

Specialty Drugs: Network Specialty Pharmacy Requirements

The Specialty Drug List reflects medications designated as specialty drugs under the pharmacy benefit. The drugs with this requirement are designated with “**SP**” on the formulary.

Most specialty drugs require a prior authorization. If covered, the specialty drugs cannot be obtained from a network retail pharmacy and must be obtained from a MedImpact contracted mail order specialty pharmacy.

The MedImpact Direct Specialty Program will help members set up their specialty medication delivery with a contracted mail order specialty pharmacy. The prescriber can send the prescription directly to MedImpact Direct Specialty **via fax at 1(888) 807-5716**. The contracted specialty pharmacy that will fill the medication will contact the member to set up their account and to arrange the delivery of the medication.

Members can also contact MedImpact Direct Specialty Program directly to get assistance in setting up an account with a specialty mail order pharmacy and transferring an existing prescription:

Phone: 1(877) 391-1103 (TTY dial 711)
