opioid medications for a diagnosis related to the terminal illness/condition, coverage may be eligible through their hospice benefit (Medicare Part A). Your physician should contact your hospice provider or health plan for coverage information. This decision is based on Title XVIII of the Social Security Act (Section 1861(t)).

OPIOID-BENZODIAZEPINE CONCURRENT USE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Has the prescriber provided attestation that the requested medication is being used for an indication that is unrelated to the terminal illness?

   If yes, **approve as follows:**
   - **Approve under Part D for 12 months by HICL or GPI-10.**
   - **Enter a Proactive PA for 12 months by HICL or GPI-10 for the concurrent product(s), based on claim analysis.**
   - **To enter approvals:**
     - **In the PA override field, override PA_HOSPICE**
     - **Set to DUR_CONCURRENT_OVR to 'Y' for Yes**
     - **Change PA type to HE (Hospice Exception)**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of **[XX]** per **[XX]** days. If there are no other future restrictions that may apply, you are approved for the concurrent (at the same time) use of the Opioid [insert medication name] and the Benzodiazepine **[insert medication name]**.

   If no, do not approve.
   NOTE: This medication is included in the hospice benefit (Part A) and is not a Part D eligible drug.
   MEMBER NOTIFICATION LANGUAGE/DENIAL TEXT: If you are enrolled in hospice (end of life care), your requested medication will be covered under your Part D benefit if your doctor confirms that the medication is being used for the treatment of a condition that is not related to your terminal illness. If you are enrolled in hospice and are taking the medication for a condition related to your terminal illness, coverage may be available through your hospice benefit (Medicare Part A). Your doctor should contact your hospice provider or health plan for coverage information. This decision was based on Title XVIII of the Social Security Act (Section 1861(t)).

   NOTE: Include the quantity limit based on any applicable restriction(s):
   The requested drug has a plan limit of **[XX]** per **[XX]** days.

OPIOID-BENZODIAZEPINE CONCURRENT USE (PART D)

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT: While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of an opioid drug and a benzodiazepine drug together. **[Proceed to enter Denial Text below]**

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-BENZODIAZEPINE CONCURRENT USE** allows for an approval if you are receiving an opioid with a benzodiazepine. An approval for concurrent (at the same time) use will be provided when ONE of the following criteria is met:

- You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
- You are enrolled in hospice (end of life care)
- You are a resident of (living in) a long-term care facility
- You have sickle cell disease (a type of blood disorder)
- Your doctor agrees to proceed with the concurrent use (at the same time) of an opioid and a benzodiazepine for a clinically appropriate indication (reason)
- You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your doctor and/or your pharmacist to discuss your options or if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this medication.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

OPIOID-BENZODIAZEPINE CONCURRENT USE (PART D)

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter:
"We expect that Part D sponsors implement a concurrent opioid and benzodiazepine soft POS safety edit (which can be overridden by the pharmacist) to prompt additional safety review at the time of dispensing beginning in 2019."*CMS 2019 Call Letter, page 251*

The claim will deny when there is concurrent use of benzodiazepines and opioids with any overlap in day supply. This can be overridden at POS or by a Prior Authorization. If the pharmacy does not submit the specified PPS codes, the claim should reject unless a prior approval is in place.
This guideline allows an approval for patients with one of the following conditions:
Receiving palliative care or end-of-life care
Enrolled in hospice
Resident of a long-term care facility
Diagnosis of sickle cell disease
Prescriber attestation to proceed with the concurrent use of an opioid and a benzodiazepine for a clinically appropriate indication
Being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

For patients enrolled in hospice, attestation by the prescriber must indicate that the requested opioid medication is being used for the treatment of a diagnosis unrelated to the terminal illness or related condition for coverage under their Part D benefit.
For patients enrolled in hospice who are taking opioid medications for a diagnosis related to the terminal illness/condition, coverage may be eligible through their hospice benefit (Medicare Part A).
This decision is based on Title XVIII of the Social Security Act (Section 1861(t)).

OPIOID-BUPRENORPHINE CONCURRENT USE (PART D)

GUIDELINES FOR USE (CONTINUED)

- You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your doctor and/or your pharmacist to discuss your options or if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this medication.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter.

Prior authorization will be required for opioid prescriptions when in concurrent use with buprenorphine. This edit will be utilized to stop opioid claims, which overlap with buprenorphine use. The edit will stop the claim for pharmacy submission of PPS codes. If the pharmacy does not submit the specified PPS codes, the claim should reject unless a prior approval is in place.

The guideline requires that the prescriber is aware that the patient is currently receiving buprenorphine or buprenorphine-containing agents for treatment of opioid dependency and has provided attestation to proceed with opioid treatment for an acute, clinically appropriate indication, or the prescriber has provided attestation that the patient has discontinued or will be discontinuing opioid dependency treatment with buprenorphine or buprenorphine-containing agents and to proceed with opioid treatment. Consultation with an addiction medicine specialist is recommended.
In addition, the guideline allows an override for patients with one of the following conditions:
Receiving palliative care or end-of-life care
Enrolled in hospice
Resident of a long-term care facility
Diagnosis of sickle cell disease
Being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

OPIOID-NAIVE DAY SUPPLY LIMITATION (PART D)

GUIDELINES FOR USE (CONTINUED)

8. Does the member have at least one approved claim for an opioid analgesic within 60 days of the date of review?
   (**NOTE:** Only approved opioid analgesic are considered as valid medication history. Cough and cold products or opioid tinctures are not considered for this edit.)

   If yes, **PA Not Required.**
   LETTER LANGUAGE: The requested drug has a plan limit of **[XX]** per **[XX]** days. Currently, our records show that you have an approved claim for an opioid analgesic (pain medication). This means that you are not considered opioid naive (you have been receiving opioid pain medication on a consistent basis). You can continue to fill your opioid medications for more than a 7-day supply if it is within 60 days of the last opioid approved claim. After this opioid prescription is picked up, you can receive additional opioid medications for more than a 7-day supply. If you stop receiving opioid claims for more than 60 days, you will be considered opioid naive and will be limited to a 7-day supply.

   If no, please use the specific denial text for **PA Request** or **DMR Request**:
   DENIAL TEXT: See the denial text on the next page.

   FOR PA REQUEST:

   OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT: While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the more than 7-day supply you are requesting for this opioid medication. **[Proceed to enter Denial Text below]**

OPIOID-NAIVE DAY SUPPLY LIMITATION (PART D)

GUIDELINES FOR USE (CONTINUED)

PA DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-NAIVE DAY SUPPLY LIMITATION** allows approval of the requested drug for longer than a 7-day supply for opioid-naive patients if you meet ONE of the following conditions:

- You are enrolled in hospice (end of life care)
- You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
- You are a resident of (living in) a long-term care facility
- You have sickle cell disease (a type of blood disorder)
- You are NOT opioid naive (defined as, you have received at least one fill of an opioid medication within the last 60 days or evidence that you are already opioid tolerant [body is used to taking the pain medication])
- Your doctor has stated that prescribed dose of opioids with the requested day supply is intended and medically necessary
- You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Although you have been denied for longer than a 7-day supply you may work with your pharmacy to get up to a 7-day supply without a prior authorization, as long as you have a prescription. Please consult your doctor if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this medication.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

OPIOID-NAIVE DAY SUPPLY LIMITATION (PART D)

GUIDELINES FOR USE (CONTINUED)

FOR DMR REQUESTS:

APPROVE REIMBURSEMENT FOR 7 DAYS ONLY and include **DMR DENIAL TEXT.**

DMR DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-NAIVE DAY SUPPLY LIMITATION** allows approval of the requested drug for longer than a 7-day supply for patients if you meet ONE of the following conditions:

- You are enrolled in hospice (end of life care)
- You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
- You are a resident of (living in) a long-term care facility
- You have sickle cell disease (a type of blood disorder)
- You are NOT opioid naive (defined as, you have received at least one fill of an opioid medication within the last 60 days or evidence that you are already opioid tolerant [body is used to taking the pain medication])
- Your doctor has stated that the prescribed dose of opioids with the requested day supply is intended and medically necessary
- You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Although you have been denied for longer than a 7-day supply, we have approved reimbursement for a 7-day supply.

NOTE: Include the quantity limit based on any applicable restriction(s):
The requested drug has a plan limit of **[XX]** per **[XX]** days.

OPIOID-NAIVE DAY SUPPLY LIMITATION (PART D)

RATIONALE

The purpose of the guideline is to ensure appropriate use of opioids and address prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, the guideline aligns with the opioid restrictions from the CMS 2019 Call Letter.

Prior authorization will be required for opioid prescriptions with a longer day supply for opioid naive patients. This requirement does not apply to patients receiving palliative care or end-of-life care, those enrolled in hospice, residents of a long-term care facility, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only.

In addition, if the patient is determined to NOT be opioid naive during the coverage determination process, they are exempt from this safety edit. This exemption is based on the following guidance: "If during the coverage determination process, it becomes known that the patient is not opioid naive, he or she should be excluded from the opioid naive edit." *CMS Additional Guidance memo from October 23, 2018, page 8.*

Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. This guideline also allows an override when there is attestation from the prescriber that the prescribed dose of opioids with the requested day supply is intended and medically necessary.

OSILODROSTAT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OSILODROSTAT (Isturisa)** requires the following rule(s) be met for approval:

A. You have Cushing's syndrome (a type of hormone disorder)
B. You are 18 years of age or older
C. Surgery is not an option or has not cured your condition
D. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OSIMERTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OSIMERTINIB (Tagrisso)** requires the following rule(s) be met for approval:

A. You have non-small cell lung cancer (NSCLC: a type of lung cancer)
B. You are 18 years of age or older
C. You meet ONE of the following:
    1. Tagrisso will be used as adjuvant therapy (add-on treatment) after tumor resection (surgical removal of a tumor), and your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
    2. Your cancer is locally advanced and unresectable (stage III) (cancer that has spread to nearby tissue or lymph nodes and cannot be surgically removed), and you meet ALL of the following:
        a. Your disease has NOT worsened during or following concurrent (at the same time) or sequential (one after the other) platinum-based (such as cisplatin, carboplatin) chemoradiation therapy (a type of treatment that combines chemotherapy and radiation)
        b. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
    3. Your cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
        a. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
        b. Your tumor has an epidermal growth factor receptor (EGFR) T790M mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test, AND your disease has worsened while on or after EGFR tyrosine kinase-inhibitor therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

OTESECONAZOLE (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ALL** of the following criteria?
   - The patient has successfully completed a course of Vivjoa for prevention of RVVC
   - The patient is either being treated or has just completed treatment for a new recurrence of VVC

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OTESECONAZOLE (Vivjoa)** requires the following rule(s) be met for approval:
   A. You have recurrent vulvovaginal candidiasis (RVVC: a repeating vaginal fungal infection)
   B. You are female
   C. You are not able to reproduce, which means you are a biological female and are postmenopausal (after menopause) or have another reason for permanent infertility (such as tubal ligation [having tubes tied], hysterectomy [removal of the uterus], salpingo-oophorectomy [removal of an ovary and its fallopian tube])
   D. You are NOT currently on ibrexafungerp for RVVC
   E. If you have not previously received Vivjoa, approval also requires:
      1. You had 3 or more episodes of RVVC in the past 12 months
   F. If you have previously received Vivjoa, approval also requires:
      1. You have successfully completed a course of Vivjoa for prevention of RVVC
      2. You are either being treated or have just completed treatment for a new recurrence of VVC

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   - The patient will be monitored for peliosis hepatis, liver cell tumors, and blood lipid changes

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have **ANY** of the following contraindications to therapy?
   - Known or suspected carcinoma of the prostate or breast in male patients
   - Known or suspected carcinoma of the breast in females with hypercalcemia
   - Known or suspected nephrosis (the nephrotic phase of nephritis)
   - Known or suspected hypercalcemia
   - Severe hepatic dysfunction

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

OXANDROLONE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OXANDROLONE** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Protein catabolism (breakdown) associated with prolonged administration of corticosteroids (a type of drug)
   2. Bone pain accompanying osteoporosis (a type of bone condition)

B. If you have protein catabolism associated with prolonged administration of corticosteroids, approval also requires:
   1. Oxandrolone will be used as adjunctive (add-on) treatment
   2. You will be monitored for peliosis hepatis (blood-filled spaces in the liver), liver cell tumors, and blood lipid (fats) changes
   3. You do NOT have any of the following reasons why you cannot use oxandrolone treatment:
      a. Known or suspected carcinoma (cancer) of the prostate or breast in male patients
      b. Known or suspected carcinoma of the breast in females with hypercalcemia (high calcium levels)
      c. Known or suspected nephrosis (the nephrotic phase of nephritis) (a type of kidney condition)
      d. Known or suspected hypercalcemia
      e. Severe hepatic (liver) dysfunction

C. If you have bone pain accompanying osteoporosis, approval also requires:
   1. You will be monitored for peliosis hepatis (blood-filled spaces in the liver), liver cell tumors, and blood lipid (fats) changes
   2. You do NOT have any of the following reasons why you cannot use oxandrolone treatment:
      a. Known or suspected carcinoma (cancer) of the prostate or breast in male patients
      b. Known or suspected carcinoma of the breast in females with hypercalcemia (high calcium levels)
      c. Known or suspected nephrosis (the nephrotic phase of nephritis) (a type of kidney condition)
      d. Known or suspected hypercalcemia
      e. Severe hepatic (liver) dysfunction

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), including clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Tysabri [natalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS
   - The patient had a trial of one sphingosine-1-phosphate receptor modulator (e.g., fingolimod, Mayzent [siponimod]) AND one other agent indicated for the treatment of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

OZANIMOD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Selarsdi /Yesintek /ustekinumab-aauz
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Rinvoq (upadacitinib) **(NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OZANIMOD (Zeposia)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), and active secondary progressive disease (advanced disease)
      2. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   (Initial denial text continued on next page)

OZANIMOD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have a relapsing form of multiple sclerosis, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Tysabri [natalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis
3. You have tried one sphingosine-1-phosphate receptor modulator (such as fingolimod, Mayzent [siponimod]) AND one other medication indicated for the treatment of multiple sclerosis (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

C. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Selarsdi /Yesintek /ustekinumab-aauz
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   e. Skyrizi (risankizumab-rzaa)
   f. Tremfya (guselkumab)

OZANIMOD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of a relapsing form of multiple sclerosis, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

     If yes, **approve for 12 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, do not approve.

     RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

     Our guideline named **OZANIMOD (Zeposia)** requires the following rule(s) be met for renewal:
     A. You have moderate to severe ulcerative colitis (UC: a type of digestive disorder)
     B. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

PALBOCICLIB (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Will Ibrance be used in combination with fulvestrant (Faslodex) and the patient meets **ALL** of the following criteria?
   - The patient's cancer is advanced or metastatic
   - The patient has experienced disease progression following endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Will Ibrance be used in combination with Itovebi (inavolisib) and fulvestrant (Faslodex) and the patient meets **ALL** of the following criteria?
   - The patient's cancer is locally advanced or metastatic
   - The patient's tumor has a PIK3CA mutation, as detected by an FDA-approved test
   - The patient has experienced disease recurrence on or after completing an adjuvant endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the patient's cancer hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-positive and the patient meets **ALL** of the following criteria?
   - The patient's cancer is locally advanced or metastatic
   - Ibrance will be used in combination with trastuzumab (Herceptin or an FDA-approved biosimilar) and endocrine therapy (e.g., letrozole, anastrozole, exemestane, fulvestrant) following induction treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PALBOCICLIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **PALBOCICLIB (Ibrance)** requires the following rule(s) be met for approval:

A. You have breast cancer
B. You are 18 years of age or older
C. If your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative, approval also requires ONE of the following:
   1. Ibrance will be used in combination with an aromatase inhibitor (such as anastrozole, letrozole, exemestane) as initial endocrine (hormone)-based therapy; and your cancer is advanced or metastatic (cancer that has progressed or has spread to other parts of the body)
   2. Ibrance will be used in combination with fulvestrant (Faslodex); and your cancer is advanced or metastatic (cancer that has progressed or has spread to other parts of the body); and your disease has worsened after endocrine (hormone) therapy (such as anastrozole, letrozole, tamoxifen)
   3. Ibrance will be used in combination with Itovebi (inavolisib) and fulvestrant (Faslodex); your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body); your tumor has a PIK3CA mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test; and you have experienced disease recurrence (disease has returned) on or after completing adjuvant (add-on) endocrine (hormone) therapy (such as anastrozole, letrozole, tamoxifen)
D. If your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, approval also requires:
   1. Your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or has spread to other parts of the body)
   2. Ibrance will be used in combination with trastuzumab (Herceptin or a Food and Drug Administration [FDA]-approved biosimilar) and endocrine (hormone) therapy (such as letrozole, anastrozole, exemestane, fulvestrant) following induction (initial) treatment

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Has the patient received Beyfortus (nirsevimab-alip) within this RSV season?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Is the patient under 12 months of age?

   If yes, continue to #3.
   If no, continue to #10.

3. Does the patient have chronic lung disease of prematurity (previously called bronchopulmonary dysplasia [BPD]) (ICD-10 P27.1) as defined below?
   - Gestational age less than 32 weeks and
   - Patient required greater than 21% supplemental oxygen for at least the first 28 days after birth

   (**Note:** This does not include respiratory distress in the newborn, wheezing, reactive airway disease (RAD), asthma, or cystic fibrosis. Current data does not support the routine use of palivizumab prophylaxis in patients with cystic fibrosis.)

   If yes, continue to #12.
   If no, continue to #4.

PALIVIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following?
   - The patient is profoundly immunocompromised during the RSV season
   - The patient has undergone solid-organ transplantation during the RSV season

   If yes, continue to #12.
   If no, continue to #5.

5. Does the patient have **ONE** of the following congenital heart disease conditions?
   - Acyanotic heart disease requiring medication to control chronic heart failure (for example, furosemide, epinephrine, dopamine, lidocaine, milrinone, atenolol, propranolol, amlodipine, clonidine) AND will require cardiac surgical procedures
   - Moderate or severe pulmonary hypertension (ICD-10 P29.30, I27.0; Group I27.2)
   - Cyanotic heart defect AND Synagis is prescribed by or in consultation with a pediatric cardiologist
     (**Note:** This does not include patients with hemodynamically insignificant heart disease, infants with lesions adequately corrected by surgery, infants with mild cardiomyopathy who are not receiving medical therapy for the condition.)

   If yes, continue to #12.
   If no, continue to #6.

6. Was the patient born prematurely?

   If yes, continue to #8.
   If no, continue to #7.

7. Does the patient have congenital abnormalities of the airways (anatomic pulmonary abnormalities) or neuromuscular disease that compromises the handling of respiratory secretions?

   If yes, continue to #12.
   If no, continue to #8.

8. Was the patient born at less than 29 weeks gestational age?

   If yes, continue to #12.
   If no, continue to #9.

PALIVIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following?
   - The patient is an American Navajo infant
   - The patient is an American White Mount Apache infant
   - The patient is an Alaska native infant

   If yes, continue to #12.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Is the patient younger than 24 months of age?

    If yes, continue to #11.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

11. Does the patient meet **ONE** of the following criteria?
    - The patient is profoundly immunocompromised during the RSV season
    - The patient has chronic lung disease of prematurity (ICD-10 P27.1) AND requires medical support (oxygen, bronchodilator, diuretic, or chronic steroid therapy) within 6 months prior to the start of the second RSV season
    - The patient has undergone solid-organ transplantation during RSV season

    If yes, continue to #12.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

PALIVIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

12. Approve by GPID or GPI-14 for all strengths for 5 fills as follows:

- **Start Date (Choose ONE):**
  - For requests with a start date of October 1st or further into the RSV season, enter the start date as requested.
    OR
  - For requests with a start date BEFORE October 1st, refer to the CDC website to verify whether RSV cases have started to increase in that region by confirming when the 'detections' (i.e., positive cases) begin to increase. If the detections have increased from baseline as of the date of the request, enter the start date as requested.
- **Approval Duration (Choose ONE):**
  - For requests that extend past April 30th, refer to the CDC website to verify when the RSV season for the specified region ends by confirming when the 'detections' (i.e., positive cases) returned to baseline in the previous years. If the detections returned to baseline after April 30th, enter a duration up to 5 months, but do not extend beyond the time when detections returned to baseline. (For example, if the request is received in February, and the CDC website shows that detection returned to baseline in that region in May of the previous year; then approve for 4 months).
    OR
  - Enter an approval duration up to April 30th.

NOTE: CDC website - https://www.cdc.gov/surveillance/nrevss/rsv/region.html

APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

PALIVIZUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PALIVIZUMAB (Synagis)** requires the following rule(s) be met for approval:

A. You have not received Beyfortus (nirsevimab-alip) within this respiratory syncytial virus (RSV: type of lung and respiratory tract infection) season
B. You are less than 12 months old or less than 24 months at the start of RSV season (mid-September to mid-May)
C. **If you are less than 12 months old, approval also requires ONE of the following**:
    1. You have chronic lung disease of prematurity (a condition where you were born at less than 32 weeks and required more than 21% of additional oxygen for at least the first 28 days after birth)
    2. You are profoundly immunocompromised (the body cannot fight off infections) during RSV season
    3. You have received a solid-organ transplant during RSV season
    4. You have congenital (starting from birth) heart disease conditions at birth such as: acyanotic heart disease (blood from the left side to the right side of the heart due to a hole in the heart walls) where you need medication to control chronic heart failure and will require heart surgical procedures; moderate to severe pulmonary hypertension (high blood pressure in the lungs); or cyanotic heart defect (low blood oxygen level); AND Synagis is prescribed by or in consultation with a pediatric cardiologist (a heart doctor for children)
    5. You have congenital (starting from birth) abnormalities of the lung airways or a neuromuscular (nerve-muscle) disorder that affects respiratory (lung/breathing) secretions
    6. You were born premature at less than 29 weeks (gestational age)
    7. You are an American Navajo, American White Mountain Apache, or Alaska Native infant born prematurely
D. If you are less than 24 months old, approval also requires ONE of the following:
    1. You are profoundly immunocompromised (a condition where the body cannot fight off infections) during RSV season
    2. You have chronic lung disease of prematurity and need medical support within 6 months before the start of the second RSV season. Medical support includes oxygen, bronchodilator (drug that helps breathing), diuretic (drug that makes you urinate), or chronic steroid therapy
    3. You have received a solid-organ transplant during RSV season

PALIVIZUMAB (PART D)

RENEWAL CRITERIA

1. Has the patient received Beyfortus (nirsevimab-alip) within this RSV season?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the patient younger than 24 months of age?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Did the patient undergo cardiopulmonary bypass surgery during their RSV prophylaxis season?

   If yes, **approve for 1 month by HICL or GPI-10 with a fill count of 2 (do not enter quantity limit on number of vials).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is this a request for a second year of coverage (e.g., a previous approval in the previous RSV season)?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient have chronic lung disease of prematurity (previously called bronchopulmonary dysplasia [BPD]) (ICD-10 P27.1) and requires medical support (oxygen, bronchodilator [e.g., albuterol], diuretic [e.g., furosemide], or chronic steroid therapy [e.g., budesonide]) within 6 months prior to start of the second RSV season?
   (**Note:** This does not include respiratory distress in the newborn period, wheezing, reactive airway disease (RAD), asthma, or cystic fibrosis. Current data does not support the routine use of palivizumab prophylaxis in patients with cystic fibrosis).

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

PANITUMUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PANITUMUMAB	VECTIBIX	34054		GPI-10 (2136007000)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, continue to #2.

2. Is the drug administered via an external pump?

   If yes, continue to #3.

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

3. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PANITUMUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer wild-type RAS (defined as wild-type in both KRAS and NRAS), as determined by an FDA-approved test?

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - Vectibix will be used in combination with FOLFOX (leucovorin calcium [folinic acid], fluorouracil, oxaliplatin)
   - Vectibix will be used as monotherapy AND the patient has disease progression after treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PANITUMUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient's cancer have a KRAS G12C-mutation, as determined by an FDA-approved test, and meet **ALL** of the following criteria?
   - Vectibix will be used in combination with Lumakras (sotorasib)
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PANITUMUMAB (Vectibix)** requires the following rule(s) be met for approval:
   A. You have metastatic colorectal cancer (mCRC: a type of digestive cancer that has spread to other parts of the body)
   B. You are 18 years of age or older.
   C. Your cancer is wild-type RAS (defined as wild-type in both KRAS and NRAS [types of genes without a specific mutation]), OR you have a KRAS G12C-mutation [type of abnormal change in a gene], as determined by a Food and Drug Administration (FDA)-approved test
   D. If your cancer is wild-type RAS, approval also requires ONE of the following:
      1. Vectibix will be used in combination with FOLFOX (treatment regimen containing leucovorin calcium [folinic acid], fluorouracil, oxaliplatin)
      2. Vectibix will be used as monotherapy (one drug treatment), AND you have disease progression (worsening) after treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-containing chemotherapy (drugs used to treat cancer)
   E. If your cancer has a KRAS G12C-mutation, approval also requires:
      1. Vectibix will be used in combination with Lumakras (sotorasib)
      2. You have received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PANITUMUMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vectibix. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR) with polyneuropathy (ICD-10 E85.1) and meet **ALL** the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, physician at an amyloidosis treatment center, or medical geneticist
   - The patient is ambulatory (i.e., familial amyloid polyneuropathy [FAP] stage 1 - 2, OR polyneuropathy disability [PND] stage I - IIIb polyneuropathy)
   - Onpattro will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Amvuttra [vutrisiran], Tegsedi [inotersen])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the hATTR diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PATISIRAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PATISIRAN (Onpattro)** requires the following rule(s) be met for approval:

A. You have hereditary transthyretin-mediated amyloidosis (hATTR: a rare genetic disorder) with polyneuropathy (widespread nerve pain/damage)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (nerve doctor), cardiologist (heart doctor), physician at an amyloidosis treatment center, or medical geneticist (doctor who treats gene disorders)
D. You are ambulatory (able to walk) (you have familial amyloid polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2, OR polyneuropathy disability [PND: a tool used to evaluate disease severity] stage I to IIIb polyneuropathy)
E. You will NOT use Onpattro concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Amvuttra [vutrisiran], Tegsedi [inotersen])
F. Your diagnosis is confirmed by ONE of the following:
    1. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (type of abnormal protein) presence AND chemical typing to confirm presence of TTR (transthyretin) protein
    2. DNA (deoxyribonucleic acid) genetic sequencing (type of lab test) to confirm hATTR mutation (type of abnormal gene)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PATISIRAN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis (hATTR) with polyneuropathy (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient has not progressed to familial amyloid polyneuropathy (FAP) stage 3, or polyneuropathy disability (PND) stage 4 polyneuropathy, as evidenced by functional decline (e.g., wheelchair-bound, bedridden)
   - Onpattro will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Amvuttra [vutrisiran], Tegsedi [inotersen])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PATISIRAN (Onpattro)** requires the following rule(s) be met for renewal:
   A. You have hereditary transthyretin-mediated amyloidosis (hATTR: a rare genetic disorder) with polyneuropathy (widespread nerve pain/damage)
   B. You have not progressed to familial amyloid polyneuropathy (FAP: a tool used to evaluate disease severity) stage 3 or polyneuropathy disability (PND: a tool used to evaluate disease severity) stage 4 polyneuropathy, as shown by functional decline (such as being wheelchair-bound, being bedridden)
   C. You will NOT use Onpattro concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Amvuttra [vutrisiran], Tegsedi [inotersen])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PATISIRAN BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Onpattro.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member are covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

PAZOPANIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PAZOPANIB (Votrient)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced renal cell carcinoma (RCC: a type of kidney cancer)
   2. Advanced soft tissue sarcoma (STS: a type of cancer that starts in soft tissues [muscle, tendons, fat, lymph vessels, blood vessels, nerves])

B. If you have advanced renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older

C. If you have advanced soft tissue sarcoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received prior chemotherapy (a type of cancer therapy such as doxorubicin, epirubicin)
   3. You do NOT have adipocytic soft tissue sarcoma (a type of fat cell cancer) or gastrointestinal stromal tumors (GIST: a type of digestive tumor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a peanut allergy (ICD-10 Z91.010) and meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has a clinical history of an allergic reaction to peanuts
   - Palforzia will be used in conjunction with a peanut-avoidance diet
   - Palforzia will NOT be used concurrently with a peanut-specific immunotherapy (e.g., Viaskin Peanut)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient completed a purposeful food challenge?

   If yes, continue to #3.
   If no, continue to #4.

PEANUT ALLERGEN POWDER-DNFP (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient's diagnosis confirmed by **ONE** of the following criteria?
   - The patient tested positive on a skin prick test with a wheal diameter of at least 3 mm within the past 24 months
   - The patient has had a peanut-specific immunoglobulin E (IgE) level of at least 0.35 kUA/L within the past 24 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's diagnosis confirmed by **ONE** of the following criteria?
   - The patient tested positive on a skin prick test with a wheal diameter of at least 8 mm within the past 24 months
   - The patient has had a peanut-specific immunoglobulin E (IgE) level of at least 14 kUA/L within the past 24 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PEANUT ALLERGEN POWDER-DNFP (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEANUT ALLERGEN POWDER-DNFP (Palforzia)** requires the following rule(s) be met for approval:

A. You have an allergy to peanuts
B. You are 1 to 17 years of age
C. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
D. You have a clinical history of an allergic reaction to peanuts
E. Palforzia will be used together with a peanut-avoidance diet
F. Palforzia will NOT be used concurrently (at the same time) with peanut-specific immunotherapy (such as Viaskin Peanut)
G. Your diagnosis is confirmed by ONE of the following:
    1. If you have completed a purposeful food challenge (a type of test): you had a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 3 mm within the past 24 months, OR you have had a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 0.35 kUA/L within the past 24 months
    2. If you have NOT completed a purposeful food challenge (a type of test): you had a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 8 mm within the past 24 months, OR you have had a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 14 kUA/L within the past 24 months

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PEGASPARGASE BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGASPARGASE	ONCASPAR	08904		GPI-10 (2125006000)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PEGASPARGASE BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGASPARGASE (Oncaspar)** requires the following rule(s) be met for approval:

A. You have acute lymphoblastic leukemia (ALL: a type of blood cancer)
B. Oncaspar will be used as a part of a chemotherapeutic (cancer treatment) plan that contains multiple medications
C. You meet ONE of the following:
    1. Oncaspar will be used as a first-line therapy (drug used for initial treatment)
    2. You have a hypersensitivity (allergy) to native forms of L-asparaginase (natural forms of a type of enzyme/protein)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Oncaspar. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PEGCETACOPLAN BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGCETACOPLAN	EMPAVELI	47380		GPI-10 (8580406500)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

PEGCETACOPLAN BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
   If no, continue to #7.

7. Is the drug administered using an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field.).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PEGCETACOPLAN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on atleast 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Empaveli will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), factor B inhibitor (e.g., Fabhalta [iptacopan]), or factor D inhibitor (e.g., Voydeya [danicopan])
   - The patient has tried and failed (as evidenced by hemoglobin levels less than 10.5 g/dL directly following at least 3 months of stable dosing) OR has a contraindication to Soliris (eculizumab) or Ultomiris (ravulizumab-cwvz)

     If yes, **approve for 4 months by HICL or GPI-10.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

PEGCETACOPLAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has a urine-protein creatine ratio (UPCR) of at least 1 g/g
   - The patient has an eGFR of at least 30mL/min/1.73m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes
   - Empaveli will NOT be used concurrently with another complement inhibitor (e.g., Fabhalta [iptacopan]) for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGCETACOPLAN (Empaveli)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Complement 3 glomerulopathy (C3G: a type of kidney disease) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN: a type of kidney disease)

   (Initial denial text continued on next page)

PEGCETACOPLAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
3. Your PNH diagnosis is confirmed by ALL the following through flow cytometry (test to measure characteristics of cells):
   a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
   b. PNH granulocyte clone size is at least 10%
4. You will NOT use Empaveli concurrently (at the same time) with C5 complement inhibitor therapy (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), factor B inhibitor (such as Fabhalta [iptacopan]), or factor D inhibitor (such as Voydeya [danicopan])
5. You have tried and failed (as shown by hemoglobin [type of protein in red blood cells] levels less than 10.5 g/dL directly following at least 3 months of stable dosing OR have a contraindication to (harmful for you to use) Soliris (eculizumab) or Ultomiris (ravulizumab-cwvz)

C. If you have complement 3 glomerulopathy or primary immune-complex membranoproliferative glomerulonephritis, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
3. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
4. You have a urine-protein creatine ratio (UPCR: a test that measures the amount of protein in urine) of at least 1g/g
5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30mL/min/1.73m(2)
6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes
7. You will NOT use Empaveli concurrently (at the same time) with another complement inhibitor (such as Fabhalta [iptacopan]) for the same indication

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGCETACOPLAN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit while on Empaveli (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [LDH] and hemoglobin levels) compared to baseline (defined as patient's condition post treatment with Soliris [eculizumab] or Ultomiris [ravulizumab-cwvz])
   - Empaveli will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), factor B inhibitor (e.g., Fabhalta [iptacopan]), or factor D inhibitor (e.g., Voydeya [danicopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN) and meet **ALL** of the following criteria?
   - The patient has had a reduction in proteinuria OR has improved or stablekidney function compared to baseline
   - Empaveli will NOT be used concurrently with another complement inhibitor (e.g., Fabhalta [iptacopan]) for the same indication

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

PEGCETACOPLAN BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGCETACOPLAN (Empaveli)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Complement 3 glomerulopathy (C3G: a type of kidney disease) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN: a type of kidney disease)

B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
   1. You have had clinical benefit while on Empaveli (such as a reduction in number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [LDH: type of enzyme] and hemoglobin levels [type of protein in red blood cells]) compared to baseline (defined as your condition after treatment with Soliris [eculizumab] or Ultomiris [ravulizumab-cwvz])
   2. You will NOT use Empaveli concurrently (at the same time) with C5 complement inhibitor therapy (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz], Piasky [crovalimab-akkz]), factor B inhibitor (such as Fabhalta [iptacopan]), or factor D inhibitor (such as Voydeya [danicopan])

C. If you have have complement 3 glomerulopathy or primary immune-complex membranoproliferative glomerulonephritis, renewal also requires:
   1. You have had a reduction (decrease) in proteinuria (high levels of protein in the urine) OR you have improved or stable kidney function compared to baseline (before treatment)
   2. You will NOT use Empaveli concurrently (at the same time) with another complement inhibitor (such as Fabhalta [iptacopan]) for the same indication

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGCETACOPLAN BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Empaveli.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for BvD review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

PEGFILGRASTIM - BMEZ (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGFILGRASTIM - BMEZ (Ziextenzo)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are receiving myelosuppressive anti-cancer drugs (drugs that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
   2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]: an illness that happens after whole body radiation)

B. If you are receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nyvepria (pegfilgrastim-apgf)

C. If you have been acutely exposed to myelosuppressive doses of radiation, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGFILGRASTIM - CBQV (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the request for Udenyca Onbody **AND** the patient meets the following criterion?
   - The patient has a barrier to access (e.g., travel barriers, patient is unable to return to the clinic for Udenyca injections)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Has the patient been acutely exposed to myelosuppressive doses of radiation (hematopoietic subsyndrome of acute radiation syndrome) **AND** the patient meets the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGFILGRASTIM - CBQV (Udenyca, Udenyca Onbody, Udenyca Autoinjector)** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are receiving myelosuppressive anti-cancer drugs (drugs that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
      2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome: an illness that happens after whole body radiation)

   (Denial text continued on next page)

PEGFILGRASTIM - CBQV (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you are receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia, approval also requires:
1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
3. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nyvepria (pegfilgrastim-apgf)
   b. You are requesting Udenyca Onbody AND you have a barrier to access (such as travel barriers, you are unable to return to the clinic for Udenyca injections)

C. If you have been acutely exposed to myelosuppressive doses of radiation, approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Udenyca.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia and meets **ALL** of the following criteria?
   - The patient has a non-myeloid malignancy
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to the preferred agent: Nyvepria (pegfilgrastim-apgf)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Has the patient been acutely exposed to myelosuppressive doses of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]) **AND** the patient meets the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PEGFILGRASTIM-UNNE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **PEGFILGRASTIM-UNNE (Armlupeg)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are receiving myelosuppressive anti-cancer medications (medications that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
   2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]: an illness that happens after whole body radiation)

B. If you are receiving myelosuppressive anti-cancer medications associated with a clinically significant incidence of febrile neutropenia, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Nyvepria (pegfilgrastim-apgf)

C. If you have been acutely exposed to myelosuppressive doses of radiation, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

RATIONALE

PEGINTERFERON ALFA-2A (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the patient between 3 to 17 years of age and meet **ALL** of the following criteria?
   - The patient does NOT have cirrhosis
   - The patient has serum HBeAg-positive chronic hepatitis B
   - The patient has evidence of viral replication with elevated serum alanine aminotransferase (ALT)

   If yes, **approve for 48 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
   - The patient has serum HBeAg-positive or HBe-Ag-negative chronic hepatitis B
   - The patient has compensated liver disease with evidence of viral replication and liver inflammation

   If yes, **approve for 48 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGINTERFERON ALFA-2A (Pegasys)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Chronic hepatitis C (a type of liver infection)
      2. Chronic hepatitis B (a type of liver infection)

   B. If you have chronic hepatitis C, approval also requires:
      1. You have compensated liver disease (a type of liver condition)

PEGINTERFERON ALFA-2A (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have chronic hepatitis B, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive condition), infectious disease specialist (a doctor who specializes in the treatment of infections), a doctor specializing in the treatment of hepatitis such as a hepatologist (liver doctor), or a specially trained group such as ECHO (Extension for Community Healthcare Outcomes) model
2. If you are between 3 to 17 years of age, approval also requires:
   a. You do NOT have cirrhosis (liver damage)
   b. Your blood test shows you have HBeAg (marker of active virus multiplying in the body)-positive chronic hepatitis B
   c. You have evidence of viral replication (virus is multiplying in the body) with elevated serum alanine aminotransferase (ALT: a type of liver enzyme test)
3. If you are 18 years of age or older, approval also requires:
   a. Your blood test shows you have HBeAg (marker of active virus multiplying in the body)-positive or HBe-Ag-negative chronic hepatitis B
   b. You have compensated liver disease (a type of liver condition) with evidence of viral replication and liver inflammation

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist, cardiologist, or specialist in genetics or inherited metabolic disorders
   - Elfabrio will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Galafold [migalastat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for a female patient who meets the following criterion?
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

PEGUNIGALSIDASE ALFA-IWXJ (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a male patient who meets **ONE** of the following criteria?
   - The patient has an alpha galactosidase A (a-Gal-A) deficiency as indicated by an enzyme assay
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGUNIGALSIDASE ALFA-IWXJ (Elfabrio)** requires the following rule(s) be met for approval:
   A. You have Fabry disease (a rare genetic disease)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a nephrologist (kidney doctor), cardiologist (heart doctor), or a doctor specializing in genetics or inherited metabolic disorders
   D. You will NOT use Elfabrio concurrently (taking at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Galafold [migalastat])
   E. If you are a female, approval also requires:
      1. You have a galactosidase alpha (GLA: a type of gene) gene mutation via genetic testing
   F. If you are a male, approval also requires ONE of the following:
      1. You do not have enough alpha galactosidase A (a-Gal-A: a type of protein) as indicated by an enzyme assay (a type of lab test)
      2. You have a galactosidase alpha (GLA: a type of gene) gene mutation via genetic testing

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

PRIOR AUTHORIZATION GUIDELINES

PEGZILARGINASE-NBLN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Arginase 1 Deficiency (ARG1-D) (ICD-10 E72.21) **AND** meet the following criterion?
   - The patient has shown improvement of symptoms or reduction of arginine levels

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGZILARGINASE-NBLN (Loargys)** requires the following rule(s) be met for renewal:
   A. You have Arginase 1 Deficiency (ARG1-D: a rare metabolic disorder)
   B. You have shown improvement of symptoms or reduction (decrease) of arginine levels (a type of lab test)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Loargys.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PRIOR AUTHORIZATION GUIDELINES

PEGZILARGINASE-NBLN BvD (PART D)

For Part D use only:

PEGZILARGINASE-NBLN (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	ARGINASE 1 DEFICIENCY (ARG1-D): INITIAL: PLASMA ARGININE LEVEL OF AT LEAST 250 MICROMOLE PER LITER.
Age Restrictions	N/A
Prescriber Restrictions	ARG1-D: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A METABOLIC SPECIALIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	ARG1-D: RENEWAL: IMPROVEMENT OF SYMPTOMS OR REDUCTION OF ARGININE LEVELS.

Created: 06/26
Effective: 07/01/26 Client Approval: 06/26 P&T Approval: 04/26

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - Keytruda will NOT be used concurrently with a targeted therapy (i.e., BRAF inhibitors [e.g., Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [e.g., Mekinist (trametinib)], and NTRK inhibitors [e.g., Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Stage IIB, IIC, or III melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Keytruda will be used as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of metastatic nonsquamous (e.g., adenocarcinoma, large cell carcinoma) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - Keytruda will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient does not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - Keytruda will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient does not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, continue to #6.
   If no, continue to #7.

GUIDELINES FOR USE (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient has stage III NSCLC AND is not a candidate for surgical resection or definitive chemoradiation
   - The patient has metastatic NSCLC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient does not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - The patient has an anaplastic lymphoma kinase (ALK) genomic tumor aberration AND disease progression on or after ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The patient has an epidermal growth factor receptor (EGFR) genomic tumor aberration AND disease progression on or after EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

9. Does the patient have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - Keytruda will be used in combination with platinum-containing chemotherapy (e.g., cisplatin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of unresectable advanced or metastatic malignant pleural mesothelioma (MPM) (ICD-10 C45.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be given in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

12. Does the patient have a diagnosis of head and neck squamous cell carcinoma (HNSCC) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32)?

    If yes, continue to #13.
    If no, continue to #17.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

13. Is the cancer resectable and locally advanced, and the patient meets **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, continue to #14.
    If no, continue to #15.

14. Does the patient meet **ONE** of the following criteria?
    - Keytruda will be used as single-agent neoadjuvant treatment and then continued as adjuvant treatment in combination with radiotherapy (RT)
    - Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

15. Is the cancer either metastatic or both unresectable and recurrent, and the patient meets **ONE** of the following criteria?
    - Keytruda will be given in combination with platinum and fluorouracil (FU)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #16.

16. Is the cancer recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

17. Does the patient have a diagnosis of classical Hodgkin lymphoma (cHL) (ICD-10 Group C81) and meet **ONE** of the following criteria?
    - The patient is 18 years of age or older AND has relapsed or refractory cHL
    - The patient has refractory cHL, or cHL that has relapsed after 2 or more prior lines of therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #18.

18. Does the patient have a diagnosis of primary mediastinal large B-cell lymphoma (PMBCL) (ICD-10 Group C85.2) and meet **ONE** of the following criteria?
    - The patient has refractory PMBCL
    - The patient has relapsed after 2 or more prior lines of therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #19.

19. Does the patient have a diagnosis of locally advanced or metastatic urothelial carcinoma (ICD-10 Groups C66, C67, C68) and meet **ONE** of the following criteria?
    - Keytruda will be used in combination with enfortumab vedotin (Padcev) AND the patient is at least 18 years of age
    - The patient is not eligible for any platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #20.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

20. Does the patient have a diagnosis of bladder cancer (ICD-10 Group C67, D09.0)?

    If yes, continue to #21.
    If no, continue to #23.

21. Is the cancer muscle invasive (MIBC) and the patient meets **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment, and then continued as adjuvant treatment after a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #22.

22. Is the cancer non-muscle invasive (NMIBC) and the patient meets **ALL** of the following criteria?
    - The patient has Bacillus Calmette-Guerin (BCG)-unresponsive, high-risk cancer with carcinoma in situ (CIS)
    - The patient is ineligible for or has elected not to undergo a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

23. Does the patient have a diagnosis of an unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient's tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #24.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

24. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (CRC) (ICD-10 C19) **AND** meet the following criterion?
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #25.

25. Does the patient have a diagnosis of locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test

    If yes, continue to #26.
    If no, continue to #27.

26. Does the patient meet **ONE** of the following criteria?
    - The cancer is HER2-positive, AND Keytruda will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
    - The cancer is HER2-negative, AND Keytruda will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

27. Does the patient have a diagnosis of locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with epicenter 1 to 5 centimeters above the GEJ) carcinoma (ICD-10 C16.0; Group C15) **AND** meet the following criterion?
    - The tumor is not amenable to surgical resection or definitive chemoradiation

    If yes, continue to #28.
    If no, continue to #29.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

28. Does the patient meet **ONE** of the following criteria?
    - Keytruda will be used in combination with platinum- and fluoropyrimidine-based chemotherapy AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1)
    - Keytruda will be used after one or more prior lines of systemic therapy AND the patient has a tumor of squamous cell histology that expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

29. Does the patient have a diagnosis of cervical cancer (ICD-10 Group C53)?

    If yes, continue to #30.
    If no, continue to #33.

30. Is the cancer locally advanced and the patient meets **ALL** of the following criteria?
    - The cancer is FIGO 2014 Stage III-IVA
    - The cancer involves the lower third of the vagina, hydronephrosis/a non-functioning kidney, or has spread to adjacent pelvic organs
    - Keytruda will be used in combination with chemoradiotherapy (CRT)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #31.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

31. Is the cancer persistent, recurrent, or metastatic and the patient meets **ALL** of the following criteria?
    - Keytruda will be used in combination with chemotherapy (e.g., paclitaxel, cisplatin, carboplatin)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #32.

32. Is the cancer recurrent or metastatic and the patient meets **ALL** of the following criteria?
    - The patient has disease progression on or after chemotherapy
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

33. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient's cancer is secondary to hepatitis B
    - The patient has received prior systemic therapy (e.g., Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (e.g., Opdivo [nivolumab])

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #34.

34. Does the patient have a diagnosis of locally advanced unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) **AND** meet the following criterion?
    - Keytruda will be used in combination with gemcitabine and cisplatin

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #35.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

35. Does the patient have a diagnosis of recurrent locally advanced or metastatic Merkel cellcarcinoma (MCC) (ICD-10 Group C4A, C7B.1)?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #36.

36. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #37.

37. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - Keytruda will be used for adjuvant treatment
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #38.

38. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used for adjuvant treatment
    - Keytruda will be used in combination with Welireg (belzutifan)
    - The patient has renal cell carcinoma with a clear cell component (ccRCC)
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #39.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

39. Does the patient have a diagnosis of primary advanced or recurrent endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with carboplatin and paclitaxel, OR as a single agent after prior use in combination with carboplatin and paclitaxel

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #40.

40. Does the patient have a diagnosis of advanced endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has experienced disease progression following prior systemic therapy
    - The patient is not a candidate for curative surgery or radiation

    If yes, continue to #41.
    If no, continue to #43.

41. Does the patient meet **ALL** of the following criteria?
    - Keytruda will be used in combination with lenvatinib (Lenvima)
    - The patient's cancer is mismatch repair proficient (pMMR) as determined by an FDA-approved test, or does NOT have microsatellite instability-high (MSI-H) biomarkers

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #42.

42. Is the patient's cancer microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) as determined by an FDA-approved test?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

43. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient's tumor is tumor mutational burden-high (TMB-H) [at least 10 mutations/megabase (mut/Mb)] as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #44.

44. Does the patient have a diagnosis of recurrent or metastatic cutaneous squamous cell carcinoma (cSCC) or locally advanced cSCC (ICD-10 C44.02, C44.42, C44.82, C44.92; Groups C44.12, C44.22, C44.32, C44.52, C44.62, C44.72) **AND** meet the following criterion?
    - The disease is not curable by surgery or radiation

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #45.

45. Does the patient have a diagnosis of high-risk early-stage triple-negative breast cancer (TNBC) (ICD-10 Group C50) **AND** meet the following criterion?
    - Keytruda will be used in combination with chemotherapy (e.g., carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #46.

46. Does the patient have a diagnosis of unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10), as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #47.

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

47. Does the patient have a diagnosis of locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - Keytruda will be used in combination with chemotherapy (e.g., paclitaxel, gemcitabine, carboplatin)
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #48.

48. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** the following criteria?
    - The patient is 18 years of age or older
    - The patient has platinum-resistant cancer
    - Keytruda will be used in combination with paclitaxel
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test
    - The patient has received one or more prior systemic treatment regimens

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.

    DENIAL TEXT: Our guideline named **PEMBROLIZUMAB (Keytruda)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Unresectable or metastatic melanoma (type of skin cancer that cannot be completely removed with surgery or has spread to other parts of the body)
        2. Stage IIB, IIC, or III melanoma (type of skin cancer)
        3. Non-small cell lung cancer (type of lung cancer)
        4. Unresectable advanced or metastatic malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery or has spread to other parts of the body)
        5. Head and neck squamous cell carcinoma (type of neck cancer)
        6. Classical Hodgkin lymphoma (type of immune system cancer)
        7. Primary mediastinal large B-cell lymphoma (type of immune system cancer)
        8. Locally advanced or metastatic urothelial carcinoma (type of urinary system cancer that has spread to other parts of the body)

    (Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

9. Bladder cancer
10. Unresectable or metastatic solid tumor (type of cancer that cannot be removed by surgery or has spread to other parts of the body)
11. Unresectable or metastatic colorectal cancer (CRC: type of colon or rectal cancer that cannot be removed by surgery or has spread to other parts of the body)
12. Locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that cannot be surgically removed, has spread to nearby tissue or to other parts of the body)
13. Locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with an epicenter of 1 to 5 centimeters above the GEJ) carcinoma (a type of digestive system cancer that has spread to nearby tissue or to other parts of the body)
14. Cervical cancer
15. Hepatocellular carcinoma (liver cancer)
16. Locally advanced unresectable or metastatic biliary tract cancer (BTC) (type of bile duct cancer that cannot be removed with surgery or has spread to other parts of the body)
17. Recurrent locally advanced or metastatic Merkel cell carcinoma (MCC: type of skin cancer that has returned or has spread to other parts of the body)
18. Renal cell carcinoma (kidney cancer)
19. Endometrial carcinoma (type of cancer that starts in the uterus)
20. Recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma (cSCC: a type of skin cancer that has returned, or has spread to other parts of the body or to nearby tissue or lymph nodes)
21. High-risk early-stage triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors)
22. Unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
23. Locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be removed with surgery or has spread to other parts of the body)
24. Epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (types of reproductive system or abdomen cancers)

B. If you have unresectable or metastatic melanoma, approval also requires:

1. You will NOT use Keytruda concurrently (at the same time) with a targeted therapy (BRAF inhibitors [such as Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [such as Mekinist (trametinib)], and NTRK inhibitors [such as Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

C. If you have Stage IIB, IIC, or III melanoma, approval also requires:
1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Keytruda will be used as adjuvant (add-on) treatment

D. If you have metastatic nonsquamous non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)
2. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)

E. If you have metastatic squamous non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

F. If you have non-small cell lung cancer, approval also requires:
1. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
2. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
3. You meet ONE of the following:
   a. You have stage III non-small cell lung cancer AND you are not a candidate for surgical resection (removal) or definitive chemoradiation (a type of treatment)
   b. You have metastatic non-small cell lung cancer (cancer that has spread to other parts of the body)

G. If you have metastatic non-small cell lung cancer, approval also requires:
1. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
2. You experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
3. You meet ONE of the following:
   a. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
   b. You have an anaplastic lymphoma kinase (ALK) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
   c. You have an epidermal growth factor receptor (EGFR) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

(Denial text continued on next page)

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

H. If you have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with platinum-containing chemotherapy (such as cisplatin) as neoadjuvant treatment (given before main treatment), OR as a single agent (not given in combination with chemotherapy) as adjuvant (add-on) treatment after surgery following prior use in combination with platinum-containing chemotherapy

I. If you have Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda will be used as adjuvant (add-on) treatment following resection (removed by surgery) and platinum-based chemotherapy (such as cisplatin, carboplatin)

J. If you have unresectable advanced or metastatic malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Keytruda will be given in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)

K. If you have head and neck squamous cell carcinoma, approval also requires ONE of the following:
1. Your cancer is resectable (able to be removed by surgery) and locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes), and you meet ALL of the following:
   a. You are 18 years of age or older
   b. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. Keytruda will be used as single-agent neoadjuvant treatment (given before main treatment) and then continued as adjuvant (add-on) treatment in combination with radiotherapy (RT: a type of cancer treatment), OR Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT
2. Your cancer is either metastatic (has spread to other parts of the body) or both unresectable (unable to remove by surgery) and recurrent (has returned), and you meet ONE of the following:
   a. Keytruda will be given in combination with platinum and fluorouracil (FU)
   b. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. Your cancer is recurrent (has returned) or metastatic (has spread to other parts of the body); AND you experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on next page)

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

L. If you have classical Hodgkin lymphoma, approval also requires ONE of the following:
1. You are 18 years of age or older AND have relapsed (disease has returned) or refractory (disease is resistant to treatment) classical Hodgkin lymphoma
2. You have refractory (disease is resistant to treatment) classical Hodgkin lymphoma or classical Hodgkin lymphoma that has relapsed (disease has returned) after 2 or more prior lines of therapy

M. If you have primary mediastinal large B-cell lymphoma, approval also requires ONE of the following:
1. You have refractory primary mediastinal large B-cell lymphoma (type of immune system cancer that is resistant to treatment)
2. You have relapsed (disease has returned) after 2 or more prior lines of therapy

N. If you have locally advanced or metastatic urothelial carcinoma, approval also requires ONE of the following:
1. Keytruda will be used in combination with enfortumab vedotin (Padcev), AND you are at least 18 years of age
2. You are not eligible for any platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
3. You have disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
   You have disease progression (worsening) within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

O. If you have bladder cancer, approval also requires ONE of the following:
1. You have muscle invasive bladder cancer (MIBC: bladder cancer that has grown into the muscle wall); AND you are 18 years of age or older; AND Keytruda will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment (given before main treatment), and then continued as adjuvant (add-on) treatment after a cystectomy (surgery to remove part or all of the urinary bladder)
2. You have Bacillus Calmette-Guerin (BCG: a type of anti-cancer treatment)-unresponsive, high-risk, non-muscle invasive bladder cancer with carcinoma in situ (a type of early-stage bladder cancer); AND you are not eligible for or have chosen not to undergo a cystectomy (surgery to remove part or all of the urinary bladder)

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

P. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You meet ONE of the following:
   a. Your tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test
   b. Your tumor is tumor mutational burden-high (TMB-H: high number of changes found in the genes of the cancer cells) [at least 10 mutations/megabase], as determined by a Food and Drug Administration (FDA)-approved test
2. Your disease has progressed (worsened) following prior treatment, and you have no alternative treatment options

Q. If you have unresectable or metastatic colorectal cancer, approval also requires:
1. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test

R. If you have locally advanced unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You meet ONE of the following:
   a. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-POSITIVE, and Keytruda will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
   b. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-NEGATIVE, and Keytruda will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

S. If you have locally advanced or metastatic esophageal or gastroesophageal junction carcinoma, approval also requires:
1. Your tumor is not amenable (responsive) to surgical resection (removal) or definitive chemoradiation (a type of treatment)
2. You meet ONE of the following:
   a. Keytruda will be used in combination with platinum- and fluoropyrimidine-based chemotherapy; AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1)
   b. Keytruda will be used after one or more prior lines of systemic therapy AND you have a tumor of squamous cell histology (cancer from flat surface-lining cells) that expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

(Denial text continued on next page)

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

T. If you have cervical cancer, approval also requires ONE of the following:
1. You have locally advanced cancer, your cancer is FIGO 2014 Stage III-IVA (a way to classify the size and spread of the cancer) and involves the lower third of the vagina, hydronephrosis (swelling of kidney)/a non-functioning kidney, or has spread to adjacent (nearby) pelvic organs; AND Keytruda will be used in combination with chemoradiotherapy (CRT: a type of therapy to treat cancer)
2. You have persistent, recurrent, or metastatic cancer (cancer that does not go away, has returned, or has spread to other parts of the body); AND Keytruda will be used in combination with chemotherapy (such as paclitaxel, cisplatin, carboplatin); AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You have recurrent or metastatic cancer; AND you have experienced disease progression (worsening) on or after chemotherapy; AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test

U. If you have hepatocellular carcinoma, approval also requires:
1. Your cancer is caused by hepatitis B (a type of liver infection)
2. You have received prior systemic therapy (such as Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (such as Opdivo [nivolumab])

V. If you have locally advanced unresectable or metastatic biliary tract cancer, approval also requires:
Keytruda will be used in combination with gemcitabine and cisplatin

W. If you have renal cell carcinoma, approval also requires ONE of the following:
1. You have advanced renal cell carcinoma; you are 18 years of age or older; AND Keytruda will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)
2. Keytruda will be used as adjuvant (add-on) treatment; AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)
3. You are 18 years of age or older; AND Keytruda will be used in combination with Welireg (belzutifan), Keytruda will be used as adjuvant (add-on) treatment; AND you have renal cell carcinoma with a clear cell component (ccRCC: a type of kidney cancer), AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)

(Denial text continued on next page)

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

X. If you have primary advanced or recurrent endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. Keytruda will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel

Y. If you have advanced endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You have experienced disease progression (worsening) following prior systemic therapy (treatment that affects the entire body)
3. You are not a candidate for curative surgery or radiation
4. You meet ONE of the following:
   a. You will use Keytruda in combination with lenvatinib (Lenvima), AND your cancer is mismatch repair proficient (pMMR) as determined by a Food and Drug Administration (FDA)-approved test or you do NOT have microsatellite instability-high (MSI-H) biomarkers (characteristics that help determine the type of cancer and what treatment options there are for it)
   b. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test

Z. If you have recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma, approval also requires:
1. Your disease is not curable by surgery or radiation

AA. **If you have high-risk early-stage triple-negative breast cancer, approval also requires:**
1. Keytruda will be used in combination with chemotherapy (such as carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant (add-on) treatment after surgery following prior use in combination with chemotherapy

BB. **If you have unresectable locally advanced or metastatic triple-negative breast cancer, approval also requires:**
1. You are 18 years of age or older
2. Keytruda will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
3. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-authorized test

(Denial text continued on next page)

PEMBROLIZUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

CC. **If you have locally recurrent unresectable or metastatic triple-negative breast cancer, approval also requires:**
1. Keytruda will be used in combination with chemotherapy (such as paclitaxel, gemcitabine, carboplatin)
2. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

DD. **If you have epithelial ovarian, fallopian tube, or primary peritoneal carcinoma, approval also requires:**
1. You are 18 years of age or older
2. You have platinum-resistant cancer (cancer that no longer responds to a type of treatment)
3. Keytruda will be used in combination with paclitaxel
4. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
5. You have received one or more prior systemic treatment regimens (treatment that affects the entire body)

RATIONALE

STANDARD PART D
PRIOR AUTHORIZATION GUIDELINES

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMBROLIZUM-BERAHYALURON-PMPH	KEYTRUDA QLEX	50902		GPI-10 (2199000253)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Stage IIB, IIC, or III melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Keytruda Qlex will be used as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

CONTINUED ON NEXT PAGE

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of metastatic nonsquamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, continue to #6.
   If no, continue to #7.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient has stage III NSCLC AND is not a candidate for surgical resection or definitive chemoradiation
   - The patient has metastatic NSCLC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - The patient has an anaplastic lymphoma kinase (ALK) genomic tumor aberration AND disease progression on or after ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The patient has an epidermal growth factor receptor (EGFR) genomic tumor aberration AND disease progression on or after EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

9. Does the patient have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with platinum-containing chemotherapy (e.g., cisplatin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of unresectable advanced or metastaticmalignant pleural mesothelioma (MPM) (ICD-10 C45.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

12. Does the patient have a diagnosis of head and neck squamous cell carcinoma (HNSCC) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #13.
    If no, continue to #17.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

13. Is the cancer resectable and locally advanced **AND** the patient meets the following criterion?
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, continue to #14.
    If no, continue to #15.

14. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used as single-agent neoadjuvant treatment, and then continued as adjuvant treatment in combination with radiotherapy (RT)
    - Keytruda Qlex will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

15. Is the cancer either metastatic or both unresectable and recurrent, and the patient meets **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with platinum and fluorouracil (FU)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #16.

16. Is the cancer recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

17. Does the patient have a diagnosis of locally advanced or metastatic urothelial carcinoma (ICD-10 Groups C66, C67, C68) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #18.
    If no, continue to #19.

18. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev)
    - The patient is not eligible for any platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression on or after treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

19. Does the patient have a diagnosis of bladder cancer (ICD-10 Group C67, D09.0) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #20.
    If no, continue to #22.

20. Is the cancer muscle invasive (MIBC) **AND** the patient meets the following criterion?
    - Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment, and then continued as adjuvant treatment after a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #21.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

21. Is the cancer non-muscle invasive (NMIBC) and the patient meets **ALL** of the following criteria?
    - The patient has Bacillus Calmette-Guerin (BCG)-unresponsive, high-risk cancer with carcinoma in situ (CIS)
    - The patient is ineligible for or has elected not to undergo a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

22. Does the patient have a diagnosis of an unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #23.

23. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #24.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

24. Does the patient have a diagnosis of locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test

    If yes, continue to #25.
    If no, continue to #26.

25. Does the patient meet **ONE** of the following criteria?
    - The cancer is HER2-positive, AND Keytruda Qlex will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
    - The cancer is HER2-negative, AND Keytruda Qlex will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

26. Does the patient have a diagnosis of locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with epicenter 1 to 5 centimeters above the GEJ) carcinoma (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The tumor is not amenable to surgical resection or definitive chemoradiation

    If yes, continue to #27.
    If no, continue to #28.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

27. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with platinum- and fluoropyrimidine-based chemotherapy AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-authorized test
    - Keytruda Qlex will be used after one or more prior lines of systemic therapy AND the patient has a tumor of squamous cell histology that expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

28. Does the patient have a diagnosis of cervical cancer (ICD-10 Group C53) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #29.
    If no, continue to #32.

29. Is the cancer locally advanced and the patient meets **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with chemoradiotherapy (CRT)
    - The cancer involves the lower third of the vagina, hydronephrosis/a non-functioning kidney, or has spread to adjacent pelvic organs (FIGO 2014 Stage III-IVA)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #30.

30. Is the cancer persistent, recurrent, or metastatic and the patient meets **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., paclitaxel, cisplatin, carboplatin)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #31.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

31. Is the cancer recurrent or metastatic and the patient meets **ALL** of the following criteria?
    - The patient has disease progression on or after chemotherapy
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

32. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is secondary to hepatitis B
    - The patient has received prior systemic therapy (e.g., Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (e.g., Opdivo [nivolumab])

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #33.

33. Does the patient have a diagnosis of locally advanced unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with gemcitabine and cisplatin

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #34.

34. Does the patient have a diagnosis of recurrent locally advanced or metastatic Merkel cell carcinoma (MCC) (ICD-10 Group C4A, C7B.1) **AND** meet the following criterion?
    - The patient is 12 years of age or older

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #35.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

35. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #36.

36. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used for adjuvant treatment
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #37.

37. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used for adjuvant treatment
    - Keytruda Qlex will be used in combination with Welireg (belzutifan)
    - The patient has renal cell carcinoma with a clear cell component (ccRCC)
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #38.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

38. Does the patient have a diagnosis of primary advanced or recurrent endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with carboplatin and paclitaxel, OR as a single agent after prior use in combination with carboplatin and paclitaxel

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #39.

39. Does the patient have a diagnosis of advanced endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has experienced disease progression following prior systemic therapy
    - The patient is not a candidate for curative surgery or radiation

    If yes, continue to #40.
    If no, continue to #42.

40. Does the patient meet **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with lenvatinib (Lenvima)
    - The patient's cancer is mismatch repair proficient (pMMR) OR not microsatellite instability-high (MSI-H) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #41.

41. Is the patient's cancer microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) as determined by an FDA-approved test?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

42. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's tumor is tumor mutational burden-high (TMB-H) [at least 10 mutations/megabase (mut/Mb)] as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #43.

43. Does the patient have a diagnosis of recurrent or metastatic cutaneous squamous cell carcinoma (cSCC) or locally advanced cSCC (ICD-10 C44.02, C44.42, C44.82, C44.92; Groups C44.12, C44.22, C44.32, C44.52, C44.62, C44.72) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The disease is not curable by surgery or radiation

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #44.

44. Does the patient have a diagnosis of high-risk early-stage triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #45.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

45. Does the patient have a diagnosis of unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10), as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #46.

46. Does the patient have a diagnosis of locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., paclitaxel, gemcitabine, carboplatin)
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #47.

47. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** the following criteria?
    - The patient is 18 years of age or older
    - The patient has platinum-resistant cancer
    - Keytruda Qlex will be used in combination with paclitaxel
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test
    - The patient has received one or more prior systemic treatment regimens

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH (Keytruda Qlex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (type of skin cancer that cannot be completely removed with surgery or has spread to other parts of the body)
   2. Stage IIB, IIC, or III melanoma (type of skin cancer)
   3. Non-small cell lung cancer (type of lung cancer)
   4. Unresectable advanced or metastatic malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery or has spread to other parts of the body)
   5. Head and neck squamous cell carcinoma (type of neck cancer)
   6. Locally advanced or metastatic urothelial carcinoma (type of urinary system cancer that has spread to other parts of the body)
   7. Bladder cancer
   8. Unresectable or metastatic solid tumor (type of cancer that cannot be removed by surgery or has spread to other parts of the body)
   9. Unresectable or metastatic colorectal cancer (CRC: type of colon or rectal cancer that cannot be removed by surgery or has spread to other parts of the body)
   10. Locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that cannot be surgically removed, has spread to nearby tissue or has spread to other parts of the body)
   11. Locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with an epicenter of 1 to 5 centimeters above the GEJ) carcinoma (a type of digestive system cancer that has spread to nearby tissue or to other parts of the body)
   12. Cervical cancer
   13. Hepatocellular carcinoma (liver cancer)
   14. Locally advanced unresectable or metastatic biliary tract cancer (BTC) (type of bile duct cancer that cannot be removed with surgery or has spread to other parts of the body)
   15. Recurrent locally advanced or metastatic Merkel cell carcinoma (MCC: type of skin cancer that has returned or has spread to other parts of the body)
   16. Renal cell carcinoma (kidney cancer)
   17. Endometrial carcinoma (type of cancer that starts in the uterus)
   18. Recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma (cSCC: a type of skin cancer that has returned, or has spread to other parts of the body or to nearby tissue or lymph nodes)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

19. High-risk early-stage triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors)
20. Unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
21. Locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be removed with surgery or has spread to other parts of the body)
22. Epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (types of reproductive system or abdomen cancers)

B. If you have unresectable or metastatic melanoma, approval also requires:
1. You are 18 years of age or older

C. If you have Stage IIB, IIC, or III melanoma, approval also requires:
1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Keytruda Qlex will be used as adjuvant (add-on) treatment

D. If you have metastatic nonsquamous non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)
3. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)

E. If you have metastatic squamous non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

F. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
3. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
4. You meet ONE of the following:
   a. You have stage III non-small cell lung cancer AND you are not a candidate for surgical resection (removal) or definitive chemoradiation (a type of treatment)
   b. You have metastatic non-small cell lung cancer (cancer that has spread to other parts of the body)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

G. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
3. You experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
4. You meet ONE of the following:
   a. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
   b. You have an anaplastic lymphoma kinase (ALK) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
   c. You have an epidermal growth factor receptor (EGFR) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

H. If you have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with platinum-containing chemotherapy (such as cisplatin) as neoadjuvant treatment (given before main treatment), OR as a single agent (not given in combination with chemotherapy) as adjuvant (add-on) treatment after surgery following prior use in combination with platinum-containing chemotherapy

I. If you have Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used as adjuvant (add-on) treatment following resection (removed by surgery) and platinum-based chemotherapy (such as cisplatin, carboplatin)

J. If you have unresectable advanced or metastatic malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be given in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

K. If you have head and neck squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is resectable (able to be removed by surgery) and locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) and you meet ALL of the following:
      i. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
      ii. Keytruda Qlex will be used as single-agent neoadjuvant treatment (given before main treatment) and then continued as adjuvant (add-on) treatment in combination with radiotherapy (RT: a type of cancer treatment), OR Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT
   b. Your cancer is either metastatic (has spread to other parts of the body) or both unresectable (unable to remove by surgery) and recurrent (has returned), and you meet ONE of the following:
      i. Keytruda Qlex will be used in combination with platinum and fluorouracil (FU)
      ii. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. Your cancer is recurrent (has returned) or metastatic (has spread to other parts of the body); AND you experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

L. If you have locally advanced or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev)
   b. You are not eligible for any platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
   c. You have disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
   d. You have disease progression (worsening) within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

M. If you have bladder cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have muscle invasive bladder cancer (MIBC: bladder cancer that has grown into the muscle wall); AND Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment (given before main treatment), and then continued as adjuvant (add-on) treatment after a cystectomy (surgery to remove part or all of the urinary bladder)
   b. You have Bacillus Calmette-Guerin (BCG: a type of anti-cancer treatment)-unresponsive, high-risk, non-muscle invasive bladder cancer with carcinoma in situ (a type of early-stage bladder cancer); AND you are not eligible for or have chosen not to undergo a cystectomy (surgery to remove part or all of the urinary bladder)

N. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You are 12 years of age or older
2. You meet ONE of the following:
   a. Your tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test
   b. Your tumor is tumor mutational burden-high (TMB-H: high number of changes found in the genes of the cancer cells) [at least 10 mutations/megabase], as determined by a Food and Drug Administration (FDA)-approved test
3. Your disease has progressed (worsened) following prior treatment, and you have no alternative treatment options

O. If you have unresectable or metastatic colorectal cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities) as determined by an FDA-approved test

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

P. If you have locally advanced unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You meet ONE of the following:
   a. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-POSITIVE, and Keytruda Qlex will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
   b. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-NEGATIVE, and Keytruda Qlex will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

Q. If you have locally advanced or metastatic esophageal or gastroesophageal junction carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor is not amenable (responsive) to surgical resection (removal) or definitive chemoradiation (a type of treatment)
3. You meet ONE of the following:
   a. Keytruda Qlex will be used in combination with platinum- and fluoropyrimidine-based chemotherapy; AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-authorized test
   b. Keytruda Qlex will be used after one or more prior lines of systemic therapy; AND you have a tumor of squamous cell histology (cancer from flat surface-lining cells) that expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-authorized test

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

R. If you have cervical cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have locally advanced cancer (cancer that has spread from where it started to nearby tissue or lymph nodes); AND Keytruda Qlex will be used in combination with chemoradiotherapy (CRT: a type of therapy to treat cancer); AND your cancer involves the lower third of the vagina, hydronephrosis (swelling of kidney)/a non-functioning kidney, or has spread to adjacent (nearby) pelvic organs (FIGO 2014 Stage III-IVA: a way to classify the size and spread of the cancer)
   b. You have persistent, recurrent, or metastatic cancer (cancer that does not go away, has returned, or has spread to other parts of the body); AND Keytruda Qlex will be used in combination with chemotherapy (such as paclitaxel, cisplatin, carboplatin); AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. You have recurrent (has returned) or metastatic (has spread to other parts of the body) cancer; AND you have experienced disease progression (worsening) on or after chemotherapy; AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test

S. If you have hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer is caused by hepatitis B (a type of liver infection)
3. You have received prior systemic therapy (such as Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (such as Opdivo [nivolumab])

T. If you have locally advanced unresectable or metastatic biliary tract cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with gemcitabine and cisplatin

U. If you have recurrent locally advanced or metastatic Merkel cell carcinoma, approval also requires:
1. You are 12 years of age or older

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

V. If you have renal cell carcinoma, approval also requires ONE of the following:
1. You have advanced renal cell carcinoma; you are 18 years of age or older; AND Keytruda Qlex will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)
2. You are 18 years of age or older; Keytruda Qlex will be used as adjuvant (add-on) treatment; AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue).
3. You are 18 years of age or older; AND Keytruda Qlex will be used in combination with Welireg (belzutifan), Keytruda Qlex will be used as adjuvant (add-on) treatment; AND you have renal cell carcinoma with a clear cell component (ccRCC: a type of kidney cancer), AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)

W. If you have primary advanced or recurrent endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel

X. If you have advanced endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You have experienced disease progression (worsening) following prior systemic therapy (treatment that affects the entire body)
3. You are not a candidate for curative surgery or radiation
4. You meet ONE of the following:
   a. You will use Keytruda Qlex in combination with lenvatinib (Lenvima), AND your cancer is mismatch repair proficient (pMMR) OR not microsatellite instability-high (MSI-H) (characteristics that help determine the type of cancer and what treatment options there are for it) as determined by a Food and Drug Administration (FDA)-approved test
   b. Your cancer is microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) (types of genetic abnormalities) as determined by an Food and Drug Administration (FDA)-approved test

Y. If you have recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your disease is not curable by surgery or radiation

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

Z. If you have high-risk early-stage triple-negative breast cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with chemotherapy (such as carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant (add-on) treatment after surgery following prior use in combination with chemotherapy

AA. **If you have unresectable locally advanced or metastatic triple-negative breast cancer, approval also requires:**
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
3. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10), as determined by a Food and Drug (FDA)-authorized test

BB. **If you have locally recurrent unresectable or metastatic triple-negative breast cancer, approval also requires:**
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with chemotherapy (such as paclitaxel, gemcitabine, carboplatin)
3. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

CC. **If you have epithelial ovarian, fallopian tube, or primary peritoneal carcinoma, approval also requires:**
1. You are 18 years of age or older
2. You have platinum-resistant cancer (cancer that no longer responds to a type of treatment)
3. Keytruda Qlex will be used in combination with paclitaxel
4. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
5. You have received one or more prior systemic treatment regimens (treatment that affects the entire body)

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PEMIGATINIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMIGATINIB	PEMAZYRE	46462		GPI-10 (2153226000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable locally advanced or metastatic cholangiocarcinoma (ICD-10 C22.1, C24.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has been previously treated for unresectable locally advanced or metastatic cholangiocarcinoma
   - The patient has a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement, as detected by an FDA-approved test
   - The patient will complete a comprehensive ophthalmological examination, including optical coherence tomography (OCT), prior to initiation of therapy and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

PEMIGATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

2. Does the patient have a diagnosis of relapsed or refractory myeloid/lymphoid neoplasms (MLNs) (ICD-10 C96.9, C96.Z; Groups C94.8, C95.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a fibroblast growth factor receptor 1 (FGFR1) rearrangement
   - The patient will complete a comprehensive ophthalmological examination, including optical coherence tomography (OCT), prior to initiation of therapy and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEMIGATINIB (Pemazyre)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Unresectable locally advanced or metastatic cholangiocarcinoma (bile duct cancer that has spread to nearby tissue and lymph nodes and cannot be removed by surgery, or it has spread to other parts of the body)
      2. Relapsed or refractory myeloid/lymphoid neoplasms (a type of blood cancer that has returned or did not respond to treatment)

   B. If you have unresectable locally advanced or metastatic cholangiocarcinoma, approval also requires:
      1. You are 18 years of age or older
      2. You have previously been treated for unresectable locally advanced or metastatic cholangiocarcinoma
      3. You have a fibroblast growth factor receptor 2 (FGFR2: type of protein) fusion or other rearrangement (types of gene mutation), as detected by a Food and Drug Administration (FDA)-approved test
      4. You will complete a comprehensive ophthalmological examination (eye exam), including optical coherence tomography (OCT: a type of eye imaging test), before starting the medication and at the recommended scheduled times

PRIOR AUTHORIZATION GUIDELINES

PENICILLAMINE CAPSULE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PENICILLAMINE	CUPRIMINE, PENICILLAMINE		7091	GPI-14 (99200030000110)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA, SEE BELOW)

1. Does the patient have a diagnosis of Wilson's disease (ICD-10 E83.01) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hepatologist or gastroenterologist
   - The patient has a Leipzig score of 4 or greater
   - The patient had a trial of or contraindication to penicillamine tablet (Depen)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of cystinuria (ICD-10 E72.01) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient had a trial of or contraindication to penicillamine tablet (Depen)
   - The patient had a trial of or contraindication to tiopronin (Thiola, Thiola EC, Venxxiva)

   If yes, continue to #3.
   If no, continue to #4.

PENICILLAMINE CAPSULE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have nephrolithiasis and meet **ONE** of the following criteria?
   - The patient's stone analysis shows a presence of cystine
   - The patient's urinalysis shows pathognomonic hexagonal cystine crystals
   - The patient has a family history of cystinuria AND a positive cyanide-nitroprusside screening

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of severe, active rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient does not have a history or other evidence of renal insufficiency
   - The patient had a trial of or contraindication to 3 months of treatment with ONE DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate dose greater than or equal to 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
   - The patient had a trial of or contraindication to penicillamine tablet (Depen)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: **Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PENICILLAMINE CAPSULE (Cuprimine)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Wilson's disease (a type of genetic disorder)
      2. Cystinuria (a type of genetic disorder)
      3. Severe, active rheumatoid arthritis (a type of joint condition)

   (Initial denial text continued on next page)

PENICILLAMINE CAPSULE (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have Wilson's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor) or gastroenterologist (doctor who treats digestive conditions)
2. You have a Leipzig score of 4 or greater (a type of diagnostic score)
3. You have tried or have a contraindication to (harmful for you to use) penicillamine tablet (Depen)

C. If you have cystinuria, approval also requires:
1. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
2. You have nephrolithiasis (kidney stones) and ONE of the following:
   a. Your kidney stone analysis that shows there is cystine (an amino acid)
   b. Your urine analysis shows there are hexagonal cystine crystals that are pathognomonic (signs relating to the disease)
   c. You have a family history of cystinuria AND tested positive for the cyanide-nitroprusside screening (a test to determine the amount of cystine in the body)
3. You have tried or have a contraindication to (harmful for you to use) penicillamine tablet (Depen)
4. You have tried or have a contraindication to (harmful for you to use) tiopronin (Thiola, Thiola EC, Venxxiva)

D. If you have severe, active rheumatoid arthritis, approval also requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
2. You do not have a history or other evidence of renal insufficiency (kidney problems)
3. You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE DMARD (disease-modifying antirheumatic drug, such as methotrexate dose greater than or equal to 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
4. You have tried or have a contraindication to (harmful for you to use) penicillamine tablet (Depen)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PENICILLAMINE CAPSULE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Wilson's disease (ICD-10 E83.01) or cystinuria (ICD-10 E72.01) **AND** meet the following criterion?
   - The patient continues to benefit from the medication

   If yes, approve for lifetime by GPID or GPI-14.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of severe, active rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient does not have a history or other evidence of renal insufficiency
   - The patient has experienced or maintained improvement in tender joint count or swollen joint count compared to baseline

   If yes, approve for lifetime by GPID or GPI-14.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PENICILLAMINE CAPSULE (Cuprimine)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Wilson's disease (a type of genetic disorder)
      2. Cystinuria (a type of genetic disorder)
      3. Severe, active rheumatoid arthritis (a type of joint condition)

   B. If you have Wilson's disease or cystinuria, renewal also requires:
      1. You continue to benefit from the medication

   C. If you have severe, active rheumatoid arthritis, renewal also requires:
      1. You do not have a history or other evidence of renal insufficiency (kidney problems)
      2. You have experienced or maintained improvement in tender joint count or swollen joint count compared to baseline

   (Renewal denial text continued on next page)

PENICILLAMINE TABLET (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have nephrolithiasis (ICD-10 N20.0) and meet **ONE** of the following criteria?
   - The patient's stone analysis shows a presence of cystine
   - The patient's urinalysis shows pathognomonic hexagonal cystine crystals
   - The patient has a family history of cystinuria AND a positive cyanide-nitroprusside screening

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of severe, active rheumatoid arthritis (ICD-10 M06.9; Groups M05.7, M05.8, M05.9, M06.0, M06.8) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient does not have a history or other evidence of renal insufficiency
   - The patient had a trial of or contraindication to 3 months of treatment with ONE DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate dose greater than or equal to 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PENICILLAMINE TABLET (Depen)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Wilson's disease (a type of genetic disorder)
      2. Cystinuria (a type of genetic disorder)
      3. Severe, active rheumatoid arthritis (a type of joint condition)

   B. If you have Wilson's disease, approval also requires:
      1. Therapy is prescribed by or in consultation with a hepatologist (a liver doctor) or gastroenterologist (doctor who treats digestive conditions)
      2. You have a Leipzig score of 4 or greater (a type of diagnostic score)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

PERTUZUMAB-TRASTUZUMAB-HY-ZZXF BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's cancer metastatic and the patient meets **ALL** of the following criteria?
   - The patient has not received prior anti-HER2 therapy or chemotherapy for metastatic disease
   - Phesgo will be used in combination with docetaxel

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PERTUZUMAB-TRASTUZUMAB-HY-ZZXF (Phesgo)** requires the following rule(s) be met for approval:
   A. You have breast cancer
   B. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   C. If you have locally advanced (cancer that has spread to nearby tissue or lymph nodes), inflammatory or early breast cancer (defined as either tumor is greater than 2 cm in diameter or node positive), approval also requires:
      1. Phesgo will be used in combination with chemotherapy as part of a complete treatment regimen for early breast cancer in the neoadjuvant setting (given before surgery)
   D. If you have early breast cancer, approval also requires:
      1. Your breast cancer is at high risk of recurrence (returning)
      2. Phesgo will be used in combination with chemotherapy in the adjuvant setting (given as add-on treatment)
   E. If you have metastatic breast cancer (cancer that has spread to other parts of the body), approval also requires:
      1. You have not received anti-HER2 therapy or chemotherapy for metastatic disease (cancer treatment for disease that has spread to other parts of the body)
      2. Phesgo will be used in combination with docetaxel

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PIRTOBRUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PIRTOBRUTINIB (Jaypirca)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Relapsed or refractory mantle cell lymphoma (MCL) (a type of blood cancer that has returned or did not respond to treatment)
   2. Relapsed or refractory chronic lymphocytic leukemia (CLL) (a type of blood cancer that has returned or did not respond to treatment)
   3. Relapsed or refractory small lymphocytic lymphoma (SLL) (a type of blood cancer that has returned or did not respond to treatment)

B. If you have relapsed or refractory mantle cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously received at least TWO lines of systemic therapy (treatment that targets the entire body) for mantle cell lymphoma, including a BTK inhibitor (Bruton's tyrosine kinase inhibitor such as Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

C. If you have relapsed or refractory chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously received a covalent BTK inhibitor (Bruton's tyrosine kinase inhibitor such as Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PITOLISANT (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient 18 years of age or older and meets **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE generic typical stimulant indicated for EDS with narcolepsy (e.g., amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])
   - The patient had a trial of or contraindication to Sunosi (solriamfetol), Nuvigil (armodafinil), OR Provigil (modafinil)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of cataplexy with narcolepsy (ICD-10 G47.411) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PITOLISANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PITOLISANT (Wakix)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   2. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)

B. If you have excessive daytime sleepiness with narcolepsy, approval also requires:
   1. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   2. You meet ONE of the following:
      a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) ONE generic typical stimulant used for excessive daytime sleepiness (EDS) with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])
      b. You are 18 years or older AND have tried or have a contraindication to (harmful for you to use) ONE generic typical stimulant used for excessive daytime sleepiness (EDS) with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin]) AND Sunosi (solriamfetol), Nuvigil (armodafinil), or Provigil (modafinil)

C. If you have cataplexy with narcolepsy, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine

PITOLISANT (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   Excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419)
   Cataplexy with narcolepsy (ICD-10 G47.411)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient shown sustained improvement of symptoms compared to baseline?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PITOLISANT (Wakix)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
      2. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
   B. You have shown sustained improvement in symptoms compared to baseline

GUIDELINES FOR USE (CONTINUED)

3. Does that patient have a diagnosis of previously untreated high-grade B-cell lymphoma (HGBL), and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an International Prognostic Index score of 2 or greater
   - Polivy will be used in combination with a rituximab product, cyclophosphamide, doxorubicin, and prednisone (R-CHP)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [xx] per [xx] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **POLATUZUMAB VEDOTIN-PIIQ (Polivy)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Relapsed (returned) or refractory (resistant to treatment) diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), not otherwise specified
      2. Previously untreated diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), not otherwise specified
      3. Previously untreated high-grade B-cell lymphoma (HGBL: an aggressive type of blood cancer)

   B. If you have relapsed or refractory diffuse large B-cell lymphoma, not otherwise specified, approval also requires:
      1. You are 18 years of age or older
      2. Polivy will be used in combination with bendamustine and a rituximab product (type of cancer drug)
      3. You have had at least two prior therapies (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone], tafasitamab with lenalidomide)

   C. If you have previously untreated diffuse large B-cell lymphoma, not otherwise specified, approval also requires:
      1. You are 18 years of age or older
      2. Polivy will be used in combination with a rituximab product (type of cancer drug), cyclophosphamide, doxorubicin, and prednisone (R-CHP)

PONATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have chronic myeloid leukemia, approval also requires:
1. You are 18 years of age or older
2. You had a mutational analysis (a type of test) before starting therapy AND Iclusig is appropriate per the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1; a type of abnormal gene) profile
3. You meet ONE of the following:
   a. You have T315I-positive (a genetic mutation) CML (chronic phase, accelerated phase, or blast phase)
   b. You have chronic phase CML AND have a resistance to or are not able to safely use at least two prior kinase inhibitor treatments such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib)
   c. You have accelerated phase or blast phase CML AND there are no other kinase inhibitors, such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib), that can be used for your disease

C. If you have Philadelphia chromosome positive acute lymphoblastic leukemia, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is positive for the T315I mutation (a type of abnormal gene)
   b. There are no other kinase inhibitors treatment, such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib), that can be used for your disease
   c. You are newly diagnosed AND Iclusig will be used in combination with chemotherapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Iclusig.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), including clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of one sphingosine-1-phosphate receptor modulator (e.g., fingolimod, Mayzent [siponimod]) AND one other agent indicated for the treatment of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PONESIMOD (Ponvory)** requires the following rule(s) be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older
   C. You have tried one sphingosine-1-phosphate receptor modulator (such as fingolimod, Mayzent [siponimod]) AND one other medication indicated for the treatment of multiple sclerosis (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

POSACONAZOLE-POWDERMIX (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the request for prophylaxis of invasive Aspergillus or Candida infections and the patient meets **ALL** of the following criteria?
   - The patient is at high risk of developing these infections due to being severely immunocompromised, such as HSCT recipients with GVHD or has a hematologic malignancy with prolonged neutropenia from chemotherapy
   - The patient is 2 to 17 years of age
   - The patient is unable to swallow tablets

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **POSACONAZOLE-POWDERMIX (Noxafil)** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Continuation of therapy after hospital discharge
      2. Treatment of invasive aspergillosis (type of fungal infection)
      3. Prophylaxis (prevention) of invasive aspergillus or candida infections (types of fungal infection)

   B. If the request is for treatment of invasive Aspergillosis, approval also requires:
      1. You are 2 to 17 years of age
      2. You have a contraindication to (harmful for you to use) or are unable to swallow tablets

   C. If the request is for the prophylaxis of invasive Aspergillus or Candida infections, approval also requires:
      1. You are at high risk of developing these infections due to being severely immunocompromised (low immune system), such as a hematopoietic stem cell transplantation (HSCT: bone marrow transplant) recipient with graft versus host disease (GVHD: a type of immune disorder), or you have a hematologic malignancy (cancer affecting the blood) with prolonged neutropenia (a type of blood condition) from chemotherapy (cancer treatment)
      2. You are 2 to 17 years of age
      3. You are unable to swallow tablets

   D. A request for continuation of therapy after hospital discharge does not require extra criteria

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory peripheral T-cell lymphoma (PTCL) (ICD-10 Group C84.4)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PRALATREXATE (Folotyn)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory peripheral T-cell lymphoma (PTCL) (a type of blood cancer that has returned or did not respond to treatment)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Folotyn.

PRALSETINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PRALSETINIB (Gavreto)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
   2. Advanced or metastatic thyroid cancer (thyroid cancer that has spread to other parts of the body)

B. If you have metastatic non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. You have a rearranged during transfection (RET) fusion-positive (a type of gene mutation) tumor, as detected by a Food and Drug Administration (FDA)-approved test

C. If you have advanced or metastatic thyroid cancer, approval also requires:
   1. You are 12 years of age or older
   2. You have a rearranged during transfection (RET) fusion-positive (a type of gene mutation) tumor
   3. You need systemic therapy (treatment that targets the entire body)
   4. You have received treatment with radioactive iodine, and it did not work or is no longer working (if radioactive iodine is appropriate)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Gavreto.

PRIOR AUTHORIZATION GUIDELINES

RABIES VACCINE BVD DETERMINATION (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RABIES VACCINE (PCEC)/PF	RABAVERT	35580		GPI-10 (1710007020)	
RABIES VACCINE HUMAN DIPLOID/PF	IMOVAX	04199		GPI-10 (1710007000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: This PA is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

GUIDELINES FOR USE

1. Is this drug to be administered as prophylaxis to a member as a result of being exposed to rabies (for example, post-exposure prophylaxis)?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Deny under Part D before approving under Part B. Populate the B vs. D field with "B" in the PA override field)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with "D" in the PA override field)**

RATIONALE

Rabies vaccine requires a Part B vs. Part D determination. The vaccine is Part D for pre-exposure vaccination. The vaccine is Part B if used for post exposure prophylaxis against rabies in all age groups.

RAMUCIRUMAB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RAMUCIRUMAB	CYRAMZA	41109		GPI-10 (2133507000)	

Do not review Part D guidelines with physicians; if the caller wished to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced or metastatic gastric cancer or gastro-esophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - Cyramza will be used as a single agent or in combination with paclitaxel
   - The patient has experienced disease progression on or after prior fluoropyrimidine-containing chemotherapy (e.g., fluorouracil [5-FU], capecitabine, floxuridine) OR platinum-containing chemotherapy (e.g., cisplatin, oxaliplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

RAMUCIRUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

2. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ONE** of the following criteria?
   - Cyramza will be used in combination with docetaxel AND the patient has experienced disease progression on or after platinum-based chemotherapy (e.g., cisplatin, oxaliplatin, carboplatin)
   - Cyramza will be used in combination with docetaxel AND the patient has an EGFR or ALK genomic tumor aberration and had disease progression on an FDA-approved therapy for these aberrations (e.g., Tarceva [erlotinib], Gilotrif [afatinib], Xalkori [crizotinib], Zykadia [ceritinib]) prior to receiving Cyramza
   - Cyramza will be used in combination with Tarceva [erlotinib] AND the patient's tumor(s) have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) and meet **ALL** of the following criteria?
   - Cyramza will be used in combination with FOLFIRI (irinotecan, folinic acid, and 5-fluorouracil)
   - The patient has experienced disease progression on or after prior therapy with bevacizumab, oxaliplatin, and a fluoropyrimidine (e.g., 5-fluorouracil, capecitabine)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

RAMUCIRUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
   - The patient has an alpha fetoprotein (AFP) greater than or equal to 400 ng/mL
   - The patient has been treated with Nexavar (sorafenib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RAMUCIRUMAB (Cyramza)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Advanced or metastatic gastric cancer or gastro-esophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)
      2. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of your body)
      3. Metastatic colorectal cancer (mCRC: a type of colon or rectum cancer that has spread to other parts of the body)
      4. Hepatocellular carcinoma (HCC: a type of liver cancer)

   B. If you have advanced or metastatic gastric cancer or gastro-esophageal junction adenocarcinoma, approval also requires:
      1. Cyramza will be used as a single agent or in combination with paclitaxel
      2. You have experienced disease progression (worsening) on or after prior fluoropyrimidine-containing chemotherapy (such as fluorouracil [5-FU], capecitabine, floxuridine) OR platinum-containing chemotherapy (such as cisplatin, oxaliplatin, carboplatin)

   (Denial text continued on next page)

RAMUCIRUMAB (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have metastatic non-small cell lung cancer, approval also requires ONE of the following:
1. Cyramza will be used in combination with docetaxel and you meet ONE of the following:
   a. You have experienced disease progression (worsening) on or after platinum-based chemotherapy (such as cisplatin, oxaliplatin, carboplatin)
   b. You have an epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of enzyme) genomic tumor abnormality AND your disease has gotten worse on a Food and Drug Administration (FDA)-approved therapy (such as Tarceva [erlotinib], Gilotrif [afatinib], Xalkori [crizotinib], Zykadia [ceritinib]) prior to receiving Cyramza
2. Cyramza will be used in combination with Tarceva (erlotinib) AND your tumor(s) have EGFR exon 19 deletions or exon 21 (L858R) substitution mutations

D. If you have metastatic colorectal cancer, approval also requires:
1. Cyramza will be used in combination with FOLFIRI (drug combination of irinotecan, folinic acid, and 5-fluorouracil)
2. You have experienced disease progression (worsening) on or after prior therapy with bevacizumab, oxaliplatin, and a fluoropyrimidine (such as 5-fluorouracil, capecitabine)

E. If you have hepatocellular carcinoma, approval also requires:
1. You have an alpha fetoprotein (AFP) greater than or equal to 400 ng/mL
2. You have been treated with Nexavar (sorafenib)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10% AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Ultomiris will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor B inhibitor (e.g., Fabhalta [iptacopan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39) **AND** meet the following criterion?
   - The patient is 1 month of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

RAVULIZUMAB-CWVZ (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AChR) antibody-positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is in Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Ultomiris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - Ultomiris will NOT be used concurrently with other NMOSD agents (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RAVULIZUMAB-CWVZ (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RAVULIZUMAB-CWVZ (Ultomiris)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
      4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

   B. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
      1. You are 1 month of age or older
      2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
      3. You will NOT use Ultomiris concurrently (at the same time) with another C5 complement inhibitor therapy (such as Soliris [eculizumab],Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor B inhibitor (such as Fabhalta [iptacopan])
      4. Your PNH diagnosis is confirmed by ALL of the following through flow cytometry (test to measure characteristics of cells):
         a. You have at least 2 different GPI-protein deficiencies (missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
         b. PNH granulocyte clone size is at least 10%

   (Initial denial text continued on next page)

RAVULIZUMAB-CWVZ (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have atypical hemolytic uremic syndrome, approval also requires:
1. You are 1 month of age or older

D. If you have generalized myasthenia gravis, approval also requires:
1. You are 18 years of age or older
2. You are anti-acetylcholine receptor (AChR) antibody-positive (an indicator of myasthenia gravis)
3. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
4. You are in Myasthenia Gravis Foundation of America class II, III, or IV (indicates severity of disease)
5. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
6. You have tried or have a contraindication to (harmful for you to use) ONE non-steroidal immunosuppressive therapy (treatment that lowers body's immune system activity, such as azathioprine, cyclophosphamide, methotrexate)
7. You will NOT use Ultomiris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

E. If you have neuromyelitis optica spectrum disorder, approval also requires:
1. You are 18 years of age or older
2. You have a positive serologic (blood) test for anti-aquaporin-4 (AQP4: a type of protein) antibodies
3. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or ophthalmologist (a type of eye doctor)
4. You have at least ONE of the following core clinical characteristics:
   a. Optic neuritis (type of brain disorder)
   b. Acute myelitis (type of brain disorder)
   c. Area postrema syndrome (type of brain disorder)
   d. Acute brainstem syndrome (type of brain disorder)
   e. Symptomatic narcolepsy (type of sleep condition) or acute diencephalic clinical syndrome (type of brain disorder) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
   f. Symptomatic cerebral syndrome with NMOSD-typical brain lesions
5. You will NOT use Ultomiris concurrently (at the same time) with other neuromyelitis optica spectrum disorder (NMOSD) medications (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RAVULIZUMAB-CWVZ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase and hemoglobin levels) compared to baseline
   - Ultomiris will NOT be used concurrently with another C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]), or factor B inhibitor (e.g., Fabhalta [iptacopan])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Ultomiris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

RAVULIZUMAB-CWVZ (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient has shown clinical benefit (e.g., reduction in relapse frequency from baseline, decrease in NMOSD-related hospitalizations) while on therapy with Ultomiris
   - Ultomiris will NOT be used concurrently with other NMOSD agents (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RAVULIZUMAB-CWVZ (Ultomiris)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
      4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

   B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
      1. You have had clinical benefit (such as a reduction in number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [an enzyme] and hemoglobin levels) compared to baseline (before treatment)
      2. You will NOT use Ultomiris concurrently (at the same time) with another C5 complement inhibitor therapy (such as Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]), or factor B inhibitor (such as Fabhalta [iptacopan])

   C. If you have generalized myasthenia gravis, renewal also requires:
      1. You have had clinical benefit compared to baseline (such as shown by the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
      2. You will NOT use Ultomiris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

   (Renewal denial text continued on next page)

RAVULIZUMAB-CWVZ (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have neuromyelitis optica spectrum disorder, renewal also requires:

1. You have shown clinical benefit (such as a reduction in relapse frequency from baseline, a decrease in NMOSD-related hospitalizations) while on therapy with Ultomiris
2. You will NOT use Ultomiris concurrently (at the same time) with other neuromyelitis optica spectrum disorder (NMOSD) medications (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy regimen (e.g., FOLFOX, FOLFIRI, FOLFOXIRI, CapeOx, infusional 5-FU/LV, capecitabine)
   - The patient has received previous treatment with an anti-VEGF therapy (e.g., Avastin [bevacizumab], Zaltrap [ziv-aflibercept])

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient's metastatic colorectal cancer RAS wild-type (mutation negative)?

   If yes, continue to #3**.**
   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Has the patient received previous treatment with an anti-EGFR therapy (e.g., Erbitux [cetuximab], Vectibix [panitumumab])?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

REGORAFENIB (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of locally advanced, unresectable, or metastatic gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) **AND** meet the following criterion?
   - The patient has received previous treatment with Gleevec (imatinib) and Sutent (sunitinib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) **AND** meet the following criterion?
   - The patient has received previous treatment with Nexavar (sorafenib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **REGORAFENIB (Stivarga)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Metastatic colorectal cancer (CRC) (a type of digestive cancer that has spread to other parts of the body)
      2. Locally advanced, unresectable, or metastatic gastrointestinal stromal tumor (GIST) (a type of digestive tumor that has spread from where it started to nearby tissue or lymph nodes, is unable to be removed by surgery, or has spread to other parts of the body)
      3. Hepatocellular carcinoma (HCC: a type of liver cancer)
   B. For the diagnosis of metastatic colorectal cancer, approval requires:
      1. You had previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy such as FOLFOX, FOLFIRI, FOLFOXIRI, CapeOx, infusional 5-FU/LV, capecitabine
      2. You had previous treatment with an anti-VEGF therapy such as Avastin (bevacizumab), Zaltrap (ziv-aflibercept)
      3. If you have RAS wild-type (a type of gene that has not mutated) metastatic colorectal cancer**,** approval also requires you had previous treatment with an anti-EGFR therapy such as Erbitux (cetuximab), Vectibix (panitumumab)
   (Denial text continued on next page)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is platinum-resistant
   - Lifyorli will be used in combination with Abraxane (nab-paclitaxel)
   - The patient has received one to three prior systemic treatment regimens, at least one of which included Avastin (bevacizumab)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **RELACORILANT (Lifyorli)** requires the following rule(s) be met for approval:
   A. You have epithelial ovarian, fallopian tube, or primary peritoneal cancer (type of reproductive system or abdominal tissue cancer)
   B. You are 18 years of age or older
   C. Your cancer is platinum-resistant (resistant to medications such as paclitaxel, docetaxel, cisplatin, carboplatin)
   D. Lifyorli will be used in combination with Abraxane (nab-paclitaxel)
   E. You have received one to three prior systemic treatment regimens (treatment that targets the entire body), at least one of which included Avastin (bevacizumab)

RELUGOLIX-ESTRADIOL-NORETHINDRONE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for the management of moderate to severe pain associated with endometriosis (ICD-10 R52 and Group N80) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a premenopausal woman
   - Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN)
   - Myfembree will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])

   If yes, **approve for 6 months by HICL or GPI-10.**

   If no, do not approve.

   INITIAL DENIAL TEXT:

   Our guideline named **RELUGOLIX-ESTRADIOL-NORETHINDRONE (Myfembree)** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids: non-cancerous growths in the uterus)
      2. Management of moderate to severe pain associated with endometriosis (condition affecting the uterus)

   B. If the request is for management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids), approval also requires:
      1. You are 18 years of age or older
      2. You are a premenopausal (before menopause) woman
      3. Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN: a type of women's health doctor)
      4. You have tried and failed or have a contraindication to (harmful for you to use) TWO medications from the following: oral tranexamic acid, contraceptive preparations (such as oral contraceptive, levonorgestrel intra-uterine device [such as Mirena, Kyleena, Skyla, Liletta], or other forms of contraceptive)
      5. You have not received a total of 24 months cumulative treatment with Myfembree

RELUGOLIX-ESTRADIOL-NORETHINDRONE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT:

Our guideline named **RELUGOLIX-ESTRADIOL-NORETHINDRONE (Myfembree)** requires the following rule(s) be met for renewal:

A. The request is for ONE of the following:
   1. Management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids: non-cancerous growths in the uterus)
   2. Management of moderate to severe pain associated with endometriosis (condition affecting the uterus)

B. If the request is for management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids), renewal also requires:
   1. You had improvement of heavy menstrual bleeding while on therapy
   2. You have not received a total of 24 months cumulative (total) treatment with Myfembree

C. If the request is for management of moderate to severe pain associated with endometriosis, renewal also requires:
   1. You have had improvement in pain related to endometriosis while on therapy
   2. Myfembree will NOT be used concurrently (at the same time) with another GnRH-modulating agent (such as Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])
   3. You have not received a total of 24 months cumulative (total) treatment with Myfembree

---

REMIBRUTINIB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **REMIBRUTINIB (Rhapsido)** requires the following rule(s) be met for approval:

1. You have chronic spontaneous urticaria (CSU) (also called chronic idiopathic urticaria [CIU]) [severe itching with unknown cause]
2. You are 18 years of age or older
3. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
4. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
5. You have tried and are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), a second generation H1 antihistamine (type of allergy medication, such as Clarinex [desloratadine], Xyzal [levocetirizine])
6. You will NOT use Rhapsido concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)
7. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Dupixent (dupilumab)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

   A. You have chronic spontaneous urticaria (CSU) (also called chronic idiopathic urticaria [CIU]) [severe itching with unknown cause]
   B. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
   C. You are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), a second generation H1 antihistamine (type of allergy medication, such as Clarinex [desloratadine], Xyzal [levocetirizine])
   D. You will NOT use Rhapsido concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has *ROS1*-positive tumors

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have solid tumors and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The tumors have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion
   - The tumors are locally advanced or metastatic, OR surgical resection is likely to result in severe morbidity
   - The patient has progressed following treatment OR has no satisfactory alternative therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

REPOTRECTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **REPOTRECTINIB (Augtyro)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   2. Solid tumors

B. If you have non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. You have *ROS1*-positive (abnormal change in a type of gene) tumors

C. If you have solid tumors, approval also requires:
   1. You are 12 years of age or older
   2. Your tumors have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion (abnormal change in a type of gene)
   3. Yours tumors are locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body), OR surgical resection (removal by surgery) is likely to result in severe morbidity (illness)
   4. You have progressed following treatment OR have no satisfactory alternative (other) therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RESLIZUMAB BvD (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RESLIZUMAB	CINQAIR	43211		GPI-10 (4460446000)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

RESLIZUMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RESLIZUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary medicine
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the past 12 months
   - Cinqair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)
   - Cinqair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RESLIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient experienced at least ONE serious exacerbation requiring hospitalization or ER visit within the past 12 months

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RESLIZUMAB (Cinqair)** requires the following rule(s) be met for approval:
   A. You have severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary (lungs/breathing) medicine
   D. You have a blood eosinophil (type of white blood cell) level of at least 150 cells/mcL within the past 12 months

   (Initial denial text continued on next page)

RESLIZUMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

E. Cinqair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), or theophylline
F. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)
G. You will NOT use Cinqair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
H. You meet ONE of the following:
    1. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
    2. You have experienced at least ONE serious asthma exacerbation requiring hospitalization or emergency room visit within the past 12 months
    3. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
        a. Daytime asthma symptoms more than twice per week
        b. Any night waking due to asthma
        c. Use of a short-acting beta-2-agonist (SABA) reliever (such as albuterol) for symptoms more than twice per week
        d. Any activity limitation due to asthma

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RESLIZUMAB BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - Cinqair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See renewal denial text at the end of the guideline.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)
   - Increase in percent predicted FEV1 from pretreatment baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See renewal denial text at the end of the guideline.

RESLIZUMAB BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RESLIZUMAB (Cinqair)** requires the following rule(s) be met for renewal:

A. You have severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
B. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol or salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast), or theophylline
C. You will NOT use Cinqair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
D. You have shown a clinical response as evidenced by ONE the following:
    1. You have experienced a reduction in asthma exacerbations (worsening of symptoms) from baseline
    2. You have decreased your use of rescue medications (such as albuterol)
    3. You have experienced a reduction in severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)
    4. Your percent predicted FEV1 (amount of air exhaled in one second) has increased from pretreatment baseline (before starting Cinqair)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-alcoholic steatohepatitis (NASH) (ICD-10 K75.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient does not have cirrhosis
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or endocrinologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the NASH diagnosis been confirmed by biopsy or noninvasive testing (e.g., elastography), obtained within the past 12 months, which demonstrates **ONE** of the following?
   - The patient has liver fibrosis stage 2 or 3
   - The patient has a non-alcoholic fatty liver disease (NAFLD) Activity Score (NAS) of at least 4

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RESMETIROM (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RESMETIROM (Rezdiffra)** requires the following rule(s) be met for approval:

A. You have non-alcoholic steatohepatitis (NASH: a type of liver disease)
B. You are 18 years of age or older
C. You do not have cirrhosis (liver damage and scarring)
D. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (doctor who treats digestive conditions), or endocrinologist (a type of hormone doctor)
E. Your diagnosis has been confirmed by biopsy (removal of cells or tissue from the body for examination) or noninvasive testing (such as elastography [type of imaging test]) within the past 12 months which demonstrates ONE of the following:
    1. You have liver fibrosis stage 2 or 3 (scoring system to measure liver damage)
    2. You have a non-alcoholic fatty liver disease (NAFLD) Activity Score (NAS: a scoring system used to measure disease activity and severity) of at least 4

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RESMETIROM (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of non-alcoholic steatohepatitis (NASH) (ICD-10 K75.81) and meet the following criterion?
   - The patient continues to have noncirrhotic NASH with moderate to advanced liverfibrosis (consistent with stages F2 to F3 fibrosis)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RESMETIROM (Rezdiffra)** requires the following rule(s) be met for renewal:
   A. You have non-alcoholic steatohepatitis (NASH: a type of liver disease)
   B. You continue to have noncirrhotic NASH (a type of liver disease) with moderate toadvanced fibrosis (consistent with stages F2 to F3 fibrosis [scoring system to measure liver damage])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic or recurrent locally advanced Merkel cell carcinoma (MCC) (ICD-10 C7B.1; Group C4A) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of locally recurrent or metastatic squamous cell carcinoma of the anal canal (SCAC) (ICD-10 C44.520) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #3.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Zynyz will be used in combination with carboplatin and paclitaxel AND the patient's cancer is inoperable
   - Zynyz will be used as a single agent AND the patient has experienced disease progression on or is intolerant to platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RETIFANLIMAB-DLWR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RETIFANLIMAB-DLWR (Zynyz)** requires the following rule(s) be met for approval:

A. You have ONE of the following
   1. Metastatic or recurrent locally advanced Merkel cell carcinoma (MCC: a type of skin cancer that has spread to other parts of the body or has returned and spread from where it started to nearby tissue or lymph nodes)
   2. Locally recurrent or metastatic squamous cell carcinoma of the anal canal (SCAC: a type of cancer of the anal canal that has returned from where it started or has spread to other parts of the body)

B. If you have metastatic or recurrent locally advanced Merkel cell carcinoma, approval also requires:
   1. You are 18 years of age or older

C. If you have locally recurrent or metastatic squamous cell carcinoma of the anal canal, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. Zynyz will be used in combination with carboplatin and paclitaxel AND your cancer is inoperable (not able to operate on)
      b. Zynyz will be used as a single agent (used alone) AND your disease has progressed (worsened) while on platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin) or you are intolerant (side effects) to platinum-based chemotherapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of cryopyrin-associated periodic syndromes (CAPS), including familial cold autoinflammatory syndrome (FCAS) or Muckle-Wells syndrome (MWS), (ICD-10 M04.2) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient had genetic testing for gain-of-function mutations in the NLRP3 gene OR has inflammatory markers (i.e., elevated CRP, ESR, serum amyloid A protein [SAA] or S100 proteins)
   - The patient has TWO of the following: urticarial-like rash (neutrophilic dermatitis), cold triggered episodes, sensorineural hearing loss, musculoskeletal symptoms, chronic aseptic meningitis, skeletal abnormalities
   - Arcalyst will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CAPS

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

RILONACEPT (PART D)

GUIDELINES FOR USE (CONTINUED)

2. Does the patient have a diagnosis of deficiency of interleukin-1 receptor antagonist (DIRA) (ICD-10 M04.8) and meet **ALL** of the following criteria?
   - The patient had genetic testing for gain-of-function mutations in the IL1RN gene OR has inflammatory markers (i.e., elevated CRP, ESR)
   - The patient has ONE of the following: pustular psoriasis-like rashes, osteomyelitis, absence of bacterial osteomyelitis, nail changes (i.e., onychomadesis)
   - Arcalyst will NOT be used concurrently with another systemic biologic (e.g., Kineret [anakinra]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DIRA
   - The patient has tried the preferred agent: Kineret (anakinra)

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for the treatment or reduction in risk of recurrent pericarditis (RP) (ICD-10 I31.9) and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient had an episode of acute pericarditis
   - The patient has been symptom-free for an interval of 4 to 6 weeks
   - The patient has TWO of the following: chest pain consistent with pericarditis, pericardial friction rub, ECG showing diffuse ST-segment elevation or PR-segment depression, new or worsening pericardial effusion
   - Arcalyst will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of recurrent pericarditis

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RILONACEPT (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RILONACEPT (Arcalyst)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Cryopyrin-associated periodic syndromes (CAPS), including familial cold autoinflammatory syndrome (FCAS) or Muckle-Wells syndrome (MWS) (types of immune system disorders)
   2. Deficiency of interleukin-1 receptor antagonist (DIRA: a type of immune system disorder)
   3. Treatment or reduction in risk of recurrent pericarditis (RP: a type of heart condition that returns)

B. If you have cryopyrin-associated periodic syndromes, including familial cold autoinflammatory syndrome or Muckle-Wells syndrome, approval also requires:
   1. You are 12 years of age or older
   2. You had genetic testing for gain-of-function mutations (abnormal change in gene) in the NLRP3 gene (a type of gene) OR you have inflammatory markers (elevated C-reactive protein [CRP: sign of inflammation], erythrocyte sedimentation rate [ESR: a type of blood test], serum amyloid A protein [SAA: a type of protein] or S100 proteins [a type of protein])
   3. You have TWO of the following: urticarial-like rash (neutrophilic dermatitis: a type of skin condition), cold triggered episodes, sensorineural hearing loss (a type of hearing loss), musculoskeletal symptoms (symptoms related to the muscles and bones), chronic aseptic meningitis (inflammation of the brain and spinal cord), skeletal (bone) abnormalities
   4. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Cryopyrin-Associated Periodic Syndromes

(Denial text continued on next page)

RILONACEPT (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have deficiency of interleukin-1 receptor antagonist, approval also requires:

1. You had genetic testing for gain-of-function mutations (abnormal change in gene) in the IL1RN gene (a type of gene) OR you have inflammatory markers (elevated C-reactive protein [CRP: sign of inflammation], erythrocyte sedimentation rate [ESR: a type of blood test])
2. You have ONE of the following: pustular psoriasis-like rashes (a type of skin condition), osteomyelitis (bone infection), absence of bacterial osteomyelitis (do not have a type of bone infection), nail changes (onychomadesis: nail shedding)
3. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic (such as Kineret [anakinra]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Deficiency of Interleukin-1 Receptor Antagonist
4. You have tried the preferred agent: Kineret (anakinra)

D. If the request is for treatment or reduction in risk of recurrent pericarditis, approval also requires:

1. You are 12 years of age or older
2. You had had an episode of acute pericarditis (a type of short-term heart condition)
3. You have been symptom-free for 4 to 6 weeks
4. You have TWO of the following: chest pain consistent with pericarditis, pericardial friction rub (a type of heart condition), electrocardiogram (ECG: a type of lab test) showing diffuse ST-segment elevation or PR-segment depression (an abnormal heart test), new or worsening pericardial effusion (a type of heart condition)
5. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of recurrent pericarditis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RILONACEPT (PART D)

For Part D use only:

RILONACEPT (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	CRYOPYRIN-ASSOCIATED PERIODIC SYNDROMES (CAPS): 1) ONE OF THE FOLLOWING: (A) GENETIC TEST FOR GAIN-OF-FUNCTION MUTATIONS IN THE NLRP3 GENE, OR (B) HAS INFLAMMATORY MARKERS (I.E., ELEVATED CRP, ESR, SERUM AMYLOID A PROTEIN (SAA) OR S100 PROTEINS), AND 2) TWO OF THE FOLLOWING: URTICARIAL-LIKE RASH (NEUTROPHILIC DERMATITIS), COLD-TRIGGERED EPISODES, SENSORINEURAL HEARING LOSS, MUSCULOSKELETAL SYMPTOMS, CHRONIC ASEPTIC MENINGITIS, SKELETAL ABNORMALITIES. DEFICIENCY OF INTERLEUKIN-1 RECEPTOR ANTAGONIST (DIRA): 1) ONE OF THE FOLLOWING: (A) GENETIC TEST FOR GAIN-OF-FUNCTION MUTATIONS IN THE IL1RN GENE, OR (B) HAS INFLAMMATORY MARKERS (I.E., ELEVATED CRP, ESR), AND 2) ONE OF THE FOLLOWING: PUSTULAR PSORIASIS-LIKE RASHES, OSTEOMYELITIS, ABSENCE OF BACTERIAL OSTEOMYELITIS, ONYCHOMADESIS. RECURRENT PERICARDITIS (RP): TWO OF THE FOLLOWING: CHEST PAIN CONSISTENT WITH PERICARDITIS, PERICARDIAL FRICTION RUB, ECG SHOWING DIFFUSE ST-SEGMENT ELEVATION OR PR-SEGMENT DEPRESSION, NEW OR WORSENING PERICARDIAL EFFUSION.
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	CAPS, DIRA: LIFETIME. RP: 12 MONTHS.
Other Criteria	CAPS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR CAPS. DIRA: 1) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR DIRA, AND 2) TRIAL OF THE PREFERRED AGENT: KINERET. RP: 1) HAD AN EPISODE OF ACUTE PERICARDITIS, 2) SYMPTOM-FREE FOR 4 TO 6 WEEKS, AND 3) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR RP.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of persistent or chronic immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or immunologist
   - The patient has a platelet count of less than 30 x 10^9/L, OR has a platelet count of less than 50 x 10^9/L and had a prior bleeding event
   - The patient had a trial of or contraindication to a corticosteroid (e.g., prednisone, dexamethasone, prednisolone) or an IV immunoglobulin (e.g., Gammagard, Gamunex-C, Gammaplex), OR had an insufficient response to a splenectomy
   - The patient had a trial of or contraindication to a thrombopoietin receptor agonist (e.g., Promacta [eltrombopag])

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RILZABRUTINIB (Wayrilz)** requires the following rule(s) be met for approval:

A. You have persistent or chronic immune thrombocytopenia (ITP: a type of blood disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or immunologist (immune system doctor)
D. You have a platelet (a type of blood cell) count of less than 30 x10^9/L, OR you have a platelet count of less than 50 x 10^9/L and had a prior bleeding event
E. You have tried or have a contraindication to (harmful for you to use) a corticosteroid (such as prednisone, dexamethasone, prednisolone) or an intravenous immunoglobulin (such as Gammagard, Gamunex-C, Gammaplex), OR you had an insufficient response to a splenectomy (surgical removal of spleen did not work)
F. You have tried or have a contraindication to (harmful for you to use) a thrombopoietin receptor agonist (such as Promacta [eltrombopag])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

RIMABOTULINUM TOXIN B BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RIMABOTULINUM TOXIN B BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RIMABOTULINUM TOXIN B (Myobloc)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Cervical dystonia (a type of muscle condition)
   2. Chronic sialorrhea (long-term drooling)
B. You are 18 years of age or older

NOTE: This medication will not be approved for the treatment of a cosmetic indication (such as wrinkles - glabellar [between the eyebrows] lines, lateral canthal [outer corner of eye] lines, forehead lines).

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Myobloc. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nurtec ODT will NOT be used concurrently with other cGRP inhibitors (e.g., Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute treatment of migraines
   - The patient had a trial of or contraindication to ONE triptan (e.g., Maxalt [rizatriptan], Imitrex [sumatriptan], Axert [almotriptan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Is the request for the preventive treatment of episodic migraines and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nurtec ODT will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RIMEGEPANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RIMEGEPANT (Nurtec ODT)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Acute (quick onset) treatment of migraines (a type of headache)
   2. Preventive treatment of episodic migraines (a type of headache)

B. If the request is for acute treatment of migraines, approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute treatment of migraines
   3. You have tried or have a contraindication to (harmful for you to use) ONE triptan (such as Maxalt [rizatriptan], Imitrex [sumatriptan], Axert [almotriptan])

C. If the request is for preventive treatment of episodic migraines, approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RIMEGEPANT (PART D)

RENEWAL CRITERIA

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) **AND** the patient meets the following criterion?
   - Nurtec ODT will NOT be used concurrently with other cGRP inhibitors (e.g., Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute treatment of migraines

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (e.g., Migraine Assessment of Current Therapy [Migraine-ACT])
   - Therapy works consistently in the majority of migraine attacks

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Is the request for the preventive treatment of episodic migraines **AND** the patient meets the following criterion?
   - Nurtec ODT will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RIMEGEPANT (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced a reduction in migraine or headache frequency with therapy
   - The patient has experienced a reduction in migraine severity with therapy
   - The patient has experienced a reduction in migraine duration with therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RIMEGEPANT (Nurtec ODT)** requires the following rule(s) be met for renewal:

   A. The request is for ONE of the following:
      1. Acute (quick onset) treatment of migraines (a type of headache)
      2. Preventive treatment of episodic migraines (a type of headache)

   B. If the request is for acute treatment of migraines, renewal also requires:
      1. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute treatment of migraines
      2. You meet ONE of the following:
         a. You have experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (assessment tool used to help guide treatment such as Migraine Assessment of Current Therapy [MIGRAINE-ACT])
         b. Treatment works consistently in the majority of migraine attacks

   C. If the request is for preventive treatment of episodic migraines, renewal also requires:
      1. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm]) for migraine prevention
      2. You meet ONE of the following:
         a. You have experienced a reduction in migraine or headache frequency with therapy
         b. You experienced a reduction in migraine severity with therapy
         c. You experienced a reduction in migraine duration with therapy

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

For Part D use only:

RIMEGEPANT (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	ACUTE MIGRAINE TREATMENT: INITIAL: TRIAL OF OR CONTRAINDICATION TO ONE TRIPTAN (E.G., SUMATRIPTAN, RIZATRIPTAN). INITIAL/RENEWAL: NO CONCURRENT USE WITH OTHER CGRP INHIBITORS FOR ACUTE MIGRAINE TREATMENT. RENEWAL: 1) IMPROVEMENT FROM BASELINE IN A VALIDATED ACUTE TREATMENT PATIENT-REPORTED OUTCOME QUESTIONNAIRE, OR 2) THERAPY WORKS CONSISTENTLY IN MAJORITY OF MIGRAINE ATTACKS. EPISODIC MIGRAINE PREVENTION: INITIAL/RENEWAL NO CONCURRENT USE WITH OTHER CGRP INHIBITORS FOR MIGRAINE PREVENTION. RENEWAL: REDUCTION IN MIGRAINE OR HEADACHE FREQUENCY, MIGRAINE SEVERITY, OR MIGRAINE DURATION WITH THERAPY.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - Adempas will NOT be used concurrently with nitrates or nitric oxide donors (e.g., amyl nitrate), phosphodiesterase (PDE) inhibitors (e.g., Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific PDE inhibitors (e.g., dipyridamole, theophylline)

   If yes, continue to #2.
   If no, continue to #3.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

RIOCIGUAT (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH) WHO Group 4 (ICD-10 I27.24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient has persistent/recurrent disease after surgical treatment OR the patient is not a candidate for surgery or has inoperable CTEPH
   - The patient has World Health Organization (WHO) Functional Class II to IV symptoms
   - Adempas will NOT be used concurrently with nitrates or nitric oxide donors (e.g., amyl nitrate), phosphodiesterase (PDE) inhibitors (e.g., Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific PDE inhibitors (e.g., dipyridamole, theophylline)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RIOCIGUAT (Adempas)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
      2. Persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH: a type of heart and lung condition) (World Health Organization Group 4: a way to classify the severity of disease)

   (Initial denial text continued on next page)

RIOCIGUAT (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have pulmonary arterial hypertension (WHO Group 1), approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
3. You will NOT use Adempas concurrently (at the same time) with nitrates or nitric oxide donors (such as amyl nitrate), phosphodiesterase inhibitors (such as Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (such as dipyridamole, theophylline)
4. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
   a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary artery pressure) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary artery pressure) of 15 mmHg or less
   c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary artery pressure) greater than 2 Wood units

C. If you have chronic thromboembolic pulmonary hypertension (WHO Group 4), approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
3. You will NOT use Adempas concurrently (at the same time) with nitrates or nitric oxide donors (such as amyl nitrate), phosphodiesterase inhibitors (such as Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (such as dipyridamole, theophylline)
4. You have persistent or recurrent disease after surgical treatment (it continues to exist or returns after surgery) OR you are not a candidate for surgery or have inoperable chronic thromboembolic pulmonary hypertension
5. You have World Health Organization (WHO) Functional Class II to IV symptoms (a tool used to rate severity of pulmonary hypertension)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, scalp, or genital area
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline

RISANKIZUMAB-RZAA (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (ICD-10 Group K50) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for 6 months by HICL or GPI-10.**
If no, do not approve.

INITIAL DENIAL TEXT: Our guideline named **RISANKIZUMAB-RZAA (Skyrizi)** requires the following rule(s) be met for approval:
A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

(Initial denial text continued on next page)

RISANKIZUMAB-RZAA (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, scalp, or face
4. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who specializes in digestive conditions)
3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

RISANKIZUMAB-RZAA (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (ICD-10 Group K50) **AND** meet the following criterion?
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (ICD-10 Group K51) **AND** meet the following criterion?
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RISANKIZUMAB-RZAA (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **RISANKIZUMAB-RZAA (Skyrizi)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (a type of skin condition)
   2. Psoriatic arthritis (a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

C. If you have psoriatic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

RATIONALE

RISANKIZUMAB-RZAA (PART D)

For Part D use only:

RISANKIZUMAB-RZAA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PLAQUE PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, FACE, SCALP, OR GENITAL AREA.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST OR DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS
Other Criteria	INITIAL: PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: PSO, PSA: CONTINUES TO BENEFIT FROM THE MEDICATION.

Created: 04/19
Effective: 07/15/26 Client Approval: 07/26 DMC Approval: 07/26

RISDIPLAM (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RISDIPLAM	EVRYSDI	46765		GPI-10 (7470656000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a neuromuscular specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center
- The diagnosis is confirmed by gene mutation analysis indicating mutations or deletions of both alleles of the survival motor neuron 1 (SMN1) gene (e.g., homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [i.e., deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient presymptomatic **AND** meets the following criterion?
- The patient has up to (i.e., no more than) three copies of survival motor neuron 2 (SMN2) based on newborn screening

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

RISDIPLAM (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient symptomatic and meets **ALL** of the following criteria?
   - The patient had a baseline motor function assessment by a neuromuscular specialist or SMA specialist
   - If the patient received prior gene therapy, the patient had less than expected clinical benefit with gene therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RISDIPLAM (Evrysdi)** requires the following rule(s) be met for approval:
   A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
   B. Therapy is prescribed by or in consultation with a neuromuscular (nerve and muscle) specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center
   C. Your diagnosis is confirmed by gene mutation analysis indicating mutations or deletions of both alleles of the survival motor neuron 1 (SMN1: type of protein in spinal cord) gene (such as homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])
   D. If you are presymptomatic (symptoms have not yet appeared), approval also requires:
      1. You have no more than three copies of survival motor neuron 2 (SMN2: type of protein in spinal cord) based on newborn screening
   E. If you are symptomatic (symptoms have appeared), approval also requires:
      1. You had a baseline motor function assessment by a neuromuscular (nerve and muscle) specialist or SMA specialist
      2. If you have received prior gene therapy, you had less than expected clinical benefit with gene therapy

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RISDIPLAM (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ONE** of the following criteria?

- The patient has improved, maintained, or demonstrated less than expected decline in motor function assessments compared to baseline (e.g., HINE, HFMSE, CHOP-INTEND)
- The patient has improved, maintained, or demonstrated less than expected decline in other muscle function (e.g., pulmonary)

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RISDIPLAM (Evrysdi)** requires the following rule(s) be met for renewal:
A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
B. You meet ONE of the following:
   1. You have improved, maintained, or demonstrated less than expected decline in motor function assessments compared to baseline. Some types of motor assessment tests include Hammersmith Infant Neurological Examination (HINE), Hammersmith Functional Motor Scale - Expanded (HFMSE) and Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP-INTEND)
   2. You have improved, maintained, or demonstrated less than expected decline in other muscle function such as pulmonary (lung/breathing) function

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

RITUXIMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RITUXIMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

RITUXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), Burkitt lymphoma (BL) (ICD-10 Group C83.7), Burkitt-like lymphoma (BLL) (ICD-10 Group C83.7) or mature B-cell acute leukemia (B-AL) (ICD-10 Group C91.A) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will be used in combination with chemotherapy (e.g., CVP [cyclophosphamide-vincristine-prednisolone])
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL, BL, BLL, or B-AL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will be used in combination with fludarabine and cyclophosphamide (FC)
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

RITUXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Rituxan will be used in combination with methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rituxan will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Rituxan will be used concurrently with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

RITUXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB (Rituxan)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
      2. Previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), Burkitt lymphoma (BL: a type of blood cancer), Burkitt-like lymphoma (BLL: a type of blood cancer), or mature B-cell acute leukemia (B-AL: a type of blood cancer)
      3. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      4. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      5. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG: a condition that affects the blood vessels])
      6. Microscopic polyangiitis (MPA: a condition that affects the blood vessel)
      7. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)
   B. If you have non-Hodgkin's lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      3. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma
      4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
   (Initial denial text continued on next page)

RITUXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia, approval also requires:
1. You are 6 months to 17 years of age
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Rituxan will be used in combination with chemotherapy (such as CVP [cyclophosphamide-vincristine-prednisolone])
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia

D. If you have chronic lymphocytic leukemia, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Rituxan will be used in combination with fludarabine and cyclophosphamide (FC)
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia
5. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

E. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Rituxan will be used with methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:

a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
d. Orencia (abatacept)

(Initial denial text continued on next page)

RITUXIMAB BvD (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have granulomatosis with polyangiitis or microscopic polyangiitis, approval also requires:
1. You are 2 years of age or older
2. Rituxan will be used with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

G. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris

RITUXIMAB BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL), or mature B-cell acute leukemia (B-AL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]), microscopic polyangiitis (MPA), or moderate to severe pemphigus vulgaris (PV), please refer to the initial criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rituxan will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB (Rituxan)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   B. You continue to benefit from the medication
   C. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

RITUXIMAB BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Rituxan.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

PRIOR AUTHORIZATION GUIDELINES

RITUXIMAB BvD (PART D)

For Part D use only:

RITUXIMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. NON-HODGKINS LYMPHOMA (NHL), DIFFUSE LARGE B-CELL LYMPHOMA (DLBCL), BURKITT LYMPHOMA (BL), BURKITT-LIKE LYMPHOMA (BLL), MATURE B-CELL ACUTE LEUKEMIA (B-AL), CHRONIC LYMPHOCYTIC LEUKEMIA (CLL): PRESCRIBED BY OR IN CONSULTATION WITH AN ONCOLOGIST.
Coverage Duration	RA: INITIAL: 6 MO, RENEWAL: 12 MO. NHL, DLBCL, BL, BLL, B-AL, PV, GPA, MPA: 12 MO. CLL: 6 MO.
Other Criteria	INITIAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. NHL, DLBCL, BL, BLL, B-AL, CLL, GPA, MPA, PV: TRIAL OF OR CONTRAINDICATION TO ONE OF THE FOLLOWING PREFERRED AGENTS: RIABNI, RUXIENCE, TRUXIMA, WHERE INDICATIONS ALIGN. RENEWAL: RA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

RITUXIMAB-ABBS BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RITUXIMAB-ABBS BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truxima will be used in combination with fludarabine and cyclophosphamide (FC)
   - Therapy is prescribed by or in consultation with an oncologist
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

RITUXIMAB-ABBS BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truxima will be used in combination with methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Truxima will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truxima will be used concurrently with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

RITUXIMAB-ABBS BvD (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB-ABBS (Truxima)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
      2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      3. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      4. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG: A condition that causes inflammation of the blood vessels])
      5. Microscopic polyangiitis (MPA: a condition that causes inflammation of the blood vessels)
      6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)

   B. If you have non-Hodgkin's lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      3. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma

   C. If you have chronic lymphocytic leukemia, approval also requires:
      1. You are 18 years of age or older
      2. Truxima will be used in combination with fludarabine and cyclophosphamide (FC)
      3. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      4. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia

   (Initial denial text continued on next page)

RITUXIMAB-ABBS BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Truxima will be used with methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Truxima concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
   d. Orencia (abatacept)

E. If you have granulomatosis with polyangiitis or microscopic polyangiitis, approval also requires:
1. You are 18 years of age or older
2. Truxima will be used with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

RITUXIMAB-ARRX BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RITUXIMAB-ARRX BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Riabni will be used in combination with fludarabine and cyclophosphamide (FC)
   - Therapy is prescribed by or in consultation with an oncologist
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

RITUXIMAB-ARRX BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Riabni will be used concurrently with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Riabni will be used in combination with methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Riabni will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

RITUXIMAB-ARRX BvD (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB-ARRX (Riabni)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
      2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      3. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG: a condition that causes inflammation of the blood vessels])
      4. Microscopic polyangiitis (MPA: a condition that causes inflammation of the blood vessels)
      5. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)

   B. If you have non-Hodgkin's lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      3. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma

   C. If you have chronic lymphocytic leukemia, approval also requires:
      1. You are 18 years of age or older
      2. Riabni will be used in combination with fludarabine and cyclophosphamide (FC)
      3. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      4. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia

   (Initial denial text continued on next page)

RITUXIMAB-ARRX BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have granulomatosis with polyangiitis or microscopic polyangiitis, approval also requires:
1. You are 18 years of age or older
2. Riabni will be used with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis

E. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Riabni will be used with methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Riabni concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima)
   d. Orencia (abatacept)

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris

RITUXIMAB-ARRX BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]), microscopic polyangiitis (MPA), or moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Riabni will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB-ARRX (Riabni)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   B. You continue to benefit from the medication
   C. You will NOT use Riabni concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

RITUXIMAB-ARRX BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Riabni.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient has received or will receive at least one full dose of a rituximabproduct by intravenous infusion prior to the initiation of Rituxan Hycela
- Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of FL

If yes, continue to #2.
If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
- The patient has relapsed or refractory FL
- The patient has previously untreated FL AND Rituxan Hycela will be used in combination with chemotherapy (e.g., CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], CVP [cyclophosphamide, vincristine, prednisone])
- The patient has achieved a complete or partial response to rituximab in combination with chemotherapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
- The patient has non-progressing (including stable disease) FL AND Rituxan Hycela will be used after cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

RITUXIMAB AND HYALURONIDASE HUMAN - SQ BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received or will receive at least one full dose of a rituximabproduct by intravenous infusion prior to the initiation of Rituxan Hycela
   - The patient has not been previously treated for DLBCL
   - Rituxan Hycela will be used in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP), or another anthracycline-based chemotherapy regimen
   - Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received or will receive at least one full dose of a rituximabproduct by intravenous infusion prior to the initiation of Rituxan Hycela
   - Rituxan Hycela will be used in combination with fludarabine and cyclophosphamide (FC)
   - Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RITUXIMAB AND HYALURONIDASE HUMAN - SQ BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB AND HYALURONIDASE HUMAN - SQ (Rituxan Hycela)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Follicular lymphoma (FL: a type of blood cancer)
   2. Diffuse large B-cell lymphoma (DLBCL: a type of blood cancer)
   3. Chronic lymphocytic leukemia (CLL: a type of blood cancer)

B. If you have follicular lymphoma, approval also requires ONE of the following:
   1. You are 18 years of age or older
   2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (given into the veins) before starting Rituxan Hycela
   3. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of follicular lymphoma
   4. You meet ONE of the following:
      a. You have relapsed or refractory follicular lymphoma (cancer that has returned or does not fully respond to treatment)
      b. You have previously untreated follicular lymphoma AND Rituxan Hycela will be used in combination with chemotherapy (such as CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], CVP [cyclophosphamide, vincristine, prednisone])
      c. You have achieved a complete or partial response to rituximab in combination with chemotherapy (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
      d. You have non-progressing (does not get worse, including stable disease) follicular lymphoma AND Rituxan Hycela will be used after cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

C. If you have diffuse large B-cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (given into the veins) before starting Rituxan Hycela
   3. You have not been previously treated for diffuse large B-cell lymphoma
   4. Rituxan Hycela will be used in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP), or another anthracycline-based chemotherapy regimen
   5. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma

RITUXIMAB AND HYALURONIDASE HUMAN - SQ BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have chronic lymphocytic leukemia, approval also requires:

1. You are 18 years of age or older
2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (given into the veins) before starting Rituxan Hycela
3. Rituxan Hycela will be used in combination with fludarabine and cyclophosphamide (FC)
4. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Rituxan Hycela.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

RITUXIMAB-PVVR BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

RITUXIMAB-PVVR BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ruxience will be used in combination with fludarabine and cyclophosphamide (FC)
   - Therapy is prescribed by or in consultation with an oncologist
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

CONTINUED ON NEXT PAGE

RITUXIMAB-PVVR BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ruxience will be used concurrently with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA
   -

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ruxience will be used in combination with methotrexate
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Ruxience will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

RITUXIMAB-PVVR BvD (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB-PVVR (Ruxience)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
      2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      3. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG: a condition that causes inflammation of the blood vessels])
      4. Microscopic polyangiitis (MPA: a condition that causes inflammation of the blood vessels)
      5. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)

   B. If you have non-Hodgkin's lymphoma, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      3. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma

   C. If you have chronic lymphocytic leukemia, approval also requires:
      1. You are 18 years of age or older
      2. Ruxience will be used in combination with fludarabine and cyclophosphamide (FC)
      3. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
      4. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia

   (Initial denial text continued on next page)

RITUXIMAB-PVVR BvD (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have granulomatosis with polyangiitis or microscopic polyangiitis, approval also requires:
1. You are 18 years of age or older
2. Ruxience will be used with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis

E. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Ruxience will be used with methotrexate
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris

RITUXIMAB-PVVR BvD (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis [WG]), microscopic polyangiitis (MPA), or moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Ruxience will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RITUXIMAB-PVVR (Ruxience)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   B. You continue to benefit from the medication
   C. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ruxience.
The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 2 to 5 years of age
   - The patient had a trial of or contraindication to a topical corticosteroid (e.g., triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topical calcineurin inhibitor (e.g., pimecrolimus, tacrolimus)
   - The patient had a trial of or contraindication to Eucrisa (crisaborole)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROFLUMILAST 0.05% CREAM (PART D)

INITIAL CRITERIA (CONTINUED)

2. Will Zoryve be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
   - Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole)], JAK inhibitors [e.g., Opzelura (ruxolitinib), Anzupgo (delgocitinib)], AhR agonists [e.g., Vtama (tapinarof)])
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 3 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROFLUMILAST 0.05% CREAM (Zoryve)** requires the following rule(s) be met for approval:
   A. You have mild to moderate atopic dermatitis (a type of skin condition)
   B. You are 2 to 5 years of age
   C. You have tried or have a contraindication to (harmful for you to use) a topical corticosteroid (such as triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topicalcalcineurin inhibitor (such as pimecrolimus, tacrolimus)
   D. You have tried or have a contraindication to (harmful for you to use) Eucrisa (crisaborole)
   (Initial denial text continued on next page)

ROFLUMILAST 0.05% CREAM (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
- The patient has experienced or maintained improvement in pruritus, relapsing-remitting dermatitis, or facial/interdigital involvement

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Will Zoryve be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
- Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole)], JAK inhibitors [e.g., Opzelura (ruxolitinib), Anzupgo (delgocitinib)], AhR agonists [e.g., Vtama (tapinarof)])
- Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
- Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
- Potent immunosuppressants (e.g., azathioprine, cyclosporine)

If yes, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

If no, **approve for 12 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROFLUMILAST 0.05% CREAM (Zoryve)** requires the following rule(s) be met for renewal:
A. You have mild to moderate atopic dermatitis (a type of skin condition)
B. You have experienced or maintained improvement in pruritus (itchiness), relapsing-remitting (disease returns and goes away) dermatitis, or facial/interdigital (between the fingers or toes) involvement

(Renewal denial text continued on next page)

ROFLUMILAST 0.05% CREAM (PART D)

RENEWAL CRITERIA (CONTINUED)

C. You will NOT use Zoryve concurrently (at the same time) with ANY of the following for the treatment of atopic dermatitis (a type of skin condition):
   1. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole)], JAK [Janus kinase] inhibitors [such as Opzelura (ruxolitinib), Anzupgo (delgocitinib)], AhR [aryl hydrocarbon receptor] agonists [such as Vtama (tapinarof)])
   2. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   3. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   4. Potent immunosuppressants (such as azathioprine, cyclosporine)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Zoryve.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 2 percent to 20 percent of body surface area (BSA) (excluding scalp, palms, and soles)
   - Zoryve will NOT be used concurrently with other systemic immunomodulating agents (e.g., Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (e.g., betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (e.g., calcitriol, tazarotene)

   If yes, continue to #2.
   If no, do no approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROFLUMILAST 0.3% CREAM (PART D)

INITIAL CRITERIA (CONTINUED)

2. Has the patient had a trial of or contraindication to **TWO** of the following (from different categories)?
   - High potency topical corticosteroid (e.g., triamcinolone acetonide 0.5 percent cream or ointment, halobetasol propionate 0.01 percent lotion) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1 percent cream, clobetasol propionate 0.05 percent cream or ointment)
   - Topical vitamin D analog (e.g., calcipotriene cream, calcitriol ointment)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Topical retinoid (e.g., tazarotene cream/gel)
   - Topical aryl hydrocarbon receptor agonist (e.g., Vtama [tapinarof])

   If yes, **approve for 2 months by GPID or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **ROFLUMILAST 0.3% CREAM (Zoryve)** requires the following rule(s) be met for approval:
   A. You have plaque psoriasis (a type of skin condition)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   D. You have psoriasis covering 2 percent to 20 percent of body surface area (BSA) (excluding scalp, palms, and soles)
   E. You will NOT use Zoryve concurrently (at the same time) with other systemic immunomodulating medications (such as Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (such as betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (such as calcitriol, tazarotene)
   F. You have tried or have a contraindication to (harmful for you to use) TWO of the following (from different categories):
      1. High potency topical corticosteroid (such as triamcinolone acetonide 0.5 percent cream or ointment, halobetasol propionate 0.01 percent lotion) or a super-high potency topical corticosteroid (such as fluocinonide 0.1 percent cream, clobetasol propionate 0.05 percent cream or ointment)
      2. Topical vitamin D analog (such as calcipotriene cream, calcitriol ointment)
      3. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
      4. Topical retinoid (such as tazarotene cream/gel)
      5. Topical aryl hydrocarbon receptor agonist (such as Vtama [tapinarof])

ROFLUMILAST - FOAM (PART D)

INITIAL CRITERIA (CONTINUED)

3. Has the patient had a prior successful treatment with roflumilast foam?

   If yes, **approve for 8 weeks by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient's plaque psoriasis covers at least 10% of total scalp OR does not exceed 20% BSA of non-scalp areas of the body
   - Zoryve will NOT be used concurrently with other systemic immunomodulating agents (e.g., Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (e.g., betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (e.g., calcitriol, tazarotene)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Has the patient had a trial of or contraindication to **TWO** of the following (from different categories)?
   - High potency topical corticosteroid (e.g., triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   - Topical vitamin D analog (e.g., calcipotriene cream, calcitriol ointment)

   If yes, **approve for 8 weeks by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

ROFLUMILAST - FOAM (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROFLUMILAST - FOAM (Zoryve)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Seborrheic dermatitis (a type of skin condition)
   2. Plaque psoriasis (a type of skin condition)

B. If you have seborrheic dermatitis, approval also requires:
   1. You are 9 years of age or older
   2. Your seborrheic dermatitis covers less than or equal to 20% of body surface area (BSA) (may involve scalp, face, trunk [the central part of your body], or intertriginous areas [between skin folds])
   3. You meet ONE of the following:
      a. You have tried or have a contraindication to (harmful for you to use) TWO of the following (from different categories):
         i. High potency topical corticosteroid (such as triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
         ii. Topical antifungal (such as ketoconazole, ciclopirox)
      b. You previously had a successful treatment with roflumilast foam

ROFLUMILAST - FOAM (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have plaque psoriasis, approval also requires:

1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. Your plaque psoriasis covers at least 10% of your total scalp OR does not exceed 20% of your body surface area (BSA) in non-scalp areas of your body
4. You will NOT use Zoryve concurrently (at the same time) with other systemic immunomodulating agents (such as Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (such as betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (such as calcitriol, tazarotene)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following (from different categories):
   a. High potency topical corticosteroid (such as triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   b. Topical vitamin D analog (such as calcipotriene cream, calcitriol ointment)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ROFLUMILAST - FOAM (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of seborrheic dermatitis, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient's plaque psoriasis involves the scalp and/or body
   - The patient has achieved or maintained clear or minimal disease
   - Zoryve will NOT be used concurrently with other systemic immunomodulating agents (e.g., Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (e.g., betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (e.g., calcitriol, tazarotene)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROFLUMILAST - FOAM (Zoryve)** requires the following rule(s) be met for renewal:
   A. You have plaque psoriasis (a type of skin condition)
   B. Your plaque psoriasis involves the scalp and/or body
   C. You have achieved or maintained clear or minimal disease
   D. You will NOT use Zoryve concurrently (at the same time) with other systemic immunomodulating medications (such as Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (such as betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (such as calcitriol, tazarotene)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

For Part D use only:

ROFLUMILAST - FOAM (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: SEBORRHEIC DERMATITIS: SEBORRHEIC DERMATITIS COVERING 20 PERCENT OR LESS OF BODY SURFACE AREA (BSA). PLAQUE PSORIASIS (PSO): PSORIASIS COVERING AT LEAST 10 PERCENT OF SCALP OR DOES NOT EXCEED 20 PERCENT OF BSA IN NON-SCALP AREAS.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST.
Coverage Duration	INITIAL: SEBORRHEIC DERMATITIS, PSO: 8 WEEKS. RENEWAL: PSO: 12 MONTHS.
Other Criteria	SEBORRHEIC DERMATITIS: INITIAL: ONE OF THE FOLLOWING: 1) TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING (FROM DIFFERENT CATEGORIES): (A) HIGH OR SUPER-HIGH POTENCY TOPICAL CORTICOSTEROID, (B) TOPICAL ANTIFUNGAL, OR 2) PRIOR SUCCESSFUL TREATMENT WITH ROFLUMILAST FOAM. PSO: INITIAL: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING (FROM DIFFERENT CATEGORIES): (A) HIGH OR SUPER-HIGH POTENCY TOPICAL CORTICOSTEROID, (B) TOPICAL VITAMIN D ANALOG. INITIAL/RENEWAL: NO CONCURRENT USE WITH OTHER SYSTEMIC IMMUNOMODULATING AGENTS (E.G., STELARA, OTEZLA), TOPICAL CORTICOSTEROIDS, OR TOPICAL NON-STEROIDALS (E.G., CALCITRIOL, TAZAROTENE). RENEWAL: ACHIEVED OR MAINTAINED CLEAR OR MINIMAL DISEASE.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hematologist or immunologist
   - The patient had a trial of or contraindication to one corticosteroid (e.g., prednisone) or immunoglobulin (e.g., Panzyga [immune globulin]), OR had an insufficient responseto splenectomy
   - Nplate will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Doptelet [avatrombopag], Promacta [eltrombopag])

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has a platelet count of less than 30 x10^9/L
   - The patient has a platelet count of less than 50 x 10^9/L AND a prior bleeding event

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROMIPLOSTIM (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROMIPLOSTIM (Nplate)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Immune thrombocytopenia (ITP: a type of blood disorder)
   2. Hematopoietic syndrome of acute radiation syndrome (an illness that happens after you have been acutely exposed to myelosuppressive doses of radiation [a type of treatment])

B. If you have immune thrombocytopenia, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or immunologist (a type of immune system doctor)
   2. You have tried or have a contraindication to (harmful for you to use) one corticosteroid (such as prednisone) or immunoglobulin (such as Panzyga [immune globulin]), OR you had an insufficient response to a splenectomy (surgical removal of spleen did not work)
   3. You meet ONE of the following:
      a. You have a platelet (a type of blood cell) count of less than 30 x10^9/L
      b. You have a platelet count (a type of blood cell) of less than 50 x 10^9/L AND a prior bleeding event
   4. You will NOT us Nplate concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Doptelet [avatrombopag], Promacta [eltrombopag])
   5. You meet ONE of the following:
      a. You are between 1 and 17 years old AND you have immune thrombocytopenia (ITP) for at least 6 months
      b. You are 18 years of age or older

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ROMOSOZUMAB-AQQG BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of postmenopausal osteoporosis (ICD-10 M81.0; Group M80.0)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient at high risk for fractures defined as **ONE** of the following criteria?
   - The patient has a history of osteoporotic (i.e., fragility, low trauma) fracture(s)
   - The patient has at least 2 risk factors for fracture (e.g., history of multiple recent lowtrauma fractures, bone marrow density [BMD] T-score or -2.5 or less, corticosteroid use [e.g., prednisone], use of GnRH analogs [e.g., Synarel (nafarelin)])
   - The patient has no prior treatment for osteoporosis AND FRAX score is at least 20 percent for any major fracture OR at least 3 percent for hip fracture

   If yes, continue to #4.
   If no, continue to #3.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is unable to use oral therapy for any of the following reasons: unable to tolerate oral medications due to upper gastrointestinal (GI) problems, unable to absorb oral medications due to lower GI problems, trouble remembering to take oral medications, or trouble coordinating an oral bisphosphonate with other oral medications or their daily routine
   - The patient had a trial of, intolerance to, or a contraindication to a bisphosphonate (e.g., Fosamax [alendronate], Actonel [risedronate])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ROMOSOZUMAB-AQQG BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Has the patient received a total of 12 months of Evenity therapy?

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROMOSOZUMAB-AQQG (Evenity)** requires the following rule(s) be met for approval:

A. You have postmenopausal osteoporosis (a type of bone condition in women after menopause)
B. You have not received a total of 12 months of Evenity therapy
C. You meet ONE of the following:
    1. You are at high risk for fractures defined as ONE of the following:
        a. You have a history of osteoporotic (fragility, low trauma) fracture(s) (a type of complete or partial break in a bone)
        b. You have at least 2 risk factors for fracture (such as history of multiple recent low trauma fractures, bone marrow density [BMD] T-score (a type of lab test) of -2.5 or less, corticosteroid use [such as prednisone], use of gonadotropin-releasing hormone [GnRH] analogs (such as Synarel [nafarelin])
        c. You have no prior treatment for osteoporosis AND your Fracture Risk Assessment Tool (FRAX: a type of test) score is at least 20 percent for any major fracture OR at least 3 percent for hip fracture
    2. You are unable to use oral therapy for any of the following reasons: unable to tolerate oral medication due to upper gastrointestinal (GI: digestive system) problems, unable to absorb oral medications due to lower GI problems, trouble remembering to take oral medications, or trouble coordinating an oral bisphosphonate with other oral medications or your daily routine
    3. You have tried, have an intolerance (side effect) to, or have a contraindication to (harmful for you to use) a bisphosphonate (such as Fosamax [alendronate], Actonel [risedronate])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

ROPEGINTERFERON ALFA-2B-NJFT (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROPEGINTERFERON ALFA-2B-NJFT	BESREMI	47669		GPI-10 (2170007750)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of polycythemia vera (ICD-10 D45) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of essential thrombocythemia (ICD-10 D47.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or an oncologist
   - Besremi will NOT be used concurrently with another interferon (e.g., Pegasys [peginterferon alfa-2a]) or anagrelide

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ROPEGINTERFERON ALFA-2B-NJFT (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROPEGINTERFERON ALFA-2B-NJFT (Besremi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Polycythemia vera (a type of blood cancer)
   2. Essential thrombocythemia (a rare type of blood cancer)

B. If you have polycythemia vera, approval also requires:
   1. You are 18 years of age or older

C. If you have essential thrombocythemia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or an oncologist (a type of cancer doctor)
   3. You will NOT use Besremi concurrently (at the same time) with another interferon (such as Pegasys [peginterferon alfa-2a]) or anagrelide

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Besremi.

No	No	Yes	No	No	Yes	No	No	Yes	No	Yes	Yes

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Will the patient or caregiver pick up the medication from the pharmacy OR will the medication be shipped directly to the member, who then brings it to the healthcare provider's clinic/office for administration?

   If yes, continue to #6.
   If no, continue to #5.

ROZANOLIXIZUMAB-NOLI BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision).**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

ROZANOLIXIZUMAB-NOLI BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AChR) antibody positive OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab) positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is in Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Rystiggo will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

     If yes, **approve for 6 months by HICL or GPI-10.**
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

ROZANOLIXIZUMAB-NOLI BVD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROZANOLIXIZUMAB-NOLI (Rystiggo)** requires the following rule(s) be met for approval:

A. You have generalized myasthenia gravis (gMG: chronic autoimmune disorder)
B. You are 18 years of age or older
C. You are anti-acetylcholine receptor (AChR) antibody positive (an indicator of myasthenia gravis) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab) positive (an indicator of myasthenia gravis)
D. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
E. You are in Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
F. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
G. You have tried or have a contraindication to ONE non-steroidal immunosuppressive therapy (such as azathioprine, cyclophosphamide, methotrexate)
H. You will NOT use Rystiggo concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

ROZANOLIXIZUMAB-NOLI BVD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Rystiggo will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROZANOLIXIZUMAB-NOLI (Rystiggo)** requires the following rule(s) be met for approval:
   A. You have generalized myasthenia gravis (gMG: chronic autoimmune disorder)
   B. You have had clinical benefit compared to baseline (such as, as shown by the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   C. You will NOT use Rystiggo concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis

ROZANOLIXIZUMAB-NOLI BVD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Rystiggo.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

RUXOLITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, and post-essential thrombocythemia myelofibrosis, approval also requires:
1. You are 18 years of age or older

C. If you have polycythemia vera, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response to (drug did not work) or did not tolerate hydroxyurea

D. If you have steroid-refractory acute graft-versus-host disease, approval also requires:
1. You are 12 years of age or older

E. If you have chronic graft-versus-host disease, approval also requires:
1. You are 12 years of age or older
2. You have failed at least ONE line of systemic therapy (treatment that targets the entire body, such as prednisone, methotrexate)
3. You will NOT use the requested medication concurrently (at the same time) with Rezurock (belumosudil), Niktimvo (axatilimab-csfr), or Imbruvica (ibrutinib)

RUXOLITINIB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of polycythemia vera or acute graft-versus-host disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of intermediate or high-risk myelofibrosis (ICD-10 D75.81), including primary myelofibrosis (ICD-10 D47.1), post-polycythemia vera myelofibrosis, and post-essential thrombocythemia myelofibrosis, **AND** meet the following criterion?
   - The patient continues to benefit from the medication

   If yes, **approve for 12 months for all strengths of Jakafi and Jakafi XR by GPID or GPI-10. APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic graft-versus-host disease (ICD-10 D89.811, D89.812) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with Rezurock (belumosudil), Niktimvo (axatilimab-csfr), or Imbruvica (ibrutinib)

   If yes, **approve for 12 months for all strengths of Jakafi and Jakafi XR by GPID or GPI-10. APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RUXOLITINIB (Jakafi, Jakafi XR)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, and post-essential thrombocythemia myelofibrosis (types of blood cancer)
      2. Chronic graft-versus-host disease (a type of long-term immune disorder)

   B. If you have intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, and post-essential thrombocythemia myelofibrosis, approval also requires:
      1. You continue to benefit from the medication

   C. If you have chronic graft-versus-host disease, approval also requires:
      1. You will NOT use the requested medication concurrently (at the same time) with Rezurock (belumosudil), Niktimvo (axatilimab-csfr), or Imbruvica (ibrutinib)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient is NOT immunocompromised
   - The patient had a trial of or contraindication to a topical corticosteroid (e.g., triamcinolone acetonide 0.1% cream or ointment; clobetasol propionate 0.05% cream or ointment; halobetasol propionate 0.01% lotion) OR a topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])
   - The patient had a trial of or contraindication to Eucrisa (crisaborole)

   If yes, continue to #2.
   If no, continue to #3.

RUXOLITINIB TOPICAL (PART D)

INITIAL CRITERIA (CONTINUED)

2. Will Opzelura be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
   - Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Zoryve (roflumilast)], JAK inhibitors [e.g., delgocitinib], AhR agonists [e.g., Vtama (tapinarof)])
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 3 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Does the patient have a diagnosis of nonsegmental vitiligo (ICD-10 L80) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
     - The patient has depigmented areas covering 10% or less of total body surface area
     - The patient had a trial of or contraindication to a topical corticosteroid (e.g., halobetasol, triamcinolone, fluocinonide) OR a topical calcineurin inhibitor (e.g., Protopic [tacrolimus])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Will Opzelura be used concurrently with **ANY** of the following?
   - Other non-steroidal topicals (e.g., Elidel [pimecrolimus], Protopic [tacrolimus], Eucrisa [crisaborole ointment])
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 6 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

RUXOLITINIB TOPICAL (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RUXOLITINIB TOPICAL (Opzelura)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Mild to moderate atopic dermatitis (a type of skin condition)
   2. Nonsegmental vitiligo (a type of skin condition)

B. If you have mild to moderate atopic dermatitis, approval also requires:
   1. You are 2 years of age or older
   2. You are NOT immunocompromised (low immune system)
   3. You have tried or have a contraindication to (harmful for you to use) a topical corticosteroid (such as triamcinolone acetonide 0.1% cream or ointment; clobetasol propionate 0.05% cream or ointment; halobetasol propionate 0.01% lotion) OR a topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])
   4. You have tried or have a contraindication to Eucrisa (crisaborole)
   5. You will NOT use Opzelura concurrently (at the same time) with ANY of the following for the treatment of atopic dermatitis (a type of skin condition):
      a. Other non-steroid topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole), Zoryve (roflumilast)], JAK [Janus kinase] inhibitors [such as delgocitinib], AhR [aryl hydrocarbon receptor] agonists [such as Vtama (tapinarof)])
      b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
      c. Other JAK inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
      d. Potent immunosuppressants (such as azathioprine, cyclosporine)

(Initial denial text continued on next page)

RUXOLITINIB TOPICAL (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have nonsegmental vitiligo, approval also requires:

1. You are 12 years of age or older
2. You have depigmented (lightening of the skin or loss ofcolor) areas covering 10 percent or less of total body surface area
3. You have tried or have a contraindication to (harmful for you to use) a topical corticosteroid (such as halobetasol, triamcinolone, fluocinonide) OR a topical calcineurin inhibitor (such as Protopic [tacrolimus])
4. You will NOT use Opzelura concurrently (at the same time) with ANY of the following:
   a. Other non-steroid topicals (such as Elidel [pimecrolimus], Protopic [tacrolimus], Eucrisa [crisaborole ointment])
   b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   c. Other JAK inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   d. Potent immunosuppressants (such as azathioprine, cyclosporine)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RUXOLITINIB TOPICAL (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
- The patient has experienced or maintained improvement in pruritus, relapsing-remitting dermatitis, or facial/interdigital involvement

If yes, continue to #2.
If no, continue to #3.

2. Will Opzelura be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
- Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Zoryve (roflumilast)], JAK inhibitors [e.g., delgocitinib], AhR agonist [e.g., Vtama (tapinarof)])
- Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
- Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
- Potent immunosuppressants (e.g., azathioprine, cyclosporine)

If yes, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

If no, **approve for 12 months by GPID or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Does the patient have a diagnosis of nonsegmental vitiligo (ICD-10 L80) **AND** meet the following criterion?
- The patient has experienced or maintained clinically meaningful repigmentation

If yes, continue to #4.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable locally advanced or metastatic breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer triple-negative and the patient meets **ONE** of the following criteria?
   - The patient is not a candidate for programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor based therapy
   - Trodelvy will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph), AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 10], as determined by an FDA-authorized test
   - The patient has received two or more prior systemic therapies (e.g., docetaxel, paclitaxel), at least one of them for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

SACITUZUMAB GOVITECAN-HZIY (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the patient's cancer hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative (IHC 0, IHC 1+ or IHC 2+/ISH-) and the patient meets **ALL** of the following criteria?
   - The patient has received endocrine-based therapy (e.g., tamoxifen, Arimidex [anastrozole])
   - The patient has received at least two additional systemic therapies (e.g., Enhertu [fam-trastuzumab deruxtecan-nxki], Talzenna [talazoparib]) in the metastatic setting

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: Our guideline named **SACITUZUMAB GOVITECAN-HZIY (Trodelvy)** requires the following rule(s) be met for approval:
   A. You have unresectable locally advanced or metastatic breast cancer (a type of breast cancer that cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. You are 18 years of age or older
   C. You meet ONE of the following:
      1. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); AND you are not a candidate for programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor based therapy (a type of cancer treatment)
      2. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); Trodelvy will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph); AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Combined Positive Score (CPS) of at least 10], as determined by a Food and Drug Administration (FDA)-authorized test
      3. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); AND you have tried two or more previous systemic therapies (treatment that targets the entire body such as docetaxel, paclitaxel), at least one of them for metastatic disease (disease that has spread to other parts of the body)
      4. Your breast cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative (IHC 0, IHC 1+ or IHC 2+/ISH- [a type of lab test]); you have received endocrine (hormone)-based therapy (such as tamoxifen, Arimidex [anastrozole]); AND you have received at least two additional systemic therapies (treatment that targets the entire body such as Enhertu [fam-trastuzumab deruxtecan-nxki], Talzenna [talazoparib]) in the metastatic setting (disease has spread to other parts of the body)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of genetically determined sucrase deficiency, which is part of congenital sucrase isomaltase deficiency (CSID) (ICD-10 E74.31), **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a gastroenterologist or medical geneticist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Small bowel biopsy
   - Sucrose breath test
   - Genetic test

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SACROSIDASE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SACROSIDASE (Sucraid)** requires the following rule(s) be met for approval:

A. You have genetically determined sucrase deficiency, which is part of congenital sucrase isomaltase deficiency (a type of genetic digestive condition)
B. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions) or medical geneticist (a doctor who treats gene disorders)
C. Your diagnosis is confirmed by ONE of the following:
    1. Small bowel biopsy (removal of cells or tissue from the body for examination)
    2. Sucrose (a type of sugar) breath test
    3. Genetic test

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SACROSIDASE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of genetically determined sucrase deficiency, which is part of congenital sucrase isomaltase deficiency (CSID) (ICD-10 E74.31), **AND** meet the following criterion?
   - The patient has experienced or maintained improvement on treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SACROSIDASE (Sucraid)** requires the following rule(s) be met for renewal:
   A. You have genetically determined sucrase deficiency, which is part of congenital sucrase isomaltase deficiency (a type of genetic digestive condition)
   B. You have experienced or maintained improvement on treatment

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Sucraid.

SARGRAMOSTIM (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Is the patient acutely exposed to myelosuppressive doses of radiation (hematopoietic syndrome of acute radiation syndrome [H-ARS]) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SARGRAMOSTIM (Leukine)** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You have undergone or are undergoing induction chemotherapy treatment (start of cancer treatment) for acute myeloid leukemia (AML: type of blood cancer)
      2. You are undergoing autologous hematopoietic stem cell transplantation (a type of procedure to replace damaged bone marrow with your own health blood-forming cells)
      3. You have undergone or are undergoing autologous peripheral blood progenitor cell (PBPC: a type of blood cancer treatment) or bone marrow transplantation (procedure to get healthy blood-forming cells)
      4. You are undergoing allogeneic bone marrow transplantation from a human leukocyte antigen (HLA)-matched related donor (a type of procedure to get healthy blood-forming cells)
      5. You have undergone allogeneic or autologous bone marrow transplantation
      6. You are acutely exposed to myelosuppressive doses of radiation (hematopoietic syndrome of acute radiation syndrome [H-ARS: an illness that happens after whole body radiation])

   B. If you have undergone or are undergoing induction chemotherapy treatment for acute myeloid leukemia, approval also requires:
      1. You are 55 years of age or older
      2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

   (Denial text continued on next page)

SARGRAMOSTIM (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you are undergoing autologous hematopoietic stem cell transplantation, approval also requires:
1. You have cancer
2. You are 18 years of age or older
3. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

D. If you have undergone or are undergoing autologous peripheral blood progenitor cell or bone marrow transplantation, approval also requires:
1. You have non-Hodgkin's lymphoma (NHL), acute lymphoblastic leukemia (ALL), or Hodgkin's lymphoma (HL) (types of blood cancer)
2. You are 2 years of age or older
3. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

E. If you are undergoing allogeneic bone marrow transplantation from a human leukocyte antigen-matched related donor, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

F. If you have undergone allogeneic or autologous bone marrow transplantation, approval also requires:
1. You are 2 years of age or older
2. Your neutrophil (a type of white blood cell) recovery is delayed or has failed
3. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

G. If you are acutely exposed to myelosuppressive doses of radiation (hematopoietic syndrome of acute radiation syndrome), approval also requires:
1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

SARILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of polymyalgia rheumatica (PMR) (ICD-10 M35.3) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient had an inadequate response to a corticosteroid (e.g., prednisone) or cannot tolerate a corticosteroid taper
- Kevzara will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PMR

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
- The patient weighs at least 63 kg (138 lbs)
- Therapy is prescribed by or in consultation with a rheumatologist
- Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
  - Xeljanz (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
  - Orencia (abatacept)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

SARILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SARILUMAB (Kevzara)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Polymyalgia rheumatica (PMR: an inflammatory disorder causing muscle pain and stiffness)
   3. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Orencia (abatacept)

C. If you have polymyalgia rheumatica, approval also requires:
   1. You are 18 years of age or older
   2. You had an inadequate response (drug did not work) to a corticosteroid (such as prednisone) or cannot tolerate a corticosteroid taper (slowly lower the dose)
   3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polymyalgia rheumatica

(Initial denial text continued on next page)

SARILUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You weigh at least 63 kg (138 pounds)
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

SARILUMAB (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of polymyalgia rheumatica, please refer to the initial criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SARILUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SARILUMAB (Kevzara)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Kevzara.

SARILUMAB (PART D)

For Part D use only:

SARILUMAB (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	RHEUMATOID ARTHRITIS (RA), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST.
Coverage Duration	RA, PJIA: INITIAL: 6 MONTHS, RENEWAL: 12 MONTHS. POLYMYALGIA RHEUMATICA (PMR): 12 MONTHS.
Other Criteria	INITIAL: RA: 1) TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. PJIA: 1) TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ IR, RINVOQ, ORENCIA. PMR: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR PMR. INITIAL/RENEWAL: RA, PJIA: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. RENEWAL: RA, PJIA: CONTINUES TO BENEFIT FROM THE MEDICATION.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - Enspryng will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

   If yes, continue to #2.
   If no, do no approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SATRALIZUMAB-MWGE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SATRALIZUMAB-MWGE (Enspryng)** requires the following rule(s) be met for approval:
   A. You have neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
   B. You are 18 years of age or older
   C. You have a positive serologic (blood) test for anti-aquaporin-4 (AQP4: type of protein) antibodies
   D. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or ophthalmologist (a type of eye doctor)
   E. You will NOT use Enspryng concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

(Initial denial text continued on next page)

SATRALIZUMAB-MWGE (PART D)

INITIAL CRITERIA (CONTINUED)

F. You have at least ONE of the following core clinical characteristics:
   1. Optic neuritis (inflammation that damages an eye nerve)
   2. Acute myelitis (sudden and severe inflammation of the spinal cord)
   3. Area postrema syndrome (attacks of uncontrollable nausea, vomiting, or hiccups)
   4. Acute brainstem syndrome (problems with vision, hearing, swallowing and muscle weakness in the head)
   5. Symptomatic narcolepsy (sudden attacks of sleep) or acute diencephalic clinical syndrome (rare disorder caused by a tumor above the brainstem) with NMOSD-typical diencephalic MRI (magnetic resonance imaging: a type of lab imaging lab) lesions (affected areas)
   6. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of lysosomal acid lipase (LAL) deficiency (ICD-10 E75.5) and meet **ALL** of the following criteria?
   - The diagnosis is confirmed by the presence of clinical features (e.g., hepatomegaly, elevated serum transaminases, dyslipidemia, splenomegaly)
   - Therapy is prescribed by or in consultation with an endocrinologist, hepatologist, gastroenterologist, medical geneticist, lipidologist, or metabolic specialist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has a blood test indicating low or absent levels of LAL enzyme activity
   - The patient has a dried blood spot test indicating low or absent LAL enzyme activity
   - The patient has a genetic test indicating the bi-allelic presence of altered LIPA gene(s)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

SEBELIPASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is lysosomal acid lipase (LAL) deficiency presenting within the first 6 months of life **AND** is rapidly progressive (also known as Wolman disease)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is lysosomal acid lipase (LAL) deficiency presenting after the first 6 months of life **AND** is NOT considered rapidly progressive (also known as cholesteryl ester storage disease [CESD])?

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEBELIPASE ALFA (Kanuma)** requires the following rule(s) be met for approval:
   A. You have lysosomal acid lipase (LAL) deficiency (a type of genetic metabolic disorder)
   B. Your diagnosis is confirmed by the presence of clinical features such as hepatomegaly (enlarged liver), elevated serum transaminases (types of enzymes), dyslipidemia (abnormal levels of fats), splenomegaly (enlarged spleen)
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), hepatologist (a type of liver doctor), gastroenterologist (doctor who treats digestive conditions), medical geneticist, lipidologist (a type of cholesterol doctor) or metabolic specialist

   (Initial denial text continued on next page)

SEBELIPASE ALFA (PART D)

INITIAL CRITERIA (CONTINUED)

D. You have ONE of the following:
   1. A blood test indicating low or absent levels of lysosomal acid lipase enzyme activity
   2. A dried blood spot test indicating low or absent lysosomal acid lipase enzyme activity
   3. A genetic test indicating the bi-allelic presence of altered LIPA gene(s) (you have a change in a gene that provides instructions for producing an enzyme called lysosomal acid lipase)

E. Your diagnosis either is presenting within the first 6 months of life and is rapidly progressive (quickly getting worse), OR is presenting after the first 6 months of life and is not considered rapidly progressive (not quickly getting worse)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SEBELIPASE ALFA (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of lysosomal acid lipase (LAL) deficiency (ICD-10 E75.5)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is lysosomal acid lipase (LAL) deficiency presenting within the first 6 months of life **AND** is rapidly progressive (also known as Wolman disease)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is lysosomal acid lipase (LAL) deficiency presenting after the first 6 months of life **AND** not considered rapidly progressive?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Does the patient have improvement in **ONE** of the following clinical parameters during the past 6 months?
   - A relative reduction from baseline in LDL-c, non-HDL-c, OR triglycerides
   - Normalization of aspartate aminotransferase (AST) based on age- and gender-specific normal ranges
   - A decrease in liver fat content compared to baseline assessed by abdominal imaging (e.g., multi-echo gradient echo [MEGE] MRI)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SEBELIPASE ALFA (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEBELIPASE ALFA (Kanuma)** requires the following rule(s) be met for renewal:

A. You have lysosomal acid lipase (LAL) deficiency (a type of genetic metabolic disorder)
B. Your diagnosis either is presenting within the first 6 months of life and is rapidly progressive (quickly getting worse) OR is presenting after the first 6 months of life and is not considered rapidly progressive (not quickly getting worse)
C. If you have lysosomal acid lipase deficiency presenting after the first 6 months of life, renewal also requires:
    1. You have improvement in ONE of the following clinical parameters during the past 6 months:
        a. A relative reduction from baseline in LDL-c, non-HDL-c, OR triglycerides (types of fat lab measurements)
        b. Normalization of aspartate aminotransferase (AST: type of liver enzyme) based on age- and gender-specific normal ranges
        c. A decrease in liver fat content compared to baseline assessed by abdominal imaging such as multi-echo gradient echo [MEGE] MRI

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has Type I or II HAE, as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q
   - The patient has Type III HAE

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEBETRALSTAT (Ekterly)** requires the following rule(s) be met for approval:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You are 12 years of age or older
   C. Ekterly will be used for the treatment of acute (sudden and severe) hereditary angioedema attacks
   D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
   E. You will NOT use Ekterly concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) hereditary angioedema attacks (such as Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])
   F. You meet ONE of the following:
      1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
      2. You have Type III hereditary angioedema (a type of gene condition with severe body swelling)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SEBETRALSTAT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) **AND** meet the following criterion?
   - Ekterly will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEBETRALSTAT (Ekterly)** requires the following rule(s) be met for renewal:
   A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
   B. You will NOT use Ekterly concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) hereditary angioedema attacks (such as Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

For Part D use only:

SEBETRALSTAT (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	HEREDITARY ANGIOEDEMA (HAE): INITIAL: 1) TYPE III HAE, OR 2) TYPE I OR II HAE CONFIRMED BY ONE OF THE FOLLOWING COMPLEMENT TESTS: C1-INH PROTEIN LEVELS, C4 PROTEIN LEVELS, C1-INH FUNCTIONAL LEVELS, C1Q.
Age Restrictions	N/A
Prescriber Restrictions	HAE: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH AN ALLERGIST, IMMUNOLOGIST, HEMATOLOGIST, OR PULMONOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	HAE: INITIAL/RENEWAL: NO CONCURRENT USE WITH OTHER MEDICATIONS FOR THE TREATMENT OF ACUTE HAE ATTACKS.

Created: 07/25
Effective: 03/01/26 Client Approval: 02/26 P&T Approval: 04/25

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding for Cosentyx (secukinumab) intravenous infusion route.

Requests for subcutaneous (SC/SQ) Cosentyx (secukinumab) do not require Payment Determination.

1. Is the request for intravenous (IV) infusion of Cosentyx for the treatment of psoriatic arthritis, ankylosing spondylitis, or non-radiographic axial spondyloarthritis?

   If yes, continue to #2.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

2. Is this a pharmacy call?

   If yes, continue to #4.
   If no, continue to #3.

3. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #4.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

4. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

SECUKINUMAB (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #6.

6. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

SECUKINUMAB (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

CONTINUED ON NEXT PAGE

SECUKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient has C-reactive protein (CRP) levels above the upper limit of normal OR has sacroiliitis on magnetic resonance imaging (MRI)
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of enthesitis-related arthritis (ERA) (ICD-10 M08.80) and meet **ALL** of the following criteria?
   - The patient is 4 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Cosentyx will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of ERA
   - The patient had a trial of or contraindication to ONE NSAID (e.g., ibuprofen, naproxen, meloxicam), sulfasalazine, OR methotrexate

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

SECUKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SECUKINUMAB (Cosentyx)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
      5. Enthesitis-related arthritis (ERA: a type of joint condition)
      6. Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)

   (Initial denial text continued on next page)

SECUKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age and older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, scalp, or face
4. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

C. If you have psoriatic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

SECUKINUMAB (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. Your C-reactive protein (CRP: a measure of how much inflammation is in the body) levels are above the upper limit of normal, OR you have sacroiliitis (type of inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: type of imaging lab)
4. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
5. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

F. If you have enthesitis-related arthritis, approval also requires:
1. You are 4 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of enthesitis-related arthritis
4. You have tried or have a contraindication to (harmful for you to use) ONE NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam), sulfasalazine, or methotrexate

G. If you have moderate to severe hidradenitis suppurativa, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

SECUKINUMAB (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SECUKINUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of enthesitis-related arthritis (ERA) (ICD-10 M08.80) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of ERA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SECUKINUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SECUKINUMAB (Cosentyx)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of joint and skin condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   5. Enthesitis-related arthritis (ERA: a type of joint condition)
   6. Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)

B. If you have plaque psoriasis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

C. If you have psoriatic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have non-radiographic axial spondyloarthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis

(Renewal denial text continued on next page)

SECUKINUMAB (PART D)

RENEWAL CRITERIA (CONTINUED)

F. If you have enthesitis-related arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of enthesitis-related arthritis

G. If you have hidradenitis suppurativa, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cosentyx.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

Prescriber Restrictions	INITIAL: PSO, HIDRADENITIS SUPPURATIVA (HS): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST OR A DERMATOLOGIST. ANKYLOSING SPONDYLITIS (AS), NR-AXSPA, ENTHESITIS-RELATED ARTHRITIS (ERA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST.
Coverage Duration	INITIAL: HS: 12 MONTHS, ALL OTHER INDICATIONS: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. AS, NR-AXSPA: TRIAL OF OR CONTRAINDICATION TO AN NSAID. ERA: TRIAL OF OR CONTRAINDICATION TO ONE NSAID, SULFASALAZINE, OR METHOTREXATE. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: ALL INDICATIONS: CONTINUES TO BENEFIT FROM THE MEDICATION.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) as confirmed by at least **TWO** of the following criteria?
   - The patient has an elevated alkaline phosphatase (ALP) level
   - The patient has the presence of antimitochondrial antibodies (AMA) OR other PBC-specific autoantibodies, including sp100 or gp210, if AMA is negative
   - The patient has histologic evidence (obtained by liver biopsy) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SELADELPAR (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist or hepatologist
   - The patient does NOT have decompensated cirrhosis (Child-Pugh B or C)
   - Livdelzi will NOT be used concurrently with any other second-line PBC treatment (i.e., Ocaliva [obeticholic acid], Iqirvo [elafibranor])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Livdelzi will be used as monotherapy in a patient who is unable to tolerate ursodiol (ursodeoxycholic acid)
   - Livdelzi will be used in combination with ursodiol (ursodeoxycholic acid) in a patient who had an inadequate response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is alleviation of pruritus a treatment goal?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Has the patient had a trial of or contraindication to ONE of the following preferred agents: Ocaliva (obeticholic acid), Iqirvo (elafibranor)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SELADELPAR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SELADELPAR (Livdelzi)** requires the following rule(s) be met for approval:

A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct), as confirmed by TWO of the following:
   1. You have an elevated (high) alkaline phosphatase (ALP) level (a type of lab test)
   2. You have the presence of antimitochondrial antibodies (AMA: indicator of the body attacking its own cells) or other PBC-specific autoantibodies (indicator of the body attacking its own cells), including sp100 or gp210, if AMA is negative
   3. You have histologic evidence (lab data obtained by liver biopsy [removal of cells or tissue from the liver for examination]) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts (symptoms of liver disease)

B. You are 18 years of age or older

C. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions) or hepatologist (a type of liver doctor)

D. You do NOT have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage)

E. You will NOT use Livdelzi concurrently (at the same time) with any other second-line therapy for PBC (Ocaliva [obeticholic acid], Iqirvo [elafibranor])

F. You meet ONE of the following:
   1. Livdelzi will be used as monotherapy (one drug treatment) if you are unable to tolerate ursodiol (ursodeoxycholic acid)
   2. Livdelzi will be used in combination (together) with ursodiol (ursodeoxycholic acid) if you had an inadequate (poor) response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy (one drug treatment)

G. You meet ONE of the following:
   1. Alleviation of (decreasing) your pruritus (itching) is a goal of treatment with Livdelzi
   2. You had a trial of or contraindication to (harmful for you to use) ONE of the following preferred medications: Ocaliva (obeticholic acid), Iqirvo (elafibranor)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SELADELPAR (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Livdelzi will NOT be used concurrently with any other second-line PBC treatment (i.e., Ocaliva [obeticholic acid], Iqirvo [elafibranor])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SELADELPAR (Livdelzi)** requires the following rule(s) be met for renewal:
   A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct)
   B. You continue to benefit from the medication
   C. You will NOT use Livdelzi concurrently (at the same time) with any other second-line therapy for PBC (Ocaliva [obeticholic acid], Iqirvo [elafibranor])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH)(World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is at least 2 years of age
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, continue to #3.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 2 to 17 years of age?

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, continue to #4.

SELEXIPAG (PART D)

INITIAL CRITERIA (CONTINUED)

4. Is the patient at least 18 years of age and had a trial of or contraindication to **ONE** of the following agents?
   - Formulary version of an oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Formulary version of an oral phosphodiesterase-5 inhibitor indicated for PAH (e.g., Revatio [sildenafil], Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil])
   - Formulary version of an oral cGMP stimulator (e.g., Adempas [riociguat])

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.

   INITIAL DENIAL TEXT:

   Our guideline named **SELEXIPAG (Uptravi)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   D. Your pulmonary arterial hypertension diagnosis is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      1. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
      2. Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
      3. Pulmonary vascular resistance (PVR) greater than 2 Wood units
   E. If you are 18 years of age or older, approval also requires you have tried or have a contraindication to (harmful for you to use) ONE of the following medications:
      1. Formulary version of an oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
      2. Formulary version of an oral phosphodiesterase-5 inhibitor indicated for PAH (such as Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil], Revatio [sildenafil])
      3. Formulary version of an oral cGMP stimulator (such as Adempas [riociguat])

   - The patient is 2 years of age or older
   - The patient's tumor has a *RET* gene fusion, as detected by an FDA-approved test
   - The patient's tumor has progressed on or following prior systemic treatment OR the patient has no satisfactory alternative treatment options

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SELPERCATINIB (Retevmo)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Locally advanced or metastatic non-small cell lung cancer (a type of lung cancer that has spread to nearby tissue or lymph nodes or has spread to other parts of the body)
      2. Advanced or metastatic medullary thyroid cancer (a type of thyroid cancer that has progressed or has spread to other parts of the body)
      3. Advanced or metastatic thyroid cancer (thyroid cancer that has progressed or has spread to other parts of the body)
      4. Locally advanced or metastatic solid tumor (abnormal mass that has spread to nearby tissue or lymph nodes, or has spread to other parts of the body)

SELPERCATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer has a rearranged during transfection (*RET:* type of gene) gene fusion, as detected by a Food and Drug Administration (FDA)-approved test

C. If you have advanced or metastatic medullary thyroid cancer, approval also requires:
1. You are 2 years of age or older
2. Your cancer has a rearranged during transfection (*RET*: type of gene) mutation, as detected by a Food and Drug Administration (FDA)-approved test
3. You require systemic therapy (treatment that travels through the entire body)

D. If you have advanced or metastatic thyroid cancer, approval also requires:
1. You are 2 years of age or older
2. You require systemic therapy (treatment that travels through the entire body)
3. Your cancer has a rearranged during transfection (*RET:* type of gene) gene fusion, as detected by a Food and Drug Administration (FDA)-approved test
4. Your thyroid cancer is refractory (has not responded) to radioactive iodine therapy, if radioactive iodine is appropriate

E. If you have a locally advanced or metastatic solid tumor, approval also requires:
1. You are 2 years of age or older
2. Your tumor has a rearranged during transfection (*RET:* type of gene) gene fusion, as detected by a Food and Drug Administration (FDA)-approved test
3. Your tumor has progressed on or following prior systemic treatment OR you have no satisfactory alternative treatment options

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

This is a DvE drug requiring a payment determination for "Part D" or "Non-Part D."

PAYMENT DETERMINATION CRITERIA

1. Is the request to reduce the risk of major adverse cardiovascular events (cardiovascular death, non-fatal myocardial infarction, or non-fatal stroke) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Wegovy will be used in combination with a reduced calorie diet and increased physical activity
   - The patient has established cardiovascular disease (e.g., prior myocardial infarction, prior stroke, symptomatic peripheral arterial disease [PAD])
   - The patient is obese (BMI of at least 30 kg/m[2] or the patient is Asian and has a BMI of at least 27.5 kg/m[2]), OR overweight (BMI of at least 27 kg/m[2] or the patient is Asian and has a BMI of at least 25 kg/m[2]) at baseline

   If yes, **set CMS_DVE_OVR to 'D' and approve all strengths and formulations for 12 months by GPID or GPI-10. Document in the PA comments: Part D Determination Override.**

   If no, continue to #2.

2. Does the patient have a diagnosis of noncirrhotic metabolic dysfunction-associated steatohepatitis (MASH)/nonalcoholic steatohepatitis (NASH) (ICD-10 K75.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The request is for Wegovy injection
   - The patient has moderate to advanced liver fibrosis (consistent with stages F2 to F3 fibrosis)
   - Wegovy will be used in combination with a reduced calorie diet and increased physical activity

   If yes, **set CMS_DVE_OVR to 'D' and approve all strengths of the pen for 12 months by GPID or GPI-12. Document in the PA comments: Part D Determination Override.**

   If no, **set CMS_DVE_OVR to 'E' and approve for 12 months by GPID or GPI-10. Document in the PA comments: Payment Determination Override. This is not a Part D indication.**

   NOTE: If the claim rejects after analyzing, then follow the clinical authorization process within the HQ notes.

SEMAGLUTIDE - WEGOVY DVE (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

RPH Review
Review for Part D compendial supported off-label indications. If yes for a Part D indication, **set CMS_DVE_OVR to 'D' and approve for 12 months for all strengths by GPID or GPI-10. Document in the PA comments: Part D Determination Override.**

If not a Part D indication, and you are denying other UM **Set CMS_DVE_OVR to 'E' within the denied PA for 12 months by GPID or GPI-10.**

If the diagnosis is UNKNOWN do not enter a DVE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction: '**PAC: do not enter a DVE override**.'

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEMAGLUTIDE - WEGOVY** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Lowering the risk of major adverse cardiovascular events (MACE: serious heart problems, such as death from heart disease, heart attack, or stroke).
   2. Treating noncirrhotic metabolic dysfunction-associated steatohepatitis /nonalcoholic steatohepatitis (MASH/NASH: severe forms of fatty liver disease)
B. You are 18 years of age or older
C. You will use Wegovy along with a lower-calorie diet and more physical activity
D. For lowering the risk of MACE, approval also requires:
   1. You have heart or blood vessel disease, such as a past heart attack, past stroke, or peripheral artery disease (a condition where narrowed blood vessels reduce blood flow to your arms or legs).
   2. Based on your body mass index (BMI: a tool for evaluating body fat) before treatment, you are ONE of the following:
      a. Obese: BMI of at least 30 kg/m[2] (or at least 27.5 kg/m[2] if you are Asian)
      b. Overweight: BMI of at least 27 kg/m[2] (or at least 25 kg/m[2]) if you are Asian)
E. For MASH/NASH, approval also requires:
   1. The request is for Wegovy injection
   2. You have moderate to advanced liver fibrosis (scarring) at stage F2 to F3.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of sepiapterin-responsive phenylketonuria (PKU) with hyperphenylalaninemia (HPA) (ICD-10 E70.1) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist
   - Sephience will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])
   - The patient had a trial of or contraindication to the preferred agent: sapropterin/Javygtor

   If yes, **approve for 6 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SEPIAPTERIN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEPIAPTERIN (Sephience)** requires the following rule(s) be met for approval:

A. You have sepiapterin-responsive phenylketonuria (PKU: a type of genetic metabolic disorder) with hyperphenylalaninemia (HPA: high levels of a type of amino acid)
B. You are 1 month of age or older
C. Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist (a doctor that treats metabolic or gene disorders)
D. You will NOT use Sephience concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])
E. You have tried or have a contraindication to (harmful for you to use) the preferred medication: sapropterin/Javygtor

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SEPIAPTERIN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of sepiapterin-responsive phenylketonuria (PKU) with hyperphenylalaninemia (HPA) (ICD-10 E70.1) and meet **ALL** of the following criteria?
   - The patient continues to benefit from treatment
   - Sephience will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEPIAPTERIN (Sephience)** requires the following rule(s) be met for renewal:
   A. You have sepiapterin-responsive phenylketonuria (PKU: a type of genetic metabolic disorder) with hyperphenylalaninemia (HPA: high levels of a type of amino acid)
   B. You continue to benefit from treatment
   C. You will NOT use Sephience concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SIBEPRENLIMAB-SZSI (PART D)

INITIAL CRITERIA (CONTINUED ON NEXT PAGE)

INITIAL DENIAL TEXT:

Our guideline named **SIBEPRENLIMAB-SZSI (Voyxact)** requires the following rule(s) be met for approval:

A. You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
B. You are 18 years of age or older
C. You are at risk for disease progression (worsening of disease)
D. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
E. Your diagnosis is confirmed by a biopsy (removal of cells or tissue from the kidney for examination)
F. You have proteinuria (high levels of protein in the urine) of at least 0.5 g/day
G. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
H. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, continue to #3.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SILDENAFIL IV (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have **ONE** of the following?
   - Achalasia (ICD-10 K22.0, Q39.5)
   - Persistent pulmonary hypertension of the newborn (ICD-10 P29.30)
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)
   - Nitric oxide withdrawal symptoms (e.g., rebound pulmonary hypertension)

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SILDENAFIL IV (Revatio)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
      2. Achalasia (a rare disorder making it hard for food and liquid to pass into the stomach)
      3. Persistent pulmonary hypertension of the newborn (a condition where not enough blood or oxygen goes into the baby's lungs after birth)
      4. Secondary Raynaud's phenomenon (a type of blood vessel disorder caused by another condition)
      5. Nitric oxide withdrawal symptoms (such as rebound pulmonary hypertension [a type of lung condition])

   (Initial denial text continued on next page)

SILDENAFIL IV (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
3. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
   a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
   c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units
4. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
5. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SILDENAFIL IV (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of achalasia, persistent pulmonary hypertension of the newborn, secondary Raynaud's phenomenon, and nitric oxide withdrawal symptoms, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SILDENAFIL IV (Revatio)** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH; a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   B. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   C. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

No	No	Yes	No	No	Yes	No	No	Yes	No	Yes	Yes

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2)
   - Achalasia (ICD-10 K22.0, Q39.5)
   - Persistent pulmonary hypertension of the newborn (ICD-10 P29.30)
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)
   - Nitric oxide withdrawal symptoms (e.g., rebound pulmonary hypertension)

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction**:** '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

SILDENAFIL SUSPENSION-LIQREV TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL SUSPENSION-LIQREV** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   2. Achalasia (a rare disorder making it hard for food and liquid to pass into the stomach)
   3. Persistent pulmonary hypertension of the newborn (a condition where not enough blood or oxygen goes into the baby's lungs after birth)
   4. Secondary Raynaud's phenomenon (a type of blood vessel disorder caused by another condition)
   5. Nitric oxide withdrawal symptoms (such as rebound pulmonary hypertension [a type of lung condition])

B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   3. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   4. You will NOT use Liqrev concurrently (at the same time) with guanylate cyclase (GC) stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])
   5. You are unable to swallow Revatio (sildenafil) tablets
   6. You have tried generic sildenafil powder for suspension
   7. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SILDENAFIL SUSPENSION-REVATIO TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL SUSPENSION-REVATIO** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   2. Achalasia (a rare disorder making it hard for food and liquid to pass into the stomach)
   3. Persistent pulmonary hypertension of the newborn (a condition where not enough blood or oxygen goes into the baby's lungs after birth)
   4. Secondary Raynaud's phenomenon (a type of blood vessel disorder caused by another condition)
   5. Nitric oxide withdrawal symptoms (such as rebound pulmonary hypertension [a type of lung condition])

B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. You are unable to swallow tablets
   3. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   4. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])
   5. If you are 1 to 17 years of age, your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) of 3 Wood units or greater

(Initial denial text continued on next page)

SILDENAFIL SUSPENSION-REVATIO TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

6. If you are 18 years of age or older, your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
   a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
   c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SILDENAFIL SUSPENSION-REVATIO TIRF (PART D)

RENEWAL CRITERIA

NOTE: For the diagnoses of achalasia, persistent pulmonary hypertension of the newborn, secondary Raynaud's phenomenon, and nitric oxide withdrawal symptoms, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria. APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SILDENAFIL SUSPENSION-REVATIO** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   B. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   C. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request. **CONTINUED ON NEXT PAGE**

PRIOR AUTHORIZATION GUIDELINES

SILDENAFIL TABLET TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SILDENAFIL CITRATE	REVATIO, SILDENAFIL CITRATE		24758	GPI-14 (40143060100320)	

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2)
   - Achalasia (ICD-10 K22.0, Q39.5)
   - Persistent pulmonary hypertension of the newborn (ICD-10 P29.30)
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)
   - Nitric oxide withdrawal symptoms (e.g., rebound pulmonary hypertension)

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction**:** '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

SILDENAFIL TABLET TIRF (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 1 to 17 years of age and the PAH diagnosis is confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) of 3 Wood units or greater

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

SILDENAFIL TABLET TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient 18 years of age or older and the PAH diagnosis is confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have **ONE** of the following?
   - Achalasia (ICD-10 K22.0, Q39.5)
   - Persistent pulmonary hypertension of the newborn (ICD-10 P29.30)
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)
   - Nitric oxide withdrawal symptoms (e.g., rebound pulmonary hypertension)

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SILDENAFIL TABLET TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL TABLET (Revatio)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   2. Achalasia (a rare disorder making it hard for food and liquid to pass into the stomach)
   3. Persistent pulmonary hypertension of the newborn (a condition where not enough blood or oxygen goes into the baby's lungs after birth)
   4. Secondary Raynaud's phenomenon (a type of blood vessel disorder that is caused by another condition)
   5. Nitric oxide withdrawal symptoms (such as rebound pulmonary hypertension [a type of lung condition])

B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   3. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])
   4. If you are 1 to 17 years of age, your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) of 3 Wood units or greater

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist insleep medicine
   - Lumryz will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient had a trial, failure, or contraindication to generic sodium oxybate
   - The patient had a trial, failure, or contraindication to armodafinil (Nuvigil), modafinil (Provigil), OR a generic typical stimulant indicated for EDS with narcolepsy (e.g., amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])

   If yes, **approve for 6 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM OXYBATE - LUMRYZ** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
      2. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)

   B. If you have cataplexy with narcolepsy, approval also requires:
      1. You are 7 years of age or older
      2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
      3. You will NOT use Lumryz concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
      4. You have tried generic sodium oxybate

SODIUM OXYBATE-XYREM (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM OXYBATE (Xyrem)** requires the following rules be met for approval:

A. You have ONE of the following:
   1. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
   2. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)

B. If you have cataplexy with narcolepsy, approval also requires:
   1. You are 7 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   3. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

C. If you have excessive daytime sleepiness with narcolepsy, approval also requires:
   1. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   2. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   3. You meet ONE of the following:
      a. You are 7 to 17 years old
      b. You are 18 years or older AND have tried, failed, or have a contraindication to a formulary version of modafinil, armodafinil, or Sunosi (solriamfetol) AND one generic stimulant indicated for excessive daytime sleepiness with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SODIUM OXYBATE-XYREM (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Cataplexy with narcolepsy (ICD-10 G47.411)
   - Excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient has sustained improvement of symptoms compared to baseline
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM OXYBATE (Xyrem)** requires the following rules be met for renewal:
   A. You have ONE of the following:
      1. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
      2. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   B. You have sustained improvement of symptoms compared to baseline
   C. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic agent (such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cataplexy with narcolepsy (ICD-10 G47.411) and meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient requires a lower sodium formulation due to concurrent medical concerns OR had a sodium-related side effect from Xyrem (sodium oxybate)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

SODIUM/CALCIUM/MAG/POT OXYBATE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient requires a lower sodium formulation due to concurrent medical concerns OR had a sodium-related side effect from Xyrem (sodium oxybate)

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 7 to 17 years of age AND had a trial, failure, or contraindication to a generic stimulant indicated for EDS with narcolepsy (e.g., amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])
   - The patient is 18 years of age or older AND had a trial, failure, or contraindication to modafinil (Provigil), armodafinil (Nuvigil), or a generic stimulant indicated for EDS with narcolepsy (e.g., amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin]) AND Sunosi (solriamfetol)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of idiopathic hypersomnia (IH) (ICD-10 G47.11, G47.12) and diagnosis is confirmed by **ALL** of the following criteria?
   - The patient does not have cataplexy
   - The patient has had insufficient sleep syndrome ruled out, and there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications
   - The patient has experienced daily periods of irrepressible need to sleep or daytime lapses into sleep for at least three months

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM/CALCIUM/MAG/POT OXYBATE (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM/CALCIUM/MAG/POT OXYBATE (Xywav)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
      Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
      Idiopathic hypersomnia (IH: a type of sleep disorder)

   B. If you have cataplexy in narcolepsy, approval also requires:
      1. You are 7 years of age or older
      2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
      3. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
      4. You require a lower sodium formulation due to concurrent (at the same time) medical concerns OR you had a sodium-related side effect from Xyrem (sodium oxybate)

   (Initial denial text continued on next page)

SODIUM/CALCIUM/MAG/POT OXYBATE (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have excessive daytime sleepiness with narcolepsy, approval also requires:

1. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
2. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
3. You require a lower sodium formulation due to concurrent (at the same time) medical concerns OR you had a sodium-related side effect from Xyrem (sodium oxybate)
4. You meet ONE of the following:
   a. You are 7 to 17 years old AND have tried, failed (drug did not work), or have a contraindication to (harmful for you to use) a generic stimulant indicated for excessive daytime sleepiness with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])
   b. You are 18 years or older AND have tried, failed, or have a contraindication to modafinil (Provigil), armodafinil (Nuvigil), or a generic stimulant indicated for excessive daytime sleepiness with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin]) AND Sunosi (solriamfetol)

D. If you have idiopathic hypersomnia, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
4. Your diagnosis is confirmed by ALL of the following:
   a. You do not have cataplexy (uncontrollable muscle weakness)
   b. You have had insufficient sleep syndrome ruled out and there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications
   c. You have experienced daily periods of irrepressible need to sleep or daytime lapses into sleep for at least three months

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SODIUM/CALCIUM/MAG/POT OXYBATE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM/CALCIUM/MAG/POT OXYBATE (Xywav)** requires the following rules be met for renewal:

A. You have ONE of the following:
   1. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
   2. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   3. Idiopathic hypersomnia (IH: a type of sleep disorder)

B. If you have cataplexy or excessive daytime sleepiness with narcolepsy, renewal also requires:
   1. You have experienced sustained improvement of symptoms compared to baseline
   2. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

C. If you have idiopathic hypersomnia, renewal also requires:
   1. You have demonstrated improvement of symptoms compared to baseline
   2. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy, such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 E72.2) and meet **ALL** of the following criteria?
   - The patient's UCD is confirmed via enzymatic, biochemical or genetic testing
   - Pheburane will be used in combination with standard of care therapy (e.g., dietary management)
   - The patient had a trial of or contraindication to generic sodium phenylbutyrate powder
   - The patient is unable to swallow sodium phenylbutyrate tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of guideline.

SODIUM PHENYLBUTYRATE GRANULES (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM PHENYLBUTYRATE GRANULES (Pheburane)** requires the following rule(s) be met for approval:

A. You have a urea cycle disorder (a genetic disorder that causes high ammonia levels in the blood)
B. Your disorder is confirmed by enzymatic, biochemical or genetic testing (types of lab tests)
C. Pheburane will be used together with standard of care therapy (such as dietary management)
D. You have tried or have a contraindication to (harmful for you to use) generic sodium phenylbutyrate powder
E. You are unable to swallow sodium phenylbutyrate tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 E72.2) and meet **ALL** of the following criteria?
   - The patient's UCD is confirmed via enzymatic, biochemical or genetic testing
   - Olpruva will be used in combination with standard of care therapy (e.g., dietary management)
   - The patient had a trial of or contraindication to generic sodium phenylbutyrate powder
   - The patient is unable to swallow Buphenyl (sodium phenylbutyrate) tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM PHENYLBUTYRATE PELLETS (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM PHENYLBUTYRATE PELLETS (Olpruva)** requires the following rule(s) be met for approval:

A. You have a urea cycle disorder (a genetic disorder that causes high ammonia levels in the blood)
B. Your disorder is confirmed by enzymatic, biochemical or genetic testing (types of lab tests)
C. Olpruva will be used together with standard of care therapy (such as dietary management)
D. You have tried or have a contraindication to (harmful for you to use) generic sodium phenylbutyrate powder
E. You are unable to swallow Buphenyl (sodium phenylbutyrate) tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic hepatitis C virus (HCV) (ICD-10 B18.2) and meet **ONE** of the following criteria?
- The patient has genotype 2 or 3 infection AND is 3 to 17 years of age
- The patient has genotype 1, 2, 3, or 4 infection AND is 18 years of age or older

If yes, continue to #2.
If no, continue to #13.

2. Will Sovaldi be used concurrently with Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)?

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #3.

3. Does the patient have genotype 2 infection and meet **ALL** of the following criteria?
- The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
- Sovaldi will be used with ribavirin

If yes, continue to #4.
If no, continue to #5.

SOFOSBUVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

D. If you have genotype 2 infection, approval also requires:
1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
2. Sovaldi will be used with ribavirin
3. You meet ONE of the following:
   a. You are 3 to 17 years of age
   b. You are 18 years of age or older AND have an intolerance (side effect) or contraindication to (harmful for you to use) the preferred medication: Epclusa

E. If you have genotype 3 infection, approval also requires:
1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
2. Sovaldi will be used with ribavirin
3. You meet ONE of the following:
   a. You are 3 to 17 years of age
   b. You are 18 years of age or older AND have an intolerance (side effect) or contraindication to (harmful for you to use) the preferred medication: Epclusa

F. If you have genotype 1 infection, approval also requires:
1. You are 18 years of age or older
2. You are treatment-naive (no prior treatment)
3. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
4. Sovaldi will be used with peginterferon alfa and ribavirin OR Sovaldi will be used with ribavirin if you have a contraindication to (harmful for you to use) interferon
5. You have an intolerance (side effect) or contraindication to ONE of the following preferred medications: Harvoni, Epclusa

SOFOSBUVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

G. If you have genotype 4 infection, approval also requires:
1. You are 18 years of age or older
2. You are treatment-naive (no prior treatment)
3. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
4. Sovaldi will be used with peginterferon alfa and ribavirin
5. You have an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Harvoni, Epclusa

H. If Sovaldi will be used to prevent post-transplant HCV reinfection (getting infected again with HCV after transplant), approval also requires:
1. You have hepatocellular carcinoma (HCC: a type of liver cancer)
2. You are waiting for your liver transplant
3. Sovaldi will be used with ribavirin as pre-transplant (before transplant) treatment

I. If you had a previous treatment failure with Mavyret (glecaprevir/pibrentasvir) OR Vosevi (sofosbuvir/velpatasvir/voxilaprevir), approval also requires:
1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) OR you do not have cirrhosis (liver damage and scarring)
2. Sovaldi will be used with Mavyret (glecaprevir/pibrentasvir) AND ribavirin

J. Sovaldi will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SOFOSBUVIR/VELPATASVIR (PART D)

Generic	Brand	HICL	GCN	Exception/Other
SOFOSBUVIR/ VELPATASVIR	EPCLUSA	43561		BRAND ONLY

Do not review this guideline with physicians; if the caller wishes to initiate a request, then a MRF must be completed (see the MedImpact Standard MRF for HepC).

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic hepatitis C virus (HCV) (ICD-10 B18.2) and meet **ALL** of the following criteria?
   - The patient is 3 years of age or older
   - The patient has genotype 1, 2, 3, 4, 5, or 6 infection

   If yes, continue to #2.
   If no, continue to #6.

2. Does the patient have an HCV RNA level within the past 6 months?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Will Epclusa be used concurrently with **ANY** of the following medications?
   - Amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin (rifapentine), efavirenz (e.g., Atripla, Sustiva), rosuvastatin at doses greater than 10mg daily, Aptivus (tipranavir)/ritonavir, topotecan, Sovaldi (sofosbuvir; as a single agent), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), Mavyret (pibrentasvir/glecaprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #4.

SOFOSBUVIR/VELPATASVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has compensated cirrhosis (Child-Pugh A)
   - The patient has decompensated cirrhosis (moderate or severe hepatic impairment; Child-Pugh B or C) AND Epclusa will be used with ribavirin

   If yes, **approve for 12 weeks by HICL.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have decompensated cirrhosis and meet **ONE** of the following criteria?
   - The patient has a contraindication to ribavirin (ribavirin ineligible)
   - The patient has failed prior treatment with a sofosbuvir-based regimen (e.g., sofosbuvir/ribavirin) AND Epclusa will be used with ribavirin
   - The patient has failed prior treatment with an NS5A inhibitor-based regimen (e.g., Harvoni [ledipasvir/sofosbuvir]) AND Epclusa will be used with ribavirin
   - The patient is post-liver transplant, treatment-experienced, AND Epclusa will be used with ribavirin

   If yes, **approve for 24 weeks by HICL.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

   If yes, **approve as indicated per guidance in AASLD/IDSA.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SOFOSBUVIR/VELPATASVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFOSBUVIR/VELPATASVIR (Epclusa)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 3 years of age or older
C. You have genotype 1, 2, 3, 4, 5, or 6 hepatitis C infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
E. You will NOT use Epclusa concurrently (at the same time) with any of the following medications: amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin (rifapentine), efavirenz (such as Atripla, Sustiva), rosuvastatin at doses greater than 10mg daily, Aptivus (tipranavir)/ritonavir, topotecan, Sovaldi (sofosbuvir; as a single agent), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), Mavyret (pibrentasvir/glecaprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)
F. You meet ONE of the following:
    1. You do not have cirrhosis (liver damage and scarring)
    2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
    3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (moderate or severe liver impairment; Child-Pugh B or C [a score that evaluates the severity of liver damage]), and you meet ONE of the following:
        a. You will use Epclusa with ribavirin
        b. You have a contraindication to (harmful for you to use) ribavirin
        c. You have failed prior treatment with a sofosbuvir-based regimen (such as sofosbuvir/ribavirin) AND Epclusa will be used with ribavirin
        d. You have failed prior treatment with an NS5A inhibitor-based regimen (such as Harvoni [ledipasvir/sofosbuvir]) AND Epclusa will be used with ribavirin
        e. You received a liver transplant (replaced your liver), are treatment-experienced (failed prior treatment), AND Epclusa will be used with ribavirin
G. Epclusa will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ANY** of the following criteria?
   - The patient has moderate or severe hepatic impairment (decompensated cirrhosis; Child-Pugh B or C)
   - Vosevi will be used concurrently with any of the following medications: amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin (rifapentine), cyclosporine, pitavastatin, pravastatin (at doses above 40mg), rosuvastatin, methotrexate, mitoxantrone, imatinib, irinotecan, lapatinib, sulfasalazine, topotecan, an HIV regimen containing efavirenz, atazanavir, or lopinavir, Aptivus (tipranavir)/ritonavir, Sovaldi (sofosbuvir; as a single agent), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Mavyret (pibrentasvir/glecaprevir)

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #4.

4. Is the patient treatment naive and meets **ALL** of the following criteria?
   - The patient has genotype 3
   - The patient has compensated cirrhosis
   - The patient has NS5A RAS Y93H polymorphism

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient has failed prior treatment with a full course of an HCV regimen containing an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Mavyret [pibrentasvir/glecaprevir]) or a DAA (e.g., Olysio [simeprevir]/peginterferon/ribavirin, Epclusa [velpatasvir/sofosbuvir]) if post-liver or kidney transplant

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient has failed prior treatment with a sofosbuvir-based regimen (e.g., Epclusa [sofosbuvir/velpatasvir], sofosbuvir with ribavirin, sofosbuvir with Olysio [simeprevir])

   If yes, **approve for 12 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient failed prior treatment with Vosevi
   - Vosevi will be used with ribavirin

   If yes, **approve for 24 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

   If yes, **approve as indicated per guidance in AASLD/IDSA.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR (Vosevi)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 18 years of age or older
C. You have genotype 1, 2, 3, 4, 5 or 6 infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
E. You do NOT have moderate or severe liver impairment (decompensated cirrhosis [a condition where there is liver damage and scarring with major symptoms]; Child-Pugh B or C [a score that evaluates the severity of liver damage])
F. You will NOT use Vosevi concurrently (at the same time) with any of the following: amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin (rifapentine), cyclosporine, pitavastatin, pravastatin (at doses above 40mg), rosuvastatin, methotrexate, mitoxantrone, imatinib, irinotecan, lapatinib, sulfasalazine, topotecan, an HIV (human immunodeficiency virus: an immune system disease caused by a virus) regimen containing efavirenz, atazanavir, or lopinavir, Aptivus (tipranavir)/ritonavir, Sovaldi (sofosbuvir; as a single agent), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Mavyret (pibrentasvir/glecaprevir)
G. If you are treatment naive (no prior treatment), approval also requires:
    1. You have genotype 3
    2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms)
    3. You have NS5A resistance-associated substitution (RAS) Y93H polymorphism (variations in a type of hepatitis C virus protein)
H. If you are treatment-experienced (failed prior treatment), approval also requires:
    1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
    2. You meet ONE of the following:
        a. You have failed a full course of a regimen containing an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Mavyret [pibrentasvir/glecaprevir]) or a direct-acting antiviral (such as Olysio [simeprevir]/peginterferon/ribavirin, Epclusa [velpatasvir/sofosbuvir]) if post-liver or kidney transplant (replaced your liver or kidney)
        b. You have failed prior treatment with a sofosbuvir-based regimen (such as Epclusa [sofosbuvir/velpatasvir], sofosbuvir with ribavirin, sofosbuvir with Olysio [simeprevir])
        c. You have failed prior treatment with Vosevi AND Vosevi will be used with ribavirin

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of primary axillary hyperhidrosis (ICD-10 L74.510) and meet **ALL** of the following criteria?
   - The patient is 9 years of age or older
   - The patient has primary axillary hyperhidrosis as evidenced by focal, visible, excessive sweating of at least 6 months duration with all secondary causes ruled out
   - Sofdra will NOT be used concurrently with other topical anticholinergics indicated for primary axillary hyperhidrosis (e.g., Qbrexza [glycopyrronium tosylate])

   If yes, continue to #2.
   If no, do not approve.

2. Does the patient meet at least **TWO** of the following criteria?
   - Symptoms occur bilaterally
   - Symptoms impair daily activities
   - The patient has at least one episode per week
   - Onset occurred prior to the patient turning 25 years of age
   - The patient has a family history of primary axillary hyperhidrosis
   - Symptoms do not occur during sleep

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

SOFPIRONIUM (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFPIRONIUM (Sofdra)** requires the following rule(s) be met for approval:

A. You have primary axillary hyperhidrosis (excessive underarm sweating)
B. You are 9 years of age or older
C. You have primary axillary hyperhidrosis (excessive underarm sweating) as shown by focal (limited to a particular area of the body), visible, excessive sweating of at least 6 months duration with all secondary causes (caused by another medical condition) ruled out
D. You will NOT use Sofdra concurrently (at the same time) with other topical anticholinergics used for primary axillary hyperhidrosis (excessive underarm sweating) (such as Qbrexza [glycopyrronium tosylate])
E. You have at least two of the following:
    1. Symptoms occur bilaterally (on both sides of the body)
    2. Symptoms impair daily activities
    3. You have at least one episode per week
    4. Onset occurred before you turn(ed) 25 years old
    5. You have a family history of primary axillary hyperhidrosis (excessive underarm sweating)
    6. Symptoms do not occur during sleep

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist insleep medicine
   - The patient had a trial of a formulary version of modafinil or armodafinil AND one other generic stimulant indicated for (EDS) with narcolepsy (e.g., amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) (ICD-10 G47.10) with obstructive sleep apnea (OSA) (ICD-10 G47.33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of a formulary version of modafinil OR armodafinil

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOLRIAMFETOL (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOLRIAMFETOL (Sunosi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   2. Excessive daytime sleepiness (EDS) with obstructive sleep apnea (OSA: a type of sleep condition due to a disorder where airflow is blocked during sleep)

B. If you have excessive daytime sleepiness with narcolepsy, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   3. You have tried a formulary version of modafinil or armodafinil AND one other generic stimulant indicated for excessive daytime sleepiness with narcolepsy (such as amphetamine sulfate [Evekeo], dextroamphetamine [Dexedrine], methylphenidate [Ritalin])

C. If you have excessive daytime sleepiness with obstructive sleep apnea, approval also requires:
   1. You are 18 years of age or older
   2. You have tried a formulary version of modafinil OR armodafinil

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SOLRIAMFETOL (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   Excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419)
   Excessive daytime sleepiness (EDS) (ICD-10 G47.10) with obstructive sleep apnea (OSA) (ICD-10 G47.33)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient had a sustained improvement of symptoms compared to baseline?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOLRIAMFETOL (Sunosi)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
      2. Excessive daytime sleepiness (EDS) with obstructive sleep apnea (OSA: a type of sleep condition due to a disorder where airflow is blocked during sleep)
   B. You have sustained improvement of symptoms compared to baseline

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

SOMAPACITAN-BECO (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #4.
   If no, continue to #6.

4. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the patient's GHD diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMAPACITAN-BECO (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of short stature born small for gestational age (SGA)(ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Does the patient have a diagnosis of growth failure associated with Noonan syndrome (ICD-10 Q87.19) and meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

SOMAPACITAN-BECO (PART D)

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?

- The patient is 2.5 to 17 years of age
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMAPACITAN-BECO (Sogroya)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)
   3. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   4. You have growth failure associated with Noonan syndrome (a type of genetic disorder)
   5. You have idiopathic short stature (ISS: short height due to unknown cause)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
   1. You are 2.5 to 17 years of age
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
   4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
   5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

(Initial denial text continued on next page)

SOMAPACITAN-BECO (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

D. If you have short stature born small for gestational age, approval also requires:
1. You are 2.5 to 17 years of age
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

E. If you have growth failure associated with Noonan syndrome, approval also requires:
1. You are 2.5 to 17 years of age
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

F. Request for Sogroya will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

SOMAPACITAN-BECO (PART D)

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand OR the patient has not completed prepubertal growth)
   - The patient has shown improvement (increased height or increased growth velocity) on therapy
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has achieved or maintained a response to therapy as evidenced by clinical treatment goals (e.g., improved body composition, lipid panel, bone health)
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMAPACITAN-BECO (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMAPACITAN-BECO (Sogroya)** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)
   3. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   4. You have growth failure associated with Noonan syndrome (a type of genetic disorder)
   5. You have idiopathic short stature (ISS: short height due to unknown cause)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. You are 2.5 to 17 years of age
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. You have open epiphyses (end part of long bone) (as confirmed by radiograph [type of imaging test] of the wrist and hand OR you have not completed prepubertal growth)
   4. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

C. If you are an adult patient with growth hormone deficiency, renewal also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. You have achieved or maintained a response to therapy as evidenced by clinical treatment goals (such as improved body composition, lipid [fat] panel, bone health)
   4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

(Renewal denial text continued on next page)

SOMAPACITAN-BECO (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have short stature born small for gestational age OR growth failure associated with Noonan syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
2. You have open epiphyses (end part of long bone) (as confirmed by radiograph [type of imaging test] of the wrist and hand OR you have not completed prepubertal growth)
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

E. If you have idiopathic short stature, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

F. Request for Sogroya will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 3 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Ngenla will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMATROGON-GHLA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROGON-GHLA (Ngenla)** requires the following rule(s) be met for approval:

A. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone
B. You are 3 to 17 years of age
C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
D. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
E. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
F. You will NOT use Ngenla concurrently (at the same time) with Increlex (mecasermin)
G. Request for Ngenla will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROGON-GHLA (PART D)

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand) OR the patient has not completed prepubertal growth
   - The patient has shown improvement (increased height or increased growth velocity) while on therapy
   - Ngenla will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROGON-GHLA (Ngenla)** requires the following rule(s) be met for renewal:
   A. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone
   B. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   C. You have open epiphyses (end part of long bone) as confirmed by a radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   D. You have shown improvement (increased height or increased growth velocity [rate of growth]) while on therapy
   E. Renewal request for Ngenla will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes
   F. You will NOT use Ngenla concurrently (at the same time) with Increlex (mecasermin)

(Renewal denial text continued on next page)

Ngenla [Prescribing Information]. New York, NY: Pfizer Laboratories; July 2025.

For Part D use only:

SOMATROGON-GHLA (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD): INITIAL: HEIGHT IS AT LEAST 2 STANDARD DEVIATIONS BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER.
Age Restrictions	N/A
Prescriber Restrictions	PEDIATRIC GHD: INITIAL/RENEWAL: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS
Other Criteria	PEDIATRIC GHD: INITIAL: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF WRIST AND HAND. INITIAL/RENEWAL: NO CONCURRENT USE WITH INCRELEX. RENEWAL: 1) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF WRIST AND HAND, OR HAS NOT COMPLETED PREPUBERTAL GROWTH, AND 2) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY).

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Genotropin will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has a confirmed genetic diagnosis of PWS
   - Genotropin will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of growth failure born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Genotropin will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of growth failure associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
   - The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Genotropin will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with an endocrinologist
- Genotropin will NOT be used concurrently with Increlex (mecasermin)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, continue to #8.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #9.

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

9. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - GENOTROPIN** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have Prader-Willi syndrome (PWS: type of genetic disorder)
      3. You have growth failure born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      4. You have growth failure associated with Turner syndrome (type of genetic disorder)
      5. You have idiopathic short stature (ISS: short height due to unknown cause)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

C. If you have Prader-Willi syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have a confirmed genetic diagnosis of Prader-Willi syndrome
3. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

D. If you have growth failure born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
5. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)
6. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

E. If you have growth failure associated with Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

(Initial denial text continued on next page)

SOMATROPIN - GENOTROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

H. Request for Genotropin will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - GENOTROPIN (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Genotropin will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - GENOTROPIN** requires the following rule(s) be met for renewal:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have Prader-Willi syndrome (PWS: type of genetic disorder)
      3. You have growth failure born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      4. You have growth failure associated with Turner syndrome (type of genetic disorder)
      5. You have idiopathic short stature (ISS: short height due to unknown cause)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
      2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
      3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
      4. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)

   (Renewal denial text continued on next page)

SOMATROPIN - GENOTROPIN (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have Prader-Willi syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have experienced improvement in body composition
3. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)

D. If you have idiopathic short stature, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

E. If you have growth failure born small for gestational age, growth failure associated with Turner syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)

F. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Genotropin concurrently (at the same time) with Increlex (mecasermin)

G. Request for Genotropin will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - GENOTROPIN (PART D)

For Part D use only:

SOMATROPIN - GENOTROPIN (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	INITIAL: PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD), IDIOPATHIC SHORT STATURE (ISS), SMALL FOR GESTATIONAL AGE (SGA): HEIGHT AT LEAST 2 STANDARD DEVIATIONS BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER. TURNER SYNDROME (TS): CONFIRMED BY CHROMOSOMAL ANALYSIS (KAROTYPING). PRADER WILLI SYNDROME (PWS): CONFIRMED GENETIC DIAGNOSIS OF PWS. ADULT GHD: 1) HAS A CONGENITAL, GENETIC, OR ORGANIC DISEASE (E.G., CRANIOPHARYNGIOMA, PITUITARY HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	SGA: 2 YEARS OF AGE OR OLDER.
Prescriber Restrictions	INITIAL/RENEWAL: ALL INDICATIONS: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: NORDITROPIN. PEDIATRIC GHD, ISS, SGA, TS: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. INITIAL/RENEWAL: ADULT GHD, PEDIATRIC GHD, SGA, TS, PWS: NO CONCURRENT USE WITH INCRELEX. RENEWAL: ISS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. PEDIATRIC GHD, SGA, TS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Humatrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of short stature associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
   - The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Humatrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

5. Does the patient have a diagnosis of short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (ICD-10 E34.328) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- Humatrope will NOT be used concurrently with Increlex (mecasermin)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Humatrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Humatrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

9. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - HUMATROPE** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have short stature associated with Turner syndrome (type of genetic disorder)
      3. You have idiopathic short stature (ISS: short height due to unknown cause)
      4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (type of genetic disorder)
      5. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   (Initial denial text continued on next page)

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

C. If you have short stature associated with Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

D. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

E. If you have short stature or growth failure with SHOX deficiency, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)

(Initial denial text continued on next page)

SOMATROPIN - HUMATROPE (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have short stature born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
5. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)
6. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

H. Request for Humatrope will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - HUMATROPE (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has shown improvement (increased height or increased growth velocity)
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand ORthe patient has not completed prepubertal growth)
   - Humatrope will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient has shown improvement (increased height or increased growth velocity)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - HUMATROPE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN - HUMATROPE** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to an inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You have short stature associated with Turner syndrome (type of genetic disorder)
   3. You have idiopathic short stature (ISS: short height due to unknown cause)
   4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (type of genetic disorder)
   5. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   3. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   4. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)

C. If you have idiopathic short stature, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
   3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

(Renewal denial text continued on the page)

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

D. If you have short stature associated with Turner syndrome, short stature or growth failure with SHOX deficiency, or short stature born small for gestational age, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)

E. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Humatrope concurrently (at the same time) with Increlex (mecasermin)

F. Renewal request for Humatrope will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of short stature associated with Noonan syndrome (ICD-10 Q87.19) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of short stature associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
   - The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

6. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has a confirmed genetic diagnosis of PWS
- Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #8.

8. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with an endocrinologist
- Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

If yes, continue to #9.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

9. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #10.

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

10. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
    - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
    - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
    - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

    If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
    APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

    If no, do not approve.

    INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **SOMATROPIN - NORDITROPIN** requires the following rule(s) be met for approval:

    A. You meet ONE of the following:
        1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
        2. You have short stature associated with Noonan syndrome (type of genetic disorder)
        3. You have short stature associated with Turner syndrome (type of genetic disorder)
        4. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
        5. You have idiopathic short stature (ISS: short height due to unknown cause)
        6. You have Prader-Willi syndrome (PWS: type of genetic disorder)
        7. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

    (Initial denial text continued on the next page)

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

C. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand

D. If you have short stature associated with Noonan syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

E. If you have Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

(Initial denial text continued on the next page)

SOMATROPIN - NORDITROPIN (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have short stature born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
5. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

G. If you have Prader-Willi syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have a confirmed genetic diagnosis of Prader-Willi syndrome
3. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

H. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

I. Request for Norditropin Flexpro will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - NORDITROPIN (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand ORthe patient has not completed prepubertal growth)
   - The patient has shown improvement (increased height or increased growth velocity)
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of Idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient has shown improvement (increased height or increased growth velocity)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - NORDITROPIN (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Norditropin Flexpro will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - NORDITROPIN** requires the following rule(s) be met for renewal:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have short stature associated with Noonan syndrome (type of genetic disorder)
      3. You have short stature associated with Turner syndrome (type of genetic disorder)
      4. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      5. You have idiopathic short stature (ISS: short height due to unknown cause)
      6. You have Prader-Willi syndrome (PWS: type of genetic disorder)
      7. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
      2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
      3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
      4. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

   (Renewal denial text continued on the next page)

SOMATROPIN - NORDITROPIN (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have idiopathic short stature, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

D. If you have short stature associated with Noonan syndrome, short stature associated with Turner syndrome, or short stature born small for gestational age, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

E. If you have Prader-Willi syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have experienced improvement in body composition
3. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

F. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Norditropin Flexpro concurrently (at the same time) with Increlex (mecasermin)

G. Request for Norditropin Flexpro will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - NORDITROPIN (PART D)

For Part D use only:

SOMATROPIN - NORDITROPIN (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	INITIAL: PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD), IDIOPATHIC SHORT STATURE (ISS), SMALL FOR GESTATIONAL AGE (SGA), NOONAN SYNDROME: HEIGHT AT LEAST 2 STANDARD DEVIATIONS BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER. TURNER SYNDROME (TS): CONFIRMED BY CHROMOSOMAL ANALYSIS (KARYOTYPING). PRADER WILLI SYNDROME (PWS): CONFIRMED GENETIC DIAGNOSIS OF PWS. ADULT GHD: 1) HAS A CONGENITAL, GENETIC, OR ORGANIC DISEASE (E.G., CRANIOPHARYNGIOMA, PITUITARY HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	SGA: 2 YEARS OF AGE OR OLDER.
Prescriber Restrictions	INITIAL/RENEWAL: ALL INDICATIONS: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PEDIATRIC GHD, ISS, SGA, TS, NOONAN SYNDROME: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. INITIAL/RENEWAL: ADULT GHD, PEDIATRIC GHD, SGA, TS, PWS, NOONAN SYNDROME: NO CONCURRENT USE WITH INCRELEX. RENEWAL: ISS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. PEDIATRIC GHD, SGA, TS, NOONAN SYNDROME: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of growth failure secondary to chronic kidney disease (CKD) (ICD-10 R62.52; Group N18) and meet **ALL** of the following criteria?
   - The request is for a pediatric patient
   - Therapy is prescribed by or in consultation with an endocrinologist or nephrologist
   - The patient has not had a renal transplant OR it has been at least one year since the patient's renal transplant
   - The patient has persistent growth failure (height below the tenth percentile) and has persistent low height velocity (height velocity below the twenty-fifth percentile)
   - Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - NUTROPIN AQ (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

5. Does the patient have a diagnosis of short stature associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
- The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

6. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with an endocrinologist
- Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, continue to #7.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMATROPIN - NUTROPIN AQ (PART D)

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #8.

8. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - NUTROPIN AQ (Nutropin AQ Nuspin)** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have growth failure secondary to chronic (long-term) kidney disease
      3. You have idiopathic short stature (short height due to unknown cause)
      4. You have short stature associated with Turner syndrome (type of genetic disorder)
      5. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   (Initial denial text continued on next page)

SOMATROPIN - NUTROPIN AQ (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

C. If you have growth failure secondary to chronic kidney disease, approval also requires:
1. You are a pediatric patient
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor) or a nephrologist (kidney doctor)
3. You have not had a renal (kidney) transplant OR it has been at least one year since your renal transplant
4. You have persistent growth failure (a height below the tenth percentile) and you have persistent low height velocity (height velocity below the twenty-fifth percentile)
5. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)

D. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

(Initial denial text continued on next page)

SOMATROPIN - NUTROPIN AQ (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have short stature associated with Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

F. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. Request for Nutropin AQ Nuspin will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - NUTROPIN AQ (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand ORthe patient has not completed prepubertal growth)
   - The patient has shown improvement (increased height or increased growth velocity)
   - Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of growth failure secondary to chronic kidney disease (CKD) (ICD-10 R62.52; Group N18) and meet **ALL** of the following criteria?
   - The request is for a pediatric patient
   - Therapy is prescribed by or in consultation with an endocrinologist or nephrologist
   - The patient has not had a renal transplant within the past year
   - The patient has shown improvement (increased height or increased growth velocity)
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand ORthe patient has not completed prepubertal growth)
   - Nutropin AQ will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - NUTROPIN AQ (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN - NUTROPIN AQ (Nutropin AQ Nuspin)** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You have growth failure secondary to chronic (long-term) kidney disease
   3. You have idiopathic short stature (short height due to unknown cause)
   4. You have short stature associated with Turner syndrome (type of genetic disorder)
   5. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   4. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)

C. If you have growth failure secondary to chronic kidney disease, renewal also requires:
   1. You are a pediatric patient
   2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor) or a nephrologist (kidney doctor)
   3. You have not had a renal (kidney) transplant within the past year
   4. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   5. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   6. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)

(Renewal denial text continued on next page)

SOMATROPIN - NUTROPIN AQ (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have idiopathic short stature, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

E. If you have short stature associated with Turner syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)

F. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Nutropin AQ concurrently (at the same time) with Increlex (mecasermin)

G. Request for Nutropin AQ Nuspin will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SOMATROPIN - NUTROPIN AQ (PART D)

For Part D use only:

SOMATROPIN - NUTROPIN AQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	INITIAL: PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD), IDIOPATHIC SHORT STATURE (ISS): HEIGHT AT LEAST 2 STANDARD DEVIATIONS (SD) BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER. GROWTH FAILURE DUE TO CHRONIC KIDNEY DISEASE (CKD): PERSISTENT GROWTH FAILURE (HEIGHT BELOW THE TENTH PERCENTILE) AND PERSISTENT LOW HEIGHT VELOCITY (HEIGHT VELOCITY BELOW THE TWENTY-FIFTH PERCENTILE). TURNER SYNDROME (TS): CONFIRMED BY CHROMOSOMAL ANALYSIS (KARYOTYPING). ADULT GHD: 1) HAS A CONGENITAL, GENETIC, OR ORGANIC DISEASE (E.G., CRANIOPHARYNGIOMA, PITUITARY HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	N/A
Prescriber Restrictions	INITIAL/RENEWAL: PEDIATRIC GHD, ISS, TS, ADULT GHD: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST. GROWTH FAILURE DUE TO CKD: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST OR NEPHROLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: NORDITROPIN, WHERE INDICATIONS ALIGN. PEDIATRIC GHD, ISS, TS: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. GROWTH FAILURE DUE TO CKD: NO RENAL TRANSPLANT OR AT LEAST ONE YEAR SINCE RENAL TRANSPLANT. INITIAL/RENEWAL: ADULT GHD, PEDIATRIC GHD, TS,

	GROWTH FAILURE DUE TO CKD: NO CONCURRENT USE WITH INCRELEX. RENEWAL: ISS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. PEDIATRIC GHD, TS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND OR HAS NOT COMPLETED PREPUBERTAL GROWTH. GROWTH FAILURE DUE TO CKD: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND OR HAS NOT COMPLETED PREPUBERTAL GROWTH, AND 3) NO RENAL TRANSPLANT WITHIN THE PAST YEAR.

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has a confirmed genetic diagnosis of PWS
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of growth failure born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of growth failure associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
   - The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #7.

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with an endocrinologist
- Omnitrope will NOT be used concurrently with Increlex (mecasermin)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, continue to #8.
If no, do not approve.
DENIAL TEXT: See the initial denial text on the next page.

8. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #9.

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

9. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - OMNITROPE** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have Prader-Willi syndrome (PWS: type of genetic disorder)
      3. You have growth failure born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      4. You have growth failure associated with Turner syndrome (type of genetic disorder)
      5. You have idiopathic short stature (ISS: short height due to unknown cause)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   (Initial denial text continued on next page)

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Omnitrope concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

C. If you have Prader-Willi syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have a confirmed genetic diagnosis of Prader-Willi syndrome
3. You will NOT use Omnitrope concurrently (at the same time) with Increlex (mecasermin)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

D. If you have growth failure born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
5. You will NOT use Omnitrope concurrently (at the same time) with Increlex (mecasermin)
6. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

E. If you have growth failure associated with Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Omnitrope concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

(Initial denial text continued on next page)

SOMATROPIN - OMNITROPE (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Omnitrope concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. Request for Omnitrope will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - OMNITROPE (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand ORthe patient has not completed prepubertal growth)
   - The patient has shown improvement (increased height or increased growth velocity)
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has shown improvement in body composition
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - OMNITROPE (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient has shown improvement (increased height or increased growth velocity)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

5. Does the patient have **ONE** of the following diagnoses?
- Growth failure born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1)
- Growth failure associated with Turner syndrome (ICD-10 Group Q96)

If yes, continue to #6.
If no, continue to #7.

6. Does the patient meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient has shown improvement (increased height or increased growth velocity OR the patient has not completed prepubertal growth)
- Omnitrope will NOT be used concurrently with Increlex (mecasermin)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

RENEWAL CRITERIA (CONTINUED)

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Omnitrope will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - OMNITROPE** requires the following rule(s) be met for renewal:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to an inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have Prader-Willi syndrome (PWS: type of genetic disorder)
      3. You have growth failure born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      4. You have growth failure associated with Turner syndrome (type of genetic disorder)
      5. You have idiopathic short stature (ISS: short height due to unknown cause)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
      2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
      3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
      4. You will not use Omnitrope concurrently (at the same time) with Increlex (mecasermin)

   (Renewal denial text continued on next page)

SOMATROPIN - OMNITROPE (PART D)

RENEWAL CRITERIA (CONTINUED)

C. If you have Prader-Willi syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have experienced improvement in body composition
3. You will not use Omnitrope concurrently (at the same time) with Increlex (mecasermin)

D. If you have idiopathic short stature, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

E. If you have growth failure born small for gestational age or growth failure associated with Turner syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
3. You have experienced improvement (increased height or increased growth velocity [rate] OR you have not completed prepubertal growth) on therapy
4. You will not use Omnitrope concurrently (at the same time) with Increlex (mecasermin)

E. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will not use Omnitrope concurrently (at the same time) with Increlex (mecasermin)

F. Request for Omnitrope will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SOMATROPIN - OMNITROPE (PART D)

For Part D use only:

SOMATROPIN - OMNITROPE (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	INITIAL: PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD), IDIOPATHIC SHORT STATURE (ISS), SMALL FOR GESTATIONAL AGE (SGA): HEIGHT AT LEAST 2 STANDARD DEVIATIONS BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER. TURNER SYNDROME (TS): CONFIRMED BY CHROMOSOMAL ANALYSIS (KARYOTYPING). PRADER WILLI SYNDROME (PWS): CONFIRMED GENETIC DIAGNOSIS OF PWS. ADULT GHD: 1) HAS A CONGENITAL, GENETIC, OR ORGANIC DISEASE (E.G., CRANIOPHARYNGIOMA, PITUITARY HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	SGA: 2 YEARS OF AGE OR OLDER.
Prescriber Restrictions	INITIAL/RENEWAL: ALL INDICATIONS: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: NORDITROPIN. PEDIATRIC GHD, ISS, SGA, TS: 1) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. INITIAL/RENEWAL: ADULT GHD, PEDIATRIC GHD, SGA, TS, PWS: NO CONCURRENT USE WITH INCRELEX. RENEWAL: ISS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. PEDIATRIC GHD, SGA, TS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN

SOMATROPIN - SAIZEN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

SOMATROPIN - SAIZEN (PART D)

INITIAL CRITERIA (CONTINUED)

5. Is the patient's diagnosis confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - SAIZEN** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
      2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
      3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
      4. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
      5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

   (Initial denial text continued on next page)

SOMATROPIN - SAIZEN (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you are an adult patient with growth hormone deficiency, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

D. Request for Saizen will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - SAIZEN (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand) ORthe patient has not completed prepubertal growth
   - The patient has shown improvement (i.e., increased height or increased growth velocity)
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMATROPIN - SAIZEN (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN - SAIZEN** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   4. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

C. If you are an adult patient with growth hormone deficiency, renewal also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

D. Request for Saizen will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Saizen.

PRIOR AUTHORIZATION GUIDELINES

SOMATROPIN - SAIZEN (PART D)

For Part D use only:

SOMATROPIN - SAIZEN (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	INITIAL/RENEWAL: ATHLETIC ENHANCEMENT, ANTI-AGING PURPOSES.
Required Medical Information	INITIAL: PEDIATRIC GROWTH HORMONE DEFICIENCY (GHD): HEIGHT AT LEAST 2 STANDARD DEVIATIONS BELOW THE MEAN HEIGHT FOR CHILDREN OF THE SAME AGE AND GENDER. ADULT GHD: 1) HAS A CONGENITAL, GENETIC, OR ORGANIC DISEASE (E.G., CRANIOPHARYNGIOMA, PITUITARY HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	N/A
Prescriber Restrictions	INITIAL/RENEWAL: ALL INDICATIONS: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS
Other Criteria	INITIAL: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: NORDITROPIN. PEDIATRIC GHD: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH INCRELEX. RENEWAL: PEDIATRIC GHD: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND OR HAS NOT COMPLETED PREPUBERTAL GROWTH.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of HIV with wasting or cachexia (ICD-10 R64) and meet **ALL** of the following criteria?
   - Serostim is NOT prescribed for athletic enhancement or anti-aging purposes
   - Therapy is prescribed by or in consultation with a gastroenterologist, nutritional support specialist or infectious disease specialist
   - The patient is currently on HIV anti-retroviral therapy (e.g., Descovy [emtricitabine-tenofovir], Triumeq [abacavir-dolutegravir- lamivudine])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMATROPIN - SEROSTIM (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria for weight loss?
   - 10% unintentional weight loss over 12 months
   - 5% weight loss over 6 months
   - 5% body cell mass (BCM) loss within 6 months
   - Body cell mass (BCM) less than 35% (men) of total body weight AND a body mass index (BMI) less than 27 kg per meter squared
   - Body cell mass (BCM) less than 23% (women) of total body weight AND a body mass index (BMI) less than 27 kg per meter squared
   - Body mass index (BMI) less than 20 kg per meter squared

   If yes, **approve for 9 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - SEROSTIM** requires the following rule(s) be met for approval:
   A. You have human immunodeficiency virus (HIV: an immune system disease caused by a virus) with wasting or cachexia (condition of severe weight and muscle loss)
   B. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions), nutritional support specialist, or infectious disease specialist (a doctor who specializes in the treatment of infections)
   C. You are currently on HIV anti-retroviral therapy (HIV treatment such as Descovy [emtricitabine-tenofovir], Triumeq [abacavir-dolutegravir- lamivudine])

   (Initial denial text continued on next page)

SOMATROPIN - SEROSTIM (PART D)

INITIAL CRITERIA (CONTINUED)

D. You meet ONE of the following criteria for weight loss:
   1. You have 10% unintentional weight loss over 12 months
   2. You have 5% weight loss over 6 months
   3. You have 5% body cell mass (BCM: a tool for evaluating nutritional status) loss within 6 months
   4. If you are a male, your body cell mass (BCM) is less than 35% of your total body weight AND your body mass index (BMI: a tool for evaluating body fat) is less than 27 kg per meter squared
   5. If you are a female, your body cell mass (BCM) is less than 23% of your total body weight AND your body mass index (BMI) is less than 27 kg per meter squared
   6. Your body mass index (BMI) is less than 20 kg per meter squared

E. Request for Serostim will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - ZOMACTON (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of short stature associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
   - The patient's diagnosis is confirmed by chromosomal analysis (karyotyping)
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- The patient had a trial of or contraindication to the preferred agent: Norditropin

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #5.

5. Does the patient have a diagnosis of short stature or growth failure with short stature homeobox-containing gene (SHOX) (ICD-10 E34.328) deficiency and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
- The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
- Zomacton will NOT be used concurrently with Increlex (mecasermin)

If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #6.

SOMATROPIN - ZOMACTON (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to the preferred agent: Norditropin

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Does the patient have a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #9.

SOMATROPIN - ZOMACTON (PART D)

INITIAL CRITERIA (CONTINUED)

9. Is the patient's diagnosis confirmed by ONE of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - ZOMACTON** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You have short stature associated with Turner syndrome (type of genetic disorder)
      3. You have idiopathic short stature (ISS: short height due to unknown cause)
      4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (type of genetic disorder)
      5. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

SOMATROPIN - ZOMACTON (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

C. If you have short stature associated with Turner syndrome, approval also requires:
1. Your diagnosis is confirmed by chromosomal analysis (karyotyping: a lab test used to examine your genetic information)
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

D. If you have idiopathic short stature, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

E. If you have short stature or growth failure with SHOX deficiency, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
3. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)

(Initial denial text continued on next page)

SOMATROPIN - ZOMACTON (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have short stature born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You have open epiphyses (end part of long bone) as confirmed by radiograph (a type of imaging test) of the wrist and hand
5. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)
6. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. You have congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests:
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2 OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Norditropin

G. Request for Zomacton will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - ZOMACTON (PART D)

RENEWAL CRITERIA

1. Is the request for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand) OR the patient has not completed prepubertal growth
   - The patient has shown improvement (increased height or increased growth velocity)
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of idiopathic short stature (ISS) (ICD-10 R62.52) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand)
   - The patient has shown improvement (increased height or increased growth velocity)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

SOMATROPIN - ZOMACTON (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have **ONE** of the following diagnoses?
   - Short stature associated with Turner syndrome (ICD-10 Group Q96)
   - Short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (ICD-10 E34.328)
   - Short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1)

   If yes, continue to #5.
   If no, continue to #6.

5. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has open epiphyses (as confirmed by radiograph of the wrist and hand OR the patient has not completed prepubertal growth)
   - The patient has shown improvement (increased height or increased growth velocity)
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Zomacton will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMATROPIN - ZOMACTON (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN - ZOMACTON** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You have short stature associated with Turner syndrome (type of genetic disorder)
   3. You have idiopathic short stature (ISS: short height due to unknown cause)
   4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (type of genetic disorder)
   5. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   6. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
   3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
   4. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin

C. If you have idiopathic short stature, renewal also requires:
   1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
   2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand
   3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy

(Renewal denial text continued on next page)

SOMATROPIN - ZOMACTON (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have short stature associated with Turner syndrome, short stature or growth failure with SHOX deficiency, or short stature born small for gestational age, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have open epiphyses (end part of long bone) as confirmed by radiograph (type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. You have experienced improvement (increased height or increased growth velocity [rate]) on therapy
4. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)

E. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use Zomacton concurrently (at the same time) with Increlex (mecasermin)

F. Request for Zomacton will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

	HYPOPLASIA, ECTOPIC POSTERIOR PITUITARY, PREVIOUS CRANIAL IRRADIATION), OR 2) GHD CONFIRMED BY ONE OF THE FOLLOWING GROWTH HORMONE (GH) STIMULATION TESTS: (A) INSULIN TOLERANCE TEST (PEAK GH OF 5 NG/ML OR LESS), (B) GLUCAGON-STIMULATION TEST (ONE OF THE FOLLOWING: (I) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI LESS THAN 25 KG/M2, (II) PEAK RESPONSE OF 3 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH A PRE-TEST PROBABILITY, (III) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS BETWEEN 25 - 30 KG/M2 WITH LOW TEST PROBABILITY, OR (IV) PEAK RESPONSE OF 1 NG/ML OR LESS AND BMI IS GREATER THAN 30 KG/M2), OR (C) MACIMORELIN TEST (PEAK GH OF 2.8 NG/ML OR LESS).
Age Restrictions	SGA: 2 YEARS OF AGE OR OLDER
Prescriber Restrictions	INITIAL/RENEWAL: ALL INDICATIONS: PRESCRIBED BY OR IN CONSULTATION WITH AN ENDOCRINOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: NORDITROPIN, WHERE INDICATIONS ALIGN. PEDIATRIC GHD, ISS, SGA, TS, SHOX DEFICIENCY: OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. INITIAL/RENEWAL: ADULT GHD, PEDIATRIC GHD, SGA, TS, SHOX DEFICIENCY: NO CONCURRENT USE WITH INCRELEX. RENEWAL: ISS: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND. PEDIATRIC GHD, SGA, TS, SHOX DEFICIENCY: 1) IMPROVEMENT WHILE ON THERAPY (INCREASED HEIGHT OR INCREASED GROWTH VELOCITY), AND 2) OPEN EPIPHYSES AS CONFIRMED BY RADIOGRAPH OF THE WRIST AND HAND OR HAS NOT COMPLETED PREPUBERTAL GROWTH.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced basal cell carcinoma (BCC) (ICD-10 C44.91, C44.01, C44.41, C44.81; Groups C44.11, C44.21, C44.31, C44.51, C44.61, C44.71) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - This is a recurrence of basal cell carcinoma (BCC) following surgery or radiation therapy OR the patient is not a candidate for surgery or radiation therapy
   - The patient's baseline serum creatine kinase (CK) and serum creatinine levels have been obtained prior to initiating therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SONIDEGIB (Odomzo)** requires the following rule(s) be met for approval:
   A. You have locally advanced basal cell carcinoma (BCC: a type of skin cancer that has spread from where it started to nearby tissue or lymph nodes)
   B. You are 18 years of age or older
   C. This is a recurrence (disease returns) of basal cell carcinoma (BCC: a type of skin cancer) after surgery or radiation therapy OR you are not a candidate for surgery or radiation therapy
   D. Your baseline serum creatine kinase (CK: a type of protein) and serum creatinine levels (type of lab test to measure kidney function) have been obtained before starting therapy
   (Denial text continued on next page)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0; Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age and older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units (WU)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOTATERCEPT-CSRK (PART D)

INITIAL CRITERIA (CONTINUED)

3. Has the patient been on background PAH therapy (for at least 3 months) with at least TWO of the following agents from different drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor (e.g., Revatio [sildenafil], Adcirca [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Is the patient on ONE agent from one of the following drug classes, **AND** has a contraindication or intolerance to ALL of the other drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor (e.g., Revatio [sildenafil], Adcirca [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOTATERCEPT-CSRK (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOTATERCEPT-CSRK (Winrevair)** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
B. You are 18 years of age and older
C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
D. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
    1. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
    2. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
    3. Pulmonary vascular resistance (PVR) greater than 2 Wood units
E. You meet ONE of the following:
    1. You have been on background PAH therapy (for at least 3 months) with at least TWO of the following medications from different drug classes:
        a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
        b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
        c. Oral cGMP stimulator (such as Adempas [riociguat])
        d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])
    2. You are on ONE medication from one of the following drug classes, AND you have a contraindication to (harmful for you to use) or intolerance (side effect) to ALL of the other drug classes:
        a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
        b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
        c. Oral cGMP stimulator (such as Adempas [riociguat])
        d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOTATERCEPT-CSRK (PART D)

For Part D use only:

SOTATERCEPT-CSRK	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	PULMONARY ARTERIAL HYPERTENSION (PAH): INITIAL: DIAGNOSIS CONFIRMED BY RIGHT HEART CATHETERIZATION WITH THE FOLLOWING PARAMETERS: 1) MEAN PULMONARY ARTERY PRESSURE (PAP) GREATER THAN 20 MMHG, 2) PULMONARY CAPILLARY WEDGE PRESSURE (PCWP) OF 15 MMHG OR LESS, AND 3) PULMONARY VASCULAR RESISTANCE (PVR) GREATER THAN 2 WOOD UNITS.
Age Restrictions	N/A
Prescriber Restrictions	PAH: INITIAL: PRESCRIBED BY OR IN CONSULTATION WITH A CARDIOLOGIST OR PULMONOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	PAH: INITIAL: 1) ON BACKGROUND PAH THERAPY (FOR AT LEAST 3 MONTHS) WITH AT LEAST TWO OF THE FOLLOWING AGENTS FROM DIFFERENT DRUG CLASSES: A) ORAL ENDOTHELIN RECEPTOR ANTAGONIST, B) ORAL PHOSPHODIESTERASE TYPE-5 INHIBITOR FOR PAH, C) ORAL CGMP STIMULATOR, D) IV/SQ PROSTACYCLIN, OR 2) ON ONE AGENT FROM ONE OF THE ABOVE DRUG CLASSES, AND HAS A CONTRAINDICATION OR INTOLERANCE TO ALL OF THE OTHER DRUG CLASSES.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a KRAS G12C-mutation, as determined by an FDA-approved test
   - The patient has received at least one prior systemic therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Lumakras will be used in combination with Vectibix (panitumumab)
   - The patient's cancer has a KRAS G12C-mutation, as determined by an FDA-approved test
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SOTORASIB (PART D)

GUIDELINES FOR USE

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOTORASIB (Lumakras)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread from where it started to nearby tissue or lymph nodes or has spread to other parts of the body)
   2. Metastatic colorectal cancer (mCRC: a type of digestive tract cancer that has spread to other parts of the body)

B. If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a KRAS G12C-mutation (type of gene mutation), as detected by a Food and Drug Administration (FDA)-approved test
   3. You have received at least one prior systemic therapy (treatment that spreads throughout the entire body)

C. If you have metastatic colorectal cancer, approval also requires:
   1. You are 18 years of age or older
   2. Lumakras will be used in combination with Vectibix (panitumumab)
   3. Your cancer has a KRAS G12C-mutation (abnormal change in a type of gene), as determined by a Food and Drug Administration (FDA)-approved test
   4. You have received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (types of cancer treatments)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk for disease progression
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's IgAN diagnosis is confirmed by a biopsy
   - The patient has proteinuria of at least 0.5 g/day
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)

   If yes, **approve for 9 months by HICL or GPI-10.**
   If no, continue to #2.

SPARSENTAN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of focal segmental glomerulosclerosis (FSGS) (ICD-10 Group N04.1) and meet **ALL** of the following criteria?
   - The patient is 8 years of age or older
   - The patient has proteinuria
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has a urine-protein creatinine ratio (UPCR) of at least 1.5 g/g
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE of the following clinical standard of care agents: an ACE inhibitor (e.g., benazepril, lisinopril), an ARB (e.g., losartan, valsartan)
   - Filspari will NOT be used concurrently with an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan)
   - The patient does NOT have nephrotic syndrome as evidenced by nephrotic range proteinuria (i.e., UPCR of at least 3.0 g/g in adults [18 years of age or older]; UPCR of at least 2.0 g/g in children [less than 18 years of age])
   - The patient does NOT have nephrotic syndrome as evidenced by the presence of hypoalbuminemia, edema, or hyperlipidemia

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **SPARSENTAN (Filspari)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
      2. Focal segmental glomerulosclerosis (FSGS: a type of kidney disease)

   B. If you have primary immunoglobulin A nephropathy, approval also requires:
      1. You are 18 years of age or older
      2. You are at risk for disease progression (worsening)
      3. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
      4. Your diagnosis is confirmed by a biopsy (removal of cells or tissue for examination)
      5. You have proteinuria (high levels of protein in the urine) of at least 0.5 g/day
      6. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)

   (Initial denial text continued on next page)

SPARSENTAN

INITIAL CRITERIA (CONTINUED)

C. If you have focal segmental glomerulosclerosis, approval also requires:

1. You are 8 years of age or older
2. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
3. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
4. You have a urine-protein creatinine ratio (UPCR: a test that measures the amount of protein in urine) of at least 1.5 g/g
5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
6. You have tried or have a contraindication to (harmful for you to use) at least 3 months of treatment with ONE of the following clinical standard of care medications: an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril), an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)
7. You will NOT use Filspari concurrently (at the same time) with an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)
8. You do NOT have nephrotic syndrome (a type of kidney disease) as shown by nephrotic range proteinuria (high levels of protein in the urine) [urine-protein creatinine ratio (UPCR: a test that measures the amount of protein in urine) of at least 3.0 g/g in adults (18 years of age or older); UPCR of at least 2.0 g/g in children (less than 18 years of age)]
9. You do NOT have nephrotic syndrome (a type of kidney disease) as shown by hypoalbuminemia (low levels of protein in the urine), edema (swelling caused by fluid build-up in the body), or hyperlipidemia (high level of fat in the blood)

SPARSENTAN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ONE** of the following criteria?
   - The patient has had a reduction in proteinuria
   - The patient has improved or stable kidney function compared to baseline

   If yes, **approve for 9 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of focal segmental glomerulosclerosis (FSGS) (ICD-10 Group N04.1) and meet **ALL** of the following criteria?
   - The patient has a reduction in proteinuria from baseline
   - The patient has a reduction in urine-protein creatinine ratio (UPCR)
   - Filspari will NOT be used concurrently with an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SPARSENTAN (Filspari)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
      2. Focal segmental glomerulosclerosis (FSGS: a type of kidney disease)

   B. If you have primary immunoglobulin A nephropathy, renewal also requires you meet ONE of the following:
      1. You had a reduction in proteinuria (increased levels of protein in the urine)
      2. You have improvement or stable kidney function compared to baseline (before treatment)

   C. If you have focal segmental glomerulosclerosis, renewal also requires:
      1. You have had a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine) compared to baseline (before starting Filspari)
      2. You have had a reduction (decrease) in urine-protein creatinine ratio (UPCR: a test that measures the amount of protein in urine)
      3. You will NOT use Filspari concurrently (at the same time) with an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

SPESOLIMAB-SBZO IV BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the request for the treatment of a generalized pustular psoriasis (GPP) (ICD-10 L40.1) flare and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient weighs at least 40 kg (88 lbs.)
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has sterile, macroscopically visible pustules on non-acral skin
   - The patient has not received more than one dose in the previous 30 days and that dose was not within the last 7 days
   - Spevigo will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPP

   If yes, **approve for 1 month by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SPESOLIMAB-SBZO IV BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SPESOLIMAB-SBZO IV (Spevigo)** requires the following rule(s) be met for approval:

A. The request is for the treatment of a generalized pustular psoriasis (GPP: a type of skin condition) flare
B. You are 12 years of age or older
C. You weigh at least 40 kilograms (88 pounds)
D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
E. You have sterile, macroscopically visible pustules (blisters with non-infectious pus that can be seen with the naked eye) on non-acral skin (skin in areas of the body such as arms and legs)
F. You have not received more than one dose in the previous 30 days and that dose was not within the last 7 days
G. You will NOT use Spevigo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of generalized pustular psoriasis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Spevigo. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

SPESOLIMAB-SBZO SQ (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SPESOLIMAB-SBZO SQ (Spevigo)** requires the following rule(s) be met for approval:

A. You have generalized pustular psoriasis (GPP: a type of skin condition)
B. You are 12 years of age or older
C. You weigh at least 40 kilograms (88 pounds)
D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
E. You have a history of GPP as defined by the presence of sterile, macroscopically visible pustules (blisters with non-infectious pus that can be seen with the naked eye) on non-acral skin (skin in areas of the body such as arms and legs)
F. You will NOT use Spevigo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of GPP

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SPESOLIMAB-SBZO SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of generalized pustular psoriasis (GPP) (ICD-10 L40.1) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response
   - Spevigo will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPP

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SPESOLIMAB-SBZO SQ (Spevigo)** requires the following rule(s) be met for renewal:
   A. You have generalized pustular psoriasis (GPP: a type of skin condition)
   B. You have experienced a clinical response
   C. You will NOT use Spevigo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of GPP

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SUNITINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SUNITINIB (Sutent)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Renal cell carcinoma (RCC: a type of kidney cancer)
   2. Gastrointestinal stromal tumor (GIST: a type of digestive tumor)
   3. Unresectable locally advanced or metastatic pancreatic neuroendocrine tumor (pNET) (a type of tumor in the pancreas that cannot be completely removed by surgery or has spread to other parts of the body)

B. If you have renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. You have advanced disease
      b. You are at high risk of recurrent renal cell carcinoma (cancer returning) following nephrectomy (surgical removal of kidney) AND the requested drug will be used as adjuvant (add-on) treatment

C. If you have gastrointestinal stromal tumor, approval also requires:
   1. You are 18 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) imatinib mesylate (Gleevec)

D. If you have unresectable locally advanced or metastatic pancreatic neuroendocrine tumor, approval also requires:
   1. You are 18 years of age or older
   2. Your tumor is progressive (getting worse) and well-differentiated (looks like healthy cells)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of cold agglutinin disease (CAD) (ICD-10 D59.12) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SUTIMLIMAB-JOME (Enjaymo)** requires the following rule(s) be met for approval:
   A. You have cold agglutinin disease (CAD: a rare type of blood condition)
   B. You are 18 years of age or older

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TADALAFIL - ADCIRCA, ALYQ TIRF (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TADALAFIL	ADCIRCA, ALYQ, TADALAFIL		26587	GPI-14 (40143080000320)	

These are TIRF-Like drugs requiring a payment determination for "Part D" or "Non-Part D".

PAYMENT DETERMINATION CRITERIA

1. Is the request for **ONE** of the following?
   - Pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2)
   - Prophylaxis of high altitude pulmonary edema
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)

   If yes, **set MCARE_DRUG_DETERM_OVR to 'Y' and approve for 12 months by GPID or GPI-14. Document in the PA comments: Part D Determination Override and diagnosis.**

   If no, **do not enter an MCARE override. Then, process as follows:**
   CSR Note:
   - If the caller is a physician, member, and/or AOR, please initiate a verbal PA intake request in MR3.
   - If the caller is a pharmacy, please advise the pharmacy to contact the provider or member to pursue a payment determination and document the diagnosis provided in MedAccess.

   Please follow the clinical authorization process within the HQ notes.

   RPH Note:
   - Review for both FDA and Part D compendial supported off-label indications.
   - If the provided diagnosis is not FDA approved or compendial supported off-label use, **set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - If the diagnosis is UNKNOWN do not enter an MCARE override; follow the criteria for any additional UM and decision the case accordingly. Provide the following PAC instruction**:** '**PAC: do not enter an MCARE override**.'

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, continue to #3.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   DENIAL TEXT: See the initial denial text at the end of the guideline.

TADALAFIL - ADCIRCA, ALYQ TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for **ONE** of the following?
   - Prophylaxis of high altitude pulmonary edema
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TADALAFIL - ADCIRCA, ALYQ** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
      2. Prophylaxis of high altitude pulmonary edema (prevention of a type of lung condition at high elevation)
      3. Secondary Raynaud's phenomenon (a type of blood vessel disorder caused by another condition)

   B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:
      1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
      2. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
         a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
         b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
         c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units

TADALAFIL-CIALIS DvE (PART D)

RATIONALE

Pursuant to Chapter 6 of the Medicare Prescription Drug Benefit Manual, Section 20.1-Excluded Categories, erectile dysfunction (ED) "drugs will meet the definition of a Part D drug when prescribed for medically-accepted indications approved by the FDA other than sexual or erectile dysfunction (such as pulmonary hypertension). However, ED drugs will not meet the definition of a Part D drug when used off-label, even when the off-label use is listed in one of the compendia found in section 1927(g)(1)(B)(i) of the Act: American Hospital Formulary Service Drug Information, and DRUGDEX® Information System."

The goal of the Payment Determination section of this guideline is to limit the coverage of Cialis to the Medicare Part D covered indication of benign prostatic hyperplasia (BPH) and exclude coverage for erectile dysfunction (ED) or any other off label indication.

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cialis.

TADALAFIL-TADLIQ TIRF (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - Tadliq will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])
   - The patient is unable to swallow tablets

   If yes, continue to #2.
   If no, continue to #3.

INITIAL CRITERIA (CONTINUED)

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the request for **ONE** of the following?
   - Prophylaxis of high altitude pulmonary edema
   - Secondary Raynaud's phenomenon (ICD-10 Group I73.0)

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TADALAFIL-TADLIQ** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
      2. Prophylaxis of high altitude pulmonary edema (prevention of a type of lung condition at high elevation)
      3. Secondary Raynaud's phenomenon (a type of blood vessel disorder that is caused by another condition)

   (Initial denial text continued on next page)

TADALAFIL-TADLIQ TIRF (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have pulmonary arterial hypertension (World Health Organization Group 1), approval also requires:

1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
2. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
   a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
   c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units
3. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
4. You will NOT use Tadliq concurrently (at the same time) with guanylate cyclase (GC) stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])
5. You are unable to swallow tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TADALAFIL-TADLIQ TIRF (PART D)

RENEWAL CRITERIA

NOTE: For the request of prophylaxis of high altitude pulmonary edema, and secondary Raynaud's phenomenon, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (World Health Organization Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is NOT concurrently or intermittently taking oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - Tadliq will NOT be used concurrently with guanylate cyclase (GC) stimulators (e.g., Adempas [riociguat])

   If yes, **approve for 12 months by GPID or GPI-14. NOTE: If the claim rejects for payment determination after analyzing, then follow the above TIRF-Like determination criteria.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   - **If not a Part D indication: Set MCARE_DRUG_DETERM_OVR to 'N' and enter override within the denied PA for 12 months by GPID or GPI-14.**
   - **If indication is Part D, but other criteria not met: Set MCARE_DRUG_DETERM_OVR to 'Y' and enter override within the partially denied PA for 12 months by GPID or GPI-14.**

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TADALAFIL-TADLIQ** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization Group 1: a way to classify the severity of disease)
   B. You are NOT concurrently (at the same time) or intermittently (off and on) taking oral erectile dysfunction agents (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
   C. You will NOT use Tadliq concurrently (at the same time) with guanylate cyclase stimulators (drugs that also treat pulmonary hypertension such as Adempas [riociguat])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cardiomyopathy associated with wild type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist, transthyretin amyloidosis (ATTR) specialist, or medical geneticist
   - The patient has New York Heart Association (NYHA) Class I, II, or III heart failure
   - The requested medication will NOT be used concurrently with other ATTR-CM TTR (transthyretin) stabilizers (e.g., acoramidis [Attruby])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TAFAMIDIS (PART D)

INITIAL CRITERIA (CONTINUED)

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP *(Note: Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)*
   - A biopsy of tissue of affected organ(s) (cardiac and possibly non-cardiac sites) to confirm amyloid presence AND chemical typing to confirm presence of transthyretin (TTR) protein

   If yes, **approve both Vyndaqel and Vyndamax for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TAFAMIDIS (Vyndaqel, Vyndamax)** requires the following rule(s) be met for approval:
   A. You have cardiomyopathy associated with wild type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: a type of heart condition)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), transthyretin amyloidosis (ATTR) specialist, or medical geneticist (doctor who treats gene disorders)
   D. You have New York Heart Association (NYHA: classificationsystem for heart failure) Class I, II or III heart failure
   E. You will NOT use the requested medication concurrently (at the same time) with other ATTR-CM TTR (transthyretin) stabilizers (such as acoramidis [Attruby])
   F. Your diagnosis is confirmed by ONE of the following:
      1. A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP (a type of imaging agent) *(Note: Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)*
      2. A biopsy of tissue of affected organ(s) (can be heart or non-heart related organs) to confirm amyloid (a type of protein) presence AND chemical typing to confirm presence of transthyretin (TTR) protein

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

TAFASITAMAB-CXIX BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TAFASITAMAB-CXIX BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TAFASITAMAB-CXIX (Monjuvi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Diffuse large B-cell lymphoma (DLBCL: a type of blood cancer)
   2. Follicular lymphoma (FL: a type of blood cancer)

B. If you have diffuse large B-cell lymphoma (not otherwise specified), approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has relapsed or is refractory (cancer that has returned or does not fully respond to treatment)
   3. You are not eligible for autologous stem cell transplant (ASCT: stem cell transplant transferred from your own body)
   4. Monjuvi will be used in combination with Revlimid (lenalidomide)

C. If you have follicular lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has relapsed or is refractory (cancer that has returned or does not fully respond to treatment)
   3. Monjuvi will be used in combination with Revlimid (lenalidomide) and rituximab

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TAFASITAMAB-CXIX BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Monjuvi. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is HER2-negative
   - The patient patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (*gBRCAm*), as confirmed by an FDA-approved companion diagnostic test for Talzenna
   - The patient has been treated with chemotherapy (e.g., doxorubicin, docetaxel) in the neoadjuvant, adjuvant, or metastatic setting

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer is NOT hormone receptor (HR)-positive
   - The patient's cancer is hormone receptor (HR)-positive AND the patient has received prior treatment with endocrine therapy (e.g., tamoxifen, Arimidex [anastrozole]) or endocrine therapy is considered to be inappropriate for the patient

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TALAZOPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2, C61) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Talzenna will be used in combination with enzalutamide (Xtandi)
   - The patient's cancer has a homologous recombination repair (HRR) gene mutation

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient previously had a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., less than 50 ng/dL)
   - Talzenna will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TALAZOPARIB (Talzenna)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Locally advanced or metastatic breast cancer (breast cancer that has spread to nearby tissue or lymph nodes or has spread to other parts of the body)
      2. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)

   (Denial text continued on next page)

TALAZOPARIB (PART D)

GUIDELINES FOR USE (CONTINUED)

B. If you have locally advanced or metastatic breast cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is HER2 (human epidermal growth factor receptor 2: a type of protein)-negative
3. You have a deleterious or suspected deleterious germline breast cancer susceptibility gene (BRCA) mutation (gBRCAm: a type of abnormal change in a gene), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic test for Talzenna
4. You have been treated with chemotherapy (such as doxorubicin, docetaxel) in the neoadjuvant (given before main treatment), adjuvant (add-on to main treatment), or metastatic setting (to treat disease that has spread to other parts of the body)
5. You meet ONE of the following:
   a. You do not have hormone receptor (HR)-positive breast cancer
   b. You have hormone receptor (HR)-positive breast cancer, and you have been treated with prior endocrine (hormone) therapy (such as tamoxifen, Arimidex [anastrozole]), or endocrine therapy is considered to be inappropriate for you

C. If you have metastatic castration-resistant prostate cancer, approval also requires:
1. You are 18 years of age or older
2. Talzenna will be used in combination with enzalutamide (Xtandi)
3. Your cancer has a homologous recombination repair (HRR) gene mutation (a type of abnormal change in a gene)
4. You meet ONE of the following:
   a. You previously received a bilateral orchiectomy (both testicles have been surgically removed)
   b. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
   c. Talzenna will be used concurrently (at the same time) with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Talzenna.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a recurrence of melanoma lesions after initial surgery
   - The patient does not have a history of primary or acquired immunodeficient states, leukemia, lymphoma, or AIDS
   - Imlygic will NOT be used concurrently with immunosuppressive therapy
   - Imlygic will NOT be used concurrently with a medical therapy for the treatment of melanoma, including pembrolizumab (Keytruda), nivolumab (Opdivo), ipilimumab (Yervoy), dabrafenib (Tafinlar), trametinib (Mekinist), vemurafenib (Zelboraf), interleukin-2, interferon, dacarbazine, temozolomide (Temodar), paclitaxel, carboplatin, imatinib (Gleevec), melphalan (Alkeran), imiquimod, or radiation therapy

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Will Imlygic be injected into cutaneous, subcutaneous, and/or nodal lesions that are visible, palpable, or detectable by ultrasound guidance?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve
   DENIAL TEXT: See the denial text at the end of the guideline.

TALIMOGENE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TALIMOGENE (Imlygic)** requires the following rule(s) be met for approval:

A. You have unresectable melanoma (a type of skin cancer that cannot be removed with surgery)
B. You have a recurrence of melanoma lesions after initial surgery (cancer returns after surgery)
C. You do not have a history of primary or acquired immunodeficient states (conditions that weaken the immune system), leukemia (a type of blood cancer), lymphoma (a type of blood cancer), or acquired immunodeficiency syndrome (AIDS: a type of immune system disorder caused by virus infection)
D. You will NOT use Imlygic concurrently (at the same time) with immunosuppressive therapy (treatment that lowers immune system activity)
E. You will NOT use Imlygic concurrently (at the same time) with a medical therapy for the treatment of melanoma, including pembrolizumab (Keytruda), nivolumab (Opdivo), ipilimumab (Yervoy), dabrafenib (Tafinlar), trametinib (Mekinist), vemurafenib (Zelboraf), interleukin-2, interferon, dacarbazine, temozolomide (Temodar), paclitaxel, carboplatin, imatinib (Gleevec), melphalan (Alkeran), imiquimod, or radiation therapy
F. Imlygic will be injected into cutaneous (skin), subcutaneous (under the skin), and/or nodal (lymph gland) lesions that are visible, palpable (can be felt), or detectable by ultrasound guidance (a type of procedure)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

TALQUETAMAB-TGVS BVD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TALQUETAMAB-TGVS BVD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least four prior lines of therapy, including a proteasome inhibitor (e.g., Velcade [bortezomib], Kyprolis [carfilzomib]), an immunomodulatory agent (e.g., Revlimid [lenalidomide], Pomalyst [pomalidomide]), and an anti-CD38 monoclonal antibody (e.g., Darzalex [daratumumab])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TALQUETAMAB-TGVS (TALVEY)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory multiple myeloma (a type of blood cancer that has returned or did not respond to treatment)
   B. You are 18 years of age or older
   C. You have received at least four prior lines of therapy, including a proteasome inhibitor (such as Velcade [bortezomib], Kyprolis [carfilzomib]), an immunomodulatory agent (such as Revlimid [lenalidomide], Pomalyst [pomalidomide]), and an anti-CD38 monoclonal antibody (such as Darzalex [daratumumab])

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% to 20% of body surface area (BSA) (excluding scalp, palms, fingernails, toenails, and soles)
   - Vtama will NOT be used concurrently with other systemic immunomodulating agents (e.g., Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (e.g., betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (e.g., calcitriol, tazarotene)

     If yes, continue to #2.
     If no, continue to #3.

CONTINUED ON NEXT PAGE

TAPINAROF (PART D)

INITIAL CRITERIA (CONTINUED)

2. Has the patient had a trial of or contraindication to **TWO** of the following (from different categories)?
   - High or super-high potency topical corticosteroid (e.g., triamcinolone acetonide, fluocinonide, clobetasol propionate, halobetasol propionate)
   - Topical vitamin D analog (e.g., calcipotriene cream, calcitriol ointment)
   - Topical calcineurin inhibitor (e.g., Protopic [tacrolimus], Elidel [pimecrolimus])
   - Topical retinoid (e.g., tazarotene cream/gel)

   If yes, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of atopic dermatitis (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had a trial of or contraindication to a topical corticosteroid (e.g., triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])
   - The patient had a trial of or contraindication to Eucrisa (crisaborole)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TAPINAROF (PART D)

INITIAL CRITERIA (CONTINUED)

4. Will Vtama be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
   - Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole)], JAK inhibitors [e.g., Opzelura (ruxolitinib), delgocitinib, AhR agonists)
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 3 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TAPINAROF (Vtama)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Plaque psoriasis (a type of skin condition)
      2. Atopic dermatitis (a type of skin condition)
   B. If you have plaque psoriasis, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
      3. You have psoriasis covering 3% to 20% of body surface area (BSA) (excluding scalp, palms, fingernails, toenails, and soles)
      4. You will NOT use Vtama concurrently (at the same time) with other systemic immunomodulating agents (such as Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (such as betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (such as calcitriol, tazarotene)
      5. You have tried or have a contraindication to (harmful for you to use) TWO of the following (from different categories):
         a. High or super-high potency topical corticosteroid (such as triamcinolone acetonide, fluocinonide, clobetasol propionate, halobetasol propionate)
         b. Topical vitamin D analog (such as calcipotriene cream, calcitriol ointment)
         c. Topical calcineurin inhibitor (such as Protopic [tacrolimus], Elidel [pimecrolimus])
         d. Topical retinoid (such as tazarotene cream/gel)

   (Initial denial text continued on next page)

TAPINAROF (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have atopic dermatitis, approval also requires:

1. You are 2 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) a topical corticosteroid (such as triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment) OR a topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])
3. You have tried or have a contraindication to Eucrisa (crisaborole)
4. You will NOT use Vtama concurrently (at the same time) with ANY of the following for the treatment of atopic dermatitis (a type of skin condition):
   a. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole)], JAK [Janus kinase] inhibitors [such as Opzelura (ruxolitinib), delgocitinib], AhR [aryl hydrocarbon receptor] agonists [a type of medication])
   b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   c. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   d. Potent immunosuppressants (such as azathioprine, cyclosporine)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TAPINAROF (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease
   - Vtama will NOT be used concurrently with other systemic immunomodulating agents (e.g., Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (e.g., betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (e.g., calcitriol, tazarotene)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
   - The patient has experienced or maintained improvement in pruritus, relapsing-remitting dermatitis, or facial/interdigital involvement

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Will Vtama be used concurrently with **ANY** of the following for the treatment of atopic dermatitis?
   - Other non-steroidal topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole)], JAK inhibitors [e.g., Opzelura (ruxolitinib), delgocitinib], AhR agonists)
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

TAPINAROF (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TAPINAROF (Vtama)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Plaque psoriasis (a type of skin condition)
   2. Atopic dermatitis (a type of skin condition)

B. If you have plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease
   2. You will NOT use Vtama concurrently (at the same time) with other systemic immunomodulating agents (such as Stelara [ustekinumab], Otezla [apremilast]), topical corticosteroids (such as betamethasone dipropionate, clobetasol propionate), or topical non-steroidals (such as calcitriol, tazarotene)

C. If you have atopic dermatitis, renewal also requires:
   1. You have experienced or maintained improvement in pruritus (itchiness), relapsing-remitting (disease returns and goes away) dermatitis, or facial/interdigital (between the fingers or toes) involvement
   2. You will NOT use Vtama concurrently (at the same time) with ANY of the following for the treatment of atopic dermatitis (a type of skin condition):
      a. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole)], JAK [Janus kinase] inhibitors [such as Opzelura (ruxolitinib), delgocitinib], AhR [aryl hydrocarbon receptor] agonists [a type of medication])
      b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
      c. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
      d. Potent immunosuppressants (such as azathioprine, cyclosporine)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vtama.

No	Yes	Yes	No	Yes	Yes	No	Yes	Yes	No	Yes	Yes

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

TARLATAMAB-DLLE BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TARLATAMAB-DLLE BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of small cell lung cancer (SCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has extensive-stage (ES) cancer
   - The patient has disease progression during or after platinum-based chemotherapy (e.g., carboplatin, cisplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TARLATAMAB-DLLE (Imdelltra)** requires the following rule(s) be met for approval:
   A. You have small cell lung cancer (a type of lung cancer)
   B. You are 18 years of age or older
   C. You have extensive-stage cancer (cancer that has spread widely throughout the lungs or other parts of the body)
   D. You have disease progression (worsening of disease) during or after platinum-based chemotherapy (a type of therapy to treat cancer such as carboplatin, cisplatin)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

TELISOTUZUMAB VEDOTIN-TLLV BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TELISOTUZUMAB VEDOTIN-TLLV (Emrelis)** requires the following rule(s) be met for approval:

A. You have locally advanced or metastatic, non-squamous non-small cell lung cancer (NSCLC: a type of lung cancer that has spread from where it started to nearby tissue, lymph nodes, or other parts of the body)
B. You are 18 years of age or older
C. Your tumor has high c-Met protein overexpression (at least 50 percent of tumor cells with strong [3+] staining) (too many proteins are made), as determined by a Food and Drug Administration (FDA)-approved test
D. You have received a prior systemic therapy (such as platinum therapy [a type of therapy to treat cancer])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Emrelis.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have glioblastoma (ICD-10 C72.9; Group C71) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has newly diagnosed glioblastoma
   - Temodar will be used concomitantly with radiotherapy and then as maintenance treatment thereafter

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have anaplastic astrocytoma (ICD-10 C71.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has newly diagnosed anaplastic astrocytoma
   - Temodar will be used as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TEMOZOLOMIDE - IV (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of refractory anaplastic astrocytoma (ICD-10 C71.9) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TEMOZOLOMIDE - IV (Temodar)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Newly diagnosed glioblastoma (a type of brain cancer)
      2. Newly diagnosed anaplastic astrocytoma (a type of brain cancer)
      3. Refractory anaplastic astrocytoma (a type of brain cancer that has not responded to treatment)

   B. If you have glioblastoma, approval also requires:
      1. You are 18 years of age or older
      2. You have newly diagnosed glioblastoma
      3. Temodar will be used concomitantly (at the same time) with radiotherapy (a type of cancer treatment) and then as maintenance treatment thereafter

   C. If you have anaplastic astrocytoma, approval also requires:
      1. You are 18 years of age or older
      2. You have newly diagnosed anaplastic astrocytoma
      3. Temodar will be used as adjuvant (add-on) treatment

   D. If you have refractory anaplastic astrocytoma, approval also requires:
      1. You are 18 years of age or older

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEPLIZUMAB-MZWV	TZIELD	48464		GPI-10 (2752106520)	

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

TEPLIZUMAB-MZWV BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of stage 2 type 1 diabetes (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has at least two positive pancreatic islet autoantibodies (e.g., insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   - An oral glucose tolerance test (or an alternative method, if an oral glucose tolerance test is not available) confirms the patient has dysglycemia without overt hyperglycemia
   - The patient's clinical history does not suggest type 2 diabetes
   - The patient has NOT previously received a 14-dose treatment course of Tzield

   If yes, **approve for 30 days by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of stage 3 type 1 diabetes (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 8 to 17 years of age
   - The patient has been recently diagnosed (within the last 8 weeks)
   - The patient has at least one positive pancreatic islet cell autoantibody (e.g., insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   - The patient has a peak C-peptide of at least 0.2 pmol/mL on a mixed-meal tolerance test (or an alternative method, if a mixed-meal tolerance test is not available)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TEPLIZUMAB-MZWV BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **TEPLIZUMAB-MZWV (Tzield)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Stage 2 type 1 diabetes (an immune disorder with high blood sugar)
   2. Stage 3 type 1 diabetes (an immune disorder with high blood sugar)

B. If you have stage 2 type 1 diabetes, approval also requires:
   1. You are 1 year of age or older
   2. You have at least two positive pancreatic islet autoantibodies (predictors of type 1 diabetes such as insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   3. An oral glucose tolerance test (or an alternative method, if oral glucose tolerance test is not available) confirms you have dysglycemia (abnormal blood sugar stability) without overt hyperglycemia (high blood sugar)
   4. Your clinical history does not suggest type 2 diabetes (a disorder with high blood sugar)
   5. You have NOT previously received a 14-dose treatment course of Tzield

C. If you have stage 3 type 1 diabetes, approval also requires:
   1. You are 8 to 17 years of age
   2. You have been recently diagnosed (within the last 8 weeks)
   3. You have at least one positive pancreatic islet cell autoantibody (a predictor of type 1 diabetes such as insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   4. You have a peak C-peptide (a type of protein) of at least 0.2 pmol/mL on a mixed-meal tolerance test (a type of test that measures how the body regulates sugar levels in response to food) (or an alternative method, if a mixed-meal tolerance test is not available)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Tzield. The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B.

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have **ONE** of the following diagnoses?
   - Postmenopausal osteoporosis (ICD-10 M81.0, Group M80.0) in a female
   - Primary or hypogonadal osteoporosis (ICD-10 M81.0, Group M80.0) in a male
   - Glucocorticoid-induced osteoporosis (ICD-10 M81.8, Group M80.8)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient is at high risk for fractures (defined as history of osteoporotic fracture or multiple risk factors for fracture)
   - The patient has failed or is intolerant to other osteoporosis therapy (e.g., Fosamax [alendronate], Actonel [risedronate])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TERIPARATIDE (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Has the patient received a total of 24 months cumulative treatment with any parathyroid hormone therapy (e.g., Forteo [teriparatide], Tymlos [abaloparatide])?

   If yes, continue to #4.
   If no, **approve for 24 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

4. Has the patient remained at high risk for fracture OR has returned to having a high risk for fracture?

   If yes, **approve for 24 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TERIPARATIDE (Forteo)** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Postmenopausal osteoporosis (a type of bone condition in women after menopause)
      2. Primary or hypogonadal (low level of testosterone) osteoporosis (a type of bone condition) in a male
      3. Glucocorticoid-induced osteoporosis (a type of bone condition caused by a type of medication such as prednisone)
   B. You meet ONE of the following:
      1. You are at high risk for fractures (defined as history of osteoporotic fracture [a type of complete or partial break in a bone] or multiple risk factors for fracture)
      2. You have failed or could not tolerate other available osteoporosis therapy (such as Fosamax [alendronate], Actonel [risedronate])
   C. You meet ONE of the following:
      1. You have received less than 24 months of cumulative treatment with any parathyroid hormone therapy (such as Forteo [teriparatide], Tymlos [abaloparatide])
      2. You have received a total of 24 months of cumulative treatment with any parathyroid hormone therapy (such as Forteo [teriparatide], Tymlos [abaloparatide]) AND remain at high risk for fracture or have returned to having a high risk for fracture

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the patient 40 years of age or older?

   If yes, continue to #4.
   If no, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

4. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE (Androderm, Androgel, Fortesta, Natesto, Testim, Vogelxo)** requires the following rule(s) be met for approval:
   A. You have primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
   B. You are 18 years of age or older
   C. You have ONE of the following lab values showing you have low testosterone levels:
      1. At least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      2. Free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
   D. If you are 40 years of age or older, approval also requires:
      1. Your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) and the patient has **ONE** of the following laboratory values confirming low testosterone levels?
   - At least TWO total serum testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   - A free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

TESTOSTERONE CYPIONATE - DEPO (PART D)

INITIAL CRITERIA (CONTINUED)

3. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

If yes, **approve all strengths for 12 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TESTOSTERONE CYPIONATE - DEPO (Depo-Testosterone)** requires the following rule(s) be met for approval:

A. You have primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
B. You have ONE of the following lab values showing you have low testosterone levels:
   1. At least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   2. Free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
C. If you are 40 years of age or older, approval also requires:
   1. Your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE CYPIONATE - DEPO (PART D)

RENEWAL CRITERIA

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) **AND** the patient meets the following criterion?
   - The patient has improved symptoms compared to baseline and has tolerated treatment

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE CYPIONATE - DEPO (Depo-Testosterone)** requires the following rule(s) be met for renewal:
   A. You have primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
   B. Your symptoms have improved compared to baseline and you have tolerated treatment
   C. If you are 40 years of age or older, renewal also requires:
      1. Your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE ENANTHATE (PART D)

INITIAL CRITERIA (CONTINUED)

4. Is the request for generic intramuscular testosterone enanthate 200 mg/mL?

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the request for Xyosted **AND** the patient 18 years of age or older?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0) not secondary to a pathological disorder who meets the following criterion?
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #7.

7. Is the request for a female patient with a diagnosis of metastatic breast cancer (ICD-10 Group C50) who meets the following criterion?
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Is the patient postmenopausal?

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #9.

TESTOSTERONE ENANTHATE (PART D)

INITIAL CRITERIA (CONTINUED)

9. Is the patient premenopausal and meets **ALL** of the following criteria?
   - The patient has benefited from an oophorectomy
   - The patient is considered to have a hormone-responsive tumor

   If yes, **approve for 12 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE ENANTHATE (Xyosted)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
      2. Delayed puberty not secondary to a pathological disorder (not due to disease) in a male
      3. Metastatic breast cancer (cancer that has spread to other areas of the body) in a female

   B. If you are a male with primary or secondary hypogonadism, approval also requires:
      1. You have ONE of the following lab values showing you have low testosterone levels:
         a. At least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
         b. Free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
      2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening
      3. If the request is for Xyosted, you are 18 years of age or older

   C. If you are a male with delayed puberty not secondary to a pathological disorder, approval also requires:
      1. Your request is for generic intramuscular (injected into muscle) testosterone enanthate 200 mg/mL

   (Initial denial text continued on next page)

TESTOSTERONE ENANTHATE (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you are a female with metastatic breast cancer, approval also requires:

1. You meet ONE of the following:
   a. You are postmenopausal (after menopause)
   b. You are premenopausal (before menopause), you have benefited from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive
2. Your request is for generic intramuscular (injected into muscle) testosterone enanthate 200 mg/mL

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE ENANTHATE (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of metastatic breast cancer, please refer to the Initial Criteria section.

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) **AND** the patient meets the following criterion?
   - The patient has had improved symptoms compared to baseline and has tolerated treatment

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.

   If no, **approve the requested drug for 12 months as follows:**
   - **Intramuscular testosterone enanthate 200 mg/mL: Approve by GPID or GPI-14.**
   - **Xyosted: Approve for all strengths by GPID or GPI-14.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

3. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, **approve the requested drug for 12 months as follows:**
   - **Intramuscular testosterone enanthate 200 mg/mL: Approve by GPID or GPI-14.**
   - **Xyosted: Approve for all strengths by GPID or GPI-14.**

   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TESTOSTERONE ENANTHATE (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0) not secondary to a pathological disorder who meets **ALL** of the following criteria?
   - The patient has not received more than two 6-month courses of testosterone replacement therapy
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE ENANTHATE (Xyosted)** requires that the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
      2. Delayed puberty not secondary to a pathological disorder (not due to disease) in a male

   B. If you are a male with primary or secondary hypogonadism, renewal also requires:
      1. Your symptoms have improved compared to baseline and you have tolerated treatment
      2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

   C. If you are a male with delayed puberty not secondary to a pathological disorder, renewal also requires:
      1. You have not received more than two 6-month courses of testosterone replacement therapy
      2. Your request is for generic intramuscular (injected into muscle) testosterone enanthate 200 mg/mL

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE UNDECANOATE (PART D)

INITIAL CRITERIA (CONTINUED)

4. Has the patient's prostate specific antigen (PSA) been evaluated for prostate cancer screening?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Has the patient had a trial of or contraindication to **TWO** of the following preferred agents: testosterone 12.5/1.25g, testosterone 20.25/1.25, testosterone 50 mg (1%)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **TESTOSTERONE UNDECANOATE (Aveed, Jatenzo, Kyzatrex, Tlando, Undecatrex)** requires the following rule(s) be met for approval:
   A. You have primary or secondary male hypogonadism (hypotestosteronism or low level of testosterone)
   B. You are 18 years of age or older
   C. You have ONE of the following lab values showing you have low testosterone levels:
      1. At least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      2. A free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
   D. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: testosterone 12.5/1.25g, testosterone 20.25/1.25, testosterone 50 mg (1%)
   E. If you are 40 years of age or older, approval also requires:
      1. Your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated for prostate cancer screening

CORE, ADVANTAGE, AND PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TETRABENAZINE (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TETRABENAZINE	XENAZINE, TETRABENAZINE	07350		GPI-10 (6238007000)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chorea associated with Huntington's disease (ICD-10 G10) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a neurologist or movement disorder specialist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TETRABENAZINE (Xenazine)** requires the following rule(s) be met for approval:
   A. You have chorea (involuntary muscle movements) associated with Huntington's disease (a type of brain disorder)
   B. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or movement disorder specialist

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis (CF) expert
   - Symdeko will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient is homozygous for the F508del mutation OR has a responsive mutation in the CFTR gene

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TEZACAFTOR/IVACAFTOR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEZACAFTOR/IVACAFTOR (Symdeko)** requires the following rule(s) be met for approval:

A. You have cystic fibrosis (CF: a type of lung disorder)
B. You are 6 years of age or older
C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
D. You will NOT use Symdeko concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
E. You are homozygous (have two copies of the same gene) for the *F508del* mutation (abnormal change) in the CFTR gene OR you have a responsive mutation in the CFTR gene (abnormal change in a type of gene that can be treated with Symdeko)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

TEZACAFTOR/IVACAFTOR (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in clinical status
   - Symdeko will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TEZACAFTOR/IVACAFTOR (Symdeko)** requires the following rule(s) be met for renewal:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You have experienced an improvement in your clinical status
   C. You will NOT use Symdeko concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

TEZEPELUMAB-EKKO BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TEZEPELUMAB-EKKO BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma (ICD-10 Groups J45.5) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary medicine
   - Tezspire will be used in combination with a medium, high-dose, or maximally tolerated inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), ipratropium, Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #7.

2. Does the patient meet **ONE** of the following criteria?
   - The patient experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g. prednisone) burst lasting at least 3 days within the past 12 months
   - The patient experienced at least ONE serious exacerbation requiring hospitalization or emergency room visit within the past 12 months

   If yes, continue to #4.
   If no, continue to #3.

TEZEPELUMAB-EKKO BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the last 12 months
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of severe oral corticosteroid-dependent asthma (ICD-10 J45.909) **AND** meet the following criterion?
   - The patient had a trial of or contraindication to the preferred agent: Dupixent (dupilumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

TEZEPELUMAB-EKKO BvD (PART D)

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of severe allergic asthma (ICD-10 Group J45.5)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Tezspire will be used as add-on maintenance treatment
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE topical nasal corticosteroid (e.g., mometasone, fluticasone)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Nucala (mepolizumab), Dupixent (dupilumab)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TEZEPELUMAB-EKKO (Tezspire)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Severe asthma (a type of lung condition)
      2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)

   (Initial denial text continued on next page)

TEZEPELUMAB-EKKO BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have severe asthma, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a doctor specializing in allergy or pulmonary (lung/breathing) medicine
3. Tezspire will be used in combination with a medium, high-dose, or maximally tolerated inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), long-acting muscarinic antagonist (such as Tudorza [aclidinium], Incruse Ellipta [umeclidinium], Spiriva [tiotropium]), leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline
4. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma
5. You meet ONE of the following:
   a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring hospitalization or emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

C. If you have severe asthma with an eosinophilic phenotype (type of inflammatory asthma), approval also requires:
1. You have a blood eosinophil level (type of white blood cell) of at least 150 cells/mcL within the last 12 months
2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab)

D. If you have severe oral corticosteroid-dependent asthma, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Dupixent (dupilumab)

(Initial denial text continued on next page)

TEZEPELUMAB-EKKO BvD (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have severe allergic asthma, no additional criteria are required

F. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 12 years of age or older
2. Tezspire will be used as add-on maintenance treatment
3. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
5. You have inadequately controlled disease
6. You had a 56-day trial of ONE intranasal corticosteroid (such as mometasone nasal spray)
7. You had a trial of or contraindication to (harmful for) ONE of the following preferred medications: Nucala (mepolizumab), Dupixent (dupilumab)
8. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TEZEPELUMAB-EKKO BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have severe asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient continues to use an inhaled corticosteroid (e.g., beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton], theophylline)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and Group J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Tezspire will NOT be used concurrently with another systemic biologic e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TEZEPELUMAB-EKKO BvD (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEZEPELUMAB-EKKO (Tezspire)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Severe asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)

B. If you have severe asthma, renewal also requires:
   1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least one other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), theophylline
   2. You have shown a clinical response as evidenced by ONE of the following:
      a. You have experienced a reduction in asthma exacerbations (worsening of symptoms) from baseline
      b. You have decreased your use of rescue medications (such as albuterol)
      c. Your percent predicted FEV1 (amount of air exhaled in one second) has increased from pretreatment baseline (before starting Tezspire)
      d. You have experienced a reduction in severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)
   3. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK[Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (before starting Tezspire) (such as improvements in nasal congestion, sense of smell, size of polyps)
   2. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a candidate for phototherapy or systemic therapy
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Ilumya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi/Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TILDRAKIZUMAB-ASMN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TILDRAKIZUMAB-ASMN (Ilumya)** requires the following rule(s) be met for approval:

A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
B. You are 18 years of age or older
C. You are a candidate for phototherapy (light therapy) or systemic therapy (therapy that travels through the entire body)
D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
E. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting your hands, feet, genital area, scalp, or face
F. You will NOT use Ilumya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
G. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Cosentyx (secukinumab), Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima, Selarsdi /Yesintek /ustekinumab-aauz, Skyrizi (risankizumab-rzaa), Tremfya (guselkumab), Otezla (apremilast)

TILDRAKIZUMAB-ASMN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Ilumya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TILDRAKIZUMAB-ASMN (Ilumya)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
   B. You continue to benefit from the medication
   C. You will NOT use Ilumya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

4. Does the patient have a diagnosis of unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma (G/GEJ) (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is HER2-negative
   - Tevimbra will be used in combination with platinum (e.g., cisplatin, oxaliplatin) and fluoropyrimidine-based chemotherapy (e.g., fluorouracil [5-FU], capecitabine)
   - The patient's tumors programmed death-ligand 1 (PD-L1) expression is at least 1

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TISLELIZUMAB-JSGR (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TISLELIZUMAB-JSGR (Tevimbra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic esophageal squamous cell carcinoma (ESCC: a type of digestive system cancer that cannot be removed by surgery or has spread to other parts of the body)
   2. Unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma (G/GEJ: a type of digestive system cancer that cannot be removed by surgery or has spread to other parts of the body)

B. If you have unresectable or metastatic esophageal squamous cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. Tevimbra will be used in combination with platinum (such as cisplatin, oxaliplatin)-containing chemotherapy (medications used to treat cancer) AND your tumor programmed death-ligand 1 (PD-L1: a type of protein) expression is at least 1
      b. Tevimbra will be used as a single agent (given alone) after a prior systemic chemotherapy (cancer treatment that targets the entire body such as paclitaxel, docetaxel, irinotecan) that did NOT include a PD-(L)1 inhibitor (a type of medication such as Opdivo [nivolumab])

C. If you have unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
   3. Tevimbra will be used in combination with platinum (such as cisplatin, oxaliplatin) and fluoropyrimidine-based chemotherapy (such as fluorouracil [5-FU], capecitabine)
   4. Your tumor programmed death-ligand 1 (PD-L1: a type of protein) expression is at least 1

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the treatment of coronavirus disease 2019 (COVID-19) in a hospitalized patient?

   If yes, **do not approve**. [NOTE: This indication is for hospital use only.]
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

TOCILIZUMAB IV (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB IV (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

TOCILIZUMAB IV (PART D)

INITIAL CRITERIA (CONTINUED)

6. Is the request for the treatment of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS) (ICD-10 Z92.850; Group D89.83) and the patient meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRS
   - The patient had a trial of or contraindication to the preferred agent: Tyenne IV (tocilizumab-aazg)

   If yes, **approve for 1 month by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB IV (Actemra)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
      5. Chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS: inflammatory response that can be triggered by a variety of factors such as infections and certain drugs)

   (Initial denial text continued on next page)

TOCILIZUMAB IV (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

(Initial denial text continued on next page)

TOCILIZUMAB IV (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

E. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)

F. If you have chimeric antigen receptor T cell-induced severe or life-threatening cytokine release syndrome, approval also requires:
1. You are 2 years of age or older
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of cytokine release syndrome
3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne IV (tocilizumab-aazg intravenous)

G. NOTE: Actemra will NOT be approved for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized patients

TOCILIZUMAB IV (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of cytokine release syndrome (CRS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) **AND** meet the following criterion?
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB IV (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of SJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB IV (Actemra)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have giant cell arteritis, renewal also requires:
      1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis

RENEWAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

E. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

---

TOCILIZUMAB IV (PART D)

For Part D use only:

TOCILIZUMAB IV (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	CORONAVIRUS DISEASE 2019 (COVID-19) IN HOSPITALIZED PATIENTS
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. SYSTEMIC JUVENILE IDIOPATHIC ARTHRITIS (SJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST, DERMATOLOGIST, OR IMMUNOLOGIST.
Coverage Duration	INITIAL: RA, PJIA, SJIA, GCA: 6 MONTHS. CRS: 1 MONTH. RENEWAL: RA, PJIA, SJIA, GCA: 12 MONTHS.
Other Criteria	INITIAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. GIANT CELL ARTERITIS (GCA): 1) HAS COMPLETED, STARTED, OR WILL SOON START A TAPERING COURSE OF GLUCOCORTICOIDS, AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: RINVOQ. PJIA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ IR, RINVOQ, ORENCIA. SJIA: TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: TYENNE. CYTOKINE RELEASE SYNDROME (CRS): TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: TYENNE IV. RENEWAL: RA, PJIA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, AND 2) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. GCA: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION. SJIA: 1) CONTINUES TO BENEFIT FROM THE MEDICATION, 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: TYENNE, AND 3) NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES FOR THE SAME INDICATION.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

TOCILIZUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.
If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) [e.g., heart failure/fluid overload, drug-induced lung toxicity (cyclophosphamide, methotrexate, ACE-inhibitors), recurrent aspiration (such as from GERD), pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage or ILD caused by another rheumatic disease, such as mixed connective tissue disease (MCTD)]
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Orencia (abatacept)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB SQ (Actemra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
   4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Orencia (abatacept)

(Initial denial text continued on next page)

TOCILIZUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

D. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
3. You do not have other causes of interstitial lung disease (such as heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, angiotensin-converting enzyme [ACE]-inhibitors [class of blood pressure medications], recurrent aspiration [inhaling] such as from gastroesophageal reflux disease [GERD, acid reflux], pulmonary vascular disease [affecting blood vessels in lungs], pulmonary edema [excess fluid in the lungs], pneumonia [type of lung infection], chronic pulmonary thromboembolism [blood clot in lungs], alveolar hemorrhage [bleeding of a part of the lungs], interstitial lung disease caused by another rheumatic [inflammatory] disease such as mixed connective tissue disease [MCTD: a type of autoimmune disorder])
4. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease

(Initial denial text continued on next page)

TOCILIZUMAB SQ (PART D)

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Orencia (abatacept)

F. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)

TOCILIZUMAB SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) **AND** meet the following criterion?
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical meaningful improvement or maintenance in annual rate of decline
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3; Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of SJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the subcutaneous formulations (syringe and pen injector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TOCILIZUMAB SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB SQ (Actemra)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Giant cell arteritis (GCA: a type of inflammatory condition)
   2. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
   3. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have giant cell arteritis, renewal also requires:
   1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis

C. If you have systemic sclerosis-associated interstitial lung disease, renewal also requires:
   1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline
   2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease

D. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

NOTE: For requests for the SQ dosage form of Tyenne, please see the TOCILIZUMAB-AAZG SQ PA guideline.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the treatment of coronavirus disease 2019 (COVID-19) in a hospitalized adult?

    If yes, do not approve. [NOTE: This indication is for hospital use only.]
    DENIAL TEXT: See the initial denial text at the end of the guideline.

    If no, continue to #2.

TOCILIZUMAB-AAZG IV (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Orencia (abatacept)
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB-AAZG IV (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Orencia (abatacept)
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #6.

TOCILIZUMAB-AAZG IV (PART D)

INITIAL CRITERIA (CONTINUED)

6. Is the request for the treatment of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS) (ICD-10 Z92.850; Group D89.83) and the patient meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRS

   If yes, **approve for 1 month by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-AAZG IV (Tyenne)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
      5. Chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS: inflammatory response that can be triggered by a variety of factors such as infections and certain drugs)

   (Initial denial text continued on next page)

TOCILIZUMAB-AAZG IV (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Orencia (abatacept)
   c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

(Initial denial text continued on next page)

TOCILIZUMAB-AAZG IV (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Orencia (abatacept)
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

F. If you have chimeric antigen receptor T cell-induced severe or life-threatening cytokine release syndrome, approval also requires:
1. You are 2 years of age or older
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of cytokine release syndrome

G. **NOTE:** Tyenne will NOT be approved for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized patients.

TOCILIZUMAB-AAZG IV (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of cytokine release syndrome (CRS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) **AND** meet the following criterion?
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.** **APPROVAL TEXT (IF APPLICABLE):** The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB-AAZG IV (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of SJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-AAZG IV (Tyenne)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have giant cell arteritis, renewal also requires:
      1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis

   (Renewal denial text continued on next page)

TOCILIZUMAB-AAZG IV (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

E. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

RATIONALE

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Orencia (abatacept)
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

TOCILIZUMAB-AAZG SQ (PART D)

INITIAL CRITERIA (CONTINUED)

If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TOCILIZUMAB-AAZG SQ (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
     - Orencia (abatacept)
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB-AAZG SQ (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB-AAZG SQ (Tyenne)** requires the following rule(s) be met for approval:

A. You have ONE of the following
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)
   4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
      b. Orencia (abatacept)
      c. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
      d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

C. If you have giant cell arteritis, approval also requires:
   1. You are 18 years of age or older
   2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
   3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

(Initial denial text continued on next page)

TOCILIZUMAB-AAZG SQ (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima
   b. Orencia (abatacept)
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor (TNF) blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as Humira (adalimumab)/Cyltezo/Yuflyma (adalimumab-aaty)/Hadlima])

E. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4 inhibitor) for the treatment of systemic juvenile idiopathic arthritis

TOCILIZUMAB-AAZG SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) **AND** meet the following criterion?
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOCILIZUMAB-AAZG SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) forthe treatment of SJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the SQ formulations (syringe and autoinjector).**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-AAZG SQ (Tyenne)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

   C. If you have giant cell arteritis, renewal also requires:
      1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis

   (Renewal denial text continued on next page)

TOCILIZUMAB-AAZG SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

E. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis

PRIOR AUTHORIZATION GUIDELINES

TOCILIZUMAB-AAZG SQ (PART D)

For Part D use only:

TOCILIZUMAB-AAZG SQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: RHEUMATOID ARTHRITIS (RA), POLYARTICULAR JUVENILE IDIOPATHIC ARTHRITIS (PJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST. SYSTEMIC JUVENILE IDIOPATHIC ARTHRITIS (SJIA): PRESCRIBED BY OR IN CONSULTATION WITH A RHEUMATOLOGIST, DERMATOLOGIST, OR IMMUNOLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: RA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ, RINVOQ, ORENCIA. GIANT CELL ARTERITIS (GCA): 1) HAS COMPLETED, STARTED, OR WILL SOON START A TAPERING COURSE OF GLUCOCORTICOIDS, AND 2) TRIAL OF OR CONTRAINDICATION TO THE PREFERRED AGENT: RINVOQ. PJIA: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING PREFERRED AGENTS: HUMIRA/CYLTEZO/YUFLYMA/HADLIMA, XELJANZ IR, ORENCIA, RINVOQ. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: RA, PJIA, SJIA: CONTINUES TO BENEFIT FROM THE MEDICATION.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M06.9; Groups M05.7, M05.8, M05.9, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

TOFACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- The patient had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
- Therapy is prescribed by or in consultation with a rheumatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #4.

TOFACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of polyarticular course juvenile idiopathic arthritis (pcJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pcJIA

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOFACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOFACITINIB (Xeljanz, Xeljanz XR)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Polyarticular course juvenile idiopathic arthritis (pcJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. You had an inadequate response (drug did not work) or intolerance (side effect) to one or more tumor necrosis factor (TNF) blockers (such as Humira [adalimumab]/Cyltezo/Yuflyma)
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   4. You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
   5. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

C. If you have psoriatic arthritis, approval also requires:
   1. You are 2 years of age or older
   2. You had an inadequate response (drug did not work) or intolerance (side effect) to one or more tumor necrosis factor (TNF) blockers (such as Humira [adalimumab]/Cyltezo/Yuflyma)
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
   4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

(Initial denial text continued on next page)

TOFACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to one or more tumor necrosis factor (TNF) blockers (such as Humira [adalimumab]/Cyltezo/Yuflyma)
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
5. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to one or more tumor necrosis factor (TNF) blockers (such as Humira [adalimumab]/Cyltezo/Yuflyma)
3. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

F. If you have polyarticular course juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to one or more tumor necrosis factor (TNF) blockers (such as Humira [adalimumab]/Cyltezo/Yuflyma)
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular course juvenile idiopathic arthritis (a type of joint condition)

TOFACITINIB (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M06.9; Groups M05.7, M05.8, M05.9, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TOFACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular course juvenile idiopathic arthritis (pcJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pcJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOFACITINIB (Xeljanz, Xeljanz XR)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Polyarticular course juvenile idiopathic arthritis (pcJIA: a type of joint condition)
      5. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   (Renewal denial text continued on next page)

TOFACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

C. If you have psoriatic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have ankylosing spondylitis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)

E. If you have polyarticular course juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular course juvenile idiopathic arthritis (a type of joint condition)

F. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of autosomal dominant polycystic kidney disease (ADPKD) (ICD-10 Q61.2, Q61.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk of rapidly progressing ADPKD (e.g., genetic factors, hypertension, increased kidney size)
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient has confirmed polycystic kidney disease via CT, MRI, or ultrasound
   - The patient does not have end stage renal disease [ESRD] (i.e., receiving dialysis)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOLVAPTAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOLVAPTAN (Jynarque)** requires the following rule(s) be met for approval:

A. You have autosomal dominant polycystic kidney disease (ADPKD: a type of kidney condition)
B. You are 18 years of age or older
C. You are at risk of rapidly progressing ADPKD (such as having genetic factors, hypertension [high blood pressure], increased kidney size)
D. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
E. You have confirmed polycystic kidney disease by CT (computerized tomography), MRI (magnetic resonance imaging), or ultrasound imaging (types of lab imaging tests)
F. You do not have end stage renal disease (ESRD: advanced kidney disease) (You are not receiving dialysis [process of removing excess water, toxins from the blood])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TOPICAL TRETINOIN (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOPICAL TRETINOIN (Atralin, Altreno, Avita, Retin-A, Retin-A Micro)** requires the following rule(s) be met for approval:

A. You have acne vulgaris (a type of skin infection usually called pimples)

B. If the request is for brand Atralin, Avita, Retin-A, Retin-A Micro, approval also requires:

1. You have tried or have a contraindication to (harmful for you to use) a generic topical tretinoin product

C. If the request is for Altreno, approval also requires:

2. You are 9 years of age or older
3. You have tried or have a contraindication to (harmful for you to use) a generic topical tretinoin product

D. Your request is NOT for a cosmetic (not for appearance) diagnosis (such as melasma [freckle-like spots on the skin], photoaging [skin damage from the sun], wrinkles). For other non-cosmetic indications, further review is required.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TORIPALIMAB-TPZI BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision).**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TORIPALIMAB-TPZI BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic or recurrent locally advanced nasopharyngeal carcinoma (NPC) (ICD-10 Group C11) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Loqtorzi will be used for first-line treatment
   - Loqtorzi will be used in combination with cisplatin and gemcitabine

   If yes, **approve for 24 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of recurrent unresectable or metastatic nasopharyngeal carcinoma (NPC) (ICD-10 Group C11) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Loqtorzi will be used as a single agent
   - The patient experienced disease progression on or after a platinum-containing chemotherapy (e.g., cisplatin)

   If yes, **approve for lifetime by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TORIPALIMAB-TPZI BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TORIPALIMAB-TPZI (Loqtorzi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic or recurrent locally advanced nasopharyngeal carcinoma (a type of neck cancer that has spread to other parts of the body or was previously treated and has spread to nearby tissue or lymph nodes)
   2. Recurrent unresectable or metastatic nasopharyngeal carcinoma (a type of neck cancer that was previously treated and unable to be removed by surgery or that has spread to other parts of the body)

B. If you have metastatic or recurrent locally advanced nasopharyngeal carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Loqtorzi will be used as first-line (initial) treatment
   3. Loqtorzi will be used in combination with cisplatin and gemcitabine

C. If you have recurrent unresectable or metastatic nasopharyngeal carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Loqtorzi will be used as a single agent (used alone)
   3. You have experienced disease progression (worsening of disease) on or after a platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TORIPALIMAB-TPZI BvD (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Loqtorzi.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Adbry will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Dupixent (dupilumab), Rinvoq (upadacitinib)

     If yes, continue to #2.
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

TRALOKINUMAB-LDRM (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a trial of or contraindication to **ONE** of the following?
   - High potency topical corticosteroid (e.g., halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Topical PDE-4 inhibitor (e.g., crisaborole [Eucrisa], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., ruxolitinib [Opzelura])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **TRALOKINUMAB-LDRM (Adbry)** requires the following rule(s) be met for approval:
   A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
   B. You are 12 years of age or older
   C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
   D. You will NOT use Adbry concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis
   E. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Dupixent (dupilumab), Rinvoq (upadacitinib)
   F. You have tried or have a contraindication to (harmful for you to use) ONE of the following:
      1. High potency topical corticosteroid (such as halobetasol propionate 0.01% lotion, triamcinolone acetonide 0.5% cream or ointment) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
      2. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
      3. Topical PDE-4 inhibitor (such as Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
      4. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
      5. Topical JAK inhibitor (such as Opzelura [ruxolitinib])

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E or V600K mutation as detected by an FDA-approved test
   - Mekinist will be used as a single agent in a BRAF-inhibitor treatment-naive patient OR in combination with Tafinlar (dabrafenib)

   If yes, continue to #7.
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E mutation as detected by an FDA-approved test
   - Mekinist will be used in combination with Tafinlar (dabrafenib)

   If yes, continue to #7.
   If no, continue to #3.

TRAMETINIB SOLUTION (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E or V600K mutation as detected by an FDA-approved test
   - Mekinist will be used as an adjuvant therapy in combination with Tafinlar (dabrafenib)
   - There is involvement of lymph node(s), following complete resection

   If yes, continue to #7.
   If no, continue to #4.

4. Does the patient have a diagnosis of locally advanced or metastatic anaplastic thyroid cancer (ATC) (ICD-10 C73) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient has no satisfactory locoregional treatment options available

   If yes, continue to #7.
   If no, continue to #5.

5. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient's disease has progressed following prior treatment and has no satisfactory alternative treatment options

   If yes, continue to #7.
   If no, continue to #6.

6. Does the patient have a diagnosis of low-grade glioma (LGG) (ICD-10 D33.2) and meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient requires systemic therapy

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRAMETINIB SOLUTION (PART D)

GUIDELINES FOR USE (CONTINUED)

7. Is the patient unable to swallow Mekinist (trametinib) tablets?

If yes, **approve for 12 months by GPID or GPI-14.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRAMETINIB SOLUTION (Mekinist)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (a type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
   2. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
   3. Melanoma (a type of skin cancer)
   4. Locally advanced or metastatic anaplastic thyroid cancer (ATC: a type of thyroid cancer that has spread to nearby tissue or lymph nodes or has spread to other parts of the body)
   5. Unresectable or metastatic solid tumor (tumor that cannot be removed by surgery or has spread to other parts of the body)
   6. Low-grade glioma (LGG: a type of brain cancer)

B. You are unable to swallow Mekinist (trametinib) tablets

C. If you have unresectable or metastatic melanoma, approval also requires:
   1. You have a BRAF V600E or V600K mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
   2. Mekinist will be used as a single agent in a BRAF-inhibitor treatment-naïve patient (you have not been previously treated for this cancer) OR in combination with Tafinlar (dabrafenib)

D. If you have metastatic non-small cell lung cancer, approval also requires:
   1. You have a BRAF V600E mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
   2. Mekinist will be used in combination with Tafinlar (dabrafenib)

(Denial text continued on next page)

TRAMETINIB SOLUTION (PART D)

GUIDELINES FOR USE (CONTINUED)

E. If you have melanoma, approval also requires:
1. You have a BRAF V600E or V600K mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
2. Mekinist will be used as adjuvant (add-on) therapy in combination with Tafinlar (dabrafenib)
3. There is involvement of lymph node(s), following complete resection (surgical removal)

F. If you have locally advanced or metastatic anaplastic thyroid cancer, approval also requires:
1. You have a BRAF V600E mutation (abnormal change in gene)
2. Mekinist will be used in combination with Tafinlar (dabrafenib)
3. You do not have any satisfactory locoregional treatment options available (treatments that are focused on the affected area)

G. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You are 1 year of age or older
2. You have a BRAF V600E mutation (abnormal change in gene)
3. Mekinist will be used in combination with Tafinlar (dabrafenib)
4. Your disease has progressed following prior treatment and has no satisfactory alternative treatment options

H. If you have low-grade glioma, approval also requires:
1. You are 1 to 17 years of age
2. You have a BRAF V600E mutation (abnormal change in gene)
3. Mekinist will be used in combination with Tafinlar (dabrafenib)
4. You require systemic therapy (treatment that targets the entire body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

TRASTUZUMAB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TRASTUZUMAB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for Herceptin
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Herzuma (trastuzumab-pkrb), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dttb), Trazimera (trastuzumab-qyyp)

   If yes, continue to #2.
   If no, continue to #4.

2. Will Herceptin be used as adjuvant treatment and the patient meets **ONE** of the following criteria?
   - Herceptin will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - Herceptin will be used as part of a treatment regimen with docetaxel and carboplatin
   - Herceptin will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TRASTUZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the patient's cancer metastatic and does the patient meet **ONE** of the following criteria?
   - Herceptin will be used in combination with paclitaxel
   - Herceptin will be used as a single agent in a patient who has received one or more chemotherapy regimens for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for Herceptin
   - Herceptin will be used in combination with cisplatin and Xeloda (capecitabine) or 5-fluorouracil
   - The patient has not received prior treatment for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRASTUZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB (Herceptin)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for Herceptin
   3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Herzuma (trastuzumab-pkrb), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dttb), Trazimera (trastuzumab-qyyp)
   4. You meet ONE of the following:
      a. Herceptin will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Herceptin will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Herceptin will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Herceptin will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medication that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Herceptin will be used in combination with paclitaxel
         ii. Herceptin will be used as a single medication if you have received one or more chemotherapy regimens for metastatic disease (disease that has spread to other parts of the body)

TRASTUZUMAB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:

1. You are 18 years of age or older
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for Herceptin
3. Herceptin will be used in combination with cisplatin and Xeloda (capecitabine) or 5-fluorouracil
4. You have not received prior treatment for metastatic disease (disease that has spread to other parts of the body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Herceptin.
The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

TRASTUZUMAB-ANNS BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for a trastuzumab product
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Herzuma (trastuzumab-pkrb), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dttb), Trazimera (trastuzumab-qyyp)

   If yes, continue to #2.
   If no, continue to #4.

2. Will Kanjinti be used as adjuvant treatment and the patient meets **ONE** of the following criteria?
   - Kanjinti will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - Kanjinti will be used as part of a treatment regimen with docetaxel and carboplatin
   - Kanjinti will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TRASTUZUMAB-ANNS BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-ANNS (Kanjinti)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Herzuma (trastuzumab-pkrb), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dttb), Trazimera (trastuzumab-qyyp)
   4. You meet ONE of the following:
      a. Kanjinti will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Kanjinti will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Kanjinti will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Kanjinti will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medication that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Kanjinti will be used in combination with paclitaxel
         ii. Kanjinti will be used as a single medication if you have received one or more chemotherapy regimens for metastatic disease (disease that has spread to other parts of the body)

TRASTUZUMAB-DKST BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-DKST (Ogivri)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   3. You meet ONE of the following:
      a. Ogivri will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Ogivri will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Ogivri will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Ogivri will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Ogivri will be used in combination with paclitaxel
         ii. Ogivri will be used as a single medication if you have received one or more chemotherapy regimens (type of cancer treatment) for metastatic disease (disease that has spread to other parts of the body)

(Denial text continued on next page)

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

TRASTUZUMAB-DTTB BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered via an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TRASTUZUMAB-DTTB BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for a trastuzumab product

   If yes, continue to #2.
   If no, continue to #4.

2. Will Ontruzant be used as adjuvant treatment and the patient meets **ONE** of the following criteria?
   - Ontruzant will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - Ontruzant will be used as part of a treatment regimen with docetaxel and carboplatin
   - Ontruzant will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TRASTUZUMAB-DTTB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Is the patient's breast cancer metastatic and does the patient meet **ONE** of the following criteria?
   - Ontruzant will be used in combination with paclitaxel
   - Ontruzant will be used as a single agent in a patient who has received one or more chemotherapy regimens for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for a trastuzumab product
   - Ontruzant will be used in combination with cisplatin and Xeloda (capecitabine) or 5-fluorouracil
   - The patient has not received prior treatment for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRASTUZUMAB-DTTB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB- DTTB (Ontruzant)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   3. You meet ONE of the following:
      a. Ontruzant will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Ontruzant will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Ontruzant will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Ontruzant will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Ontruzant will be used in combination with paclitaxel
         ii. Ontruzant will be used as a single medication if you have received one or more chemotherapy regimens (type of cancer treatment) for metastatic disease (disease that has spread to other parts of the body)

(Denial text continued on the next page)

GUIDELINES FOR USE (CONTINUED)

C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:

1. You are 18 years of age or older
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
2. Ontruzant will be used in combination with cisplatin and Xeloda (capecitabine) or 5-fluorouracil
3. You have not received prior treatment for metastatic disease (disease that has spread to other parts of the body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ontruzant.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

TRASTUZUMAB-PKRB BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-PKRB (Herzuma)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   3. You meet ONE of the following:
      a. Herzuma will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Herzuma will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Herzuma will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Herzuma will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Herzuma will be used in combination with paclitaxel
         ii. Herzuma will be used as a single medication if you have received one or more chemotherapy regimens (type of cancer treatment) for metastatic disease (disease that has spread to other parts of the body)

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:

1. You are 18 years of age or older
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
3. Herzuma will be used in combination with cisplatin and Xeloda (capecitabine) or 5-fluorouracil
4. You have not received prior treatment for metastatic disease (disease that has spread to other parts of the body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Herzuma.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

TRASTUZUMAB-QYYP BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient has HER2-overexpressing (HER2-positive) cancer, as detected by an FDA-approved companion diagnostic test for a trastuzumab product

   If yes, continue to #2.
   If no, continue to #4.

2. Will Trazimera be used as adjuvant therapy and the patient meets **ONE** of the following criteria?
   - Trazimera will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - Trazimera will be used as part of a treatment regimen with docetaxel and carboplatin
   - Trazimera will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

TRASTUZUMAB-QYYP BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-QYYP (Trazimera)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   2. You meet ONE of the following:
      a. Trazimera will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Trazimera will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Trazimera will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Trazimera will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment) such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your breast cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
         i. Trazimera will be used in combination with paclitaxel
         ii. Trazimera will be used as a single medication if you have received one or more chemotherapy regimens (type of cancer treatment) for metastatic disease (disease that has spread to other parts of the body)

(Denial text continued on next page)

TRASTUZUMAB-STRF BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-STRF (Hercessi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Breast cancer
   2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive cancer that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
   3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Herzuma (trastuzumab-pkrb), Ogivri (trastuzumab-dkst), Ontruzant (trastuzumab-dttb), Trazimera (trastuzumab-qyyp)
   4. You meet ONE of the following:
      a. Hercessi will be used as adjuvant (additional) treatment, and you meet ONE of the following:
         i. Hercessi will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         ii. Hercessi will be used as part of a treatment plan with docetaxel and carboplatin
         iii. Hercessi will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment) such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
      b. Your cancer is metastatic (has spread to other parts of the body), and you meet ONE of the following:
         i. Hercessi will be used in combination with paclitaxel
         ii. Hercessi will be used as a single medication if you have received at least one chemotherapy regimen (type of cancer treatment) for metastatic disease (disease that has spread to other parts of the body)

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of major depressive disorder (MDD) (ICD-10 Groups F32, F33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to OR is unable to swallow trazodone tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRAZODONE (Raldesy)** requires the following rule(s) be met for approval:
   A. You have major depressive disorder (a type of mental illness)
   B. You are 18 years of age or older
   C. You have a contraindication to (harmful for you to use) OR are unable to swallow trazodone tablets

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable hepatocellular carcinoma (uHCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Imjudo will be used in combination with Imfinzi (durvalumab)
   - The patient has not received previous treatment with Imjudo

   If yes, **approve for 30 days by HICL or GPI-10 for #1 fill.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient does not have sensitizing epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - Imjudo will be used in combination with Imfinzi (durvalumab) and platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient has not received a total of 5 doses of Imjudo

   If yes, **approve for 5 months by HICL or GPI-10 for #5 fills.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TREMELIMUMAB-ACTL (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREMELIMUMAB-ACTL (Imjudo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable hepatocellular carcinoma (uHCC: a type of liver cancer that cannot be removed by surgery)
   2. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)

B. If you have unresectable hepatocellular carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Imjudo will be used in combination with Imfinzi (durvalumab)
   3. You have not received previous treatment with Imjudo

C. If you have metastatic non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. You do not have sensitizing epidermal growth factor receptor (EGFR: a type of protein) mutations or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (a type of abnormal gene)
   3. Imjudo will be used in combination with Imfinzi (durvalumab) and platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin)
   4. You have not received a total of 5 doses of Imjudo

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Imjudo.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1)(ICD-10 I27.0, Group I27.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, continue to #4.

2. Is the PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, continue to #3.
   If no, do no approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TREPROSTINIL DPI (PART D)

INITIAL CRITERIA (CONTINUED)

3. Has the patient had a trial of or contraindication to **TWO** of the following agents from different drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor indicated for PAH (e.g., Revatio [sildenafil], Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Veletri [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of pulmonary hypertension associated with interstitial lung disease (PH-ILD) (WHO Group 3) (ICD-10 I27.23) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #5.
   If no, do no approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the PH-ILD diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**

TREPROSTINIL DPI (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREPROSTINIL DPI (Tyvaso DPI)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   2. Pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) (WHO Group 3: a way to classify the severity of disease)

B. If you have pulmonary arterial hypertension (WHO Group 1), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units
   3. You have tried or have a contraindication to (harmful for you to use) TWO of the following medications from different drug classes:
      a. Oral endothelin receptor antagonist (such as Tracleer [bosentan], Letairis [ambrisentan], Opsumit [macitentan])
      b. Oral phosphodiesterase-5 inhibitor indicated for PAH (such as Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil], Revatio [sildenafil])
      c. Oral cGMP stimulator (such as Adempas [riociguat])
      d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Veletri [epoprostenol], Remodulin [treprostinil])

TREPROSTINIL INHALED (PART D)

RATIONALE

This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.

50.16.2 – Inhalation Durable Medical Equipment (DME) Supply Drugs (Rev. 18, 09-17-18)

Medicare Part B covers certain inhalation drugs, such as Albuterol and Levalbuterol nebulizer solutions, as supplies under the DME benefit. The DME benefit, however, is not available to beneficiaries residing in long-term care facilities (i.e. Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities). Consequently, if the beneficiary is not on a Part A stay in one of these facilities, these inhalation drugs can be covered under Medicare Part D. CMS permits Part D sponsors to rely on a patient residence code of "3" or "9" on a pharmacy claim for determining when such inhalation drugs may be covered under Part D. Moreover, we expect that sponsors will only pay claims for these products when the pharmacy claim includes these specified patient residence codes regardless of any prior coverage determination based upon a prescriber statement indicating that the beneficiary resides in a long-term care facility (i.e. the prescriber statement and patient residence code must be aligned). For further information, please refer to the Prescribing Information and/or Drug Monograph for Tyvaso.

PRIOR AUTHORIZATION GUIDELINES

TREPROSTINIL INHALED (PART D)

For Part D use only:

TREPROSTINIL INHALED (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PULMONARY ARTERIAL HYPERTENSION (PAH), PULMONARY HYPERTENSION-INTERSTITIAL LUNG DISEASE (PH-ILD): DIAGNOSIS CONFIRMED BY RIGHT HEART CATHETERIZATION WITH THE FOLLOWING PARAMETERS: 1) MEAN PULMONARY ARTERY PRESSURE (PAP) GREATER THAN 20 MMHG, 2) PULMONARY CAPILLARY WEDGE PRESSURE (PCWP) OF 15 MMHG OR LESS, AND 3) PULMONARY VASCULAR RESISTANCE (PVR) GREATER THAN 2 WOOD UNITS.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PAH, PH-ILD: PRESCRIBED BY OR IN CONSULTATION WITH A CARDIOLOGIST OR PULMONOLOGIST.
Coverage Duration	INITIAL/RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PAH: TRIAL OF OR CONTRAINDICATION TO TWO OF THE FOLLOWING AGENTS FROM DIFFERENT DRUG CLASSES: 1) FORMULARY VERSION OF AN ORAL ENDOTHELIN RECEPTOR ANTAGONIST, 2) FORMULARY VERSION OF AN ORAL PHOSPHODIESTERASE TYPE-5 INHIBITOR FOR PAH, 3) FORMULARY VERSION OF AN ORAL CGMP STIMULATOR, 4) FORMULARY VERSION OF AN IV/SQ PROSTACYCLIN. THIS DRUG MAY BE COVERED UNDER MEDICARE PART B OR D DEPENDING UPON THE CIRCUMSTANCES.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #6.
   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #6.
   If no, continue to #5.

TREPROSTINIL INJECTABLE BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override)**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by GPID or GPI-14 for all strengths under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**
   If no, continue to #7.

7. Is the drug administered using an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by GPID or GPI-14 for all strengths under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by GPID or GPI-14 for all strengths under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

TREPROSTINIL INJECTABLE BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units (WU)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the request for continuation of Remodulin (treprostinil) therapy from hospital discharge?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

TREPROSTINIL INJECTABLE BvD (PART D)

INITIAL CRITERIA (CONTINUED)

4. Is the request for a new start of Remodulin (treprostinil) therapy **AND** the patient meets the following criterion?
   - The physician has indicated the patient is intermediate or high risk

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Is the request for a new start of Remodulin (treprostinil) therapy and the patient had a trial of or contraindication to **TWO** of the following agents from different drug classes?
   - Formulary version of an oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Formulary version of an oral phosphodiesterase-5 inhibitor indicated for PAH (e.g., Revatio [sildenafil], Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil])
   - Formulary version of an oral cGMP stimulator (e.g., Adempas [riociguat])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TREPROSTINIL INJECTABLE (Remodulin)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)

   (Initial denial text continued on next page)

TREPROSTINIL INJECTABLE BvD (PART D)

INITIAL CRITERIA (CONTINUED)

C. Your pulmonary arterial hypertension diagnosis is confirmed by right heart catheterization (a test used to measure how well the heart is pumping) with ALL of the following lab values:
   1. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension) greater than 20 mmHg
   2. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension) of 15 mmHg or less
   3. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension) greater than 2 Wood units

D. You meet ONE of the following:
   1. The request is for continuation of Remodulin (treprostinil) therapy from hospital discharge
   2. The request is for a new start of Remodulin (treprostinil) AND your doctor has indicated you are intermediate or high risk
   3. The request is for a new start of Remodulin (treprostinil) AND you have tried or have a contraindication to (harmful for you to use) TWO of the following medications from different medication classes:
      a. Formulary version of an oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
      b. Formulary version of an oral phosphodiesterase-5 inhibitor indicated for PAH (such as Revatio [sildenafil], Adcirca [tadalafil], Alyq [tadalafil], Tadliq [tadalafil])
      c. Formulary version of an oral cGMP stimulator (such as Adempas [riociguat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TREPROSTINIL INJECTABLE BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1)(ICD-10 I27.0; Group I27.2)?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TREPROSTINIL INJECTABLE (Remodulin)** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or drug monograph for Remodulin.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of pulmonary hypertension associated with interstitial lung disease (PH-ILD) (WHO Group 3) (ICD-10 I27.23) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the patient's PH-ILD diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve all strengths for 12 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TREPROSTINIL-YUTREPIA (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREPROSTINIL-YUTREPIA** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   2. Pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) (World Health Organization [WHO] Group 3: a way to classify the severity of disease)

B. If you have pulmonary arterial hypertension (WHO Group 1), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. Your pulmonary arterial hypertension diagnosis is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary hypertension) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary hypertension) 15 mmHg or less
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary hypertension) greater than 2 Wood units
   3. You have tried or have a contraindication to (harmful for you to use) TWO of the following medications from different medication classes:
      a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
      b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
      c. Oral cGMP stimulator (such as Adempas [riociguat])
      d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])

TREPROSTINIL-YUTREPIA (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have pulmonary hypertension associated with interstitial lung disease (WHO Group 3), approval also requires:

1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
2. Your pulmonary hypertension diagnosis is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary hypertension) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary hypertension) 15 mmHg or less
   c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary hypertension) greater than 2 Wood units

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TREPROSTINIL-YUTREPIA (PART D)

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2)
   - Pulmonary hypertension associated with interstitial lung disease (PH-ILD) (WHO Group 3) (ICD-10 I27.23)

   If yes, **approve all strengths for 12 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TREPROSTINIL-YUTREPIA** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
      2. Pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) (World Health Organization [WHO] Group 3: a way to classify the severity of disease)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TRIFLURIDINE/TIPIRACIL (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 C16.0; Group C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received treatment with at least two prior lines of chemotherapy that included a fluoropyrimidine, a platinum, either a taxane or irinotecan, and if appropriate, HER2/neu-targeted therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIFLURIDINE/TIPIRACIL (Lonsurf)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Metastatic colorectal cancer (a type of digestive system cancer that has spread to other parts of the body)
      2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

   B. If you have metastatic colorectal cancer, approval also requires:
      1. You are 18 years of age or older
      2. Lonsurf will be used as a single agent OR in combination with bevacizumab
      3. You had treatment with fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapy (drugs used to treat cancer), and an anti-VEGF biological therapy (such as Zaltrap [ziv-aflibercept], Cyramza [ramucirumab])
      4. If your metastatic colorectal cancer is RAS wild-type (a type of gene), you also had treatment with an anti-EGFR agent (such as Erbitux [cetuximab], Vectibix [panitumumab])

   C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
      1. You are 18 years of age or older
      2. You had treatment with at least two prior lines of chemotherapy (drugs used to treat cancer) that included a fluoropyrimidine, a platinum, either a taxane or irinotecan, and if appropriate, HER2 (type of gene)/neu-targeted therapy

The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a long-chain fatty acid oxidation disorder (LC-FAOD) (ICD-10 Group E71.31) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist or physician specialist in medical genetics/inherited metabolic disorders
   - The patient is symptomatic (e.g., rhabdomyolysis, cardiomyopathy) for LC-FAOD

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the LC-FAOD diagnosis confirmed by **TWO** of the following criteria?
   - The patient has disease-specific elevations of acylcarnitines on a newborn blood spot or in plasma
   - The patient has low enzyme activity in cultured fibroblasts
   - The patient has one or more known pathogenic mutations in *CPT2, ACADVL, HADHA, or HADHB*

   If yes, **approve for 4 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TRIHEPTANOIN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRIHEPTANOIN (Dojolvi)** requires the following rule(s) be met for approval:

A. You have a long-chain fatty acid oxidation disorder (LC-FAOD: a type of rare genetic disorder)
B. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions) or physician specialist in medical genetics/inherited metabolic disorders
C. You are symptomatic for LC-FAOD (such as having rhabdomyolysis [break down of muscle tissue] or cardiomyopathy [disease of the heart muscle])
D. Your LC-FAOD diagnosis is confirmed by TWO of the following:
    1. You have disease-specific elevations of acylcarnitines (a type of carrier for fatty acids) on a newborn blood spot (a type of laboratory test) or in plasma (blood)
    2. You have low enzyme activity in cultured fibroblasts (a type of cell found in the body)
    3. You have one or more known pathogenic mutations in CPT2, ACADVL, HADHA, or HADHB (types of gene mutations)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TRIHEPTANOIN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of a long-chain fatty acid oxidation disorder (LC-FAOD) (ICD-10 Group E71.31) **AND** meet the following criterion?
   - The patient has had a positive clinical response (e.g., improved exercise tolerance) or stabilization of clinical status compared to baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIHEPTANOIN (Dojolvi)** requires the following rule(s) be met for renewal:
   A. You have a long-chain fatty acid oxidation disorder (LC-FAOD: a type of rare genetic disorder)
   B. You have had a positive clinical response (such as improved exercise tolerance), or stabilization of clinical status compared to baseline

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Dojolvi.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of extensive-stage small cell lung cancer (ES-SCLC) and meet **ALL** of the following?
   - The patient is 18 years of age or older
   - Cosela is being used to decrease the incidence of chemotherapy-induced myelosuppression
   - Cosela will be administered prior to a platinum/etoposide-containing regimen or topotecan-containing regimen

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRILACICLIB (Cosela)** requires the following rule(s) be met for approval:
   A. You have extensive-stage small cell lung cancer (a type of lung cancer)
   B. You are 18 years of age or older
   C. Cosela is being used to decrease the incidence of chemotherapy-induced myelosuppression (decreased bone marrow activity causing fewer red blood cells, white blood cells, and platelets)
   D. Cosela will be given prior to a platinum/etoposide-containing regimen or topotecan-containing regimen (types of cancer treatment)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TRIPTORELIN-TRIPTODUR BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Is the request for a male patient who meets **ALL** of the following criteria?
   - The patient has an elevated level of luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient is at Tanner stage 2 or above for genital development and pubic hair growth

   If yes, **approve for 12 months by GPID or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIPTORELIN-TRIPTODUR** requires the following rule(s) be met for approval:
   A. You have central precocious puberty (CPP: early sexual development in children)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. If you are a female, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 8 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for breast development and pubic hair growth
   E. If you are a male, approval also requires:
      1. You have a high level of luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      2. You are/were younger than 9 years of age when your condition started
      3. You are at Tanner stage 2 or above (scale of physical measurements of development based on external sex characteristics) for genital development and pubic hair growth

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TUCATINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TUCATINIB (Tukysa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced unresectable or metastatic breast cancer (cancer that cannot be removed by surgery or has spread to other parts of the body)
   2. Unresectable or metastatic colorectal cancer (a type of digestive cancer that cannot be removed by surgery or has spread to other parts of the body)

B. If you have advanced unresectable or metastatic breast cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   3. You have received at least one anti-HER2-based treatment (such as trastuzumab, trastuzumab with pertuzumab) for metastatic (has spread to other parts of the body) disease
   4. Tukysa will be used in combination with trastuzumab and capecitabine

C. If you have unresectable or metastatic colorectal cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your colorectal cancer is RAS-wild type (a type of gene), human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   3. Your cancer has progressed (worsened) following treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (medications used to treat cancer)
   4. Tukysa will be used in combination with trastuzumab

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

UBLITUXIMAB-XIIY BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

If yes, **Refer to plan. (The health plan makes the final payment determination decision)**

- **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
- **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PLUS OPEN DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

UBLITUXIMAB-XIIY BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial and failure of or contraindication to TWO agents indicated for relapsing forms of MS (e.g., Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: **Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **UBLITUXIMAB-XIIY (Briumvi)** requires the following rules be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), and active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older
   C. You have tried and failed (drug did not work) or have a contraindication to (harmful foryou to use) TWO medications indicated for relapsing forms of MS (such as Tecfidera [dimethyl fumarate], Vumerity [diroximel fumarate])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

UBROGEPANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **UBROGEPANT (Ubrelvy)** requires the following rule(s) be met for approval:

A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
B. You are 18 years of age or older
C. You will NOT use Ubrelvy concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Zavzpret [zavegepant]) for acute treatment of migraines
D. You have tried or have a contraindication to (harmful for you to use) ONE triptan (such as Maxalt [rizatriptan], Imitrex [sumatriptan], almotriptan)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

UBROGEPANT (PART D)

RENEWAL CRITERIA

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) **AND** the patient meets the following criterion?
   - Ubrelvy will NOT be used concurrently with other cGRP inhibitors (e.g., Zavzpret [zavegepant]) for acute treatment of migraines

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (e.g., Migraine Assessment of Current Therapy [Migraine-ACT])
   - Therapy works consistently in the majority of migraine attacks

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **UBROGEPANT (Ubrelvy)** requires the following rule(s) be met for renewal:
   A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
   B. You will not use Ubrelvy concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Zavzpret [zavegepant]) for acute treatment of migraines
   C. You meet ONE of the following:
      1. You have experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (assessment tool used to help guide treatment such as Migraine Assessment of Current Therapy [MIGRAINE-ACT])
      2. Treatment works consistently in the majority of migraine attacks

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient had a trial of or contraindication to 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug) (e.g., methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine)
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #2.

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Enbrel [etanercept])
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
- Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Opzelura (ruxolitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

If yes, continue to #4.
If no, continue to #5.

4. Did the patient have a trial of or contraindication to **ONE** of the following?
- Topical corticosteroid (e.g., hydrocortisone, clobetasol propionate, halobetasol propionate)
- Topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])
- Topical PDE-4 inhibitor (e.g., Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
- Topical AhR agonist (e.g., Vtama [tapinarof])
- Topical JAK inhibitor (e.g., Opzelura [ruxolitinib])

If yes, **approve for 6 months by HICL or GPI-10.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Humira [adalimumab]/Cyltezo/Yuflyma), OR has received at least one approved systemic therapy (e.g., Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Humira [adalimumab]/Cyltezo/Yuflyma), OR has received at least one approved systemic therapy (e.g., Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #7.

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #8.

8. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Cimzia [certolizumab pegol])
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient has C-reactive protein (CRP) levels above the upper limit of normal, OR has sacroiliitis on magnetic resonance imaging (MRI)
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had a trial of or contraindication to an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #9.

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had an inadequate response or intolerance to at least one tumor necrosis factor (TNF) blocker (e.g., Humira [adalimumab]/Cyltezo/Yuflyma)
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
    - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GCA

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **UPADACITINIB (Rinvoq)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Ankylosing spondylitis (AS: a type of joint condition)
   7. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   8. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
   9. Giant cell arteritis (GCA: a type of inflammatory condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. You had an inadequate response (drug did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Humira [adalimumab]/Cyltezo/Yuflyma)
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   4. You have tried or have a contraindication to (harmful for you to use) 3 months of treatment with ONE conventional synthetic DMARD (disease-modifying antirheumatic drug, such as methotrexate at a dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine
   5. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have psoriatic arthritis, approval also requires:
   1. You are 2 years of age or older
   2. You had an inadequate response (drug did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Enbrel [etanercept])
   3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
   4. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe atopic dermatitis, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with other systemic biologics (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Opzelura (ruxolitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)] for the treatment of atopic dermatitis
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following:
   a. Topical corticosteroid (such as hydrocortisone, clobetasol propionate, halobetasol propionate)
   b. Topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])
   c. Topical PDE-4 inhibitor (such as Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
   d. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
   e. Topical JAK inhibitor (such as Opzelura [ruxolitinib])

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (medication did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Humira [adalimumab]/Cyltezo/Yuflyma), OR you have received at least one approved systemic therapy (treatment that targets the entire body such as Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable (not recommended)
3. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
4. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (medication did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Humira [adalimumab]/Cyltezo/Yuflyma), OR you have received at least one approved systemic therapy (treatment that targets the entire body such as Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable (not recommended)
3. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
4. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

G. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Humira [adalimumab]/Cyltezo/Yuflyma)
3. Therapy is prescribed by or in consultation with a rheumatologist (type of immune system doctor)
4. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
5. You have tried or have a contraindication to (harmful for you to use) an NSAID (nonsteroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

(Initial denial text continued on next page)

UPADACITINIB (PART D)

INITIAL CRITERIA (CONTINUED)

H. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Cimzia [certolizumab pegol])
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. Your C-reactive protein (CRP: a measure of how much inflammation is in the body) levels are above the upper limit of normal, OR you have sacroiliitis (inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: type of imaging lab)
5. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
6. You have tried or have a contraindication to (harmful for you to use) an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

I. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. You had an inadequate response (drug did not work) or intolerance (side effect) to at least one tumor necrosis factor (TNF) blocker (such as Humira [adalimumab]/Cyltezo/Yuflyma)
3. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
4. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

J. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment giant cell arteritis

UPADACITINIB (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

UPADACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Opzelura (ruxolitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #7.

UPADACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #8.

8. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #9.

9. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.5, M31.6) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

UPADACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **UPADACITINIB (Rinvoq)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   5. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition in children)
   6. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   7. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   8. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   9. Giant cell arteritis (GCA: a type of inflammatory condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis

C. If you have psoriatic arthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

E. If you have non-radiographic axial spondyloarthritis, renewal also requires:
   1. You continue to benefit from the medication
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis

(Renewal denial text continued on next page)

UPADACITINIB (PART D)

RENEWAL CRITERIA (CONTINUED)

F. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You continue to benefit from the medication
2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis

G. If you have moderate to severe atopic dermatitis, renewal also requires:
1. You have shown improvement while on therapy
2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Opzelura (ruxolitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis

H. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

I. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

J. If you have giant cell arteritis, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment giant cell arteritis

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary orotic aciduria (HOA) (ICD-10 E79.89) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the HOA diagnosis confirmed by **ALL** of the following criteria?
   - The patient has a genetic mutation in the uridine monophosphate synthase (UMPS) gene
   - The patient has an elevated urine orotic acid level according to an age-specific reference range

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

URIDINE (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **URIDINE (Xuriden)** requires the following rule(s) be met for approval:

A. You have hereditary orotic aciduria (HOA: a type of rare genetic disorder)
B. Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases
C. Your HOA diagnosis is confirmed by ALL of the following:
    1. You have a genetic mutation in the uridine monophosphate synthase (UMPS) gene (a type of gene)
    2. You have elevated urine orotic acid levels (high levels of a type of substance in the urine) according to an age-specific reference range

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

USTEKINUMAB-AAUZ SQ (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

USTEKINUMAB-AAUZ SQ (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **USTEKINUMAB-AAUZ SQ** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Psoriatic arthritis (PsA: a type of skin or joint condition)
      2. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have psoriatic arthritis, approval also requires:
      1. You are 6 years of age or older
      2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
      3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   (Initial denial text continued on next page)

USTEKINUMAB-AAUZ SQ (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, scalp, or face
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

USTEKINUMAB-AAUZ SQ (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

USTEKINUMAB-AAUZ SQ (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **USTEKINUMAB-AAUZ SQ** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Psoriatic arthritis (PsA: a type of skin or joint condition)
      2. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   C. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

USTEKINUMAB-AAUZ SQ (PART D)

For Part D use only:

USTEKINUMAB-AAUZ SQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: PSA, PSO: CONTINUES TO BENEFIT FROM THE MEDICATION.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding for Selarsdi (ustekinumab-aekn) intravenous infusion route.

Requests for subcutaneous (SC/SQ) Selarsdi (ustekinumab-aekn) do not require Payment Determination.

1. Is the request for intravenous (IV) infusion of Selarsdi for the treatment of moderate tosevere Crohn's disease (CD) or moderate to severe ulcerative colitis (UC)?

   If yes, continue to #2.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

2. Is this a pharmacy call?

   If yes, continue to #4.
   If no, continue to #3.

3. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #4.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

4. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #7.
   If no, continue to #5.

5. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #7.
   If no, continue to #6.

CONTINUED ON NEXT PAGE

USTEKINUMAB-AEKN (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

7. Is the intravenous infusion administered via an external infusion pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve Selarsdi 130 mg/26 mL (for the induction dose) for 12 months by GPID or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

USTEKINUMAB-AEKN (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes**, approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #3.
   If no, continue to #4.

USTEKINUMAB-AEKN (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10 for all formulations.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

USTEKINUMAB-AEKN (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10 for all formulations.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **USTEKINUMAB-AEKN (Selarsdi)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Psoriatic arthritis (PsA: a type of skin or joint condition)
      2. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have psoriatic arthritis, approval also requires:
      1. You are 6 years of age or older
      2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
      3. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

USTEKINUMAB-AEKN (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, scalp, or face
4. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

USTEKINUMAB-AEKN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient continues to benefit from the medication
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

USTEKINUMAB-AEKN (PART D)

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Selarsdi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **USTEKINUMAB-AEKN (Selarsdi)** requires the following rules be met for renewal:

   A. You have ONE of the following:
      1. Psoriatic arthritis (PsA: a type of skin or joint condition)
      2. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have psoriatic arthritis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   C. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You continue to benefit from the medication
      2. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

   (Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Selarsdi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Selarsdi.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

USTEKINUMAB-AEKN (PART D)

For Part D use only:

USTEKINUMAB-AEKN IV (PART D) USTEKINUMAB-AEKN SQ (PART D)	
Covered Uses	ALL FDA APPROVED INDICATIONS NOT OTHERWISE EXCLUDED FROM PART D.
Exclusion Criteria	N/A
Required Medical Information	INITIAL: PLAQUE PSORIASIS (PSO): PSORIASIS COVERING 3 PERCENT OR MORE OF BODY SURFACE AREA OR PSORIATIC LESIONS AFFECTING THE HANDS, FEET, GENITAL AREA, SCALP OR FACE.
Age Restrictions	N/A
Prescriber Restrictions	INITIAL: PSORIATIC ARTHRITIS (PSA): PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST OR RHEUMATOLOGIST. PSO: PRESCRIBED BY OR IN CONSULTATION WITH A DERMATOLOGIST. CROHNS DISEASE (CD), ULCERATIVE COLITIS (UC): PRESCRIBED BY OR IN CONSULTATION WITH A GASTROENTEROLOGIST.
Coverage Duration	INITIAL: 6 MONTHS. RENEWAL: 12 MONTHS.
Other Criteria	INITIAL: PSO: 1) AT LEAST A 3 MONTH TRIAL OF ONE ORAL IMMUNOSUPPRESSANT (CYCLOSPORINE, METHOTREXATE, TACROLIMUS) OR PUVA (PHOTOTHERAPY), 2) CONTRAINDICATION OR INTOLERANCE TO BOTH IMMUNOSUPPRESSANT AND PUVA, OR 3) PATIENT IS SWITCHING FROM A DIFFERENT BIOLOGIC, PDE-4 INHIBITOR, OR JAK INHIBITOR FOR THE SAME INDICATION. INITIAL/RENEWAL: ALL INDICATIONS: NO CONCURRENT USE WITH ANOTHER SYSTEMIC BIOLOGIC OR TARGETED SMALL MOLECULES (E.G., JAK INHIBITOR, PDE-4 INHIBITOR) FOR THE SAME INDICATION. RENEWAL: PSA, PSO: CONTINUES TO BENEFIT FROM THE MEDICATION.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding for Yesintek (ustekinumab-kfce) intravenous infusion route.

Requests for subcutaneous (SC/SQ) Yesintek (ustekinumab-kfce) do not require Payment Determination.

1. Is the request for intravenous (IV) infusion of Yesintek for the treatment of moderate to severe Crohn's disease (CD) or moderate to severe ulcerative colitis (UC)?

   If yes, continue to #2.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

2. Is this a pharmacy call?

   If yes, continue to #4.
   If no, continue to #3.

3. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #4.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

4. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, continue to #7.
   If no, continue to #5.

5. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, continue to #7.
   If no, continue to #6.

USTEKINUMAB-KFCE (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

6. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

7. Is the intravenous infusion administered via an external infusion pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve Yesintek 130 mg/26 mL (for the induction dose) for 12 months by GPID or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

USTEKINUMAB-KFCE (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve for 6 months by HICL or GPI-10.**
APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

If no, continue to #2.

USTEKINUMAB-KFCE (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, scalp, or face
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy)
   - The patient has a contraindication or intolerance to both immunosuppressant and PUVA (phototherapy)
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10 for all formulations**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

USTEKINUMAB-KFCE (PART D)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10 for all formulations**.
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **USTEKINUMAB-KFCE (Yesintek)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Psoriatic arthritis (PsA: a type of skin or joint condition)
      2. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have psoriatic arthritis, approval also requires:
      1. You are 6 years of age or older
      2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (skin doctor)
      3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

USTEKINUMAB-KFCE (PART D)

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor)
3. You have psoriasis covering 3% or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, scalp, or face
4. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
5. You meet ONE of the following:
   a. You have had at least a 3-month trial of one oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months under Part D for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

USUALLY NON SELF-ADMINISTERED DRUGS (UNSAD) BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

4. Will the patient or caregiver pick up the medication from the pharmacy OR will the medication be shipped directly to the member, who then brings it to the healthcare provider's clinic/office for administration?

   If yes, **approve for 12 months under Part D for the requested drug. Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enter any override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months under Part B for the requested drug.**
   Please note: Multiple approvals by GPID or GPI-14 and/or HICL or GPI-10 may be necessary depending on the drug requested. Please refer to the drug list at the end of the guideline for approval instructions. (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of tardive dyskinesia (ICD-10 G24.01) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or movement disorder specialist
   - The patient has a history of using agents that cause tardive dyskinesia (e.g., haloperidol, aripiprazole)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of chorea associated with Huntington's disease (ICD-10 G10) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or movement disorder specialist

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

VALBENAZINE (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VALBENAZINE (Ingrezza)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Tardive dyskinesia (uncontrolled body movements)
   2. Chorea (involuntary muscle movements) associated with Huntington's disease (a type of brain disorder)

B. If you have tardive dyskinesia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor), psychiatrist (a type of mental health doctor), or movement disorder specialist
   3. You have a history of using medications that cause tardive dyskinesia (such as haloperidol, aripiprazole)

C. If you have chorea associated with Huntington's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor) or movement disorder specialist

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet **ALL** of the following criteria?
   - The patient is 2 years of age and older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis of DMD is confirmed by genetic testing

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient tried prednisone or prednisolone?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Did the patient experience an adverse effect (e.g., weight gain) on prednisone or prednisolone?

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

VAMOROLONE (PART D)

INITIAL CRITERIA (CONTINUED)

4. Did the patient experience lack of efficacy with prednisone or prednisolone and meets **ALL** of the following criteria?
   - The patient is not in Stage 1 of the disease (the pre-symptomatic phase)
   - Steroid myopathy has been ruled out
   - The patient has experienced deterioration in ambulation, functional status, or pulmonary function that is consistent with advancing disease (stage 2 or higher)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VAMOROLONE (Agamree)** requires the following rules be met for approval:
   A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)
   B. You are 2 years of age and older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve system doctor)
   D. Your diagnosis of DMD is confirmed by genetic testing
   E. You have tried prednisone or prednisolone and meet ONE of the following:
      1. You have experienced an adverse effect (side effects such as weight gain) on prednisone or prednisolone
      2. Prednisone or prednisolone did not work for you, and you meet ALL of the following:
         a. You are not in Stage 1 of the disease (the pre-symptomatic phase)
         b. There is no steroid myopathy (muscle disease due to steroid use)
         c. You have experienced a decrease in ambulation (walking), functional status, or pulmonary (lung) function that is consistent with advancing disease (stage 2 or higher)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VAMOROLONE (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient currently ambulatory **AND** meets the following criterion?
   - The patient has shown improvement while on Agamree, as assessed by a standard set of ambulatory or functional status measures (e.g., 6-minute walking distance [6MWD], ascending or descending 4 stairs, rise from floor time [Gower's maneuver], 10-meter (30 feet) run/walk time, North Star Ambulatory Assessment [NSAA])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

3. Is the patient currently non-ambulatory **AND** meets the following criterion?
   - The patient has maintained or demonstrated a less than expected decline in pulmonary function or upper limb strength while on Agamree, as assessed by standard measures (e.g., pulmonary function [FVC, PFTs], upper limb strength)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

VAMOROLONE (PART D)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VAMOROLONE (Agamree)** requires the following rules be met for renewal:

A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)

B. If you are currently ambulatory (can walk), approval also requires:

1. You have shown improvement while on Agamree as measured by a standard set of ambulatory or functional status measures (such as, the 6-minute walking distance [6MWD], going up or down 4 stairs, time to rise from the floor [Gower's maneuver], 10-meter (30 feet) run/walk time, North Star Ambulatory Assessment [NSAA: a tool for evaluating Duchenne muscular dystrophy])

C. If you are currently non-ambulatory (cannot walk), approval also requires:

1. You have maintained or had a less than expected decrease in pulmonary (lung) function or upper limb strength while on Agamree as assessed by standard measures (such as pulmonary function [forced vital capacity, pulmonary function tests], upper limb strength)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VANDETANIB (PART D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VANDETANIB	CAPRELSA	37531		GPI-10 (2153308500)	

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Is the patient currently stable on the requested medication?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have diagnosis of symptomatic or progressive medullary thyroid cancer (ICD-10 C73) **AND** meet the following criterion?
   - The patient's cancer is unresectable locally advanced or metastatic

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

VANDETANIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline for **VANDETANIB (Caprelsa)** requires ONE of the following rule(s) be met for approval:

A. You are currently stable on the requested medication
B. You have symptomatic or progressive medullary thyroid cancer with unresectable locally advanced or metastatic disease (advanced thyroid cancer that cannot be removed with surgery and has spread to nearby tissue, lymph nodes, or other parts of the body)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Alyftrek will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient has at least ONE variant in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is either responsive to Alyftrek based on clinical or in vitro data or that results in the production of CFTR protein

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VANZACAFTOR-TEZACAFTOR-DEUTIVACAFTOR (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **VANZACAFTOR-TEZACAFTOR-DEUTIVACAFTOR (Alyftrek)** requires the following rule(s) be met for approval:

A. You have cystic fibrosis (CF: a type of lung disorder)
B. You are 6 years of age or older
C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
D. You will NOT use Alyftrek concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as a type of medication containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
E. You have at least ONE variant in the cystic fibrosis transmembrane conductance regulator (CFTR) gene (a type of gene) that is either responsive to Alyftrek based on clinical or in vitro data (testing outside of the body in a tube) or that results in the production of CFTR protein

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, continue to #2.

2. Is the drug administered via an external pump?

   If yes, continue to #3.

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

3. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B. (Populate the B vs. D field with 'B' in the PA override field. If MI does not process Part B for the client, refer the caller/request back to the Health plan)**

   If no, **approve for 12 months by HICL or GPI-10 under Part D. (Populate the B vs. D field with 'D' in the PA override field)**

Customer Service Representative review stops here.

Guideline interpretation beyond this point requires Clinical/Technician review.

PRIOR AUTHORIZATION GUIDELINES

VELMANASE ALFA-TYCV (PART D)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Lamzede.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - You are 18 years of age or older
   - The patient's cancer is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s), as detected by an FDA-authorized test
   - The patient has had disease progression following at least ONE line of endocrine therapy (e.g., anastrozole, letrozole)
   - Therapy is prescribed by or in consultation with an oncology specialist
   - Veppanu will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VEPDEGESTRANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **VEPDEGESTRANT (Veppanu)** requires the following rule(s) be met for approval:

A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
B. You are 18 years of age or older
C. Your cancer is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test
D. You have had disease progression (worsening) following at least ONE line of endocrine therapy (a type of hormone therapy such as anastrozole, letrozole)
E. Therapy is prescribed by or in consultation with an oncology specialist (a type of cancer doctor)
F. You will NOT use Veppanu concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

STANDARD PART D
PRIOR AUTHORIZATION GUIDELINES

VEPDEGESTRANT (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s), as detected by an FDA-authorized test
   - The patient has demonstrated clinical benefit while on therapy as shown by a partial or complete response OR stable disease
   - Veppanu will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **VEPDEGESTRANT (Veppanu)** requires the following rule(s) be met for renewal:
   A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your cancer is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test
   C. You have experienced clinical benefit while on therapy as shown by a partial (cancer has shrunk but did not go away) or complete response (cancer went away completely) OR stable disease (disease has stopped growing or spreading)
   D. You will NOT use Veppanu concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic heart failure (ICD-10 Group I50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an ejection fraction of less than 45%
   - The patient had a trial of, contraindication, or intolerance to ONE preferred SGLT-2 inhibitor (e.g., Farxiga [dapagliflozin], Xigduo XR [dapagliflozin/metformin], Jardiance [empagliflozin])
   - Verquvo will NOT be used concurrently with Adempas (riociguat) or PDE-5 inhibitors (e.g., vardenafil, tadalafil)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Did the patient have a trial of, contraindication, or intolerance to **ONE** agent from any of the following standard of care classes?
   - ACE inhibitor (e.g., enalapril, lisinopril), ARB (e.g., valsartan, candesartan), or ARNI (e.g., Entresto [sacubitril/valsartan])
   - Beta-blocker (bisoprolol, carvedilol, metoprolol succinate)
   - Aldosterone antagonists (spironolactone, eplerenone)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VESTRONIDASE ALFA-VJBK BvD (PART D)

PAYMENT DETERMINATION CRITERIA (CONTINUED)

5. Is the internal HQ code ML500, SFC01, or SUM03?

   If yes, **Refer to plan. (The health plan makes the final payment determination decision)**
   - **For CSR's: refer the caller to contact the plan, provide the plan's phone number, and advise that the plan will make the UNSAD BvD Prior Authorization Payment determination and Clinical determination for this particular product. (Do Not Enterany override).**
   - **For PAC's: Send an email to plan (reference UNSAD section of PACIP).**

   If no, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

6. Is the drug administered via an implantable pump?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, continue to #7.

7. Is the drug administered using an external pump?

   If yes, continue to #8.
   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

8. Is the drug specifically infused through an external infusion pump covered by Medicare?

   If yes, **approve for 12 months by HICL or GPI-10 under Part B (Deny under Part D before approving under Part B. Populate the B vs. D field with a 'B' in the PA override field).**

   If no, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with 'D' in the PA override field).**

(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of mucopolysaccharidosis VII (MPS VII, Sly syndrome) (ICD-10 E76.29) as confirmed by **ALL** of the following criteria?
   - The patient's urinary GAG (glycosaminoglycan) level is greater than three times the upper level of normal based on the laboratory assay
   - The patient has beta-glucuronidase enzyme activity deficiency or had genetic testing
   - The patient has ONE of the following clinical signs of MPS VII: enlarged liver and spleen, joint limitations, airway obstructions or pulmonary dysfunction

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a physician specializing in genetic or metabolic disorders
   - The patient has NOT undergone successful bone marrow or stem cell treatment for MPS VII
   - The patient has limitation in mobility, but remains sufficiently ambulatory (e.g., 6MWT [6-minute walk test] can be measured)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VESTRONIDASE ALFA-VJBK BvD (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VESTRONIDASE ALFA-VJBK (Mepsevii)** requires the following rule(s) be met for approval:

A. You have mucopolysaccharidosis VII (MPS VII, Sly syndrome: a type of genetic metabolism disorder)
B. Therapy is prescribed by or in consultation with a physician specializing in genetic or metabolic disorders
C. Your diagnosis is confirmed by ALL of the following:
    1. Your urinary glycosaminoglycan (GAG: a type of molecule) level is greater than three times the upper level of normal based on the laboratory test
    2. You have beta-glucuronidase enzyme activity deficiency (absence of a type of enzyme that breaks down molecules) or had genetic testing
    3. You have ONE of the following clinical signs of MPS VII: enlarged liver and spleen, joint limitations, airway obstructions or pulmonary (lung/breathing) dysfunction
D. You have NOT undergone successful bone marrow or stem cell treatment for mucopolysaccharidosis VII
E. You have limitation in mobility, but remain sufficiently ambulatory [able to walk] (for example, you can perform and be measured for a 6MWT [6-minute walk test])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VESTRONIDASE ALFA-VJBK BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of mucopolysaccharidosis VII (MPS VII, Sly syndrome) (ICD-10 E76.29) **AND** meet the following criterion?
   - The patient has improved, maintained, or demonstrated a less-than-expected decline in ambulatory ability from baseline (e.g., measured by 6MWT)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VESTRONIDASE ALFA-VJBK (Mepsevii)** requires the following rule(s) be met for renewal:
   A. You have mucopolysaccharidosis VII (MPS VII, Sly syndrome: a type of genetic metabolism disorder)
   B. You have improved, maintained, or demonstrated a less-than-expected decline in ambulatory (walking) ability compared to baseline (such as measured by the 6-minute walk test)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Mepsevii.

The requested drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination. Drugs filled by a pharmacy and shipped directly to the physician's office or clinic on behalf of a member may be covered under Part B. Drugs administered by an implantable pump are covered under Part B. Drugs administered via an external pump are covered under Part B if they are included under the local coverage policy of the applicable Medicare coverage policies (National and/or Local Coverage Policies). Drugs administered via an external pump that are not included under the applicable Medicare coverage policies are covered under Part D. A CMS website to assist with National and Local Coverage Determination for B versus D review is http://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx.

The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of refractory complex partial seizures (CPS) (ICD-10 Group G40.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The requested medication will be used as adjunctive therapy
   - The potential benefits outweigh the potential risk of vision loss
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient had a trial of or contraindication to TWO antiepileptic agents (e.g., carbamazepine, oxcarbazepine, levetiracetam IR/ER, gabapentin, zonisamide, topiramate, lamotrigine, tiagabine)

     If yes, **approve for 12 months by GPID or GPI-14 for all formulations: tablet and powder packet.**
     APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

     If no, continue to #2.

VIGABATRIN (PART D)

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of infantile spasms (ICD-10 Group G40.82) and meet **ALL** of the following criteria?
   - The patient is 1 month to 2 years of age
   - The requested medication will be used as monotherapy
   - The potential benefits outweigh the potential risk of vision loss
   - Therapy is prescribed by or in consultation with a neurologist

   If yes, **approve for 12 months by GPID or GPI-14 for the powder packet.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VIGABATRIN (Sabril, Vigadrone, Vigpoder)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Refractory complex partial seizures (a type of seizure)
      2. Infantile spasms (a type of seizure disorder in infancy and childhood)
   B. If you have refractory complex partial seizures, approval also requires:
      1. You are 2 years of age or older
      2. The requested medication will be used as adjunctive (add-on) therapy
      3. The potential benefits outweigh the potential risk of vision loss
      4. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
      5. You have tried or have a contraindication to (harmful for you to use) TWO antiepileptic medications (medications used to treat seizures such as carbamazepine, oxcarbazepine, levetiracetam immediate-release or extended-release, gabapentin, zonisamide, topiramate, lamotrigine, tiagabine)
   C. If you have infantile spasms, approval also requires:
      1. You are 1 month to 2 years of age
      2. The requested medication will be used as monotherapy (one drug treatment)
      3. The potential benefits outweigh the potential risk of vision loss
      4. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic basal cell carcinoma (ICD-10 C44.01, C44.41, C44.81, C44.91; Groups C44.11, C44.21, C44.31, C44.51, C44.61, C44.71) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of locally advanced basal cell carcinoma (ICD-10 C44.01, C44.41, C44.81, C44.91; Groups C44.11, C44.21, C44.31, C44.51, C44.61, C44.71) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has recurred following surgery OR the patient is not a candidate for surgery or radiation

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VISMODEGIB (Erivedge)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic basal cell carcinoma (a type of skin cancer that has spread to other parts of the body)
   2. Locally advanced basal cell carcinoma (a type of skin cancer that has spread from where it started to nearby tissue or lymph nodes)

B. If you have metastatic basal cell carcinoma, approval also requires:
   1. You are 18 years of age or older

C. If you have locally advanced basal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has returned after surgery OR you are not a candidate for surgery or radiation.

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VONOPRAZAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VONOPRAZAN (Voquezna)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. *Helicobacter pylori* (*H. pylori*: a type of bacteria) infection
   2. Erosive esophagitis (a type of digestive disorder)
   3. Non-erosive gastroesophageal reflux disease (a type of digestive disorder)

B. If you have a *Helicobacter pylori* infection, approval also requires:
   1. You are 18 years of age or older
   2. Voquezna will be used in combination with amoxicillin OR amoxicillin and clarithromycin

C. If you have erosive esophagitis, approval also requires:
   1. You are 18 years of age or older
   2. You had a trial of or contraindication to (harmful for you to use) TWO proton pump inhibitors (such as lansoprazole capsules, esomeprazole magnesium capsules, rabeprazole, omeprazole, pantoprazole) at the maximum dose for 8 weeks each

D. If you have non-erosive gastroesophageal reflux disease, approval also requires:
   1. You are 18 years of age or older
   2. You do not have a previous treatment failure (drug did not work) with Voquezna in the last 12 months
   3. You have tried or have a contraindication to (harmful for you to use) ONE proton pump inhibitor (such as lansoprazole capsules, esomeprazole magnesium capsules, rabeprazole, omeprazole, pantoprazole) at the maximum dose for 8 weeks

VONOPRAZAN (PART D)

RENEWAL CRITERIA

NOTE: For the diagnosis of *Helicobacter pylori* (*H. pylori*) infection or non-erosive gastroesophageal reflux disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of erosive esophagitis (ICD-10 Group K20)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the request for a continuation of treatment (i.e., the patient recently received an initial prior authorization approval for 8 weeks)?

   If yes, continue to #3.
   If no, refer to Initial Criteria.

3. Has the patient maintained a clinical response while on Voquezna?

   If yes, **approve for 24 weeks by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VONOPRAZAN (Voquezna)** requires the following rule(s) be met for renewal:
   A. You have erosive esophagitis (a type of digestive disorder)
   B. You have maintained a clinical response on Voquezna (the treatment is working)

VORICONAZOLE SUSPENSION (PART D)

GUIDELINES FOR USE (CONTINUED)

6. Is the request for the treatment of a serious fungal infection caused by Scedosporium apiospermum or Fusarium species (ICD-10 B48.8) and the patient meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient is unable to swallow tablets

   If yes, **approve for 6 months by GPID or GPI-14.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VORICONAZOLE SUSPENSION (Vfend)** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Invasive aspergillosis (a type of fungal infection)
      2. Candidemia or other deep tissue Candida infections (a type of fungal infection)
      3. Esophageal candidiasis (fungal infection of the throat to the stomach)
      4. Serious fungal infection caused by Scedosporium apiospermum or Fusarium species (types of fungal infection)

   B. If you have invasive aspergillosis, approval also requires:
      1. You are 2 years of age or older
      2. You are unable to swallow tablets

   C. If you have candidemia or other deep tissue Candida infection, approval also requires:
      1. You are 2 years of age or older
      2. You have a contraindication to (harmful for you to use) or are unable to swallow fluconazole

   D. If you have esophageal candidiasis, approval also requires:
      1. You are 2 years of age or older

   E. If you have a serious fungal infection caused by Scedosporium apiospermum or Fusarium species, approval also requires:
      1. You are 2 years of age or older
      2. You are unable to swallow tablets

   F. Request for continuation of therapy after hospital discharge does not require extra criteria

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of achondroplasia (ICD-10 Q77.4) **AND** meet the following criterion?
   - The patient has open epiphyses

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VOSORITIDE (Voxzogo)** requires the following rule(s) be met for approval:
   A. You have achondroplasia (a type of genetic bone growth disorder)
   B. You have open epiphyses (when the end parts of long bones still allow growth)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit).**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

VUTRISIRAN BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, physician at an amyloidosis treatment center, or medical geneticist
   - The patient is ambulatory (i.e., Familial Amyloid Polyneuropathy [FAP] stage 1 - 2 OR Polyneuropathy Disability [PND] stage I - IIIb polyneuropathy)
   - Amvuttra will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VUTRISIRAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of cardiomyopathy of wild-type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist, transthyretin amyloidosis (ATTR) specialist, or medical geneticist
   - The patient has New York Heart Association (NYHA) Class I, II, or III heart failure

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP
     (Note: Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)
   - Biopsy of tissue of affected organ(s) (cardiac and possibly non-cardiac sites) to confirm amyloid presence **AND** chemical typing to confirm presence of transthyretin (TTR) protein

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VUTRISIRAN (Amvuttra)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
      2. Cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)

   (Initial denial text continued on next page)

VUTRISIRAN BvD (PART D)

INITIAL CRITERIA (CONTINUED)

B. If you have hereditary transthyretin-mediated amyloidosis with polyneuropathy, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve doctor), cardiologist (a type of heart doctor), physician at an amyloidosis treatment center, or medical geneticist (doctor who treats gene disorders)
3. You are ambulatory (able to walk) (you have Familial Amyloid Polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2 OR Polyneuropathy Disability [PND: a tool used to evaluate disease severity] stage I to IIIb polyneuropathy)
4. You will NOT use Amvuttra concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])
5. Your diagnosis is confirmed by ONE of the following:
   a. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (a type of abnormal protein) presence AND chemical typing to confirm presence of TTR (transthyretin) protein
   b. DNA (deoxyribonucleic acid) genetic sequencing (a type of lab test) to confirm hATTR mutation (a type of abnormal gene)

C. If you have cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), transthyretin amyloidosis (ATTR) specialist, or medical geneticist (doctor who treats gene disorders)
3. You have New York Heart Association (NYHA) Class I, II, or III heart failure (classification of heart failure symptoms)
4. Your diagnosis is confirmed by ONE of the following:
   a. Bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP (a type of imaging test) (Note: Strongly positive defined as heart to contralateral lung [H/CL] ratio of at least 1.5 or Grade 2 or greater localization to the heart using the Perugini Grade 1-3 scoring system)
   b. Biopsy of tissue of the affected organ(s) (removal of cells or tissue from the body for examination) (can be heart or non-heart related organs) to confirm amyloid (type of protein) presence AND chemical typing to confirm presence of transthyretin (TTR) protein

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VUTRISIRAN BvD (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient has NOT progressed to Familial Amyloid Polyneuropathy (FAP) stage 3 or Polyneuropathy Disability (PND) stage 4 polyneuropathy, as evidenced by functional decline (e.g., wheelchair-bound, bedridden)
   - Amvuttra will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of cardiomyopathy of wild-type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VUTRISIRAN (Amvuttra)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
      2. Cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)

ZANIDATAMAB-HRII BvD (PART D)

CLINICAL DETERMINATION CRITERIA

Do not review Part D guidelines with physicians; if the caller wishes to initiate an oral request, then a verbal MRF must be completed. Please check the applicable CS note for processing.

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of previously treated, unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is human epidermal growth factor receptor 2 (HER2)-positive (IHC 3+), as detected by an FDA-authorized test

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of gastric, gastroesophageal junction, or esophageal adenocarcinoma (GEA) (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is unresectable locally advanced or metastatic

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer is HER2-positive (IHC 3+ or IHC 2+/ISH+), as detected by an FDA-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, oxaliplatin) and Tevimbra (tislelizumab-jsgr)
   - The patient's cancer is HER2-positive (IHC 3+), as detected by an FDA-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ZANIDATAMAB-HRII BvD (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZANIDATAMAB-HRII (Ziihera)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Biliary tract cancer (BTC: a type of bile duct or gallbladder cancer)
   2. Gastric, gastroesophageal junction, or esophageal adenocarcinoma (GEA: a type of digestive system cancer)

B. If you have biliary tract cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is previously treated, unresectable (unable to remove by surgery) or metastatic (cancer has spread to other parts of the body)
   3. Your cancer is human epidermal growth factor receptor 2 (HER2)-positive immunohistochemistry 3+ (IHC 3+), as detected by a Food and Drug Administration (FDA)-authorized test

C. If you have gastric, gastroesophageal junction, or esophageal adenocarcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is unresectable (cannot be removed by surgery) locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) or metastatic (has spread to other parts of the body)
   3. You meet ONE of the following:
      a. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+ or IHC 2+/ISH+), as detected by a Food and Drug Adminstration (FDA)-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (such as fluorouracil, capecitabine) and platinum-containing chemotherapy (such as cisplatin, oxaliplatin) and Tevimbra (tislelizumab-jsgr)
      b. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+), as detected by a Food and Drug Administration (FDA)-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (such as fluorouracil, capecitabine) and platinum-containing chemotherapy (such as cisplatin, oxaliplatin)

***********Pharmacist/PAC Alert************
(For Internal Use Only)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of mantle cell lymphoma (MCL) (ICD-10 Group C83.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least ONE prior therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
   - The patient had an intolerance to Calquence (acalabrutinib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #2.

2. Does the patient have a diagnosis of Waldenström's macroglobulinemia (WM) (ICD-10 C88.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #3.

ZANUBRUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of relapsed or refractory marginal zone lymphoma (MZL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least ONE anti-CD20-based regimen (e.g., rituximab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #4.

4. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) or small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had an intolerance to Calquence (acalabrutinib) or Imbruvica (ibrutinib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, continue to #5.

5. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma (FL) (ICD-10 Group C82) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Brukinsa will be used in combination with Gazyva (obinutuzumab)
   - Brukinsa will be used after at least TWO lines of systemic therapy (e.g., lenalidomide with rituximab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ZANUBRUTINIB (PART D)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZANUBRUTINIB (Brukinsa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Mantle cell lymphoma (MCL: a type of blood cancer)
   2. Waldenstrom's macroglobulinemia (WM: a type of blood cancer)
   3. Relapsed or refractory marginal zone lymphoma (MZL: a type of blood cancer that has returned or did not respond to treatment)
   4. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   5. Small lymphocytic lymphoma (SLL: a type of blood cancer)
   6. Relapsed or refractory follicular lymphoma (FL: a type of blood cancer that has returned or did not respond to treatment)

B. If you have mantle cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received at least ONE prior therapy (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
   3. You had an intolerance to (side effect) to Calquence (acalabrutinib)

C. If you have Waldenstrom's macroglobulinemia, approval also requires:
   1. You are 18 years of age or older

D. If you have relapsed or refractory marginal zone lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received at least ONE anti-CD20-based regimen (a type of blood cancer treatment plan, such as rituximab)

E. If you have chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You had an intolerance to (side effect) to Calquence (acalabrutinib) or Imbruvica (ibrutinib)

F. If you have relapsed or refractory follicular lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. Brukinsa will be used in combination with Gazyva (obinutuzumab)
   3. Brukinsa will be used after at least TWO lines of systemic therapy (treatment that targets the entire body such as lenalidomide with rituximab)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zavzpret will NOT be used concurrently with other cGRP inhibitors (e.g., Ubrelvy [ubrogepant]) for the acute treatment of migraines
   - The patient had a trial of or contraindication to ONE triptan (e.g., Maxalt [rizatriptan], Imitrex [sumatriptan], Axert [almotriptan])
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Ubrelvy (ubrogepant), Nurtec ODT (rimegepant)
   - The patient is unable to tolerate oral medications

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ZAVEGEPANT (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZAVEGEPANT (Zavzpret)** requires the following rule(s) be met for approval:

A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
B. You are 18 years of age or older
C. You will NOT use Zavzpret concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Ubrelvy [ubrogepant]) for the acute treatment of migraines
D. You have tried or have a contraindication to (harmful for you to use) ONE triptan (such as Maxalt [rizatriptan], Imitrex [sumatriptan], Axert [almotriptan])
E. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ubrelvy (ubrogepant), Nurtec ODT (rimegepant)
F. You are NOT able to tolerate oral medications

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ZAVEGEPANT (PART D)

RENEWAL CRITERIA

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) **AND** the patient meets the following criterion?
   - Zavzpret will NOT be used concurrently with other cGRP inhibitors (e.g., Ubrelvy [ubrogepant]) for the acute treatment of migraines

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (e.g., Migraine Assessment of Current Therapy [Migraine-ACT])
   - Therapy works consistently in a majority of migraine attacks

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZAVEGEPANT (Zavzpret)** requires the following rule(s) be met for renewal:
   A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
   B. You will NOT use Zavzpret concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Ubrelvy [ubrogepant]) for the acute treatment of migraines
   C. You meet ONE of the following:
      1. You have experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (assessment tool used to help guide treatment such as migraine assessment of current therapy [MIGRAINE-ACT])
      2. Treatment works consistently in a majority of migraine attacks

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAYMENT DETERMINATION CRITERIA

NOTE: This section is for administrative purposes to determine Medicare Part B versus Medicare Part D funding.

1. Is this a pharmacy call?

   If yes, continue to #3.
   If no, continue to #2.

2. Is the requested medication going to be filled at a pharmacy?

   If yes, continue to #3.
   If no, **Refer to plan. (This should be processed under the member's medical benefit)**

3. Is the internal HQ code AHF01, ATR01, CCA05, CEN10, CLH01, GLD01/02, HPJ01, IHH01, KHS01, MCP01, MRI03, RPS01, SFP01, or any MVS HQs?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #4.

4. Is the pharmacy dispensing the drug directly to the member or member's representative?

   If yes, **approve for 12 months by HICL or GPI-10 under Part D (Populate the B vs. D field with a 'D' in the PA override field).**

   If no, continue to #5.

ZENOCUTUZUMAB-ZBCO BVD (PART D)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of advanced unresectable or metastatic cholangiocarcinoma (ICD-10 C22.1, C24.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is neuregulin 1 (NRG1) gene fusion-positive
   - The patient has disease progression while on or after prior systemic therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZENOCUTUZUMAB-ZBCO (Bizengri)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Advanced unresectable or metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that cannot be removed by surgery or has spread to other parts of the body)
      2. Advanced unresectable or metastatic pancreatic adenocarcinoma (a type of pancreas cancer that cannot be removed by surgery or has spread to other parts of the body)
      3. Advanced unresectable or metastatic cholangiocarcinoma (a type of bile duct cancer that cannot be removed by surgery or has spread to other parts of the body)

   B. If you have advanced unresectable or metastatic non-small cell lung cancer, approval also requires:
      1. You are 18 years of age or older
      2. Your cancer is neuregulin 1 (NRG1) gene fusion-positive (abnormal change in a type of gene)
      3. Your disease has progressed (worsened) while on or after prior systemic therapy (treatment that targets the entire body)

   C. If you have advanced unresectable or metastatic pancreatic adenocarcinoma, approval also requires:
      1. You are 18 years of age or older
      2. Your cancer is neuregulin 1 (NRG1) gene fusion-positive (abnormal change in a type of gene)
      3. Your disease has progressed (worsened) while on or after prior systemic therapy (treatment that targets the entire body)

IMPORTANT FORMULARY NOTE:
The prior authorization guideline may not apply to all products. Please ensure the requested drug is on the member's formulary. Refer to formulary print for specific details.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is anti-acetylcholine receptor (AChR) antibody positive
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy (e.g., azathioprine, cyclophosphamide, methotrexate)
   - Zilbrysq will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]) for the treatment of gMG

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ZILUCOPLAN (PART D)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZILUCOPLAN (Zilbrysq)** requires the following rule(s) be met for approval:

A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
B. You are 18 years of age or older
C. You are anti-acetylcholine receptor (AChR) antibody positive (shows that you have myasthenia gravis)
D. Therapy is prescribed by or in consultation with a neurologist (type of brain doctor)
E. You have Myasthenia Gravis Foundation of America class II, III, or IV (indicates severity of disease)
F. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as, prednisone)
G. You have tried or have a contraindication to (harmful for you to use) ONE non-steroidal immunosuppressive therapy (such as, azathioprine, cyclophosphamide, methotrexate)
H. You will NOT use Zilbrysq concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]) for the treatment of genralized mysasthenia gravis

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PLUS DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ZILUCOPLAN (PART D)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient had clinical benefit compared to baseline (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Zilbrysq will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT (IF APPLICABLE): The requested drug has a plan limit of [XX] per [XX] days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZILUCOPLAN (Zilbrysq)** requires the following rule(s) be met for renewal:
   A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   B. You have had clinical benefit compared to baseline (for example, as shown by the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   C. You will NOT use Zilbrysq concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]) or complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab]) for the treatment of genralized mysasthenia gravis

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zilbrysq.
