Healthy Workers Formulary

As of May 17, 2017

San Francisco Health Plan Healthy Workers Formulary

The San Francisco Health Plan (SFHP), with the direction from the Pharmacy and Therapeutics Committee (P&T), has developed a formulary to be used by members, clinicians, and pharmacists. The P&T Committee is composed of the SFHP Chief Medical Officer, the SFHP Pharmacy Director, physicians from various medical specialties and clinics, and community clinical pharmacists. The P&T meets quarterly to review formulary changes based on quality of care considerations and sound pharmacoeconomic principles.

The formulary is a list of drug products designed to reflect the most appropriate, high quality and cost-effective drug therapies. The formulary is updated regularly and is subject to change without notice.

The formulary requires the continuous support of all our providers and pharmacists. Please contact us at **(415) 547-7818 x 7085 option 3** or medpharm@sfhp.org if you have any questions regarding the formulary. The SFHP Formulary can be easily accessed online from our website at <http://www.sfhp.org/providers/formulary/sfhp-formulary/>.

Request for Addition or Deletion of a Drug to the Formulary

SFHP providers may request evaluation of drugs for addition to or deletion from the Formulary by submitting the [Formulary Modification Request Form](#) available on our website at <http://www.sfhp.org/providers/formulary/prior-authorization-requests/>.

Request for Non-Preferred Medications

Non-preferred or non-formulary medications may be authorized when there is clinical justification for doing so. Clinicians can submit a prior authorization (PA) request in one of three different ways:

1. **Online:** Submit using the [Online Pharmacy Prior Authorization Request Form](#).
2. **Fax:** Download a [Prior Authorization Request Form](#) and fax to **1(855) 811-9331** for both standard and urgent requests. Urgent requests should be clearly labeled “URGENT” at the top of the prior authorization request form.
3. **Phone:** Pharmacy Benefits Manager (PBM) PerformRx at **(888) 989-0091** to submit a verbal request.

The [Prior Authorization Request Form](#) and the [Online Pharmacy Prior Authorization Request Form](#) can be accessed from our website at <http://www.sfhp.org/providers/formulary/prior-authorization-requests/>.

Brand Medication Policy

SFHP has a mandatory generic policy and requires generic substitution when an equivalent generic product is available. Dispensing of brand name medications when generic equivalent is available will be allowed only in the following cases:

- Pharmacy bills brand medication as DAW 5 (i.e. billed as a generic product)
- Pharmacy bills brand medication as DAW 8 (i.e. generic formulation is not currently available)
- Pharmacy is dispensing one of the following narrow therapeutic index drugs: Armour Thyroid, Coumadin, Dilantin, Synthroid

In all other cases, a prior authorization (PA) request should be submitted using the instructions above. Detailed PA criteria for brand name medication requests can be found at http://www.sfhf.org/files/providers/formulary/Prior_Auth_Criteria.pdf under “Brand Medication Requests” section.

Healthy Workers Formulary Exclusions

The following drug classes are excluded from the Healthy Workers formulary:

- Over-the-counter (OTC) medications except:
 - OTC insulin and diabetic testing supplies including test strips, lancets, insulin needles and syringes, urine ketone testing strips
 - OTC nicotine replacement products
 - OTC prenatal vitamins, folic acid and fluoride preparations

Copayments

The following copayments apply to Healthy Workers formulary:

- \$5 - generic medications
- \$10 - brand medications

Day Supply Policy

SFHP standard day supply policy is 30 day supply for most brand medications and 90 day supply for generic medications with some exceptions. Refills are allowed when 75% of the medication has been used, except for opioid pain medications where refills are allowed when 90% of the medication has been used.

Exceptions to the 30 day supply policy for brand medications are as follows:

- Up to 100 day supply is allowed for test strips, lancets, insulin syringes and urine ketone testing strips
- Up to 90 day supply is allowed for select medications used for treatment of chronic conditions. Examples include but are not limited to antidiabetic medications including insulin, anticonvulsants, anticoagulants, antidepressants, antihyperlipidemics, antihypertensives, and inhaled steroids.

Exceptions to the 90 day supply policy for generic medications are as follows:

- 30 day supply only is allowed for all opiate medications except tramadol

Exceptions to the 30 and 90 days supply policy for brand and generic medications are as follows:

- Up to a year supply of self-administered hormonal contraceptives (i.e. up to 364 pills, 12 vaginal rings, and 36 patches) is allowed with patient request and a valid prescription for the correct quantity. For the 12 month supply, refills are allowed only when 90% of the medication has been used.

Exceptions to the 90 day supply policy for generic medications are as follows:

- 30 day supply only is allowed for all opiate medications except tramadol

Exceptions to the 30 and 90 days supply policy for brand and generic medications are as follows:

- Up to a year supply of self-administered hormonal contraceptives (i.e. up to 364 pills, 12 vaginal rings, and 36 patches) is allowed with patient request and a valid prescription for the correct quantity. For the 12 month supply, refills are allowed only when 90% of the medication has been used.

Formulary Restrictions (DUR edits)

Standard formulary restrictions applicable to SFHP formulary are medication quantity and age limitations. All formulary restrictions are based on FDA approved indications, standards of practice and safety and abuse potential considerations.

Step Therapy (ST)

Step Therapy (ST) medications will process at point of sale at the pharmacy if there are paid prescription claims for preferred medications. If there are no paid prescription claims, a prior authorization (PA) request must be submitted for consideration of coverage. Visit our website at <http://www.sfhp.org/providers/formulary/sfhp-formulary/> for detailed information on all active [step therapy rules](#).

Therapeutic Interchange Policy

Per American College of Clinical Pharmacy (ACCP), therapeutic interchange is defined as the dispensing of a drug that is therapeutically equivalent to but chemically different from the drug originally prescribed by a physician or other authorized prescriber. SFHP follows ACCP's definition of therapeutic interchange and will only employ therapeutic interchange with prescriber's approval. Criteria for consideration in therapeutic interchange include availability of agents within a therapeutic class, therapeutic equivalence, safety data, and costs.

Diabetic Supplies

The following diabetic supplies are covered:

*Here for you*

- Glucometers: ACCU-CHEK Nano SmartView, ACCU-CHEK Aviva Plus, Accu-Chek Designer Care Kit, 1 glucometer per 365 days
- Test strips: ACCU-CHEK SmartView (for Nano) and ACCU-CHEK Aviva Plus test strips with the following quantity limits:
 - 400 per 100 days for all members
 - 800 per 100 days for members with gestational diabetes
- Lancets: ACCU-CHEK FastClix, Multiclix, SoftClix lancets, 100 day supply

Respiratory Supplies

The following respiratory supplies are covered as a pharmacy benefit for a quantity of 2 per 365 days:

- Inhalers and inhaler assist devices
- Nebulizers
- Peak flow meters

Formulary Document Details

The SFHP formulary document is listed by drug class and the following information: drug name, dosage form, drug tier, quantity limit and prior authorization or step therapy requirements. Brand products are listed in all uppercase letters and generic products are listed in all lowercase letters. Tier 1 drugs are formulary and will pay at the point of sale, if quantity limits and age limitations are met (see “Formulary Restrictions” above). Tier 2 drugs may require a Prior Authorization (see “Request for Non-Preferred Medications” above) or Step Therapy (see “Step Therapy (ST)” above).

**Some medications may be listed as both Tier 1 and Tier 2 due to a particular strength being formulary and another strength of the same medication requiring a prior authorization.
