Informational Section

Introduction to the Formulary

The San Francisco Health Plan (SFHP) Healthy Workers HMO Formulary is a list of drug products that are approved by the Food and Drug Administration (FDA) and are eligible for coverage under the outpatient prescription benefit. Drugs on the SFHP Healthy Workers HMO Formulary are selected to reflect the most appropriate, high quality and cost-effective drug therapies. The SFHP Healthy Workers HMO Formulary includes brand and generic medications as well as some devices, in compliance with the Affordable Care Act (ACA) and California state regulations. The presence of a drug on the Formulary does not guarantee that you will be prescribed that drug by your provider.

Definitions of Terms

The following is a list of common terms used throughout this Formulary and their meanings:

"**Brand name drug**" is a drug that is marketed under a proprietary, trademark protected name. The brand name drug shall be listed in all CAPITAL letters.

"**Coinsurance**" is a percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

"**Copayment**" is a fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

"**Deductible**" is the amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.

"**Drug Tier**" is a group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.

"**Enrollee**" is a person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this formulary template shall also include subscriber as defined in this section below.

"**Exception request**" is a request for coverage of a prescription drug. If an enrollee, his or her designee or prescribing health care provider submits an exception request for

coverage of a prescription drug, the health plan must cover the prescription drug when the drug is determined to be medically necessary to treat the enrollee's condition.

"**Exigent circumstances**" are when an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health, or ability to regain maximum function or when an enrollee is undergoing a current course of treatment using a nonformulary drug.

"**Formulary**" is the complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list.

"**Generic drug**" is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in ***bold*** **and** ***italicized lowercase*** letters.

"**Nonformulary drug**" is a prescription drug that is not listed on the health plan's formulary.

"**Out-of-pocket costs**" are copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

"**Pharmacy & Therapeutics Committee**" is a group of local prescribers and pharmacists that meet four times per year and determine which drugs will be on the formulary and the criteria used for the Prior Authorization review process.

"**Prescribing provider**" is a health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.

"**Prescription**" is an oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.

"**Prescription drug**" is a drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law.

"**Prior Authorization**" is a health plan's requirement that the enrollee or the enrollee's prescribing provider obtain the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization when it is medically necessary for the enrollee to obtain the drug.

"**Step therapy**" is a process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider

submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.

"**Specialty drug**" are drugs that may require coordination of care, close monitoring, or extensive patient training for self-administration. Most specialty drugs require a prior authorization. If covered, the specialty drugs cannot be obtained from a network retail pharmacy and must be obtained from a MedImpact contracted mail order specialty pharmacy.

"**Subscriber**" means the person who is responsible for payment to a plan or whose employment or other status, except for family dependency, is the basis for eligibility for membership in the plan.

How to Read This Formulary

The SFHP Healthy Workers HMO Formulary document is listed alphabetically by drug class and includes the following information: drug name, dosage form, drug tier, along with any formulary restriction such as quantity limit, prior authorization or step therapy requirements.

How can I find a drug on the Formulary list?

You can locate a prescription drug by looking up the therapeutic category and class of the drug or the BRAND or *generic* name of the drug in the alphabetical index. You can search this list by:

- Searching for the category or class to which the drug belongs and then searching for the name of the drug in alphabetical order OR
- Searching the index for the name of the drug in alphabetical order

Formulary List

Drug type	How the drug name will appear in the formulary drug list
generic drug	***metronidazole oral tablet***
brand drug	ELIQUIS ORAL TABLET (***apixaban***)

How do I know if the drug listed is a brand or generic drug?

A drug is listed alphabetically by its BRAND and *generic* names in the therapeutic category and class to which it belongs. If a drug is available as a generic, it is listed by the generic name. Some generic drugs are marketed under a proprietary, trademark protected brand name. For these, the brand name will be listed after the generic name in parentheses and regular typeface with first letter of each word capitalized.

Generally, SFHP requires generic substitution when an equivalent generic product for a brand name drug is available (see Brand medication policy below). If a generic equivalent for a brand name drug is available, and both the brand name and generic equivalents are covered, the generic drug will be listed separately from the brand name drug in all *italicized lowercase* letters. If a generic equivalent for a brand name drug is not available or is not covered on the formulary, the drug will not be listed separately by its generic name.

What if I cannot find a drug on the Formulary list?

If your medication is not listed in the SFHP Healthy Workers HMO Formulary list, it is called a nonformulary drug. Your provider must submit a prior authorization form to SFHP before the pharmacy can dispense the nonformulary drug. SFHP will review the request and determine if the medication will be authorized based on prior authorization criteria. Some Formulary medications also require your provider submit a prior authorization form before the pharmacy can dispense the drug if your prescription exceeds specific limits, requires step therapy, or is a medication with specific uses. SFHP's prior authorization criteria are approved by the Pharmacy Benefit Manager's (PBM) P&T Committee and are consistent with professionally recognized treatment guidelines and standards of practice.

*For more information about the prior authorization process, see the Formulary Restrictions section.

What are Drug Tiers?

Drugs are placed on different tiers based on how they work, and their safety and cost compared to other drugs used for the same type of treatment.

Drug Tier	
Tier 1	Generic
Tier 2	Preferred Brand
Tier 3	Non-Preferred Brand
Tier 4	Specialty Generic
Tier 5	Specialty Preferred Brand
Tier 6	Specialty Non-Preferred Brand
EHB ($0)	Essential Health Benefit

Some medications may be listed in multiple tiers due to a particular strength being formulary and another strength or dosage form of the same medication requiring a prior authorization.

Definitions of Coverage Requirement and Limits

Restriction	Definition
SP: Specialty Pharmacy	This prescription drug may only be filled through a contracted specialty pharmacy.
PA: Prior Authorization	Your provider is required to get prior authorization before you fill your prescription, which ensures appropriate use of the selected drug. Without prior approval, we may not cover this drug.
QL: Quantity Limit	There is a limit on the amount of this drug that is covered per prescription, or within a specific time frame.
ST: Step Therapy	In some cases, you may be required to first try certain drugs to treat your medical condition before you move up a "step" to other drug options.
AL: Age limit	This prescription drug may only be covered if you meet the minimum or maximum age limit.
EHB: Essential Health Benefit	The Affordable Care Act (ACA) requires certain preventive generic products to be covered at zero dollar copay.

Other abbreviations used in the formulary:
CT = Contraceptives
DD = Diabetes Drug or Device
OCH = Orally Administered Anti-Cancer Drug

Drug tier and other restrictions that may apply to the tier are designated with symbols according to the key above. Please see the Coverage Requirements and Limits column of the formulary for these limits.

What is the difference between the outpatient prescription drug benefit and the medical benefit?

The outpatient prescription drug benefit includes FDA-approved drugs that are self-administered, commonly oral or self-injectable drugs, not otherwise excluded. Drugs that must be administered to you by a health care professional are usually provided under the medical benefit. Medical benefit drugs may include drugs for infusion therapy, blood products, and any drug that must be administered by a health care professional. Some drugs that must be administered by a healthcare professional are covered in the outpatient prescription drug benefit, such as: long-acting injectable drugs for necessary treatment of a mental health condition or substance use disorder, and an injectable medication used for pre-exposure prophylaxis (PrEP) for HIV-1. Please refer to the Formulary for the drugs that must be administered to you by a health care professional that are also covered under the outpatient prescription drug benefit. For more information on benefits under the Healthy Workers HMO plan please visit **sfhp.org/programs/healthy-workers/benefits.**

Are any drugs excluded from the Formulary?

The following drug classes are excluded from the Healthy Workers HMO Formulary:

- When prescribed for cosmetic services. For purposes of this exclusion, cosmetic means drugs solely prescribed for the purpose of altering or affecting normal structure of the body to improve appearance rather than function.
- When prescribed solely for the treatment of hair loss, sexual dysfunction, athletic performance, cosmetic purposes, anti-aging for cosmetic purposes, and mental performance. The exclusion does not apply to drugs for mental performance when they are Medically Necessary to treat diagnosed mental illness or medical conditions affecting memory, including, but not limited to, treatment of the conditions or symptoms of dementia or Alzheimer's disease.
- When prescribed solely for the purpose of shortening the duration of the common cold.
- When prescribed solely for the purpose of losing weight.
- Prescription Drugs available over the counter or for which there is an over-the-counter equivalent (the same active ingredient, strength, and dosage form as the Prescription Drug). This exclusion does not apply to:
    - Insulin,
    - Over-the-counter drugs as covered under preventive services, e.g., over-the-counter FDA-approved contraceptive drugs),
    - Over-the-counter drugs for reversal of an opioid overdose, or
    - An entire class of Prescription Drugs when one drug within that class becomes available over the counter.

- Drugs when prescribed by non-contracting providers for non-covered procedures and which are not authorized by a plan or a plan provider, except when coverage is otherwise required in the context of Emergency Services and Care.

Who decides what drugs are on the Formulary?

The Pharmacy Benefit Manager's (PBM) Pharmacy and Therapeutics (P&T) Committee is responsible for selecting medications on the Formulary. The PBM's P&T Committee reviews all new medications and new treatment guidelines to determine how well drugs work, the safety profile of the medications, and overall value when selecting the formulary list. The SFHP P&T Committee reviews the PBM's standard formulary and recommends any changes to the PBM. The SFHP P&T Committee is composed of actively participating network physicians from various medical specialties and clinics and community clinical pharmacists along with the SFHP Chief Medical Officer and Pharmacy Director or designee.

SFHP providers may request evaluation of drugs for addition to or deletion from the Formulary by submitting the Formulary Modification Request Form available on our website at **sfhp.org/providers/pharmacy-services/prior-authorization-requests.**

How and when does the Formulary change?

The Pharmacy Benefit Manager's (PBM) P&T Committee meets quarterly to review Formulary changes based on safety, efficacy, and quality of care considerations. The most updated formulary is posted on the SFHP website monthly. Once updated, previous Formulary documents are no longer considered in effect.

The following changes to the formulary may occur:

- A drug may be added to or removed from the Formulary
- A new generic form may be added to the Formulary when it becomes available
- A brand drug may be removed from the Formulary when a generic equal becomes available
- A drug may move tiers when a prior authorization or step requirements are added or removed
- Age or quantity limits may be added, removed, or changed

When a drug or dosage form is removed from the formulary or restrictions are added and it was previously approved for coverage for your medical condition, coverage for the drug will continue if your provider continues to prescribe the drug for your condition and the drug is prescribed appropriately and is safe for your condition. SFHP will notify you if a covered drug you are taking is removed from the formulary because the FDA deems the drug to be unsafe and it is removed from market, or because the manufacturer removes the drug from market.

The monthly updates to the SFHP Formulary can be accessed online from our website at **sfhp.org/for-members/healthy-workers/benefits/pharmacy-services.** You can also request information by calling SFHP Customer Service at **1(415) 547-7800** (local), **1(800) 288-5555** (toll-free), Monday–Friday, 8:30am–5:30pm.

What preventive services are covered under the outpatient prescription drug benefit?

Preventive services are required by the Patient Protection and Affordable Care Act (ACA) and Knox-Keene Health Care Service Plan Act (Knox-Keene Act) to be covered without prior authorization and at no charge to the enrollee. Preventive health drugs covered under the outpatient prescription drug benefit are determined based on recommendations by the United States Preventive Services Task Force and immunization coverage are based on the recommendations from the Advisory Committee on Immunization Practices of the federal Centers for Disease Control and Prevention. For more details about preventive services covered under the outpatient prescription drug benefit, visit **sfhp.org/for-members/healthy-workers/benefits/pharmacy-services.** For information on how to obtain prescription drugs and how to find a network pharmacy, please see "Filling a prescription" section below.

What is a contraceptive drug or device?

Contraceptives are medications or devices, such as diaphragms, that help prevent pregnancy. SFHP is required by law, to cover up to a 12-month supply, per fill, of FDA-approved contraceptives medications and devices, including over the counter (OTC) contraceptives, without prior authorization and no copayment. A prescription is not required to trigger coverage of OTC contraceptives. The enrollee ID card must be presented at a participating in-network pharmacy and the pharmacy can process the formulary OTC contraceptive without prior authorization and no copayment.

Over the counter (OTC) Contraceptives includes:

- Condoms (Female)
- Condoms (Male)
- Daily Oral Contraceptives (Opill)
- Emergency Oral Contraceptives
- Spermicides (cream, film, foam, gel, suppository)

For information on how to obtain a prescription contraceptive and how to find a network pharmacy, please see "Filling a prescription" section below.

What diabetes care drugs and products are covered?

SFHP covers FDA-approved medications for the treatment of diabetes, (including the type of diabetes developed during pregnancy in women who did not have diabetes

before) and diabetic testing devices and supplies, whether or not you need to use insulin. Covered devices and supplies under the outpatient prescription drug benefit include glucose monitors, test strips, syringes, lancets, alcohol wipes and ketone urine testing strips. For information on how to obtain prescription drugs and how to find a network pharmacy, please see "Filling a prescription" below.

Filling a prescription

When you need medication, your Primary Care Physician (PCP) or referred specialist will prescribe it. You can obtain prescription drugs at any in-network retail pharmacy. To get the medication, take the paper prescription to a retail pharmacy listed in the Pharmacies section of the San Francisco Health Plan Healthy Workers HMO Provider Directory (**sfhp.org/programs/healthy-workers/find-a-provider**) and show your enrollee ID card to the pharmacist. Your Primary Care Physician (PCP) or referred specialist may choose to send prescription drugs to a pharmacy electronically. Prescriptions will be covered according to this SFHP Formulary document and restrictions outlined below.

Mail Order Pharmacy

A mail order pharmacy is a licensed pharmacy that is set up to fill medications for ongoing use to maintain health and are shipped directly to the patient's home. Besides our network retail pharmacies, members can also obtain their medications through a mail order pharmacy. It can be a convenient way to fill ongoing medications. For instructions on how to obtain medications through a mail order pharmacy, please visit the Mail Order Pharmacy Section at the following website **sfhp.org/programs/healthy-workers/benefits/pharmacy-services.**

Specialty Drug Pharmacy Requirements

Specialty drugs are drugs that may require coordination of care, close monitoring, or extensive patient training for self-administration. Specialty drugs may also require special handling or manufacturing processes (such as biotechnology), restriction to certain physicians or pharmacies, or reporting of certain clinical events to the FDA. Specialty drugs are usually high cost. Because of their complexity and cost, they typically need to be obtained through a specialty pharmacy to help us make sure you get the support, coordination, and care management that often comes with these medications.

The Specialty Drug List can be found at the website: https://www.sfhp.org/for-members/healthy-workers/benefits/pharmacy-services. The drugs with this requirement are designated with "**SP**" on the formulary.

Most specialty drugs require a prior authorization. If covered, the specialty drugs cannot be obtained from a network retail pharmacy and must be obtained from a MedImpact contracted mail order specialty pharmacy.

The MedImpact Direct Specialty Program will help members set up their specialty medication delivery with a contracted mail order specialty pharmacy. The prescriber can send the prescription directly to MedImpact Direct Specialty **via fax at 1(888) 807-5716**. The contracted specialty pharmacy that will fill the medication will contact the member to set up their account and to arrange the delivery of the medication.

Members can also contact MedImpact Direct Specialty Program directly to get assistance in setting up an account with a specialty mail order pharmacy and transferring an existing prescription. Translation services are available.

Copayment Information:

Copayments for covered outpatient prescription medications are as described below. Cost-sharing does not exceed 50 percent of the cost to the plan. The following copayments apply to prescriptions covered under the Healthy Workers HMO Formulary:

- **$5 Copayment** – generic medications listed on Tier 1 or Tier 4 and brand medications listed on Tier 1 or Tier 4 that have a generic equivalent.
- **$10 Copayment** – brand medications listed on Tier 2, Tier 3, Tier 5, or Tier 6

The total amount of copayments and coinsurance an enrollee is required to pay does not exceed two hundred fifty dollars ($250) for up to a 30-day supply of a covered outpatient prescription drug.

What drugs have their cost waived?

Select drugs are required by state or federal legislation to be covered with no out-of-pocket cost for enrollees. For full list of preventive drugs and immunizations at $0 copayment, please visit **sfhp.org/programs/healthy-workers/benefits/pharmacy-services.**

- **$0 Copayment** –
    - Preventive medications, including but not limited to:
        - all contraceptives
        - medications approved for prevention of human immunodeficiency virus (HIV) infection
        - low-dose aspirin

    - statin medications
    - prenatal vitamins with folic acid
    - breast cancer prevention drugs
    - medications for tobacco cessation
    - immunizations
  - Covid-19 Home Tests and Therapeutics provided at SFHP's in-network pharmacies.
- All $0 copayment medications on formulary have "$0" in the Status column

Formulary Restrictions

The SFHP Formulary uses standard formulary restrictions designated with symbols including specific limits on drugs such as quantity limitations (QL) and age limitations (AL), step therapy (ST), and prior authorization (PA). All formulary restrictions are based on FDA approved indications, standards of practice, and safety considerations. Prescriptions exceeding the formulary restrictions require that your prescriber submit a Prior Authorization request. Your pharmacist will get an electronic message from SFHP if a prescription has a formulary restriction requiring prior authorization and will inform you and your treating provider.

What is Step Therapy?

Step Therapy (ST) medications require you to try one or more drugs to treat your medical condition before SFHP will cover a particular drug for the condition pursuant to a step therapy request. If your prescribing provider submits a request for step therapy exception, SFHP shall make exceptions to step therapy when the prior authorization criteria is met. SFHP will not require you to meet step therapy for a drug you are already taking as long as your provider continues to prescribe the drug, and the drug is still appropriate and considered safe and effective for your condition. Additional information for step therapy request approval can be found at **sfhp.org/providers/pharmacy-services/prior-authorization-requests** under the "Prior Authorization Criteria" section.

What is the prior authorization request process?

The health plan shall cover nonformulary or restricted drugs when medically necessary. If a nonformulary drug, a drug restricted for prior authorization, a drug restricted for step therapy, or a prescription exceeding a quantity or age limitation is medically necessary; you or your provider can request SFHP to review the prescription for coverage. This process is called a prior authorization request or an exception request. Clinicians can submit a prior authorization request by:

1. **Fax**: Download a Prior Authorization Request Form and fax to **1(858) 790-7100** for both standard and urgent requests. Urgent requests should be clearly labeled "URGENT" at the top of the prior authorization request form.

2. **Phone**: Pharmacy Benefits Manager (PBM) MedImpact at **1(800) 788-2949** to submit a verbal request.
3. **Online**: Submit a request at Cover My Meds

The Prior Authorization Request Form can be accessed from our website at **sfhp.org/providers/pharmacy-services/prior-authorization-requests.**

A pharmacist or Medical Director reviews all prior authorization requests and makes a decision to approve, approve with changes, deny, or ask your prescribing provider for more information based on criteria approved by the PBM's P&T Committee. Non-urgent requests are reviewed within 72 hours. When exigent circumstances exist, the request is expedited and reviewed within 24 hours. When exigent circumstances exist, the request may be labeled urgent. If the prior authorization request is approved, a message is sent by fax to the prescriber listed on the completed Prior Authorization Request Form, stating the medication will be covered by SFHP. When a non-urgent request is approved, the health plan will provide coverage for the duration of the prescription, including refills. When a request based on exigent circumstances is approved, the health plan will provide coverage for the duration of the exigency. If the health plan fails to respond to a completed prior authorization or step therapy request within 72 hours of receiving a non-urgent request or 24 hours of receiving a request based on exigent circumstances, the request is deemed granted for the duration of the prescription, including refills.

If the prior authorization request is denied or approved with changes, SFHP will send a letter to you and the prescribing provider. This letter includes the criteria reason for SFHP's decision. We also include instructions for how you may appeal if you disagree with the decision. If you disagree with SFHP's denial or approval with changes, you may submit an appeal to SFHP. SFHP will review your appeal within thirty (30) days. If your appeal is urgent, it will be reviewed within 72 hours. If your appeal is about a drug that is not on SFHP's formulary, you may file a grievance seeking an external exception request review. A grievance seeking an external exception request review is reviewed by an external review organization. An external review organization is not affiliated with or employed by SFHP. The external review organization will decide whether SFHP should cover the non-formulary drug based on your medical need. SFHP will notify you and your prescribing physician of the decision within 72 hours. If the original request was expedited, SFHP will notify you and your prescribing physician within 24 hours.

**Note: Pursuant to section 1367.22 of the Health and Safety Code, SFHP will not limit or exclude coverage for a drug if the health plan previously approved coverage of the drug for an enrollee's medical condition and the prescribing provider continues to prescribe the drug for the medical condition, provided that the drug is appropriately prescribed and safe and effective for treating the enrollee's medical condition.

Other Formulary Policies

Brand medication policy

SFHP has a mandatory generic policy and requires generic substitution when an equivalent AB-rated generic or interchangeable biologic product for a brand name drug is available. Exceptions to this policy can be found on the formulary.

There may be rare exceptions to this policy. If the brand medication is included or preferred on the formulary when an equivalent generic or interchangeable biologic product is available, the lowest cost share (generic copayment) will apply.

Day supply policy

SFHP standard day supply policy is 30-day supply prescription limit for most brand medications and 90-day supply prescription limit for generic medications with some exceptions. Refills are allowed when 84% of the medication has been used.

Therapeutic interchange policy

Per American College of Clinical Pharmacy (ACCP), therapeutic interchange is defined as the dispensing of a drug that is therapeutically equivalent to but chemically different from the drug originally prescribed by a physician or other authorized prescriber. SFHP follows ACCP's definition of therapeutic interchange and will only employ therapeutic interchange with prescriber's approval. Criteria for consideration in therapeutic interchange include availability of agents within a therapeutic class, therapeutic equivalence, safety data, and costs.
